Government securities have been further advanced in price, chiefly by the demand from speculative buyers, and the anticipation of a further large purchasing call for the Five-Twenty bonds, from the Treasury Department. It was announced early on Monday that Secretary Boutwell will buy in some ten millions of 5-20 bonds during the current month, two millions for the sinking fund, and eight millions extra, to be held in reserve, and to await the action of Congress. The bonds will be bought in as follows: Two millions each on the 5th, 11th, 18th, and 25th. One million each on the 12th and 26th, the latter two for the sinking fund purposes. The offerings of bonds in the open market have been quite limited at even the ruling high prices. The last Public Debt statement for August 1, shows an additional net liquidation of $7,435,744, excluding as Treasury obligations the U. S. currency six per cent. bonds, issued in aid of the several Pacific R. R. enterprises. The total purchases of bonds during the month of July amounted to $17,912,500, of which only $2,000,000 has been on account of the sinking fund, the balance being bought subject to the ultimate sanction of Congress. The coin in the Treasury has diminished $7,071,101, and the currency on hand has declined $13,716,164, mainly owing to the large purchases of bonds. The Treasury, however, held on August 1, $23,381,654 of currency. The two millions of Five-Twenties bought in on Wednesday at the Sub-Treasury were at from 121 05@121 71. The aggregate offerings to the office on that day were over four millions.

U. S. sixes of 1881 closed here on Wednesday at 124½@125; U. S. Five-twenties of 1862, ex-coupon, 125⅛@125¼; U.S. Five-twenties of 1864 at 123⅞@123½; U. S. Five-twenties of 1865 at 124@124½; U. S. Five-twenties of 1865, consolidated, 122¾@122⅞; U. S. Five-twenties of 1867, 122⅜@123; U. S. Five-twenties of 1868, 122⅞@122¾; U. S. Ten-forties at 115⅞@116⅛; U. S. Six per cent. currency bonds, 111⅛@111⅜.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 21.	July 28.	Aug. 4.
Consols	93⅛	93⅛	93
U.S. 5-20's of 1862	83⅛	....	83½
Erie	19	18¾	19¾
Ill. Central	94½	93¾	94½

Railway and miscellaneous stocks have been quite freely dealt in, since our last, but prices have been unusually variable. The death of Mr. Keep, led to rather extensive speculative sales of North Western shares, but the market rallied promptly and sharply, acquiring even more notable buoyancy than had paeviously prevailed. The latest dealings in Railway property showed a weaker market.

There has been a rather more generally active trade in domestic produce, and prices have been quoted stronger, in several instances, particularly in the line of Flour, Wheat, Cotton, Pork, and Lard. Middling upland cotton closed rather more buoyantly on Wednesday at 33¾ cts. per lb. The stock of cotton now here is estimated at about 25,000 bales. The receipts at the port this week, have averaged about 350 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 2,301,000 bales, against 2,333,000 bales same time in 1867–'8; exports, same time 1,428,500 bales, against 1,661,000 bales same time in 1867–'8; stock on hand at latest dates, 44,500 bales, against 75,000 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 15,646 pkgs., against 14,145 pkgs., same time last year. From Boston, 5,943 pkgs., against 6,385 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been in market demand, at from 9@16c., per lb.; week's receipts, 7,428. Milch cows, dull at from $40@$110 each, receipts, 83. Veal calves in fair request at from 6@11c. per lb.; receipts, 2,983. Sheep and lambs in demand at from 4@7c., and 8@10c. per lb.,; receipts, 29,906. Swine quiet at from 9¾@10½c. per lb.; receipts, 19,686.

Foreign goods have been rather more freely dealt in and quoted stronger as to price.

Freights have been more active and quoted firmer. For Liverpool we quote flour at 2s. by sail, and 2s. 4½d.@2s. 6d. by steamer, per bbl.; grain at 7¼@7½d. by sail, and 8½@8¾d. by steamer, per bushel; cotton at $\frac{5}{32}$@$\frac{3}{16}$d. by sail, and ¼d. by steamer, per lb.; and heavy goods 20s. @35s. by sail, and 25s.@40s. by steamer, per ton. Total number of vessels in port on Wednesday, 462.

The New York exports, exclusive of specie, for the week ending Aug. 3, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$2,505,994	$3,934,358
Prev. reported	96,573,586	104,956,115
Since January 1	$99,079,580	$108,890,473

The imports for the week ending July 31, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$2,185,819	$2,649,371
Gen. merchandise	3,509,347	3,158,141
Total for the week	$5,695,166	$5,807,512
Previously reported	139,478,368	178,591,639
Since January 1	$145,173,534	$184,399,151

The balance in the Sub-Treasury on Wednesday was $94,640,032 61.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

R., 19@20; George's Creek Coal, 68@72½; Santa Clara, 1.50@2.00; Atlantic Coal, 2.90@3.00.

☞ The earnings of the Great Western Railway of Canada, for May, 1869, were $316,327 66, and the working expenses, including renewals, $184,810 60—leaving net, $131,517 06. In May, 1868, the earnings were $306,318 47, the expenses, $179,989 78, and the net earnings, $126,328 69 showing an increase in earnings of $10,019 19, in expenses, $4,820 82, and in net earnings, $5,188 37. After deduction of loss by exchange, proportion of interest charge, &c., the *net profit for the four months* to 30th May, is $114,597, against $90,740, obtained in the corresponding period of last year.

☞ Proposals will be received at the office of the Chief Engineer of the Cumberland Valley Railroad, in Hagerstown, Md., until Wednesday, the 11th of August for the construction of about eight miles of road from Hagerstown to the Potomac River.

☞ A mortgage of the Philadelphia and Erie Railroad for $20,000,000 has just been entered in the Recorder's office at Erie, Pa. The object of the mortgage is to raise money for building a double track from Erie to Philadelphia.

☞ Track laying on the Memphis and Little Rock Railroad is progressing rapidly west of Forest City.

☞ The Savannah, Skidaway and Seaboard Railroad was formally opened on the 22d ult.

Port Huron and Chicago Railroad Line.

A NEW ROUTE BETWEEN NEW YORK AND CHICAGO.

The work on this line is being pushed in good earnest. Eastward from Battle Creek, and westward from Port Huron, the hammers of the track laying parties are resounding incessantly, and the iron to keep them supplied is constantly going forward—more than 2,500 tons having been shipped during the past month. Engines and cars are already on the line, and others are now being manufactured. At the present rate of progress, the road will be complete from Port Huron to Flint, (65 miles,) and in operation, in season for the Fall business this year, and through to Battle Creek before January 1st.

Westward of this point the road is ready for the superstructure, and track laying will follow in due course.

This line comprises four roads, viz: the Port Huron and Lake Michigan Railroad, the Peninsular Railway of Michigan, and the Peninsular Railroads of Indiana and Illinois, running from Chicago to Port Huron, and there connecting with both the Grand Trunk and Great Western Railways of Canada, for Buffalo or Suspension Bridge; thence over the New York Central or Erie road, making the shortest of the through routes between New York and Chicago.

In addition to its through travel, the local business of the line must be very large. The western part of the route is through an agricultural district as rich as any in the West, and it passes many large and prosperous towns. The eastern portion will transport the lime, salt and gypsum from the Grand River and Saginaw, and it brings within reach of a market the vast forests of pine and hard wood timber which exist in this part of Central and Northeastern Michigan.

Better than all, the line is in the hands of shrewd and practical men, who know how to push through such an enterprise, and who, knowing how, are determined to do it.

☞ The entire track of the Raritan and Delaware Bay Railroad, lying between Raritan Bay and the Camden and Atlantic track, and all the lands, permanent way, rails, stations, wharves, rolling stock and fixtures, are to be sold on the fourteenth of September next. It is said that parties are ready to purchase, if sold at a reasonable figure, who will put it in running order and commence operating it again.

☞ The directors of the Portland and Ogdensburg Railroad have voted to locate the road from Portland as far as the foot of Sebago Lake, crossing the Presumpscot River at or near Cumberland Mills, thence up the valley on the east side of the river to a point between the falls at Gambo and Leavitt's Falls, thence westerly to the lake. The engineer was directed to receive proposals for its immediate construction.

BANKS AND FINANCE. The third edition of the "Merchants' and Bankers' Almanac for 1869," has been issued at No. 41 Pine street, containing lists of six thousand bankers, three hundred Savings Banks, 850 Insurance Companies throughout the U. S., Prices of Staple Commodities for forty years, daily price of Gold, and fluctuations of Stocks and Bonds, Price two dollars.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of July, were :

ENTERED FOR CONSUMPTION.

☞ The Plymouth branch of the Philadelphia, Germantown and Norristown Railroad, has been put into operation, and passenger trains are run between Conshohocken and Corson's lime kilns, on the Plymouth and Horsham Turnpike. A further extension is now in progress, by which a junction will be formed with the North Pennsylvania Railroad, about a half mile north of Edge ill Station.

Imports of General Merchandise.

Below we give a comparative statement of the imports of a few leading articles of general merchandise at New York from foreign ports for the quarter ending June 30:

	1868.	1869.
Books	$242.175	$368,589
Buttons	324,889	245,144
Cheese	60,464	67,814
Chinaware.....	96,199	177,872
Cigars	152,928	221,789
Coal	48 571	79,240
Coffee	4,825,547	4,839,180
Cotton	21,971	100,238
Earthenware.....	495,552	743,257
Furs	974,120	907,827
Glass plate	255,485	311,892
India rubber.....	597,417	826,087
Indigo	361,958	452,691
Leather & dres'd skins	1,002,143	1,641,031
Undressed do.....	1,522.785	2,978,924
Liquors—Brandy	114,762	252,123
Metal—Copper ore...	4,142	3,038
Iron, bar	622,068	764,536
Iron, pig	158,804	303,379
Iron, R. R. bars....	1,148,155	2,169.576
Iron, sheet	30.126	60,433
Lead	645,329	893,406

Journal of Railroad Law.

RAILROAD COMPANY—DEATH OF PASSENGER.—WHEN RIGHT OF ACTION IS BARRED.

The case of Andrews Admr. *vs.* The Hartford and New Haven Railroad Company, [34 Conn. 37] was an action under the statute, which gives a right of action to the executor or administrator of a deceased person killed by the negligence of a railroad company, for the benefit of the wife and children or heirs of the deceased; such suit to be brought within one year after the cause of action arises. The declaration alleged that the plaintiff was the administrator of George Andrews deceased, and that he was injured while a passenger on the cars of the defendants, by reason of the negligence of the defendants, on the 29th day of December, 1864, and soon after died in consequence thereof. The suit was brought June 14th, 1866, to the Superior Court for New Haven County.

The defendants pleaded in the bar that the suit was not brought within one year after the cause of action arose. The plaintiff replied that he was appointed administrator of the deceased as alleged in his declaration, and that the suit was brought within one year thereafter. To this replication the defendants demurred.

The following is the opinion by

BUTLER, J.—The only material question in this case is whether the action was barred by any statute of limitation.

It is founded on section 544 of the act relating to communities and corporations. The section provides in substance that where a *life* is *lost* by reason of the negligence of a railroad company, such company shall be liable to pay damages not exceeding five thousand nor less than one thousand dollars, to the use of the executor or administrator, in an action on that statute, for the benefit of the husband, or widow, or children, or heirs, as the case may be.

It is immaterial, as we have before had occasion to observe, whether a new action is thus given in substitution of the right of the administrator to sue for the injuries which occasioned the death and on behalf of the estate generally, or whether it is a limitation and regulation of the then existing right of action in favor of an executor or administrator for such injuries. The effect of the regulation, if that is its character, is not only to fix the amount of damages and limit them to the use of the relatives, but to take away by implication the right of the executor or administrator to sue for the benefit of the estate generally. Such was clearly the intention of the General Assembly. No suit can now be brought by an dministrator or executor, founded on the injuries which occasioned the death alone; and a declaration averring the negligence and injury without averring the *consequent death*, would be bad on demurrer or motion in arrest. We are all satisfied therefore, that as death is an essential precedent to the existence of any right of action the statute of limitations cannot begin to run until that event has happened.

The cause of action here would have been perfect on the happening of the death, and under section 546 would have been barred at the end of one year from the happening of that event, if an ordinary case, or there had been an executor. But it is a rule of law recognized by the Court in Hobard *vs.* Connecticut Turnpike Co.; 15, Conn. 145, that a cause of action accruing to an administrator after the death of the intestate, is not complete and does not arise and exist so that the statute of limitations can begin to run upon it, until an administrator is appointed who can bring suit. And the legislature seem to have had that rule in view when they enacted the statute; for they did not say that the action should be barred unless commenced within one year from the death, or the happening of the events, for which it is given, but unless "commenced within year after the *cause of action* shall have *arisen*." Inasmuch then as under a well settled rule no cause of action can *arise* and *exist* in favor of an administrator until he comes in existance as such, and this suit was brought within one year after the plaintiff received his appointment, it was not barred, and the court below erred in sustaining the demurrer. The Superior Court is therefore advised that there is manifest error in that respect in the record and that judgment should be reversed.

In this opinion the other judges concurred.

☞ The Lafayette, Bloomington and Munice Railroad has been organized by the election of Moses E. Fowler, John Purdue, Martin L. Pierce, Owen Ball, W. S. Lingle, James Telford, W. J. Templeton, John Green, Joseph Green, Joseph S. Ruckles and C. E. Shipley, Directors. The officers are Adams Earl, President; H. W. Chase, Secretary, and H. T. Ample, Treasurer.

☞ The Scranton *Republican* says that the Lehigh Valley Railroad is expected to be completed from Tunkhannock to Towanda during August next.

SEVEN PER CENT. GOLD
FIRST MORTGAGE CONVERTIBLE BONDS
OF THE
Danville, Urbana, Bloomington and Pekin Railroad Company
OF ILLINOIS,

Principal and Interest payable in Gold at the Farmers' Loan and Trust Coupany, New York. Coupons payable April and October.

FREE OF GOVERNMENT TAX.

The Danville, Urbana, Bloomington and Pekin Railroad, upon which property these bonds are issued, is now in process of construction, its termini being the cities of Danville and Pekin, both in Illinois. The length of the road is 117 5 100 miles; its capital stock $3,060,000. The grading, bridging, and all the work necessary to perfect a complete roadway has been already done, and the whole line is ready for the rails. These are rapidly being put down, and a portion of the road is now in successful operation. It is expected that the whole road will be completed early the coming autumn.

These bonds are convertible into stock at par, at the option of the holder, and may be registered in the name of the owner, at any time if desired. The total amount of bonds is limited to $2,000,000. The security offered is, as we shall show, the very best. Already sums, nearly equal to the total amount of bonds to be issued, have been expended on the road. The bonds, averaging less than $18,000 per mile, are secured by a first mortgage on the whole road, and entire property of the company. The road runs East and West on the line of the principal and oldest emigrant-road in the State, passing through several populous towns and cities, and the richest agricultural district in Illinois—in a word, through the garden of the Garden State. Its local business alone will suffice to make it a first-class paying road; while, with its connections with many principal lines, its through trade must be such as to make it one of the most profitable in the country.

The road will be consolidated with the line from Danville to Indianapolis, making a line of 210 miles. At Indianapolis, connection will be made with all the through lines to New York and Baltimore; at Danville with the Toledo, Wabash and Western. In fact the road will form a main link in the direct communication of the principal Atlantic cities with southern Illinois, with Keokuk and Burlington, Iowa, and thence with Omaha and the Pacific.

It will complete a direct line from Boston to Peoria, Keokuk, Burlington, Omaha and the far West, via Albany, Buffalo, Cleveland, and the Bellefontaine Railroad to Indianapolis and Danville, or via Toledo and Wabash and Western Road.

It will form the most direct line from New York to the same points West via the New York Central, Lake Shore and Bellefontaine Roads, to Indianapolis and Danville; or via the Erie, Atlantic and Great Western, to Dayton, Ohio; and via Indiana Central, to Indianapolis, Danville, Bloomington, &c.; as well as from Philadelphia, via the Penn. Central to Harrisburg, Pittsburg, Columbus, Dayton and Indianapolis.

It will form an important link in the communication of Baltimore and the South with the Great West, the North West and the Pacific, via Baltimore and Ohio Railroad, to Parkersburgh, Cincinnati, Indianapolis, Danville and Peoria.

Thus with the combined advantages of a certainty of a remunerative local business and a through business, which, as a connecting link to so many diverging and principal lines, it must necessarily have, it is reasonable to presume that the earnings of this road must exceed, in proportion to its length, those of any other railroad in Illinois. The following table shows the earnings of some of the principal railroads in Illinois:

Railroads.	Gross Earnings.	Miles road.	Earnings per mile.
Chicago, Alton and St. Louis	$3,892,861	280	$13,900
Chicago and Northwestern	11,712,248	1,152	11,670
Chicago, Rock Island and Pacific	4,105,103	410	10,012
Toledo, Wabash and Western	3,783,820	521	7,261
Illinois Central	7,160,991	708	10,115

It is safe to estimate the receipts of the Danville, Urbana, Bloomington and Pekin R. R. for the first year, at $12,000 per mile, or on 117.05 miles, $1,404,600.

FIRST YEAR.

Receipts as estimated		$1,404,600
Estimated expenses as follows:		
Operating expenses, 50 per cent	$702,300	
Interest on $2,000,000 gold bonds 7 per ct.	140,000	
Premium, 40 per cent. on $140,000 gold	56,000	
Set aside as Sinking Fund	10,000	
		908,300
Leaving a net profit over interest and expenses		$496,300

or over 6 per cent. for dividends on the capital stock the first year of its operation. Without doubt, a progressive increase thereafter. each year, would be the result. The geographical location of the road is alone sufficient to convince all of its great value and usefulness.

The stock of the Rock Island and the Illinois Central, the Chicago and Alton, Burlington and Quincy Roads, are all selling at from above par to nearly 200, while none of them are more favorably located, and the competition of them all is much greater than this can have. There is no reason why the stock of this road shall not sell as high as either of the above. Hence the privilege of converting these bonds into stock of this Company at par at any time desired greatly increases their value.

After having personally and thoroughly examined this road, we accepted the agency for negotiating its bonds. We now offer them at 95 and accrued interest in currency. With the utmost confidence we recommend them as a reliable and safe security and profitable investment.

At the present price they pay 10 per cent. currency,—over 45 per cent. more than the same amount invested in Five-twenty Bonds,—besides the advantage of being free from tax, and the prospect of a speedy advance in the stock of the road on completion, into which they may be converted.

Government Bonds and Gold received at their market value in exchange without commission. Bonds forwarded by Express free of charge.

Full particulars furnished by the undersigned, Financial Agents of the Company.

TURNER BROTHERS, Bankers,
14 Nassau Street, New York.

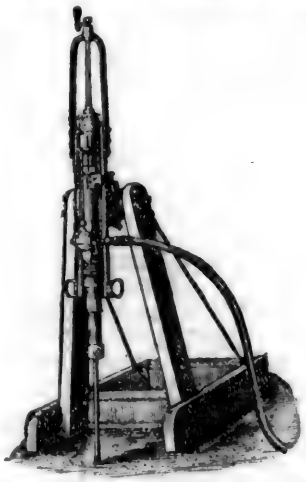
New York, July 22, 1869.

☞ Work has been commenced on the new passenger depot for the Susquehanna Railroad Company at Binghamton. It is to be a brick structure, French style of architecture, and covered with slate.

Pennsylvania Tonnage Tax.

The Supreme Court of Pennsylvania, sitting at Harrisburg, has just decided the following cases; Commonwealth *vs.* Philadelphia and Reading, Erie Railway, Lackawanna and Bloomsburg, Monongahela Navigation Company, and the Cleveland and Pittsburg Railroad companies—five cases in all. Error to the Court of Common Pleas of Dauphin county. The question involved herein is stated by the Court, as follows: "The question before us arises under the act of the Legislature of Pennsylvania, approved August 25, 1864, entitled "An act to provide additional revenue for the use of the commonwealth," P. L. 1864, p. 988. It is solely a revenue law, has no other purpose, and is in substance, this: That the financial officers of all railroad, steamboat, canal, slack-water navigation and transportation companies (excepting turnpike, plankroad and bridge companies), upon whose works freights are transported by themselves or others, for freights or tolls, shall make quarterly returns to the Auditor-General, stating fully and particularly the number of tons of freight carried over or upon their works, and shall pay to the State Treasurer, for the use of the commonwealth, a tax on each 2,000 pounds of freight so carried at rates designated in the act, and founded on a classification of the freights, so as to distinguish between the heavy and bulky and the lighter kinds, and thus to graduate the tax equitably in order to meet the greater expense of transportation. This act also confines the tax upon freight carried over continuous lines by several companies to a single one, to be designated by the Auditor General, so as not to charge the tax twice on freights carried over the same line of improvements. The corporations, defendants in the foregoing cases, dispute the validity of this tax, alleging that it is a regulation of commerce or an impost act beyond the power of the State."

The decision of the Court is embraced in the annexed extract:



The act we are now considering is in no sense a regulation of commerce or an attempt to tax interstate commerce. It is the lawful exercise of State power over creations and uses brought into existence by her own authority; a proper tax upon the use of the franchises granted by her for the benefit of all alike who employ them, and in consideration of valuable privileges and facilities furnished to them by her authority and permission. The subject is wholly internal, and the imposition equal in its operation and equitable in its distribution; while to exempt freight passing out or coming into the State from its operations would be unjust discrimination against our own citizens and in favor of the citizens of other States. The case is not rested on the debatable ground of State power to regulate interstate commerce in the absence of Congressional legislation on the same subject, but on the admitted right of a State to execute its power of eminent domain in the construction of works for the transportation of freight and passengers, and to legislate and tax their use by those who choose to employ them as undoubted subjects of her domestic affairs and of that internal commerce which she can rightfully control so long as she do not fraudulently exercise her power to the injury of the citizens of other States.

For these reasons the judgments in all the cases are reversed and writs of *venire facias de novo* awarded in the case.

BURLEIGH'S PATENT
Pneumatic Rock Drill

Is now in successful working operation in New York, Chicago, Jersey City; also at the Hoosac Tunnel (Mass.,) Lake Superior, Colorado and Nova Scotia Mines, Union Pacific and Boston and Hartford Railroads; also in deepening the beds of the Illinois and Michigan Canals, and Des Moines Rapids, and numerous other localities.

The Burleigh Drill is adapted to all kinds of rock cutting in open cut Mining, Tunnels, Sewers, Quarries, &c., drilling holes from 1¼ to 5½ inches in diameter. The Drills are worked either by steam or compressed air. For all kinds of work under ground compressed air is used, serving as a perfect ventilator, as it is exhausted from the Drill. At the Hoosac Tunnel the compressed air is carried upwards of a mile and a quarter, and at that distance works eight Drills at the same time. Information in regard to the ownership of the different State rights. Prices of Drills, Air Compressors, &c., can be obtained at the office of

A SEVEN PER CENT. GOLD LOAN.
$6,500,000.

The Kansas Pacific Railway now in successful operation from Kansas City to Sheridan, proposes to build an extension to Denver, Colorado. The Government has granted Three Millions of Acres of the finest lands in Kansas and Colorado, which are mortgaged for the security of a loan of

$6,500,000.

This loan is secured in the most effectual manner. It represents a road in profitable operation, and will open the trade of the Rocky Mountain country and connect it with the great markets of the East. It is considered to be one of the best loans in the market.

EVEN BETTER IN SOME RESPECTS THAN GOVERNMENT SECURITIES.

The loan has thirty years to run, principal and interest payable in gold, semi-annually in either Frankfort, London, or New York, and will be free from Government taxation. The bonds for the present are sold in currency at 96, with accrued interest.

Circulars, maps, and pamphlets sent on application.

TO RAILROAD CONTRACTORS.

Memphis, El Paso and Pacific RAILROAD COMPANY.

Office of the Chief Engineer,
Memphis, El Paso and Pacific Railroad Company,
66 Exchange Place,
NEW YORK, June 8th, 1869.

SEALED PROPOSALS will be received at the above Office, until **September 1st, 1869,** when Contracts will be awarded, for the GRUBBING and CLEARING, GRADING, MASONRY, BRIDGING, BALLASTING, CROSS TIES and TRACKLAYING of the following portions of said Railroad:

FIRST—The last Fifteen miles on the First Division of One Hundred and Fifty Miles, between Jefferson and Paris, Texas, commencing Eight miles east and extending Seven miles west of the town of Clarksville, in Red River County.

SECOND—One Hundred and Fifty miles, embracing the Second Division, commencing at Paris and extending westward, to Palo Pinto County.

Specifications, Profiles, Maps and Plans can be examined after the FIFTEENTH OF AUGUST, 1869, at the ENGINEER'S OFFICE, in NEW YORK or JEFFERSON.

Proposals must conform to the specification which will be furnished upon application at either of the above places after August 1st, 1869.

Evidence of ability to complete contracts will be required and a percentage retained of estimates until each section of five miles is finished.

Work upon the First Division must be completed by March 1st, 1870.

The Second Division must be finished by October 1st, 1870.

Every facility will be furnished those wishing to inspect the ground on the line of the road, by application in person at the Engineer's Office in Jefferson.

J. M. DANIEL, Engineer in Chief,
Memphis, El Paso and Pacific R. R. Comp'y.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

New York and Oswego Midland Railroad.

A CHOICE SECURITY.

Messrs. GEORGE OPDYKE & Co., No. 25 Nassau St., New York, have for sale FIRST MORTGAGE BONDS of the "*New York and Oswego Midland Railroad Company*"—Coupon and Registered—Principal and Interest payable in GOLD. Interest SEVEN per cent. GOLD per annum, *Free of Government Tax*, payable in New York January and July.

The road upon which these securities are based is one of first-class importance. It spans the State of New York from its metropolis to its northern borders. No public work of greater magnitude or of fairer promise for utility and profit has ever been undertaken in this State.

Its northern terminus is at the City of Oswego, on Lake Ontario. From this point it traverses, in the direction of New York, the rich and populous counties of Oswego, Oneida, Madison, Cayuga, Onondaga, Cortland, Chenango, Otsego, Delaware, Sullivan, Ulster, and Orange, where it strikes the borders of New Jersey, whence it continues under another name and a separate charter obtained from that State, to the City of New York. The last named division is now in course of construction. The entire length of the road is upward of 400 miles.

The road is admirably located for securing a large and profitable business. The northern section of New Jersey, through which it passes, is one of the most healthful and picturesque regions in the vicinity of New York. It only needs the additional attraction of the railroad facilities which this line will afford to transform it into a wealthy and populous suburb of the metropolis; thus securing to that division of the road a large and constantly increasing local business.

The other and main division traverses the entire length of the great midland counties of New York, which have been hitherto almost destitute of railroad facilities. These counties are as fertile and productive as any in the State; and as this road will furnish them their much needed facilities for transportation and travel, it cannot fail to command, throughout its entire length, a large and remunerative local business.

Its advantages for through business, both Northern and Western, are also unsurpassed. It shortens the railroad connections of the city of New York with Oswego and Canada forty-five miles; and, by means of a branch to Auburn, where it connects with the New York Central, it shortens that connection with Buffalo and the West seventy miles. These are important advantages. Taken in connection with its thorough construction, its easy grades, and its freedom from sharp curves, it cannot fail to compete successfully with any and all other roads for through business. Possessing such superior advantages for commanding both local and through business, and being one of the trunk lines of road starting from the great commercial center of the Union, there would seem to be no more room to doubt that the road will prove to be one of the most remunerative in the country.

Its construction has been undertaken under financial auspices equally favorable. The citizens of the Midland Counties, feeling the urgent need of railroad facilities, have made subscriptions to its capital stock to the amount of six millions of dollars. The larger share of these subscriptions have been made by towns and cities in their corporate capacity, and for which they paid in town and city bonds bearing 7 per cent. interest. These bonds being made by law exempt from local and municipal taxation, when held in any county through which the road passes, the company have found ready sale for them at par and interest whenever they had occasion to use the proceeds, thus rendering the subscriptions for which they were given in payment, equivalent to cash. The Company, therefore, commenced its undertaking with a paid up capital of $6,000 000, which, it is believed, *is a larger capital than any other railroad enterprise in this country has ever been started with.*

By express provision of law the towns and cities which have thus subscribed for and now hold a majority of the capital stock of the Company, can never dispose of it, whatever the market price may be, without the consent of a majority of the taxpayers in the respective towns and cities. This virtually may be deemed a perpetual prohibition of sale, whereby the control of the road will remain forever with the farmers and business men residing on its line, who, of all others, are the parties most interested in its success, and thus save it from the hazards of being made a foot-ball of stock operators and speculators.

To provide the balance of the means that may be found requisite to complete and equip the road, the Company has adopted the usual method of issuing bonds secured by a first mortgage on its property. That mortgage has been executed. It conveys to A. A. Low, Geo. Opdyke, and Delos De Wolf, in trust, to be held as security for the bondholders, the entire road and its branches from Oswego to the State line of New Jersey, together with its equipment, franchise, and all other property of the Company appertaining thereto. *It also provides that the issue of bonds shall be strictly limited to* $20,000 *per mile of road actually built and in running order.*

The Company is prosecuting its work with great energy, and doing it in the most substantial manner. It expects to have one hundred and forty-seven miles of its road finished by the 1st October next, namely, that portion of its main line running from Oswego to Sidney Plains, the point of intersection with the Albany and Susquehanna Railroad, together with a branch to New Berlin. Nearly the whole cost of this portion has been defrayed by the stock subscriptions raised along this part of the line. The grading, masonry, and

bridging of that portion of the line is already completed, and not less than sixty miles of track laid. The work is also making good progress on other divisions of the road. It is the expectation of the Company, if not retarded by unforeseen obstacles, to have the entire road completed within the ensuing calendar year.

In offering these securities to the public it is due to the Company to say, that in the preparation of their bonds and the mortgage under which they are issued, they have cheerfully adopted every suggestion that we have deemed essential to render them the most perfect and attractive railroad security on the market. The mortgage provides that in case of default, for a period of four months, in the payment of interest, the bonds shall become due; and it empowers the trustees, in that event to take possession of the road and all other property covered in the mortgage, and to use or sell the same for the benefit of the bondholders. This we deem a most important provision, as it avoids all the delays and dangers of litigation in case of default.

The bonds are issued with coupons; but they provide for registration and reconversion into coupon bonds at the option of the holders. Or, if any holder so elect, he may, by surrendering the coupons, convert them into permanent registered bonds.

The bonds are payable in twenty-five years from the 1st of July last. They are payable in gold coin of the United States. They bear gold interest at the rate of 7 per cent. per annum, payable in New York 1st January and 1st July, free of Government tax.

In view of the $6,000,000 paid up capital of the corporation issuing these bonds; the importance of the road and its admirable location for commanding profitable local and through business; its proximity to the city of New York; its wise protection from the control of stock operators and speculators; the good judgment and energy displayed by those charged with its projection and construction; the valuable provisions contained in the mortgage; the right to convert the bonds from coupon into registered, and to reconvert them; the *sound currency* in which they are payable, and the high rate of interest they bear—in view of all these assuring facts, we feel amply warranted in commending these bonds as one of the safest and most inviting railroad securities ever offered to the public.

We are authorized for the present to sell them at par and accrued interest in currency. But the Company reserves to itself the right to enhance the price at any time it may elect.

For sale by

GEORGE OPDYKE & CO.,
No. 25 Nassau Street.

☞ The stockholders of the Portland, Saco and Portsmouth railroad have accepted the proposal made by the Eastern and Boston and Maine Railroad corporations to settle the demands made upon them, as a compromise of the existing difficulties. These roads agree to pay $180,000 in currency and $45,000 in gold, and the Portland, Saco and Portsmouth Railroad Company agree to execute an effectual release for all claims under the certain gold article in the contract of 1847. The annual dividends for July and all future dividends to be paid in gold.

Chicago, Burlington and Quincy Railroad.

The earnings of this road for the years ending April 30, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$1,482,506 92	$1,659,308 61

		3,448,130 74
Leaving balance to credit of income account April 30, 1869		$500,252 23

The gross earnings of the railroad for the year (including interest and exchange, $33,716 18) have been $6,846,525 36; and the operating expenses of all kinds, including taxes, both State and National, and rents of tracks, and cost of transfers, have been $3,668,622 14—leaving applicable to interest and dividends during the year $3,177,903 22. The amount paid for dividends during the year has been $1,254,390; for interest on bonds, $369,547 44; stock dividend, $1,254,390; tax on dividends, $130,092 35; bonds purchased for sinking fund, $161,200—total, $3,169,619 79, leaving a balance of $8,283 43; to which add balance from previous year, $491,968 80, making the total amount to credit of income account at the close of the year $500,252 23, exclusive of amount paid into the sinking fund, which at this time is $1,036,761 13. If the amount paid into this fund be a proper credit to income account, that account stands at $1,537,013 36. The president in his report says:

The gross earnings of the road have been in excess of the previous year by $658,161 93, notwithstanding the somewhat diminished rates of fare and freight.

The aggregate tonnage of freight transported over the entire line of the road has been considerably larger than in any former year, and the increase over that of the last year has been 92,257 tons. The increase in number of cattle transported has been about 10,000 head, and of hogs about 9,000. While the general aggregate of increase in most of the items of traffic of lesser importance evinces the continual improvement and progress of the country along the lines of the railroad, the increase in the passenger traffic has been still more marked, amounting in revenues to the company to nearly $200,000 over that of the previous year, though at somewhat reduced rates of fare.

The operating expenses, as compared with the earnings, continue to be about the same as in former years, having been, exclusive of taxes, 49.76 per cent. as against 49.81, and inclusive of taxes, 53.58 per cent. as against 53.07 as compared with the previous years, showing careful economy of management, while at the same time the road-bed, track and equipment have had careful attention and been kept fully up to the standard of any former year. About forty-two miles of track have been relaid with new or re-roiled iron, and all the appointments of the road have been kept in good condition. The road-bed and track probably have never been as good as at the present time.

The second track between Chicago and Mendota is in progress: eighteen and a half miles have been laid the past year, and the track is going down upon about seven miles more, which is ready for the rail. This track is fully ballasted, and made as perfect as possible before its use for the passage of trains. Inclusive of side-tracks, nearly half of this eighty five miles is now double track. This work should continue as rapidly as practicable, until that part of the road is laid with the double track the whole distance. It has long been overtasked, and much delay and difficulty occurs there from the numerous trains always passing over it.

There have been also about fifteen miles of new additional side-track laid. The work of ballasting has been pushed forward as fast as has been practicable, with a due regard to both economy and the business of the road, and it is hoped that this work may be completed during the present year.

It will be observed, by examining the statement hereto appended of the amount of business furnished by connecting roads, that while that business is of importance, yet the chief traffic of the road, both of freight and passenger, is local. It is fully five-sevenths of the whole business. Yet that from connecting roads is becoming every year more valuable. From the Hannibal and St. Joseph Road, the contributions to the business of your road were from freight $513,775 83; and from passengers $189,199 36; both amounting to $702,975 16. From the Burlington and Missouri Road we have received from freight $396,232 23; and from passengers $75,891 01. Of the business coming from the Hannibal and St. Joseph Road, the Cameron Branch contributed $266,870 52. Both these roads are destined to become much more valuable connections year by year; and with the progress of the country west of the Missouri, as well as with the very rapid development of the country along the lines of those roads, we can now hardly estimate properly their great value in the future. The freights, for instance, from points west of Quincy to Chicago, have nearly doubled in amount during the past year. From points west of Burlington, the freight transported to Chicago this year is 54,024 tons, against 39,812 in 1868. The increase in the passenger traffic from those sources is perhaps equal in proportion.

The bridge at Kansas City, which is the southwestern terminus of the Hannibal and St. Joseph Railroad, is now complete, and the running of regular trains over it is about commencing. This opens an unbroken connection for trains from Chicago to all the Kansas roads. The Kansas Pacific runs directly west from Kansas City, four hundred miles, and is soon to be opened to Colo-

rado, at Denver. The Missouri River, Fort Scott and Gulf Railroad is nearly done to Fort Scott, and will soon be open to the southern border of the State. The Burlington and Missouri to Omaha is fast approaching completion, opening a route as eligible and direct as any other between Chicago and the Pacific Road. Both this road and the easy and unbroken connection with the Kansas roads, promise large increase to the traffic of this company. It may be added, and will, perhaps, remove any lingering doubt in the mind of any stockholder as to the safety and propriety of the aid extended to the Burlington and Missouri River Company, that as that road approaches completion its stock has risen to par in the market, and with a prospect therefore in the future, of a return to the company of full value for the full amount of the aid rendered, in addition to the increased volume of business which it will furnish to us, and which was the real object of the aid given.

When the road from Galesburg to Quincy came into the hands of this Company several years ago, it was in an unfinished state. No part of it had ever been ballasted. It was unfenced, and almost without proper station houses. The defects have been, to a great degree, remedied, and that portion of the property of the Company will in its condition and appointments compare favorably with other portions of the road.

With the progress of the country and of business, many of the appointments of the Road, adequate when they were planned, had and have become totally inadequate to the present state of things. This has been especially the case with station grounds, the Machine and other shops for the repair of the Engines, and the repair and construction of the Rolling Stock of the Company, and, in a less important degree, with very many of the other appurtenances of the Road.

The construction of Branch Roads, and the increased business upon the main lines, have made necessary large additions to Machinery and Rolling Stock, not even now adequate, to the business of the country.

There have been put upon the Road thirteen new Locomotives, and four hundred and twenty house and platform cars, and twelve way cars, and additions to machinery, at the cost of $644,811-.72.

It has been necessary, from time to time, to enlarge the grounds at many of the Stations, and at some of them at large expense, and this past year at a cost of $65,800; to lay additional track at Chicago, costing $22,746.88; to erect new roundhouses at Aurora, Galesburg and Burlington, a new blacksmith shop at Aurora, stock-yards at Quincy and Burlington, and freight and passenger-houses between Galesburg and Quincy and on on the Lewiston Branch, at a cost in the aggregate, of $337,856.57; and other works at various points. The aggregate cost of these various works during the year have been $1,237,705.60; a very large amount it is certain, and yet it is difficult to see any item of this expense which it would have been good economy to have omitted.

By the terms of the agreement between this Company and the American Central Railway Company, which led to the construction of the road from Galva to New Boston, and by which this Company becomes the lessee of that Road, this Company became bound to advance the necessary money to complete the road which might be required before the fund provided by the Company owning it should have been realized, or after it should have been exhausted. This advance, during the year, amounts to $285,875.80; all of which, however, is made secure in the value of the lease of that Road to this Company.

The cost of the extension of the Lewiston Branch to Rushville, will probably exceed somewhat the funds provided for its construction, though to a much smaller extent. That extension which is thirty miles, is the absolute property of this Company.

At Burlington, the lands under the bluffs is very limited, and to obtain depot grounds it has been necessary to fill a portion of the Mississippi, and really to make them. This was a work of time and considerable expense, and has been in progress about two years. Ample grounds for all present purposes have thus been obtained, and have been in use since the opening of the bridge. There have been expended upon this work and additional lands purchased there, the sum of $370,050.48, of which there has been expended in the past year $189,808.87. At that place, also, there have been expended for engine-house, and passenger and freight buildings, tracks, switches, &c., &c., the further sum of $57,023.85. All this expenditure is the necessary result of transferring the terminal business from the east side of the river to the City of Burlington, the real terminus of the Road in that direction.

At Quincy, the change has been from the West to the East side, and this company has been compelled to enlarge its grounds there, also, by reclaiming from the river. The cost of filling and thus adding largely to our grounds there, and constructing enlarged cattle yards, has been, for the past year $73,959 91. The enlarged traffic, both of passenger and freight, reaching us at that point from the Hannibal and St. Joseph road, in consequence of the construction of roads connecting with it in the West, both north and south, as well as west, has not only rendered these expenditures necessary in the past, but will require considerably greater ones in the near future, and especially to accommodate the passenger traffic.

The bridges have been completed at both Quincy and Burlington now some months, and in use. Both are of iron superstructure, built in the most substantial manner, and are models of neat and beautiful works of the kind. That at Quincy belongs to a Bridge Company, and was built without involving the finances of this company, but under such arrangements as guards its business against exorbitant and oppressive tolls.

By an agreement with the roads terminating at Quincy, such reasonable tolls as will enable the Bridge Stockholders to realize permanently 10 per cent. dividends only, can be levied upon the traffic passing over it, and no more; a burden not heavy in the present, and in the future with enlarged business will become less and less every year.

The bridge at Burlington has been built entirely from the funds of this company, and is its property and a part of its line, and traffic passing over it is subject to no tolls in any form. The cost of this structure, together with the approaches on both sides has been $1,227,044 81, of which, however, only $318,708 31 has been expended in the past year. The Board are very sensible that the aggregate of these expenditures in the past and previous years are very large, but they seemed to be requisite to enable the road to meet the exigencies of business and keep abreast with the progress of the country, though in the aggregate for two years past they have more than absorbed all the earnings of the road above the interest on the funded debt and the cash dividends, and other cash obligations of the company. They could not, however, well be omitted or postponed. Happily they are for the most part additions to the permanent and fixed estate of the company, and contributing much more than their cost to the value of its property.

It is not easy now to state the amounts which in the near future will be required for construction purposes; but certainly the whole amount necessary for the remainder of the double track between Chicago and Mendota, a passenger house at Quincy and at Galesburg, and a share in a joint passenger house with the Illinois Central and Michigan Central Companies at Chicago, and such enlarged power and equipment, and machine and other shops as the increasing business of the company may require.

It has been the policy of the company in the past, by arrangements familiar to all stockholders, to aid in the construction of such lateral roads as would both promote the interests of the company and contribute to increase the business of its road. The roads thus added the past year are the extension of the Lewiston Branch to Rushville, a distance of thirty miles, making that branch sixty miles long; and the road from Galva to New Boston, on the Mississippi, fifty miles. Both run into sections heretofore destitute of railway accommodations and very fertile and productive; and each of them will be valuable auxiliaries to the business of the main line of the road of the company. An arrangement of a similar nature has also been made during the year for the construction of the road from Burlington to Keokuk, to become, however, the absolute property of the company. Each of these roads, comparatively short as they are, and of not, perhaps, great value in itself, yet contributing, as it does, a business which passes a long distance over our main line, is of much value to our road. It is of still greater value to the country through which it is built, and which it contributes to enrich and develop.

Since the close of the fiscal year, arrangements of the same character have been made to aid in the construction of a road from Yates City or Elmwood, to Buda, on the main line of the road of this company; and also the Carthage and Burlington Railroad, being an extension of the Burlington Branch of our road south, through the fertile country on the east side of the Mississippi, a distance of thirty miles, and commanding, to a great extent, the business of that section over the main line for the whole distance from the point of junction. The first named road has the double advantage of bringing to our line a new business from the well cultivated and rich country through which it runs, and also of shortening the distance between all that section of country through which the Rushville Branch runs, and Chicago, from twenty-five to thirty miles.

This, as well as the Carthage road, will add largely to our business, though the Buda and Yates City road is doubtless the most important. It may also be remarked with regard to all these lateral roads that the Board have been influenced by the consideration that while they have been lending aid to these companies of local importance, in a manner not imposing heavy burdens upon the finances of this company, they have been satisfying the wishes of the people of rich sections of country, and rendering them willing and friendly contributors to our business; while otherwise they would become allies to other and rival enterprises, which, perhaps, might become prejudicial and hostile to our interests.

It will be seen by the Treasurer's Report that the expenditures for construction, including the amounts advanced for the completion of the road from Galva to New Boston and to Rushville, the double track and bridge, and other improvements above alluded to, have exceeded the surplus revenues applicable to them, by about $1,226 207 18, while there are other large expenditures which should be made as early as possible. The double track, as has been stated, should continue to go down between Mendota and Chicago. The enlargement of accommodations at Galesburg, where the business of the company has far outgrown those already there, and the erection, at that point, of a new passenger house, the purchase of lands and the erection, jointly with Michigan Central and Illinois Central Companies, of a passenger house at Chicago, the increase of power and equipment, and the enlargement of machine and other shops, are so indispensable that the Board has not deemed it best to await the earnings, to enable them to do so, before making the required improvements, but to provide for both the past and those most immediately necessary in the future at once. It scarcely needs to be said that, with another policy, these expenditures, in the past and in the future, might not have been necessary. But in a country like the West, it is impossible to remain stationary. If the companies owning and managing roads there do not meet the wants of the adjoining country and aid in its development, other alliances are sure to be found which end in rival roads, and damage to existing interests. It has, therefore, been the policy of this company, (and the Board are confirmed by its results in the past in their convic-

tions of its wisdom,) always, so far as has been practicable, to second, by aid and influence, the construction of roads which might accommodate the country and contribute to its business and obviate the necessity of rival projects. It is to this policy that the company owes much of its prosperity, while, also, it has contributed very greatly to the wealth and prosperity of all the region where this influence has been felt. While, however, the policy has been wise and has resulted in a very large and profitable business, destined to become still larger, and, we hope, more profitable as well, it brings with it the necessity of being prepared at all points, with the ability to do it, and, also, with the greatest possible facility and economy. Hence, all these additions to the property of the company in the past, and presently to be made. They are the necessary results of the vastly increased country made tributary to its business, both locally and otherwise; and the best and wisest course, in the judgment of the Board, is at once to make such necessary expenditures as will bring the capacity of the company fully up to all the demands, in the way of business, likely to be made upon it. To provide the requisite means for these purposes, they propose to distribute stock among the stockholders at its par value, to the extent of 20 per cent. of the capital stock of the company, as being at once the easiest, and to them, most agreeable mode of raising the money. With this, they believe there will be lacking nothing in the future requisite to enable the company not only to maintain its position and reputation, but to meet easily and conveniently all the demands which the increased business likely to come upon its lines may make of it.

In conclusion, we may remark that the year has been a prosperous one, and though it has called for large expenditures, as has been seen, and though these must continue for some time in the future, yet it is fully believed by all the managers of the road that they will all be much more than compensated for by the enlarged business to be transacted and the increased facilities afforded in doing it; and that with the basis of prosperity so broadly laid, and with tributary connections extending so widely and through sections of country of such extraordinary fertility and productiveness, they may still reasonably expect a continued and progressive prosperity in the future, fully equal in proportion to the capital invested to secure it to any which has been realized in the past.

The company have 135 locomotives, 49 passenger, 37 baggage, mail and express, 1 pay, 2,177 house, freight and stock (including 50 Blue Line,) 665 platform and coal, 61 drovers' and conductors', 40 gravel, 2 tool, 1 pile driving, 128 rubble, 143 hand and 2 wrecking cars.

Number of miles run by locomotives on passenger trains, 828,220; on freight trains, 1,437,892; on miscellaneous trains, 919,568—total, 3,185,680. Average cost per mile for repairs, 11.04; for oil and waste, 0.91; for fuel, 10.83—average cost per mile run, 22.78. Miles run to pint of oil, 16.14; to cord of wood, 63.84; to ton of coal, 42.16. Average cost per mile for engineers, firemen and wipers, 8.04. Wood is rated at $8 per cord; coal at $4 per ton.

The number of passengers carried during the year was 1,027,664; of these, 58,363 were through, and 969,301 way. Of the through passengers, 33,659 went west, and 24,704 east. Of the way passengers, 486,726 went west, and 482,575 east. Total carried west, 520,385; do., east, 507,279. Total mileage of passengers, 45,470,104; average do., 44.25. Earnings per passenger per mile, 3.649 cents.

The whole tonnage moved over the entire line during the year, exclusive of company freight and Illinois Central business, was 1,029,746; of which 470,291 tons were moved westward, and 559,455 tons eastward. Number of tons hauled one mile, 146,499,422. Average earnings per ton per mile, 3.01 cents. Company tonnage moved, 185,693; do., moved one mile, 11,810,863. Illinois Central tonnage moved, 367,817; do., moved one mile, 30,161,010.

GENERAL ACCOUNT, APRIL 30, 1869.

Capital stock		$13,825,025 00
Funded debt ($4,794 250) viz:		
Trust mortgage convertible sinking fund 8 per cent. bonds		150,000 00
Trust mortgage inconvertible sinking fund 8 per cent. bonds		2,977,000 00
Trust mortgage 7 per cent. bonds.		400,000 00
Second mortgage bonds issued on account of Northern Cross road, payable at Frankfort-on-the-Main, interest at 4½ per cent. to July 1, 1875, and at 4 per cent. from July 1, 1875, to July 1, 1890		941,000 00
C., B. & Q. scrip of 15 semi-annual instalments of $21,750 each, payable July and January at Frankfort-on-the-Main, issued on account of N. C. R. R.		326,250 00
Amount due under decree of Court foreclosing the mort. on the N. C. R. R., not yet called for by the bondholders, and therefore retained by order of the Court		270,000 00
Unclaimed dividends	$2,208 00	
Unpaid accounts and pay rolls	41,165 60	
Due agents and connecting roads	52,650 70	
Bills payable	217,362 12	
Due Lewiston Branch Railroad Extension	33,252 34	
		346,638 76
Due J. N. Denison, Chairman, for advances		1,226,207 18
Sinking fund		1,036,761 13
Balance to credit of income acc'nt		500,252 23
		$21,999,134 30
Construction		$15,745,050 07
Equipment		3,850,219 34
Due on Northern Cross Railroad		270,000 00
Material on hand	$490,923 07	
Pullman Palace Car Co. stock	66,200 00	
Steam ferry, President and other boats	44,074 01	
Burlington depot, grounds and accretions	315,946 42	
Chicago teams for transferring freight.	4,500 00	
		921,643 50

Burlington & Missouri River R. R. preferred stock, 7 instalments		412,737 64
Keokuk and St. Paul R. R. Co		86,620 62
American Central Railroad		298,708 55
Due from agents and connecting roads		115,988 97
Deposits in New York and Treasury		31,821 73
		$21,999,134 30

The directors chosen at the annual meeting June 30, 1869, are as follows:

President.—JAMES F. JOY.

Directors.—Erastus Corning, James F. Joy, Chauncey S. Colton, John C. Green, Nathaniel Thayer, John M. Forbes, Sidney Bartlett, John W. Brooks, Robert S. Watson, William Boott and John N. Denison.

Chairman of Board.—JOHN N. DENISON.

Gen'l Superintendent.—ROBERT HARRIS.

Secretary and Treasurer.—AMOS T. HALL.

Transcontinental Railroad.

CONGRESSIONAL ACTION—GENERAL FREMONT'S CONNECTION WITH THE ROAD.

To the Editor of the New York Times:

In view of the following statements, in a late number of the *Times*, that are calculated, though it cannot be that they were so intended, to defeat a great, beneficent and essentially American enterprise, and to do signal injury to the interests and usefulness of so upright, patriotic and honorable an American citizen as General FREMONT is universally conceded to be, I am sure you will feel obliged to me for communicating to you the subjoined facts.

The following are the statements of the *Times*:

"The atmosphere of Paris does not seem favorable to General FREMONT'S last great project. He and his financiering are both coming to grief. Deterred neither by the refusal of Congress to furnish a subsidy nor by its refusal to grant a right of way, he repaired to France and threw himself upon the tender mercies of its capitalists. A grand Transcontinental Railway appeared—upon paper. A company was announced to promote its construction, and a prospectus appeared full of rich and gorgeous promises. Mariposa in all its glory never excelled the picture spread before the eyes of Parisian capitalists. There were to be 'two hundred and ten millions of francs, in shares of 125 francs,' first mortgage bonds, based upon a munificent land grant, and, above all, the construction bonds were to enjoy from the Federal Government a guarantee of six per cent. interest. The last promise was unfortunate. It was specific, and admitted of a test. Mr. WASHBURNE was applied to for information, and he referred to the State Department; and the State Department remorselessly replied that the United States have granted no subsidy or aid in any shape to the imaginary Transcontinental Railway. Polite Parisian critics thereupon pronounced the project a fraud and the prospectus a tissue of falsehoods."

Last week the Secretary of State received, through Secretary Cox, of the Interior Department, the documents described below, which documents, *on Saturday last*, the 7th inst., were transmitted by the State Department, to Minister WASHBURNE at Paris, for the information of "all concerned:"

I. A letter to Secretary Cox from Governor MCCORMICK, now Delegate in Congress from Arizona, giving statements, founded on his own knowledge, respecting the legislation of Congress in aid of the Memphis, El Paso and Pacific Railroad Company and the actual *status* of that company.

II. Official statement of the Chief Clerk of United States Senate, accompanied by authenticated extracts from the journal of that body, showing repeated and favorable action of the Senate on bills and resolutions of the Senate and House in aid of the said railroad ("General FREMONT'S last great project") near the close of the Fortieth Congress, and during the brief session of the Forty-first Congress, in March last.

III. Additional official statement of the Chief Clerk of the Senate, accompanied by authenticated extracts from the journal of the House, showing that that body, on the 22d of February, 1869, (Fortieth Congress) passed by a vote of 121 yeas to 41 nays, a joint resolution granting the right of way to the said Railroad Company, and on the 22d of March, 1869, (Forty-first Congress) passed a similar joint resolution by a vote of 102 yeas to 49 nays. These resolutions were not reached, in the Senate, for want of time, except to be favorably reported. The last named joint resolution (of March 22,) is now on the calendar of the Senate, as unfinished business, and will come up for action (and be passed) at the approaching December session.

IV. Letters from Ex-Governor THROCKMORTON, of Texas, showing: 1. The existing validity of the company's charter from Texas. 2. The land grant by Texas to the Company (10,240 acres per mile.) 3. The right of way through Texas (that State having exclusive control of the public lands

within her limits,) and giving various other items of important information.

V. Certified copy of a letter from the President of the Memphis and Little Rock Railroad Company, dated April 5, 1867, to General FREMONT, showing the unanimous vote of his Company in favor of the contract consolidating the Memphis and Little Rock with the Memphis, El Paso and Pacific Railroad, and also favorable legislation of the Arkansas Legislature in behalf of that road.

VI. A certified letter from Dr. WILLIAM SCHMOILE, of Philadelphia, showing that he and his brother sold to the Memphis, El Paso and Pacific Railroad Company on the 23d of December, 1867, a large tract of land, (1,023 acres), having three miles of harbor front on the harbor of Norfolk, Va., for the Atlantic terminus of the "Southern Trans-continental" (Memphis, El Paso and Pacific) Railroad. This harbor admits vessels drawing from fifteen to thirty-three feet.

VII. A letter from Mr. EPPERSON, President of the Memphis, El Paso and Pacific Railroad Company, to the Secretary of the Interior, showing the history of the legislation of Texas in aid of the Company; that the Company has, by purchase or consolidation, already acquired the right of way over more than three-fourths of the distance to the Pacific, and giving information of other facts of great interest to the Company and the public.

These important and authentic documents will, no doubt, be in the hands of Minister WASHBURNE within the next ten days, and cannot fail, of course, to enlist his sympathy and co-operation with the interests and objects of so grand and prosperous an American enterprise. AMERICUS.

WASHINGTON, Monday, Aug. 9, 1869.

A Further Statement.

To the Editor of the New York Times:

Your editorial notice of the 3d inst., respecting General FREMONT and the Memphis, El Paso and Pacific Railroad Company in Paris does both the General and the Company injustice, by making them responsible, impliedly at least, for the publication of the prospectus referred to.

Neither the General nor the officers of the Company had anything to do with its publication.

The statements in that prospectus were doubtless attributable to a want of distinction in the minds of its authors in France between the action of our General Government and that of one of the States.

The Memphis, El Paso and Pacific Railroad Company was incorporated by the State of Texas to build a railroad through that State upon or near the thirty-second parallel, which road it is now engaged in constructing. It has a land grant from the State upon which its bonds are based. These bonds have been sold in Europe. They are in the ordinary form of coupon bonds, and show upon their face how they are secured, and what obligations the Company assumes. No construction bonds have ever been offered for sale.

The representations made by the Company and by General FREMONT in its behalf, are in writing, and are scrupulously and definitely correct in every particular.

The negotiations abroad were committed to persons versed in that kind of business and residing there, and have been attended with such results that about one-half of the entire issue of $10,000,000 of land bonds have been sold.

The proceeds are being applied as needed in the construction and equipment of the road, which, from the methodical and economical organization and management of the Company, promises to be built and put in operation with more dispatch and less waste than any other railroad in the United States.

Confusion has arisen from the use of the term "Trans-continental," applied abroad to designate the Company and its bonds.

This term was taken from the memorial presented to the last Congress praying for a national grant of a right of way.

It was to be a part of the name of the Company to be formed under the new charter and was deemed appropriate to indicate the purpose of the Company by construction and consolidation to embrace a continuous line reaching from Norfolk on the Atlantic shore to San Diego on the Pacific.

An important part of these consolidations has already been effected. The promoters of this enterprise intend to make it in fact as well as in name a transcontinental railroad.

The adoption in advance of this name abroad has not perhaps tended to clearness of understanding nor correctness of statement in reference to this business, especially as to the part taken in it by the American Minister and the Secretary of the Interior.

Yours truly, EDWARD GILBERT,
Counsel for the Company.

NEW YORK, Aug. 5, 1869.

Journal of Railroad Law.

RAILROAD COMPANIES NOT LIABLE FOR INJURY TO SERVANT OCCURRING THROUGH NEGLIGENCE OF FELLOW SERVANT. WHEN SERVANTS OF A CONTRACTOR DEEMED THE SERVANTS OF HIS PRINCIPAL.

The facts of the late case of Burke Admr. *vs.* The Norwich and Worcester Railroad Company are clearly and fully stated in the following opinion by

MCCURDY, J.—The principle relied upon by the defendants that a master is not liable to a servant for an injury to him occasioned by the misconduct or negligence of a fellow-servant, has so often been recognized both in this country and in England, that it must now be considered as settled law. Two reasons are usually assigned for the rule: 1st. That the employed must be supposed to have contracted with reference to the perils of the business, including those which may arise from the character and conduct of his fellow employees; and 2d. That public policy requires that each servant should be influenced by its operation to be not only careful of his own doings, but as watchful as possible over the acts of his associates. Farwell *vs.* Boston and Worcester R. R. Co., 4 Met., 49.

The justness of this reasoning has been questioned by high judicial authority. Little Miami R. R. Co. *vs.* Stevens, 20 Ohio, 435. However plausible may be the theory, it is very doubtful whether, in fact, a spinner in a factory or a fireman on a railroad ever made an examination into the condition of the machinery, the mode of conducting the business, or the character and habits of the operatives for the purpose of ascertaining the extent of his risk, as an element in calculating the proper amount of his wages. A passenger in a railroad car may well be presumed to have a vivid consciousness of his risk, but it has never been understood that he contracts with reference to it when he buys his ticket so as to be his own insurer. Again, a principal is responsible to an employee for his own negligence—why should he not be liable for that of his agent over whom the employee has no control, and of whom he may have no knowledge?

With respect to consideration of policy, it is by no means certain that the public interest would not be best subserved by holding the superior, with his higher intelligence, his surer means of information, and his power of selecting, directing and discharging subordinates, to the strictest accountability for their misconduct in his service, whoever may be the sufferer from it.

But accepting the law as established, and as assented to by the parties, we are led to inquire whether the defendants have not had the benefit of it in the charge of the Court. The defendants, outside of their regular business, had engaged in discharging coal from the holds of vessels. O'Neil, an employee in their ordinary business, was acting under a special contract with them to raise and drop the coal. He employed Burke. The defendants requested the Court to charge that if Burke was employed in the same general business as O'Neil, and the company had control of him, (Burke,) and could discharge him when they chose, he was to be considered as their servant, and they were not liable.

The charge was substantially as proposed. The Court said "If Burke was an employee of the railroad company, the plaintiff cannot recover. I leave it to you upon all the evidence as a question of fact, to say whether Burke was so in the employ of O'Neil as an independent contractor, or in the employ of the company in their business. Had the company the control of him? Could they discharge him without breaking their special contract with O'Neil. If they could, or O'Neil was their agent in employing him, then he was in their employ and the plaintiff cannot recover." It is difficult to see wherein the charge differed from that which was requested by the defendants, or wherein they could have been injured.

It was conceded by the counsel for the plaintiff that if the relation of master and servant existed between the company and Burke, the action would not lie. The real question was one of fact, whether the relation existed; and even if on this motion we could inquire into the weight of the evidence, we should have no doubt of its sufficiency to sustain the verdict. In discharging the coal O'Neil was working under a particular agreement, in a business entirely distinct from his regular employment, and for a separate compensation. In this respect he was an independent contractor. He alone employed, paid, controlled, and could discharge, Burke. The pay of O'Neil did not depend upon the wages of Burke. O'Neil was paid by the ton, Burke may have been hired by the day or the job. Burke was unknown to the company and his name did not appear on their rolls. He was considered and treated by all parties as in the employment of O'Neil, and not of the company. He was neither in law nor in fact the servant of the defendants.

In the case of Kelly *vs.* The Mayor, &c., of New York, 1 Kernan, 432, Judge Selden, a very eminent jurist, says, speaking of a contract, "The clause in question clearly gave the corporation no power to control the contractor in the choice of his servants. That he might make his own selection of workmen will not be denied. The right of the selection lies at the foundation of the responsibility of a master or principal for the acts of his servant or agent. As a general rule no one can be held responsible as principal who has not the right to choose the agent from whose acts the injury flows." See also Corbin *vs.* The American Mills, 27 Conn., 274. In 1st Redfield's Law of Railways, 506 (ed. of 1867,) the general principle is laid down that one is liable for the act of his servant, but not for that of a contractor or the servant of a contractor. A long list of authorities is there collected bearing upon the question involved in this case. See also American Leading Cases, with Hare and Wallace's notes, 648. It will be noticed that in most of the cases the question has not turned so much upon the legal principles as on their application to the facts of the particular case. This is especially true in the case of Wiggett *vs.* Fox, 36 Eng., Law & Eq. R., 486, so much relied upon by the defendants.

A new trial is not advised.

In this opinion the other Judges concurred.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, August 14, 1869.

Stock Exchange and Money Market.

Money has been in very full supply nearly all through the week, and though the demand from all classes of borrowers has been fairly active, it has been quite promptly met by lenders at rates within the range of from 5@7 per cent. on call, and 7@9 per cent. per annum. The city banks had nearly four millions added to their deposit averages, last week, bringing the aggregate up to over 200 millions, as against a little ever 183 millions five weeks ago. They augmented their loan and discount averages, nearly 4⅜ millions. Their specie reserve was reduced nearly 1⅞ millions, and their hoard of legal tender notes, $44,793. The U. S. Sub-Treasury closed the week with a coin balance of $77,658,079, against $77,383,685 the preceding week; and a currency balance of $14,535,814, against $15,000,231 week ending with July 31. On Tuesday of the current week, the office held a coin reserve of $78,792,546, and a currency balance of $14,926,667. The gold and greenback note reserves of the city banks are nearly 26½ millions in excess of the 25 per cent. of their liabilities call for by the banking act, which is a gain, on the preceding week, of nearly three millions. The Government received 136.13 per cent. on the sale of $1,000,000 of coin on Thursday of last week, and paid out about 121.46 per cent. for $2,000,000 United States 5 20s purchased on the lowest sealed offers at noon of the preceding day. Further purchases to the extent of $3,000,000 were to have been made on Wednesday and Thursday of the present week, which would add nearly four millions of currency to the supply of money available in the open market.

The specie reserve of the city banks according to the latest return is $26,003,925, against $24,784,427 same time last year. The city bank deposits are now $200,220,008, against $231,716,492 week ending Aug. 8, 1868. The legal tender reserve amounts to $56,056,834, against $74,051,548 same time last year. The circulation now stands at $38,947,985, against $24,074,374 same time last year. The loans are now $264,879,357, against $279,755,786 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $102,479,239 a day, against a daily average of $102,409,248 the preceding week, and $93,975,840 the week ending with July 24, 1869. The current week's exchanges average about $103,000,000 a day. The city banks, last week, reported a loss of $1,868,008 of specie, with an increase of $3,803,565 of deposits, and a loss of $44,793 of legal tender notes. They increased their loans, $4,349,132; and reduced their circulation, $120,692.

The city bank exchanges on Wednesday were $91,642,547, and the resulting balances, $3,238,021.

National Bank notes to the amount of $105,549 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $316,926,219, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $17,179,458, leaving, with the existing 1,620 banks, (having an aggregate capital of $422,659,260,) an actual circulation at this date, of $299,746,761. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $345,054,900; and for the public deposits, $20,909,500—making a total of $365,964,400. The Treasury Department last week redeemed and destroyed $171,000 of worn and mutilated fractional currency, and issued no new. The outstanding amount of fractional currency on the 1st of Aug., was $31,030,300, against $32,062,528 on the 1st of July.

The U. S. Sub-Treasury receipts, week ending with July 31, were $3,528,724 in coin, including $3,190,339 from customs duties, and $4,916,377 in currency; payments, $3,254,330 in coin, including $741,589 of coin interest, and $5,880,793 in currency; balance at the close of the week, $92,193,894, including $77,656,080 of coin, and $14,535,814 of currency, against $92,621,590 at the close of the preceding week, showing a decrease of $427,696. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $1,131,137, including $506,721 from customs, and payments, $860,129, including $76,000 of coin interest. On Tuesday, receipts, $1,114,811, including $615,000 from customs, and payments $542,255, including $187,000 of coin interest. The balance at the close of busi-

ness on Tuesday stood at $93,755,622, (including $14,926,668 of currency, and $78,792,546 of coin,) against $94,192,874 a week previous; and $98,226,136 on July 28, 1869. The aggregate receipts of the office in July were $88,513,855, including $10,502,046 from customs; aggregate payments, $76,502,624, including $17,384,486 of coin interest.

The outstanding amount of coin certificates on the 1st of Aug. was $36,725,840 against $30,489,640 on the 1st of July. The Sub-Treasurer at this port, last week, retired $3,079,339 of coin certificates through the receipts for customs.

Government revenues have been yielding quite satisfactorily, since our last. The excises have been up to a full average, while the customs receipts have been on the increase. The excises, last week, yielded about 4¼ millions; customs at the port of New York, $3,190,339, and at the outports about $800,000 (in coin) more, making the grand total income for the week equal to about $9,636,958 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 26¾ millions.

With a more liberal supply available in the open market, and less of a speculative inquiry noted, Gold has shown less firmness and less buoyancy, the range having from 135@136½, and the closing quotation on Wednesday 135⅛. The customs demand has been on an enlarged scale, having averaged over half a million a week. The export drain last week, slightly exceeded a million and a half; thus far, this week, the shipments have been confined to about $50,000 on Tuesday, and $265,000 on Wednesday. The U. S. Sub-Treasury at this port now controls a coin balance of about 78¾ millions, as against about 77⅜ millions ten days since. The city banks hold a little over 26 millions of specie, as against a trifle more than 31 millions three weeks preceding; and $7,811,780 on the 17th of last April. At the U. S. Sub-Treasury at Boston, the coin balance, last Saturday, was $1,521,615.

The following is the statement of the New York Gold Exchange Bank for the week ending Saturday, the 7th day of August, 1869:

Average am't of loans and discounts	$1,432,114
Average amount of specie	862,712
Average amount of deposits	1,655,358

The customs of the port on Wednesday yielded $580,000. The U. S. Sub-Treasury disbursed $64,173 of coin interest, on that day.

The customs revenue at the port of Boston last week was $353,649.

The customs demand for Gold last week, averaged $531,723 a day; thus far, this week, it has averaged $560,860 a day, or equal to a weekly aggregate of $3,365,160. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $17,606, and since Jan. 1, $9,784,778, against $4,264,012 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $78,711,632, again $69,019,966 same time in 1868. At San Francisco, from Jan. 1, to July 21st, 1869, $4,216,000, against $4,385,731 same time last year.

The exports of specie, from this port, last week, were $1,510,842, against $2,896,532 same week last year; total, since Jan. 1, 1869, $23,436,848, against $62,584,689 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $741,589, and since Jan. 1, 1869, $63,739,476, against $59,479,580 same time in 1868. The specie exports from San Francisco, from Jan. 1, to July 16, 1869, were $22,439,532, against $21,780,419 same time in 1868.

The U. S. Treasury receipts from customs at all ports from July 1, to July 31, were about 20 millions.

Foreign exchange has been rather more freely offered, and there has been less buoyancy in rates, the demand having been less active. Bankers' prime sixty day bills on London closed on Wednesday at 109⅝@110⅛, and on Paris to 5.18¾@5.13¾; sight bills on London to 110⅛@110⅜, and on Paris to 5.12¾c.@5.11¼. The offering of produce bills has been up to a full average this week. The week's exports of domestic produce have been to the currency value of $3,727,514, making the total since Jan. 1, 1869, $112,617,987, against $102,288,892 same time last year.

Government securities have been in rather better supply in the open market, and with a less urgent demand for the several issues, prices have been quoted weaker, with a downward tendency. Government bought in on Wednesday of the current week, through the U. S. Sub-Treasury at this port, two millions of the U. S. Five-twenty bonds at from 120.85@121.25, and accrued coin interest.

U. S. sixes of 1881 closed here on Wednesday at 123⅛@124; U. S. Five-twenties of 1862, ex coupon, 123¾@124; U. S. Five-twenties of 1864 at 122⅝@122⅞; U. S. Five-twenties of 1865 at 122¾@122⅞; U. S. Five-twenties of 1865, consolidated, 121⅝@121¾; U. S. Five-twenties of 1867, 121¾@121⅞; U. S. Five-twenties of 1868, 121½@121¾; U. S. Ten-forties at 114¾@115; U. S. Six per cent. currency bonds, 110⅜@110½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 28.	Aug. 4.	Aug. 11.
Consols	93⅛	93	93
U. S. 5-20's of 1862	....	83½	83⅜
Erie	18¾	19¾	19½
Ill. Central	93¾	94½	94½

The dealings in railway and miscellaneous stocks have been on a restricted scale, and prices have been quite variable. In the Western shares, the business has been most satisfactory, showing most strength and buoyancy in values. The New York roads have been in less favor with the speculative operators.

The demand for Breadstuffs, Petroleum, Tobacco, Cotton, and Naval Stores has been fairly active. Flour, Wheat and Corn have shown more firmness as to prices. Middling upland cotton closed rather tamely on Wednesday at 33½ cts. per lb. The stock of cotton now here is estimated at about 23,500 bales. The receipts at the port this week, have averaged about 500 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 2,308,500 bales, against 2,347,000 bales same time in 1867–'8; exports, same time 1,428,500 bales, against 1,661,000 bales same time in 1867–'8; stock on hand at latest dates, 40,000 bales, against 72,500 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 15,744 pkgs., against 14,281 pkgs., same time last year. From Boston, 5,977 pkgs., against 6,391 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been in more demand, at from 9@16c., per lb.; week's receipts, 6,549. Milch cows, dull at from $40@$110 each, receipts, 116. Veal calves in moderate request at from 6@11c. per lb.; receipts, 2,139. Sheep and lambs in fair demand at from 4½@7c., and 8@10c. per lb.,; receipts, 36,315. Swine quiet at from 10@10⅞c. per lb.; receipts, 25,346.

There has been more movement in the dry goods line, particularly in cotton and woolens, which have been in much better request and steadier in price. The reduction of rates on inland freight have favored increased purchases. Groceries and metals have been more sought after. Other kinds of foreign goods have been rather slow of sale.

There has been a fair degree of activity in ocean freights, and the general market has been quoted stronger. For Liverpool we quote flour at 1s. 10½d.@2s. by sail, and 2s. 4½d.@2s. 6d. by steamer, per bbl.; grain at 7¼@7½d. by sail, and 8¾@9d. by steamer, per bushel; cotton at $\frac{5}{32}$@$\frac{3}{16}$d. by sail, and ¼d. by steamer, per lb.; and heavy goods 20s.@35s. by sail, and 25s.@40s. by steamer, per ton. Total number of vessels in port on Wednesday, 500.

The New York exports, exclusive of specie, for the week ending Aug. 10, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$3,209,312	$3,727,514
Prev. reported	99,079,580	108,890,473
Since January 1	$102,288,892	$112,617,987

The imports for the week ending August 7, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$2,534,163	$2,615,928
Gen. merchandise	3,511,930	2,592,313
Total for the week	$6,046,093	$5,208,241
Previously reported	145,173,534	184,399,151
Since January 1	$151,219,627	$189,607,392

The balance in the Sub-Treasury on Wednesday was $94,203,745 13.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Georgia 6s, 84; do., 7s, 92½; Louisiana 6s, 71; do., 6s, Levee bonds, 64⅞; Connecticut 6s, 99½; N. Y. Memphis, El Paso and Pacific Railroad.

Three full corps of Engineers have been in the field for several months on the line of road in Texas, making the final location of the line of road, laying off and superintending the work now under contract.

A large number of men are actively at work under able Contractors on the first division of 150 miles, which is under contract to be completed by March 1, 1870.

The iron, spikes, plates, etc., for the first fifty miles, also several of the finest and most powerful Locomotives have been purchased and paid for, ready for shipment to Texas.

Implements, carts, etc., to equip another 1,000 men have just been purchased in this market ready for shipment this week.

☞ Messrs. GEORGE OPDYKE & Co. have recently brought out in this market the first mortgage bonds of the New York and Oswego Midland Railroad. These bonds are payable in gold twenty-five years from the first of July last, and bear seven per cent. gold interest, which is payable semi-annually. Particulars concerning the road and the bonds will be found in another column, to which the attention of investors is invited.

☞ The "Steel Rail" laid on the Chicago, Burlington and Quincy Railroad in June, 1867, shows little or no wear. Seven bars have broken, and in each instance, at the ends where holes for splice bolts had been punched instead of drilled. In some places where these rails are laid it has been necessary, heretofore, to replace the iron rails often as once in four months.

☞ The "Miller Platform, Coupler and Buffer" has been attached to all the Passenger and Baggage Cars on the Chicago, Burlington and Quincy Railroad, and upon several occasions has proved its great value in saving life as well as preventing a great destruction of property.

☞ The chief engineer of the Honduras Interoceanic Railroad reports that large numbers of laborers are constantly arriving from Truxillo, Belize, Lewiston, and other points, and the work of surveying the road and laying the rails is progressing very favorably. The supplementary loan recently made in Paris for the continuation of the work has greatly increased the prospect of its early completion.

☞ The Stockholders of the Michigan Southern and Buffalo and Erie Railroads, have accepted the terms of consolidation previously arranged by the directors, and the Lake Shore and Michigan Southern railroad now extends from Buffalo to Chicago.

☞ The engineers engaged in the service of the Little Rock and Fort Smith railroad are now at work locating the line of the road through Johnson county.

Railroads in Peru.

The proposals for the construction of the Transandine Railroad, from Lima to Oroyo, near the head of navigation upon the Mayro River, were opened at Lima on the 18th of July. There were but three competitors, Henry Meiggs, Senor Montero, and a German by the name of Christian. Meiggs's proposal is for $27,000,000 in Peruvian bonds. Montero asks for £4,400,000 and a guarantee of seven per cent. on the amount. Christian 20,000,000 soles in cash and 13,000,000 in bonds. In all probability the three proposals will be referred to a committee either of engineers or merchants. Proposals for the Pascamayo Road have also been made by Mr. Meiggs. The first cutting was made on the Pisco and Ica railroad on the 18th ult.

Little Rock and Fort Smith Railroad.

We are pleased to announce that Mr. Josiah Caldwell, the contractor on the road, accompanied by Capt. Haney, the secretary of the company, and C. W. Huntington, the attorney of Mr. Caldwell, have arrived in the city to make an examination of the work to be done. We are assured that a large force will shortly be placed upon the road.—*Ark. Gazette*, Aug. 3.

☞ The Detroit *Tribune* says that the Lake Shore and Michigan Southern Railway Company has agreed to guarantee the bonds of the projected railroad from Janesville through Albion to Lansing. This line extends a little to the southwest of Lansing, and with an extension to the new road projected from Port Huron west, it is believed that it would serve to take the business of that line to Chicago over the Michigan Southern.

☞ The Savannah and Gulf Railroad, which now extends from Savannah to Bainbridge, is to be extended to the Chattahoochee, opposite Columbia, Ala., where it is to connect with the Southern Alabama Railroad, which is projected from Columbia to Pollard, the point of junction of railroads to Pensacola and Mobile. This will give the Savannah and Gulf a direct line to those cities, and, eventually, to New Orleans.

☞ The Cambridge and Seaford railroad will be completed, it is stated, on the first of September. It will be thirty-three miles long, and pass through Newmarket and Federalsburg, Md., both thriving towns. Cambridge is the capital of Dorchester county, and has a population of about two thousand.

☞ A new line of railroad has recently been opened in Jamaica, (W. I.) increasing the aggregrte length of all the roads to twenty two miles. The opening of this road was celebrated by a banquet, attended by the Governor, the principal officers and the most prominent men of the colony.

☞ It is now the general belief that the work of constructing the proposed bridge across the Delaware between Camden and Philadelphia will be commenced some time next season, as nearly all the preliminaries have been arranged.

☞ The contract for the construction of the Gosford Wooden Railway has been given to Mr. Hurlbert. He will break ground within a fortnight.

Illinois Central Railroad.

The statement of this Company for the month ending July 31, 1869, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	4,850.68 for	$46,576 91
Acres Int. Fund Lands sold	199.86 for	2,317 48
Acres Free Lands sold	680.00 for	10,614 00
Total sales during month of July, 1869	5,730.54 for	$59,508 39
To which add Town Lot Sales		250 00
Total of all	5,730.54 for	$59,758 39
Cash collected in July		$135,356 68

TRAFFIC DEPARTMENT.

Receipts from Freight		$344,494 00
do. Passengers		129,899 34
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		55,000 00
Total Receipts in July, 1869		$539,751 67
Total Receipts in July, 1868		$481,214 34
Estimated earnings in the month of July, on the D. & S. C. R. R., not included above		$122,042 10
Corresponding month of 1868		$67,301 58

Wetland (Canada) Railway.

REPORT OF THE MANAGING DIRECTOR.

I have the honor to submit for your consideration my annual report of the transactions of the company, for the year ending December 31, 1868, together with the usual revenue accounts, traffic statements, and other departmental returns connected with the working of the railway and propellers during that period:

The gross traffic receipts of the year, from all sources have amounted to $77,482 25, (£15,921 0s. 5d. stg.) as in comparison with $68,615,46 (£14,099 1s. 4d. stg.), in 1867, showing an increase of earnings from traffic of $8,866 89, equal to £1,821 19s. 3d. stg.

THROUGH TRAFFIC.

Elevating	$6,141 46	
Freight	43,649 37	
Other sources	403 00	
		$50,193 83

LOCAL TRAFFIC.

Passengers (35,294)	$12,170 57	
Freight	9,133 34	
Mail service	400 00	
Telegraph	518 75	
Other sources	5,065 86	
		$27,288 52
Total earnings from all sources		$77,482 85

And the ordinary working expenses of the year have amounted to $58,562.66.

Maintaining roadway	$7,007 17	
" works & b'ldings.	476 01	
Repairs of machinery and rolling stock	11,405 30	
Train service	12,874 01	
Station "	4,397 08	
Terminal "	9,154 77	
General supplies	582 46	
Miscellaneous expenses	5,077 23	
General charges	7,588 63	
Total work'g expenses.	$58,562 66	
Loss on conversion U.S. currency in 1868	7,629 44	
		$66,192 10
Net earnings		$11,290 25

Thus after providing for a loss of $7,629 44 by conversion of United States currency during the year our net earnings amount to $11,290 25 (£2,319 18s. 8d. stg.) The following comparative statement shows the gross earnings and expenditure and also the loss by United States currency in 1867 and 1868:

	1867.	1868.
Gross earnings	$68,615 46	$77,482 85
Expenditure	66,756 34	58,562 66
Net earnings	$1,859 12	$18,919 69
Loss by U. S. currency	4,968 55	6,629 44
Net profit	.....	$11,290 25
Loss	$3,099 43	.....

It will be observed by an examination of the above statement that our gross earnings for 1868 show an increase of $8,866 89 (£1,821 19s. 3d. sterling), and our working expenses a decrease of $8,139 68 (£1,683 12s. 8d. stg.) as compared with 1867. In reviewing the operations of the railway for the past nine years, it is satisfactory to observe that our ordinary working expenses for 1868 are much less than in any previous year, and a much larger amount of local freight and passenger business could have been done—did the traffic exist—without increasing our expenditure.

Statement of the number of bushels of grain received and carried over the line during the year 1868:

	Bushels.
Through cargoes (106 vessels)	1,928,014
Lighterages (151 ")	499,990
From Grand Trunk Railway	27,650
From teamsters	5,805
	2,461,459

Disposed of as follows, viz:

Shipped from Port Dalhousie	2,417 283	
Delivered to millers on line	44,046	
Sold at Port Dalhousie	130	
		2,461,459

Our flour traffic for 1868 shows an increase of 16,048 barrels carried, as compared with 1867. During the past year we carried 8,715 tons of local freight and 14,286 tons of lighterage grain, for which we received, on an average, two-pence sterling per ton per mile, being a good paying rate; but for our "through cargoes," which amounted to 54,776 tons, or about 71 per cent. of our gross traffic, we received (after deducting the actual cost of transhipment at Port Dalhousie, elevating, shovelling and shortage at Oswego and Kingston insurance and agencies and loss by United States currency, which currency we are obliged to receive in payment of freight on through grain) a little less than one farthing per ton per mile, a sum insufficient to cover cost of carriage, and yet we are compelled as it were to take the "through freight" at this very low rate, to compete with other routes, or decline it altogether, a course if adopted, you can readily understand would be most injurious to our route. The permanent way, rolling stock, locomotive engines, elevator buildings and machinery, and other property of the Company have been maintained in a serviceable condition, and the expenses attending their maintenance reduced as much as circumstances would warrant, keeping in view the safety of the public and the efficiency of the Company's service.

The gross earnings of the propellers for the year ending 31st December, 1868, amounted to $50,341 74 (being an increase, as compared with 1867, of $15,815 26), derived from the following sources:

Passengers	$934 15
Freight downward	49,078 54
" upward	69 05
Towing	260 00
	$50,341 74

And the ordinary expenditure:

Repairs	$2,344 83	
Running expenses	22,387 71	
Miscellaneous	18,215 79	
		42,948 33
		$7,393 41
Loss by United States currency		14,234 08
Balance deficit		$6,840 67

Showing a deficit of $6,840 67 (£1,405 12s. 4d. sterling) in their working for 1868.

This result is greatly to be regretted, but when it is considered that no less than $14,234 08, (£2,924 16s. 3d. stg.), or say 35⅓ per cent. of their gross earnings is absorbed by the conversion of United States currency (in addition to the low rates of freight previously referred to), it can hardly be a matter for surprise, that under such unavoidable and exceptional circumstances the working of the propellers should exhibit a loss. The loss sustained by the company under this head from 1865 to 1868 (four years), in working the railway and propellers, amount to the large sum of $113,616 02 (£23,345 15s. 1d. stg.), an item of loss which will, it is feared, have to be borne annually by the company until the return to specie payments by the Government of the United States. The following statement exhibits the earnings and expenditure of propellers for years 1867 and 1868:

	1867.	1868.
Earnings	$34,523 48	$50,341 74
Expenditure	42,763 75	42,948 33
Balance	$8,240 27 loss.	$7,393 41
Loss by U.S. currency	9,726 70	14,234 08
Loss	$17,966 97	$6,840 67

The past two years have been very unprofitable ones for vessel owners in general. The speculative policy of grain dealers in Chicago and Milwaukee, in holding back the produce of the Western States from finding its way to the seaboard, has occasioned a great deal of disappointment, and made the two last seasons most unsatisfactory and unremunerative for nearly all kinds of vessel property on our lakes. On the morning of the 6th October last, the propeller Perseverance was totally destroyed by fire, when on her way to Oswego with a cargo of grain. The captain and thirteen of her crew unfortunately perished. She was insured in the undermentioned marine insurance companies for $32,000, gold, viz.:

Phœnix Marine Insurance Company, New York			$11,000 00
Security	ditto		10,000 00
Ætna	ditto	Hartford, Conn.	6,000 00
British Am.	ditto	Toronto, Canada	5,000 00

which amounts were promptly and satisfactorily paid. Shortly after the loss of the ill-fated vessel immediate steps were taken to replace her. With the consent of your London board, a contract was entered into with Mr. Shickluna, a shipbuilder, St. Catherines, to build and equip a propeller having a carrying capacity of from 18,000 to 19,000 bushels, with a speed of nine miles per hour, and to class A1, for seven years, for the sum of $26,000 00=£5,342 9s. 4d. sterling. She will be completed and ready for service on the 1st of May next. Finally, I have much pleasure in bearing testimony to the satisfactory manner in which the duties of the different departments have been performed, and to the efficiency of the officers and employes of the company.

The accounts showed an expenditure on capital account of £348,025. The revenue account for the year showed a profit on the railway of £2,320, and a loss on the working of the propellers of £1,406, leaving the net gain on the railway traffic for the year £914.

Watertown Railroad Bonds.

The Executive Board for the compromise and payment of the Watertown Railroad bonds is at length fully organized, and prepared to enter upon its work. It believes the holders of the bonds issued in aid of the Watertown and Madison Railroad will consult their interest by corresponding with this Board, rather than engage in expensive and useless litigation to collect them, as there seems to be a disposition on the part of the Board to take up such bonds as are offered at the most reasonable rates, upon which costs have not been made, and let those who prefer to resort to the courts collect their claims at the end of the law. M. B. Williams of Watertown is the Secre-

tary of the Board, to whom communications may be addressed on this subject.—*Watertown (Wis.) Dem.*

Paying Weights on Railways.

Mr. B. Haughton has published a paper read by him before the Civil and Mechanical Engineers Society in May last, entitled the "Paying and Non-paying Weights pulled by the Locomotive Engine in 1867," the object of which appears to be to prove that the average fares at present charged to passengers are fair and reasonable considering the amount of work actually performed in conveying them, the speeds at which they travel, together with the comfort and accommodation furnished, and that so so long as the railway Companies adhere to their present tariff, the public have no ground of complaint. Mr. Haughton urges these views in defence of the existing system, in opposition to proposals which have lately obtained some hold on the public mind for a transference of the railways to the Government, and in vindication of the efficient manner in which the service of the railways is performed by the present officers entrusted with the duty of working and maintaining them.

Our first obligation before discussing the points in question is to acknowledge the valuable statistical information which the author has compiled, condensed, and reduced to items for reference and comparison. These statistics are taken from the returns of the Board of Trade for the last year published, viz., 1867, and we learn from them that up to that date there were 14,247 miles of railway made at a cost of £502,563,000, being at the average rate of £35,253 per mile. That during the year the traffic receipts amounted to $39,480,000; the number of journeys was 287,688,000, average 12½ miles each; that 148,253,800 tons of goods, minerals, etc., were carried an average distance of 25 miles; that the distance travelled by the locomotives was 148,542,827 miles; that 3,924,624 passenger trains, weighing 10,708,101,106 tons, were started, each travelling a distance of 19.08 miles, and 2,403,866 goods trains, weighing 14,804,545,302 tons, each travelling 30.64 miles; that this work kept 8,619 locomotives employed, each pulling 2,960,047 tons per mile, and each engine running 17,234 miles. The average distance run by each train per day was 23.47 miles, having an average weight of 165 tons, at an average speed of 26 miles per hour, the average power exerted by each engine being 205.92 horses, the whole power exerted by the engines being equal to 1,774,824 horses, working two hours per day, or 354,965 horses working the usual ten hours.

Mr. Haughton next investigates the paying and the non-paying weights of which both the passenger and goods trains are made up, and the result comes out (so far at least as the passenger trains are concerned) even more unfavorably than is generally assumed. It has been calculated from previous statistics that about 1½ ton of dead weight is usually drawn for each passenger on an average, but Mr. Haughton shows it to be close upon two tons, or estimating the weight of one passenger with luggage at 2 cwt, the paying weight is about 5 per cent. of the gross weight of the train, while the paying weight in goods trains is about 30 per cent.; and he gives all this as a reason why the public cannot hope for a reduction in the fares; he also urges the fallacy of comparing the railway fares in this country with those on the Belgian lines, first because those alluded to in the report of the Railway Commissioners are only the State railway, and were made by Government, who selected the most paying routes, that they cost but £18,000 per mile as against £36,000, the average cost of the English lines, that they were not saddled with parliamentary expenses, and that land and labor is cheaper there than in this country, all of which combine to make the lines at home more costly, and to necessitate a higher tariff.

We cannot, however, quite agree in all Mr. Haughton advances; the cost of land, labor, and Parliamentary expenses are all comprised in the total cost of the lines, and the £18,000 per mile quoted as the cost of the Belgian lines was for the lines alone, and did not include the equipment and other expenses, which altogether brings up their total cost to about £24,000 per mile, and taking the average cost of the English railways at £35,000 per mile, the relative cost of the two would be nearly as 3 to 2, or the Belgian State lines will have cost about 31 per cent. less than the English lines; but the fares on the Belgian lines are on the average considerably more than 31 per cent. less than those of the English lines. In Belgium the fares are not the same in proportion for all distances, being greater for short than for long journeys; there may be wisdom in this arrangement, for the expense of conveying a passenger a short distance, taking all things into consideration, is much greater in proportion than for a long one; there is more wear and tear and loss of service of the engines and carriages, the cost of station accommodations, attendance, and general expenses are the same for a long as for a short journey, so that a slightly proportionate higher fare is but reasonable for short distances. The Belgian fares as compared with those in England are nearly thus: for ten miles distances about 25 per cent. less; for twenty miles 33 per cent.; for fifty miles 60 per cent.; for 100 miles 70 per cent., and for 200 miles and upwards about 75 per cent. less than the fares in this country. This difference is so enormous and so disproportionate to the actual cost of the lines that there must be something else to account for it. It cannot be the greater number of passengers carried, for although there is a slight excess in Belgium over the number in England in proportion to the mileage, the actual amount is insignificant when compared with the great disparity between the rates; thus in England 20,000 passengers were carried per mile of line open, as against 23,600 in Belgium, a difference only of about 18 per cent. Something may be said on our side for the greater speed which obtains in this country, and credit be taken for additional expense in maintaining it, but with all this, comparing our rates with those in Belgium, there does appear a good margin for a reduction, when our railways pay better. The main expenditure, notwithstanding that our carriages are on the average run 80 per cent. empty, is not incurred in the actual working of the trains, or in keeping the engines, carriages, and permanent way in repair, for the amount expended on all these items barely amounts to more than half of the total working expenses. The cost of conveying a single passenger one mile, taking the average of the classes, and allowing Mr. Haughton's estimate of 2 cwt. per passenger, which is a high one, may be taken approximately at—locomotive renewals, and repairs, .08d.; fuel, .04d.; permanent way, maintenance, and renewals, .06d.; carriages, repairs, and renewals, .02d.; making altogether .2d. per passenger per mile. The average revenue per passenger per train mile being .78d., and allowing the working expenses to amount to nearly 50 per cent. of the receipts, the total expense per passenger per train mile would be (say) .38d., leaving .18d. per passenger per mile, which is nearly equal to the whole cost of locomotive power, together with carriage repairs and maintenance of permanent way, paid away in general expenses.

It is to this nearly one-half the working expenses, for which there is really no work to show in dragging the trains, that railway reformers should devote their attention; and it is no doubt in this that the greater portion of the saving is effected in the Belgian State railways; and surely what can be done in Belgium can be done here; therefore, taking the common sense view of the question which Mr. Haughton invites us, and comparing our railway matters with those of other countries, we are not quite so sure, as he appears to be, that we are in the matter of railways, prices considered, the best served community in the world. We certainly have some advantages over our neighbors across the channel, but at the same time we are behind them in many things, and we do not see, while retaining all the good we possess, why we should not remedy our short-comings by taking a lesson out of their book. If these general expenses could only be reduced one-half, and the trains were so adjusted to the traffic as on the average to run even 50 per cent. filled instead of 80 per cent. empty, as is now the case, we should be able to assimilate our fares more nearly to the Belgian standard; and the very fact of doing so would help the object by increasing the number of passengers, lessening the unpaying weight by filling the present emptiness of the carriages, and by increasing the receipts reducing in proportion the general expenses.

While thus differing in some points from Mr. Haughton's conclusions, we must, nevertheless, give him full credit for having compiled a most valuable paper, containing an immense amount of statistical information, which will be found highly useful to every one interested in railway property and progress; and we are glad to find that this important question is receiving the attention it deserves, for this cannot be over-rated, and the more it is ventilated, and that from both sides, the sooner shall we be likely to arrive at a satisfactory solution of the great question of how to confer on the travelling public the boon of cheap fares, and on the Shareholder handsome dividends.—*Herapath.*

Pittsburg and Connellsville R. R.

The work on the extension of the Connellsville Railroad is now progressing in the most satisfactory manner. The contractors are doing everything in their power to push the work forward, having upwards of fifteen hundred laborers employed. A large number of the employees are from Canada. The prospects for the early completion of the road are flattering, and will be hailed with great satisfaction by our merchants and manufacturers. The work of improving the old portion of the road is also being pushed forward. The most important part of this work is the filling in of the trestle work between this city and Port Perry, on which a number of men are employed.—*Pittsburg Chronicle.*

Boston, Hartford and Erie Railroad.

The first division, seven miles, easterly from Willimantic, Connecticut, is all graded, and the masonry all completed, including the abutments for the large bridge over the Natchaug river, fifty-seven feet high, and containing six thousand yards of fine granite bridge masonry. The bridges are being put on and the permanent track laid, and passenger cars can run from Willmantic to Goshen whenever it is thought the local business will warrant.—*Boston Journal.*

OFFICE OF THE SHELBY RAILROAD CO.,
SHELBYVILLE, KY., Aug. 5, 1869.

SEALED PROPOSALS will be received at this office until the first day of September next for the graduation and masonry of this road, 18 miles in length, and extending from Hobbs' Depot, on the Louisville, Cincinnati, and Lexington Railroad, to Shelbyville. The work will be divided into ten sections, and the proposals may embrace one or more sections or the whole work. Plans and specifications may be seen at this office at any time before the letting. Several heavy sections and one tunnel of one thousand feet in length are embraced in the letting. The company reserves the right to reject any or all propositions

A. R. SCOTT,
3t33 Pres't Shelby R. R. Co.

ENGINEER'S OFFICE T. & P. R. R.,
LEBANON, TENN., Aug. 2d, 1869.

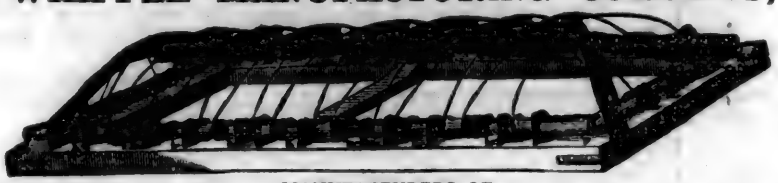
PROPOSALS for the delivery of rails and fastenings for the main track of the 1st thirty miles of this road are hereby invited and will be received by the undersigned until the 1st day of September next. Rails to be of the T pattern with fish bar fastenings, and to weigh 56 lbs. per yard or 88 Tons per mile of track.

Drawings or patterns of rails, also specimens of rails and fastenings will be required and the same (rails and fastenings) must be warranted to be in accordance with the specimen furnished and of the best quality of native or foreign iron and manufacture.

The price bid for will include the delivery of all material on the track of the Nashville and Chattanooga Railroad at Nashville, Tenn., from the 1st of November to the 1st of January next. The company reserves the right to reject any and all bids.

By order of the Board of Directors,

E. L. FALCONNET,
3t33 Chief Engineer.



PROPOSALS
FOR $300,000
CITY LUNATIC ASYLUM STOCK.

SEALED PROPOSALS will be received at the Comptroller's Office until TUESDAY, Aug. 31, 1869, at 2 o'clock, P. M., when the same will be publicly opened, for the whole or any part of the sum of three hundred thousand dollars of "City Lunatic Asylum Stock," authorized by chapter 56, Laws of 1869, and by an ordinance of the Common Council, approved by the Mayor, July 29, 1869. Said stock is to be issued for the purpose of providing additional buildings for lunatics in the City of New York, and will bear interest at the rate of seven per cent. per annum, payable half yearly, to wit: On the first day of May and November in each year, and the principal will be redeemed on the first day of August, 1889. The proposals will state the amount of stock desired and the price per one hundred dollars thereof, and the persons whose proposals are accepted will thereupon be required to deposit with the Chamberlain the sums awarded to them respectively, together with any premiums thereon. On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive certificates for equal amounts of the par value of the sums awarded to them, bearing interest from the dates of payment. Each proposal should be sealed and indorsed "Proposals for City Lunatic Asylum Stock," and inclosed in a second envelope, addressed to the Comptroller. The right is reserved on the part of the Comptroller to reject any or all of the bids, if in his judgment the interests of the Corporation require it.

RICHARD B. CONNOLLY,
Comptroller.

A SEVEN PER CENT. GOLD LOAN.

$6,500,000.

The Kansas Pacific Railway now in successful operation from Kansas City to Sheridan, proposes to build an extension to Denver, Colorado. The Government has granted Three Millions of Acres of the finest lands in Kansas and Colorado, which are mortgaged for the security of a loan of

$6,500,000.

This loan is secured in the most effectual manner. It represents a road in profitable operation, and will open the trade of the Rocky Mountain country and connect it with the great markets of the East. It is considered to be one of the best loans in the market.

EVEN BETTER IN SOME RESPECTS THAN GOVERNMENT SECURITIES.

The loan has thirty years to run, principal and interest payable in gold, semi-annually in either Frankfort, London, or New York, and will be free from Government taxation. The bonds for the present are sold in currency at 96, with accrued interest.

Circulars, maps, and pamphlets sent on application.

BURLEIGH'S PATENT

Pneumatic Rock Drill

Is now in successful working operation in New York, Chicago, Jersey City; also at the Hoosac Tunnel (Mass.,) Lake Superior, Colorado and Nova Scotia Mines, Union Pacific and Boston and Hartford Railroads; also in deepening the beds of the Illinois and Michigan Canals, and Des Moines Rapids, and numerous other localities.

The Burleigh Drill is adapted to all kinds of rock cutting in open cut Mining, Tunnels, Sewers, Quarries, &c., drilling holes from 1¼ to 5¼ inches in diameter. The Drills are worked either by steam or compressed air. For all kinds of work under ground compressed air is used, serving as a perfect ventilator, as it is exhausted from the Drill. At the Hoosac Tunnel the compressed air is carried upwards of a mile and a quarter, and at that distance works eight Drills at the same time. Information in regard to the ownership of the different State rights. Prices of Drills, Air Compressors, &c., can be obtained at the office of

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Port Huron and Chicago Railroad Line.

The location of this line of railway is across the entire State of Michigan, and over portions of Indiana and Illinois, and is, as its name shows, a route from the City of Port Huron to Chicago.

Its projectors avow the intention to furnish an additional through route, which shall claim and receive its full share of the superabundant railroad traffic existing between Chicago and the East, and they claim, at the same time, to have located its route through a section of country, whose uncommon natural resources and great fertility cannot fail to bring very heavy local business to the road, and the facts bearing on the case seem to show clearly that their ideas are sound, and the enterprise an assured success.

This line is continuous, but composed of the roads of four different companies, viz: The *Port Huron and Lake Michigan Railroad* connects Port Huron with the City of Lansing; the *Peninsular Railway* (of Michigan) runs from Lansing to the Indiana State Line; the *Peninsular Railroad of Indiana* from point last named to the State boundary of Illinois, and the *Peninsular Railroad of Illinois* connects last mentioned terminus with Chicago.

It was organized in this manner not only to secure the necessary charters from the three State Legislatures, but also because it was believed that *municipal aid* could in this manner be much more readily obtained from the cities and counties on the route, as all experience in this direction goes to show that such communities are far more interested in and more ready to assist small and purely local enterprises directed and urged on by the principal men of the section than larger projects in the hands of those having no direct interest in the welfare of the State through which the roads pass. And after such municipal aid and local subscriptions to the stock had been secured sufficient to place the roads in readiness for the superstructure, it was intended to consolidate the four roads into one. This aid and the subscriptions to the stock having now been secured, the consolidation, we understand, will be effected without delay.

It cannot be doubted that the through business of this line will be enormous; for when we take into consideration the magaitude of the freight and passenger business between the East and Chicago, it will be seen that an additional line, (and particularly one shorter than any of the existing lines,) cannot fail to verify the most sanguine expectations.

For local business, the prospects of the line are unsurpassed. The three States through which its route lies, viz: Illinois, Indiana and Michigan, stand in the very front rank of agricultural States, and for wheat growing Michigan stands at the very head, excelling even New York. Her soil and climate being peculiarly adapted to its production, the wheat crop here is not only abundant and excellent in quality, but it is *unfailing*, and all this crop when produced, must be manufactured into flour, and when so manufactured, it must be transported to a market; and such transportation furnishes one of the best and surest items of business which a railroad can have.

But more reliable than all other business, is the great lumber traffic that will flow in upon this road. For the production of lumber, Michigan stands at the head of all the States and has no rival. The quality of both her pine and hard wood lumber, is known through all the continent, and the *quantity* is practically unlimited. This line will open new forests, and the supply in that section is sufficient to last for fifty years at least, without scarcity.

Then we are reminded of the great beds of iron ore, and gypsum, and of the production of salt (which is very great in the Northeastern portion of Michigan) all of which will contribute to the traffic of the line now in process of construction, which from the business received from all these sources cannot be otherwise than profitable.

Certain it is that the road is not only needed, but the people on the entire line have long been clamorous for its construction, and we are glad now that their hopes are soon to be realized.

We have not learned whether any movement has been made looking to the usual issuance of Bonds to provide superstructure, but we are informed that the two Michigan Companies have made arrangements by which it is furnished to them as rapidly as needed, and from the rapidity with which Rails are arriving both at Battle Creek for the Peninsular Road, and at Port Huron for the Port Huron and Lake Michigan Railroad we judge the information is correct.

Both roads, the Peninsular from the West, and the Port Huron from the East, are striving to reach Lansing with the track at the earliest possible moment, and when this is done, the whole distance completed will be 157 miles.

From present appearances the track laying forces of the Peninsular Company will first reach the capital (Lansing), the Port Huron Road having been somewhat delayed in the commencement at the Eastern end, by the failure on the part of the contractors to complete the crossing and connection with the Grand Trunk Railway at Port Huron.

Concerning the *manner* in which these roads are being constructed, we wish we could say of all Western Roads as we can of this, that it appears to be the determination of the officers that it shall be done in the best and most substantial manner.

The rails used on the Port Huron and Chicago line are from 6 to 10 pounds per yard heavier than those commonly used by roads in the West, and they are fastened by fish joints at the ends, instead of the antiquated railroad chair, which should have been discarded, long ago by every company which desires to construct a durable and safe road.

The managers of this line seem to be determined to present to the public a road which, when completed, will be fit to compete with the great Michigan Central, and Southern Roads; and, therefore, notwithstanding that nearly or quite fifteen per cent. of the expense for iron might have been saved by the use of the 50 pound rail, they have, (as we are glad to see) resolved to incur the additional expense, and construct a road substantial and *safe*, rightly believing that such construction is, in the end, the most economical; and the parties with whom arrangements have been made for furnishing the superstructure have a prominent Civil Engineer on the spot, to see that the road is completed in a manner strictly first class, and that all material furnished is used to the best advantage.

Railroad from Quincy to Burlington.

The railroad from Quincy to Burlington by way of Mendon and Carthage is nearly completed from the railroad bridge at Burlington to Carthage. The Quincy and Warsaw Railroad Company is authorized by an act of the last legislature to build its road from Quincy northerly through Mendon and Carthage, and has contracted with persons to build the line from Burlington to Carthage, within six months from the time when the *bona fide* subscriptions to the capital stock of the company shall amount to the company's estimated cost of grading the line and furnishing the cross ties; they to take and pay for in cash $10,000 of said subscription. The contractors bridge, iron, stock, complete the railroad in everything but the grading and ties, for stock and bonds of the company. The line from Quincy to Burlington will thus form a part of the great thoroughfare of trade and travel by rail from St. Paul and Milwaukee to St. Louis, and finally to New Orleans.—*Quincy Herald.*

Ashtabula, Youngstown and Pittsburg Railway.

On Wednesday a meeting of the citizens of Youngstown and a committee from Ashtabula was held in Mahoning County, Ohio, to consider the project of the Ashtabula, Youngstown and Pittsburg Railway. The people of Ashtabula have long been desirous of getting connection with the Mahoning coal region. For this purpose the Ashtabula and New Lisbon Railway Company was organized, which in 1860 was obliged to suspend operations. In 1864 the southern portion of that line from Niles to New Lisbon was leased, and under a transfer of that lease, the Niles and New Lisbon road was recently completed. The northern portion of the original line still remains unimproved, with nearly all of the track graded to the amount of thirty-six miles, and at a cost of $150,000. It is now desired to complete this road to Bristol, thence build a road through Vienna and Liberty to the depot of the Pennsylvania Central at Youngstown, there to connect with that road for Pittsburg.

At the meeting, Mr. McCreery said that the Ashtabula road could be brought through, making both the shortest and best line from Youngstown and Pittsburg to the lake. He said that General Cass had expressed himself strongly in its favor, and that the Pennsylvania Central interest was favorably disposed to the project. Mr. McCreery presented the following figures of the cost of freight on the ore for a ton of iron in Pittsburg and Youngstown: In Pittsburg the freights on the ore for a ton of iron is $3 36. In Youngstown the cost is $2 52, to which must be added $2 00 for the shipment of pig iron to Pittsburg, making the cost $4 52. In other words, where there is competition, the freight is $3 36 for a distance of two hundred and twenty-five miles; where there is a monopoly, the cost is $4 52 for one hundred and sixty-five miles. Mr. Moore, who was acquainted with the character of the country between Youngstown and Bristol stated that he thought a line could be made to secure freights and be constructed very cheaply. He stated his opinion that this line would be able to bring ore from Ashtabula at a dollar a ton, and the cost of handling and dockage at Ashtabula would be far less than it is now at Cleveland. With reference to the coal carrying trade, there is at least twenty five miles in favor of the project as compared with the Cleveland and Mahoning Railroad. This will make an immense difference on a coal train. By laying the route from the Lawrence depot up Crab Creek, thence across to the Leslie farm, from where they are taking out three hundred tons of coal daily, and from there by the centre of Vienna to Bristol, a very good route could be secured. The right of way would cost little or nothing, the grades would be almost imperceptible, and there would be hardly five feet of cutting on any part of the line. A committee was appointed to raise funds and have a preliminary survey of the line between Youngstown and Bristol.—*Pittsburg Chronicle, Aug.* 14.

Connecticut and Passumpsic Rivers R. R.

The receipts from operations of this road for the fiscal years ending May 31, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$170,172 10	$177,346 47
" freights	302,418 55	330,549 64
" mails	11,160 09	11,117 00
" express	4,950 00	6,000 00
" rents	3,107 96	4,333 97
	$481,808 70	$529,347 08
Expenses, viz:		
Maintenance of road	$94,332 17	$106,241 97
Motive power	88,389 31	70,880 46
Fuel	37,466 38	38,528 60
Oil and waste	4,521 74	6,596 70
Passenger department	18,315 88	21,420 35
Freight "	27,141 25	27,031 15
Loss and damage	4,053 27	3,244 14
Repairs of buildings	3,208 65	8,664 96
New wood sheds	.....	5,000 00
Depots and land	.....	4,536 00
Insurance	2,654 61	5,587 55
Tools and machinery	7,910 24	4,350 91
Miscellaneous	31,900 36	35,080 07
	$319,894 46	$337,162 95
Net earnings	$171,914 24	$192,184 13

A comparison of the earnings of the past with those of the preceding year, shows an increase of $47,538 38; with an increase in expenses of $17,268 49—making the increase in net earnings, $20,269 89.

The company have 13 locomotives, 11 passenger, 7 baggage and mail, 131 box, 71 rack, 13 coal, 104 platform, 10 ore, 2 derrick, 20 gravel, 28 hand, 12 wood, 1 drovers' saloon, and 4 freight saloon cars, valued at $330,835. Value of materials on hand, $152,823 76.

There have been added to the equipment during the year, 1 freight locomotive, 1 smoking and baggage car, 20 platfarm cars, 7 rack cars, 14 box cars, and 1 large snow plow. Three locomotives, 11 platform and 1 box car have been thoroughly repaired; and 7 platform, 11 rack, 10 gravel, and 1 freight saloon car rebuilt. A new depot of stone has been built at North Thetford; also a small depot at St. Johnsbury Centre for the accommodation of passengers; and five large wood sheds have been built. In repairs of track, 414½ tons of new and re-rolled iron, 8,866 repaired rails, and 29,969 sleepers have been used. The report says:

The track and road-bed are in good condition. Equipment, (additional,) amounting to $39,894, has been built at our repair shops and charged to construction.

Two dividends of three per cent. have been declared during the year, amounting to $129,691 58, including government tax, ($6,484 58.)

It will be seen, on reference to the Treasurer's trial balance, that the bonded debt of the company has been reduced the past year $53,800, and notes payable $99,000, leaving outstanding, in bonds and notes, $795,000, which mature Dec. 1, 1876.

The repairs of freight and passenger cars, and rebuilding of rack and platform cars, will more than make good all deteriorations.

The increase of freight has made it absolutely necessary to increase our rolling-stock the past year, and the prospective increase will require further expenditures the coming year.

The necessity of a northern connection has been considered of vital importance to this corporation, and in accordance with a resolution passed at the annual meeting of the stockholders, July 31, 1867, the directors have entered into a contract with the Massawippi Valley Railway Company to lease, when completed, their road, connecting ours with the Grand Trunk at Lennoxville, Province of Quebec, for the term of 999 years, on terms satisfactory to both corporations.

The Massawippi Valley Railway is now under contract to be completed, ready for use, July 1, 1870. A large force is now employed in grading and bridging; the iron is all purchased, and some 1,800 tons delivered. The known energy of A. P. Balch, Esq., the contractor, is a satisfactory guarantee that the road will be ready for operation at the time named in the contract.

An examination of the annexed statement of the comparative business, expenses and earnings for twenty years, and the greatly increased business upon reaching Newport, October, 1863, show a steady increase of business that can be relied upon in future, and which must enable our corporation to pay its stockholders satisfactory dividends.

The number of miles run by passenger trains during the year was 89,302; by freight trains, 84,829; other trains, 16,278—total, 190,409. Number of passengers carried, 118,019; do., carried one mile, 3,747,271. Tons of freight carried, 87,222; do., carried one mile, 4,799,290.

TRIAL BALANCE, JULY 20, 1869.

Construction	$2,996,180 99

President.—HENRY KEYES.

Vice President.—JOSIAH STICKNEY.

Directors.—Henry Keyes, Josiah Stickney, Emmons Raymond, William Thomas, Gardner C. Brown, Thomas Upham, Benj. P. Cheney, F. S. Carruth, Elijah Cleveland, Henry Chase, Timo. P. Redfield, Albert Knight, Benj. Pomroy.

Treasurer.—N. P. LOVERING.

Secretary.—ELIJAH CLEVELAND.

Superintendent.—A. H. PERRY.

Central Pacific Railroad.

Messrs. Fisk & Hatch, Bankers and Dealers in Government Securities, and Financial Agents of the Central Pacific Railroad Co. of California, No. 5 Nassau Street, New York, write as follows under date of August 10th, 1869:

DEAR SIR:—The Pacific Railroad, so long the theme of conjecture, is a fact accomplished. Passengers, mails, and freight pass between New York and San Francisco with the same regularity, celerity and convenience as between Boston and Washington; the Pacific coast has been effectually brought within the national railroad system. Considering the extent of the undertaking, the nature of the country to be traversed, the vast distances whence labor, supplies and materials were drawn, together with the rapidity of its construction, it stands unrivalled among peaceful enterprises. Had fifteen years been occupied in the work, instead of five years, its completion would have been hailed as one of the grandest events in our national progress.

The rumors which for awhile prevailed of the faulty character of portions of the work have been dissipated since the opening of the through line has afforded opportunity to thousands of examining it. Although barely three months have elapsed since the opening, the testimony is almost universal to the excellence of the road and to the energy of the Companies in bringing it to the highest state of perfection in the shortest possible time. Railroads *grow* to perfection, and it may be safely asserted that the past affords no parallel to the rapidity of completion of either track, structures or equipment of the Main Line of the Pacific Railroad. Especially is this true of that portion lying west of Salt Lake, owned and built by the Central Pacific Railroad Company; which stands to-day as solid, finished and well-furnished as many of the oldest and most prominent lines in the country. In the words of the Government Commissioners, who but recently inspected the whole line, "we are satisfied that all has been done in good faith."

This splendid monument of the genius, skill and energy of the Central Pacific Railroad Company is due in part, at least, to the efforts of those who aided us in securing the means, without which the enterprise must have halted. It is with peculiar pride, therefore, at this time, that we point to our oft-expressed expectations, which must have seemed sanguine, and to the glorious consummation of the work, as our vindication. From the beginning, we have had faith in the sagacity, vigor and integrity of the Company's operations; and we have the same faith in their wisdom and success of maintaining and operating their great road as they have shown in its construction.

We are gratified to be able to present conclusive evidence of the remunerative returns of the enterprise as a business investment, independently of the important national benefits and prestige to be derived from it. The business of the Central Pacific between Sacramento and Promontory Point, between which places it has been operated for the three months since the opening on the 10th of May, are (approximately) as follows, mainly in gold:

Gross Earnings,	Operating Exps.,	Net Earnings.
$1,703,350	$920,341	$783,009

or a revenue of *over seven millions per annum, of which three millions are net profit*, available for interest payments. The aggregate of the annual interest payments for the past year was $994,010 00, and it is not probable they will be increased materially.

These figures have been attained, of course, while the facilities of the Company were at their newest and crudest stage, and at the same time that a large amount of unproductive transportation was necessary. Both freight and passengers are increasing so rapidly that the Company have made important reductions in the rates as fast as their facilities permitted them. They will adhere to the policy of encouraging the largest traffic consistent with the requirements of their obligations. The mineral deposits along the route of the road continue to attract attention and add to its local business; while the low prices and easy terms offered to emigrants must tend to increased settlement on the Company's lands, which are of great value. We feel, indeed, that the business of the Central Pacific is in its infancy; and that its development to unexampled proportions in a very short period will be a new cause of astonishment.

Yours respectfully,

FISK & HATCH.

Memphis, El Paso and Pacific Railroad.

The completion of the Central and Union Pacific roads, and the opening of the great line of transcontinental railroad communication of which they form an integral part, was an event of more than local, or even National importance. It was undoubtedly a splendid triumph of American enterprise, and the burst of enthusiastic applause and congratulation which greeted the announcement of "the last spike driven," shows that the greatness of the work then completed and its value to the country at large was fully appreciated by all classes of the people. It is unfortunate, however, and deterimental to the commercial interests of a large and important part of the United States, that this event should have distracted so large a share of public attention from other enterprises of equal consequence, that will one day perform as important a part as the line already completed in promoting the material interests, developing the resources and adding to the wealth of the country. Prominent among these stands the Memphis, El Paso and Pacific Railroad. This important enterprise, undertaken and partially completed before the beginning of the late war, has been to some extent lost sight of by the public during the excitements of the past few years; but with the dawn of a new era of peace, prosperity and progress it again demands the attention which, for the time, was bestowed on other and, in some instances, less important subjects. Although between fifty and one hundred miles of this road are already completed, the project of transcontinental communication on the line of the thirty-second parallel of north latitude, the best of all practicable American routes to the Pacific, is still in its infancy, and the facts concerning it which we have compiled for the information of our readers will, doubtless, be found of much general interest and value.

The Memphis, El Paso and Pacific Railroad Company was incorporated by an act of the Legislature of the State of Texas, approved February 4th, 1856, and by an act supplemental and amendatory, approved February 10th, 1858. The first section of the act of incorporation confers upon the president and stockholders all the rights and privileges usually belonging to corporate bodies; the second gives the company so constituted the right to construct and operate a railway "commencing at the Western terminus of the Mississippi, Ouachita and Red River Railroad, or the Cairo and Fulton road on the Eastern boundary of the State of Texas, between Sulphur Fork and Red River, and running thence westwardly to the Rio Grande, opposite to or near the town of El Paso." The point where the two roads come together has been designated by actual surveys and the place named Texarkanna. Since the date of the above mentioned charter the company has been authorized to build a branch road from Jefferson, about forty-five miles south of this point, a town of considerable commercial importance on the Red River from which the annual shipments of cotton amount to over fifty thousand bales.

As will be seen below, the company have acquired, by purchase, etc., not only connections in the East, by which their road will be continuous with all the main lines running to the great Atlantic and interior cities and States, but also the right of way all the distance to the Pacific, with the exception of about 150 miles in New Mexico, which will also be secured. Thus their line will open the "strong box" of the precious metals in both Arizona and Northern Mexico, the road passing between them and near to both. The countless treasures of Sonora and Chihuahua in Mexico are world-renowned, and of Arizona it can be said, that it is a new California and new Nevada combined. This road may, therefore, be considered to be the true way alluded to by the President that shall open the "strong box," from which our national debt can be paid. Up to the present time every condition of the charter has been fully complied with by the company.

To aid the completion of an enterprise of such vital importance to the future agricultural and commercial interests of the State, the Legislature of Texas granted the company, in addition to the right of way, and all important and necessary privileges, 10,240 acres per mile, for every section finished and equipped according to the conditions of the charter. This liberal policy on the part of the State shows the favor with which the people of Texas regard the project. As an evidence of the determination of the company as well as of the State government, to fulfill the conditions mutually imposed by the charter, we may mention the fact that for the section of fifty miles graded by the first of March, 1861, the company received the proper certificates for the tract to which they were entitled. Although the loss and delay experienced by the company during the war prevented an immediate resumption of the work after the cessation of hostilities, the temporary hindrances were not fatal to the prospects of the enterprise. It was decided by the stockholders in 1867, to resume the work of construction as soon as the necessary money can be raised. Before examining the financial condition of the company, or discussing its prospects, let us examine the character and resources of the country along the line of the proposed road as an index to the importance of the scheme and the desirability of prosecuting it to a successful issue.

Our readers do not need to be informed that, in extent of territory Texas is nearly five times as great as the State of New York. Owing to its peculiar topography, Texas is but thinly populated as yet. The absence of navigable rivers has rendered railroads indispensibly necessary to the full development of the vast tracts of fertile land now lying outside the busy circles of the world's activities. The extraordinary natural advantages of the State, notwithstanding the want of navigable streams, has attracted to it a population of the most enterprising and energetic character, and every inducement is offered to the people of the Northern and Western States to emigrate thither, which they are now doing in considerable numbers. The climate is genial and salubrious, and the soil wonderfully fertile, yielding the most valuable products in abundance. Wheat, rye,

oats, barley and sorghum will grow there as well as in New York or Pennsylvania; and besides these, many other staple products, such as cotton, hemp and tobacco, are peculiarly adapted to its generous soil. It is said that there is enough new and untouched cotton land in the State to raise an annual crop equal to all the other Southern States combined, besides a wheat and corn crop equal to any three States of the Union. As a stock raising country it is without a parallel. There is pasturage enough the year round to keep cattle in the best possible condition, without necessitating their being housed or fed in any season. Fruits of all kinds, grapes, peaches, apples, pears, plums and apricots, grow in the most luxuriant profusion. The mineral resources of the State are also proportionate to the extent of its territory. In many localities iron, lead and copper, of the best and purest quality, is found in vast quantities, situated favorably for mining operations. Many of these valuable deposits are known to exist in the lands that will come into the possession of the company with the completion of the road. There are also immense coal beds in the valley of the Brazos, besides marble, gypsum, lime stone and steatite, which are found in great abundance in many parts of the State. In the neighborhood of Pecos river, along the proposed line of the road, there are immense beds of pure salt, found in ponds where millions of bushels may be had for scooping it up. These are but a few of the natural advantages which characterize the country to be opened up by the railroad; but our limited space prevents our dwelling on this interesting topic at greater length.

To properly appreciate the importance of such a line as the Memphis, El Paso and Pacific Railroad, its character as a national work, as well as a local improvement, must be carefully and intelligently considered. By reference to any railroad map it will be seen that the railroad system of the United States is approaching, by converging lines, the Eastern borders of the State of Texas, where this road commences. This has resulted wholly from the geographical conformation of the Southwest, and not from any concerted action on the part of the companies whose lines converge towards the future great railroad centre of that section of the country. By these diverging lines the Memphis, El Paso and Pacific road will open direct communication between the Pacific at San Diego, and San Francisco, with every important commercial center of the East, South and West. By the Cairo and Fulton road it will connect with the Illinois Central, and communication will thus be opened with Chicago, St. Louis, and the entire Northwest, where a market for the products of Texas will at once be opened. By the Memphis and Little Rock road, which intersects the Cairo and Fulton, communication will be established with Charleston, Savannah, Richmond, New York, and all the interior cities on the lines of railroads centering at those points. To effect this latter connection only one hundred and fifty miles has to be built, from Little Rock to the Texas line, and the action of Congress during its last session in reviving the land grants to this road, insures the early completion of the work checked by the late war. Connection with the Gulf of Mexico will be established by the Texas Central road from Galveston to Houston. Besides these there are the Vicksburg and Shreveport and the Gaines Landing roads from the Mississippi, the last of which is graded within forty-five miles of the Texas line. From the North the road from Lawrence, Kansas, will intersect with it about one hundred and forty miles from the initial point. These connections with the Memphis, El Paso and Pacific road will open up the heart of Texas, the best agricultural part of the United States, to the people of the whole country. There is no richer belt of land in any part of the Union than that through which the road passes for several hundred miles. The luxuriant ferility of the Red River valley, and its ability to produce cotton and tobacco, as well as all the cereals, does not need to be proved by facts other than those already known to the people of the United States.

The stretch of country lying between the thirty-first and thirty-fourth parallels of latitude, the most of which would use this road for the transportation of its products, is equal to one hundred and forty-one thousand square miles, or nearly the aggregate area of Georgia, Alabama and Mississippi, and with the capacity to produce as much cotton as the three. The present population of Texas is estimated at less than eight hundred thousand, but it is confidently believed by the State authorities, that the impetus which the construction of this road will give to immigration from other parts of the country will swell the population to three millions within ten years. But aside from these important considerations, the line of the road is along the route which nature seems to have designated for the construction of railroad communication between the Atlantic and Pacific Oceans. Its route is the shortest by several hundred miles, passing through a country capable of sustaining a dense population; and where neither the construction nor operation of the road would be interfered with at any season of the year by the frosts or snows of our Northern winters. The surveys of the several proposed routes to the Pacific, made a number of years ago by the United States Government, demonstrated the fact beyond question that the line of the Memphis, El Paso and Pacific road, following as nearly as possible the thirty-second parallel of latitude, is the shortest, cheapest and best route to the Pacific Ocean. The Secretary of War, in his report, dated February 27th, 1855, dwells on the importance of this road regarded from a military stand point, and treats at considerable length of the necessity of providing such a road for the protection of our Southwestern borders.

In view of the facts above given, it seems hardly necessary for us to discuss the question of whether or not it would pay to build this road; but in addressing the American people it is necessary to satisfactorily answer the question, "Will it pay?" before the public mind is satisfied on the subject of any great material enterprise, whatever its object may be. According to the estimates of Mr. J. M. DANIEL, Chief Engineer of the Memphis, El Paso and Pacific Railroad Co., the total cost of building and equipping a first class road for 813 miles through the State of Texas, will be $21,598,185, and the average cost per mile, $26,566. The average cost of the first six hundred miles, from Jefferson, would be $20,000 per mile; the heavy work within the Rio Pecos and El Paso, together with the additional cost for labor and materials, making the general average given above as the cost of the road per mile. It is believed that these figures are approximately correct, if not absolutely so. Let us now turn to the credit side of the account. At the completion of the road, El Paso would have direct railway communication with the principal cities of the United States, as shown by the following table of distances:

	Miles.
New York	2,227
Washington	1,991
Richmond	1,957
Wilmington	1,792
Charleston	1,641
Brunswick	1,560
New Orleans	1,313
Galveston	868
Vicksburg	1,010
Gaines Landing	933
Memphis	1,068
St. Louis	1,310
Guaymas (Mexico)	400
San Diego	838
San Francisco	1,338

These connections depend on chartered roads being built east of El Paso to the Mississippi River—charters not having yet been granted to them running west of that point; but in either case the construction of these roads is only a question of time, as the charter can be obtained and the work commenced whenever the necessity for them is found to exist. Under these circumstances, the Memphis, El Paso and Pacific Railroad cannot fail to pay a handsome dividend on its cost. Basing calculations upon the products and present population of the country, it is easily demonstrated that the construction of the road would be a good investment without the valuable land grants made by the State of Texas. When completed to Paris, a distance of 141 miles, it would transport one hundred thousand bales of cotton annually, this amount being increased from year to year with the growth of population and the consequent cultivation of a greater number of acres of cotton land. The freights which this would pay, at $2 50 per bale, would be $250,000. The value of goods carried the other way would be equal to this; then add wool, leather, hides and cattle, which in the aggregate would not be less. The lumber trade of the State is also an item of primary importance—not less than one hundred million feet of pine, cedar and other valuable woods being transported at great cost on wagons from the country, to be traversed by the road when finished. In addition to this business now awaiting the opening of steam communication with the Mississippi, the passenger travel and the transportation of United States mails, troops and supplies, would certainly pay the expense of operating the road, leaving as net earnings upon the first 150 miles not less than $750,000, or 40 per cent. of its cost. If such results could reasonably be expected without the land grant, the exhibit shows still more favorably for the company when we consider the grant of 10,240 acres per mile for building the road to El Paso; or 1,536,000 for the construction of 150 miles, for which money is now being raised. The value of such grants in aiding the construction of railroads is not a matter of theory but of experience. On the vast expanse of territory that will come into the possession of the company, no per

centage of its earnings or of the money received from the sale of lands will be paid to the State of Texas. They will be so much added to the value of the franchise, on which only the stockholders have any claim whatever. Estimating their lands worth only $5 per acre, and the bonus from the State is $51,000—or $30,000 per mile more than the cost of the road for the first four hundred miles. For one half of this grant of land the company is privileged to choose from the unimproved public domain in any part of the State, and establish its claim to such quantities and in such places as it shall see fit. It is probable, therefore, that the value of land chosen will far exceed $5 per acre, and that its worth will be greatly increased with the growth of population within the next ten years. With its section already graded and ready for the rails, its reservations of lands, its corporate rights secured and unquestioned, and its freedom from encumbrance by debt, this road certainly presents great claims to consideration as a safe basis for investment.

To facilitate the completion of this great national work, the company, through the agency of General JOHN C. FREMONT, one of the leading directors, are at present negotiating a loan in the French market, in which his efforts have been completely successful. The entire loan of $10,000,000, based on the land grants of the company for the first 300 miles of the road, sold readily to a party of leading French capitalists, by whom the bonds were put on the market. The demand for the stock was so great that their market value rose rapidly from week to week. Through the agency of rival interests, on this side of the Atlantic, however, the *bears* of the Bourse were not idle in their efforts to depreciate the value of the stock. Owing to the popular misapprehension concerning the exact character of the enterprise, some of the French brokers, it is said, secured purchasers for the bonds by representing as accomplished facts what are, as yet, only the purposes and intentions of the company. For these misrepresentations the directors disclaim all responsibility, as all their statements were warranted by official documents, of which copies were freely circulated. Seizing on the misstatements of the bulls, the bears availed themselves of the opportunity thus offered to injure the character of the enterprise and those connected with it. Articles of the most damaging character appeared in some of the French journals, denouncing the scheme as a swindle and denying its official recog nition by the United States Government. With a view to sustaining and vindicating their reputation the agents of the company instituted libel suits against the perpetrators of these falsehoods. At this time Mr. WASHBURNE arrived in Paris, and was immediately appealed to by the defendants for information calculated to damage the company. Without properly appreciating his duty to sustain the reputation of his countrymen, until the fraudulent character of the scheme was proved, Mr. WASHBURNE informed these parties that he would apply to the Department of State for instructions before venturing a favorable opinion concerning the enterprise. Owing to a mistake in the name given Mr. WASHBURNE, designating the road as the "Memphis Transcontinental," or something similar, the Secretary of State, in reply to his inquiries, said that he had failed to find any mention of such a company in the record of Congressional legislation; adding that Congress had not guaranteed the interest on the bonds of any company. Although this reply had no reference to the Memphis, El Paso and Pacific Railroad, the reporters of the press knowing of this company's negotiations in the French market, connected the reply of the Department with that company. Thus it will be seen that the use of a wrong name—unintentionally, we imagine—caused an entire misapprehension with regard to the company. The negative statement of the Secretary of State was, of course, amplified and exaggerated by the French press, and the people were thus made to believe that the enterprise was nothing more than a huge swindle intended to defraud French capitalists out of their money. At this state of affairs the officers of the company interposed to set the matter right. A full and explicit statement of the character and prospects of the enterprise was laid before the Secretary of the Interior, to whom the matter was previously referred, and the result was most satisfactory in every respect. From these documents officially accepted by the Department, the following facts are shown: 1st, the entire validity of the company's charter in Texas; the fact that 10,240 acres of land per mile have been granted by that State; the right of way on the proposed line, and the right to form connections and consolidations with other lines. It was also shown that the House of Representatives had twice passed a bill granting the right of way to the company, and the favorable action of the Senate was only prevented by want of time during the last session; that Senator HARLAN'S bill granting right of way and guaranteeing six per cent. annual interest on the company's bonds for fifty years, was now awaiting the re-assembling of Congress; and that there was no reasonable doubt of the matter receiving favorable consideration by the committees to which such questions are referred. In view of this accumulated evidence, of which we have given only a brief outline, there can no longer be any doubt, either here or abroad, as to the character of the enterprise. As a national work of the greatest importance to the Southwest, and, indeed, to the entire country, it deserves the honest and hearty support of the Government and people of the United States. That this will be freely given it, and that the most liberal policy will be pursued by Congress towards this enterprise, we have no reason to doubt.

This company has acquired by purchase, the rights, franchises and property of the San Diego, Gila and Southern Pacific and Atlantic Railroad Company, which was incorporated under the laws of the State of California, to construct a railroad from San Diego to Fort Yuma upon the Colorado, and which owns some very valuable lands.

An agent who was sent out some months since to examine into the affairs of this company, and to investigate the titles to the lands, reports the titles to the lands complete, and that they are of sufficient value to pay for the construction of the whole road from San Diego to Fort Yuma. Gen. Morton C. Hunter, of Indiana, will leave here the first of September, with a corps of engineers for the purpose of commencing operations at once at San Diego.

This company has also acquired by purchase, the rights and franchises of the Arizona Railway Company, which was incorporated by the Legislature of Arizona, with valuable privileges, to construct a railroad across that territory from the Colorado, opposite or near Fort Yuma, to its eastern boundary line. And thus, it will be seen that the right of way has been acquired already, all the way to the Pacific, excepting through a small portion of the territory of New Mexico, and efficient steps are being taken to secure this.

Railroads in Michigan.

The city of Lansing has reason to be proud of the success of railroad projects in the last four weeks. Five roads are placed in a position that renders their ultimate completion only a question of time. The iron has been secured for the Port Huron and Lake Michigan Railroad from Port Huron to Lansing; also, for the Peninsular Railway, from Lansing to Battle Creek; also, for the Iona and Lansing Railroad, from Lansing to Greenville. The guaranty by the Michigan Southern consolidated line of the bonds of the Northern Central Michigan Railroad will cause it to be speedily completed, and the same company will extend a helping hand in the same way to the Lansing, St. Johns and Mackinac road. The completion of the Detroit, Howell and Lansing road, and the extension of a road from this city to St. Joseph; from Smith's Creek to Lansing, and a direct line from Toledo to Lansing, will give the capital of the state ten iron arms stretching to every point of the compass.—*Lansing Republican.*

Grand Rapids and Indiana R. R.

The announcement that arrangements have been effected by the Grand Rapids and Indiana Railroad, and the Kalamazoo, Allegan and Grand Rapids Railroad, to connect at this point, coupled with the announcement that the building of the former road between this city and Kalamazoo is indefinitely postponed, is calculated to confirm in the minds of those who have all along contended that it was not the intention of the company to build that portion of the line, that their suspicions were well founded from the first. That part of the Grand Rapids and Indiana railroad between Fort Wayne and Sturgis is under contract, and it is to be finished immediately, and trains run over it regularly, in connection with the 'Gardner' road. The tracks of the Grand Rapids and Indiana and the Kalamazoo, Allegan and Grand Rapids roads, have been connected, and cars will hereafter be transferred at this point, avoiding reloading as heretofore.—*Grand Rapids Eagle.*

☞ A project is on foot to connect the Kansas Pacific and Union Pacific railways by a road from Manhattan, Kansas, up the Republican River Valley, intersecting the Union Pacific railroad near the mouth of Plumb creek. The road will be easy of construction, and lies through the finest country in Kansas, already thickly settled. The probable length of this road will be two hundred miles.

☞ The Concord and Rochester railroad company have been organized by the election of the following board of directors: Nathaniel White, James R. Hill, Benjamin A. Kimball, John V. Barron, Concord; Eliphalet Fose, Strafford; John M. McDuffee, Rochester; John M. Babcock, Barnstead. President, Nathaniel White; Treasurer, L. D. Stevens; building agent, G. A. Pillsbury,

☞ Hartford, Conn., has voted to issue bonds to the amount of $750,000 to raise funds to pay the town subscription to the Connecticut Western Railroad.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, August 21, 1869.

Stock Exchange and Money Market.

Money has been in fairly active speculative demand, most of the week, at from 5@7, generally at 6@7 per cent. on call. The Gold and Stock operators have been the principal borrowers. There has not been much inquiry from the dealers in the public funds, who have been comparatively idle, the better part of the week. The mercantile call for money has been somewhat brisker, and discounts on prime to good business paper, have been quoted at from 7@9 per cent. per annum, The city banks have lost strength, since our last. the deposit averages having been reduced over 1¼ millions; the legal tender reserve, nearly 1¾ millions; and the specie hoard nearly 1⅞ millions; while the loan and discount averages have been increased about 1⅝ millions. The U.S. Sub-Treasury closed the week with cash balances of 94⅛ millions, of which 11⅛ millions were in currency On Tuesday, of the current week, its aggregate balances were 92⅛ millions, including nearly 11½ millions of currency. Of the currency reserve, about two-thirds are in legal tender notes, and one-third is in national bank notes. The U. S. Sub-Treasurer at this port this week, will disburse $2,350,000 in the purchase of $2,000,000 Five Twenty bonds and will take in about $1,340,000 in payment for gold.

The specie reserve of the city banks according to the latest return is $24,154,499, against $22,-953,850 same time last year. The city bank deposits are now $198,952,711, against $223,-561,087 week ending Aug. 15, 1868. The legal tender reserve amounts to $54,730,089, against $72,935,481 same time last year. The circulation now stands at $38,992,257, against $24,114,087 same time last year. The loans are now $266,-505,365, against $277,808,620 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $97,136,934 a day, against a daily average of $102,479,239 the preceding week, and $102,479,239 the week ending with July 31, 1869. The current week's exchanges average about $96,195,000 a day. The city banks, last week, reported a further loss of $1,849,426 of specie, $1,267,297 of deposits, and of $1,326,745 of legal tender notes. They increased their loans, $1,626,008; and their circulation, $44,272.

The city bank exchanges on Wednesday were $92,813,175, and the resulting balances, $3,622,-587.

National Bank notes to the amount of $212,347 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $317,138,566, against $282,-555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $17,377,235, leaving, with the existing 1,620 banks, (having an aggregate capital of $422,659,260,) an actual circulation at this date, of $299,761,331. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $343,133,-850; and for the public deposits, $20,394,500—making a total of $363,528,350. The Treasury Department last week redeemed and destroyed $301,500 of worn and mutilated fractional currency, and issued $146,808 of new. The outstanding amount of fractional currency on the 1st of Aug., was $31,030,300, against $32,062,528 on the 1st of July.

The U. S. Sub-Treasury receipts, week ending with Aug. 14, were $4,031,427 in coin, including $3,299,423 from customs duties, and $2,167,154 in currency; payments, $2,504,194 in coin, including $382,659 of coin interest, and $7,290,145 in currency; balance at the close of the week, $94,312,-140, including $79 185,214 of coin, and $11,199,-399 of currency, against $92,193,894 at the close of the preceding week, showing an increase of $2,118,246. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $597,630, of coin including $501,000 from customs, and $607,704 of currency and payments, $76,672, in coin including $57,103 of coin interest and $371,963 in currency. On Tuesday, receipts, $890,554, in coin including $462,000 from customs, and $200,697 and payments $63,746, in coin including $38,487 of coin interest and $203,755 in currency. The balance at the close of business on Tuesday stood at $92,-111,546, (including $11,432,081 of currency, and $80,532,973 of coin,) against $93,755,622 a week previous; and $94,192,874 on July 31, 1869. The aggregate receipts of the office in July were $88,-

513,855, including $10,502,046 from customs; aggregate payments, $76,502,624, including $17,384,486 of coin interest.

The outstanding amount of coin certificates on the 1st of Aug. was $36,725,840 against $30,489,640 on the 1st of July. The Sub-Treasurer at this port, last week, retired $3,178,422 of coin certificates through the receipts for customs.

Government revenues have been on a more liberal scale, since our last, particularly in the form of customs. The excises, last week, yielded about 5⅜ millions; customs at the port of New York, $3,299,423, and at the outports about $1,050,000 (in coin) more, making the grand total income for the week equal to about $11,246,721 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 31 millions.

Gold has been offered much more freely, and as the speculative demand has been spiritless, most of the week, the price has been seriously depressed, the range having been from 132¾ to 135⅛ and the closing quotation on Wednesday 133¼ as against 135⅛ on Wednesday of the preceding week. The customs call has been more than usually active, but has been easily met at the going rates. There has been less demand from shippers. The exports last week were $784,116; on Tuesday of this week $124,500.

The following is the statement of the New York Gold Exchange Bank for the week ending Saturday, the 14th day of August, 1869:

Average am't of loans and discounts	$1,415,361
Average amount of specie	769,073
Average amount of deposits	1,536,382

The customs of the port on Wednesday yielded $438,000. The U. S. Sub-Treasury disbursed $118,792 of coin interest, on that day.

The customs demand for Gold last week, averaged $549,904 a day; thus far, this week, it has averaged $481,500 a day, or equal to a weekly aggregate of $2,889,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $30,592, and since Jan. 1, $9,815,380, against $4,524,114 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $82,075,092, again $71,896,966 same time in 1868. At San Francisco, from Jan. 1, to July 21st, 1869, $4,216,000, against $4,385,731 same time last year.

The coin balances of the Government at this port on Wednesday morning, was about 80½ millions.

The exports of specie, from this port, last week, were $784,116, against $653,493 same week last year; total, since Jan. 1, 1869, $24,220,964, against $63,238,187 same time last year. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $382,659, and since Jan. 1, 1869, $64,122,135, against $59,757,581 same time in 1868. The specie exports from San Francisco, from Jan. 1, to July 16, 1869, were $22,439,532, against $21,780,419 same time in 1868.

The U. S. Treasury receipts from customs at all ports from July 1, to Aug. 14, were about 26 millions.

Foreign exchange has been more abundant and quoted a fraction lower on a limited business. Bankers' prime sixty day bills on London closed heavily on Wednesday at 109⅝@109⅞, and on Paris to 5.18¾@5.15; sight bills on London to 110⅛@110½, and on Paris to 5.13¾c.@5.11⅞. The offering of produce bills has been quite extensive this week. The week's exports of domestic produce have been to the currency value of $4,568,552, making the total since Jan. 1, 1869, $117,186,539, against $105,061,555 same time last year.

Government securities have been more freely offered, though not in very large amounts; and as the demand from all sources has been much restricted, prices have declined, Government bought in through the Sub Treasury here on Wednesday, bonds to the amount of only $1,136,200 all that were actually offered, at from 117.75 a 119 net. This circumstance was interpreted in the street as indicating a real scarcity of the Public Funds. As an immediate consequence the demand revived promptly, partly on speculative account, and prices, which opened weak and lower, closing more firmly and buoyantly, the improvement, from the lowest figures of the day, being ⅝@1 per cent.

The foreign houses have been sellers rather than buyers, at the prevalent figures.

U. S. sixes of 1881 closed here on Wednesday at 123@123⅛; U. S. Five-twenties of 1862, ex-coupon, 123@123⅛; U. S. Five twenties of 1864 at 121⅜@121½; U. S. Five-twenties of 1865 at 121⅜@121½; U. S. Five-twenties of 1865, consolidated, 120@120⅛; U. S. Five-twenties of 1867, 120¼@120⅜; U. S. Five-twenties of 1868, 120@121⅜; U. S. Ten-forties at 113½@113⅝; U. S. Six per cent. currency bonds, 108⅜@108⅝.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 4.	Aug. 11.	Aug. 18.
Consols	93	93	92⅞
U. S. 5-20's of 1862	83⅛	83⅜	83¼
Erie	19¾	19½	18½
Ill. Central	94⅛	94½	94¾

Railway and miscellaneous stocks have been less active, as a rule, and quite variable in price.

There has been less inquiry for Breadstuffs and Provisions, at irregular prices. Coal has been in limited request, and anthracite from yard has been reduced in prices $1.50 per ton of 2,000 lbs. Cotton has been brisker and firmer. Middling upland cotton closed buoyantly on Wednesday at 33¾@34 cts. per lb. The stock of cotton now here is estimated at about 15,000 bales. The receipts at the port this week, have averaged about 350 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 2,308,500 bales, against 2,347,000 bales same time in 1867–'8; exports, same time 1,435,000 bales, against 1,661,000 bales same time in 1867–'8; stock on hand at latest dates, 27,500 bales, against 57,500 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 15,810 pkgs., against 14,404 pkgs., same time last year. From Boston, 6,025 pkgs., against 6,391 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been in far demand, at from 10@16c., per lb.; week's receipts, 6,802. Milch cows, very dull at from $40@$110 each, receipts, 84. Veal calves in more request at from 7@12c. per lb.; receipts, 2,020. Sheep and lambs less active at from 4½@7c., and 7@9c. per lb.,; receipts, 31,655. Swine in demand at from 10@10⅜c. per lb.; receipts, 22,378.

Foreign goods have been moderately dealt in without any remarkable changes in values. The week's dry goods imports were valued at $2,059,677, and of general merchandise $2,738,937.

Freights, have been less active but quoted higher on a light supply of room. For Liverpool we quote flour at 2s.@2s. 3d. by sail, and 2s. 9d. by steamer, per bbl.; grain at 8d. by sail, and 10⅛d. by steamer, per bushel; cotton at $\frac{3}{16}$d. by sail, and ¼d. by steamer, per lb.; and heavy goods 20s.@35s. by sail, and 30s.@45s. by steamer, per ton. Total number of vessels in port on Wednesday, 472.

The New York exports, exclusive of specie, for the week ending Aug. 17, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$2,772,663	$4,568,552
Prev. reported	102,288,892	112,617,987
Since January 1	$105,061,555	$117,186,539

The imports for the week ending August 14, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$1,933,412	$2,059,677
Gen. merchandise	2,379,486	2,738,937
Total for the week	$4,312,898	$4,798,614
Previously reported	151,219,627	189,607,392
Since January 1	$155,532,525	$194,406,006

The balance in the Sub-Treasury on Wednesday was $93,550,243 20.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 31st ult., inclusive, during the years 1868 and 1869, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1868..	115,900	4,993,000	7,313,900	326,500
1869..	163,600	6,993,200	2,473,300	11,800
Inc ..	47,700	1,999,800	*4,840,600	*314,700

* Decrease.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows an increase equal to 447,660 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of July in the years indicated:

	1867.	1868.	1869.
Canal opened—	May 6.	April 23.	May 6.
Flour, bbls..	54,000	115,900	163,600
Wheat, bushels...	286,000	4,993,000	6,993,200
Corn, bushels	4,812,300	7,313,900	2,743,300
Barley, bushels..	30,100	326,500	11,800
Oats, bushels	1,551,100	3,956,600	1,577,200
Rye, bushels.....	125,800	159,500	210,600
Malt, bushels....	116,700	217,300	112,600
Feed, lbs.....	.....	.....	4,144,900

The figures for 1868 cover 45,200 bbls. flour 2,811,500 bush. wheat, 694,500 bush of corn, 321,700 bush. barley, 104,100 bush. rye, 941,900 bush. bush. oats, 54,300 malt, estimated to have been detained on the canal by ice during the winter of 1867 and 1868.

Delaware, Lackawanna and Western R.R.

This company is once more offering increased facilities to the public. Its latest enterprise is the extension from Boonton to New York, *via* Paterson, giving direct communication with the coal regions of Pennsylvania and the flour markets of Northern New York, as well as the lumber districts of Southern and Central New York. When the new road is completed there will be three avenues by which New York is supplied with coal through the State of New Jersey, the others being *via* the Erie, supplying Pittston coal, and the Morris Canal, carrying the Lehigh and Scranton coal. The new line will have a double track, and will be able to carry immense quantities of coal at a reasonable rate.

Crossing the Passaic west of Paterson there will be constructed a bridge six hundred and fifty feet long, four spans one hundred and sixty feet long each, with an elevation of eighty feet above the river bed. This bridge will be constructed on the same principle as the bridge on the Paterson and Newark Railroad. It will cost $80,000 at least, and in all probability will exceed that sum. Its exact location will be on the south side of the Paterson and Little Falls turnpike, and about nine hundred feet from the canal. The truss work will be sixty feet above the turnpike. Two spans will carry the bridge to the shore on either side, leaving only one pier in the river. The foundation of the bed of the river is rock, washed by seven feet of water. When completed Paterson will thus have one of the largest bridges of New Jersey. There will be depots at Clifton, Passaic and Rutherford Park in its route to New York, the line crossing the Hackensack river three hundred yards east of the Morris and Essex Railroad bridge. At this point the Hackensack has been found by recent soundings to have a depth of fifty-five feet. The construction of the bridge has already been commenced.

Progress of the Hoosac Tunnel.

Work on the central shaft over the Hoosac Tunnel is progressing at the rate of a foot a day. It is now down 705 feet. Some of the New Burleigh Drills are being put into the shaft. At the east end they are putting in six of the New Burleigh Pattern Drills. The heading at the west end is being driven very fast, eight drills to work them. The rock is penetrated at the rate of from 40 to 50 feet per week. At each blast that is made on the enlargement, 20 cubic yards of rock are displaced. At this rate of progress the Tunnel will be completed in three years. When the Tunnel is running the way the contractors intend it shall be, there will be about 30 of the Burleigh Drills in use, and some 7 or 8 Air Compressors. The Mt. Cenis Tunnel work, that has cost over $25,000,000 gold already, will not compare with the Hoosac in regard to Drills, Compressors, &c.

☞ At a recent meeting of the parties interested in the construction of a railroad from Parkesburg to Delaware City, everything was satisfactorily settled, and the contractor, Colonel Clark, it is understood, will soon commence the grading of the road. The corporation embraces two companies, one chartered by Pennsylvania and the other by the State of Delaware.

☞ The *Western Railroad Gazette* says it is reported that the Indianapolis, Crawfordsville and Danville Railroad, now nearly completed, has been consolidated with the Danville, Urbana, Bloomington and Pekin Railroad, which has the cars running at both ends of its line, and requires little more work to complete it. The consolidated line is to be known as the Indianapolis, Bloomington and Western Railroad.

☞ A survey of the route of the Southern railroad from Cincinnati has been commenced by Mr. W. A. Gunn, Chief Engineer. The route will pass by Georgetown, Scioto county, Williamsport, Grant county, and it is expected to be twenty miles shorter than the Kentucky Central. The survey will be completed in two months.

☞ The Winona *Republican* says that arrangements are now in progress to extend the Winona and St. Peter Railroad from its present terminus at Waseca to some point on the Minnesota river—either Mankato or St. Peter, or possibly both—at as early a day as possible, and the 1st of May has been fixed as the limit of its completion.

☞ The Western Pacific Railroad, running from Sacramento to San Francisco, is completed between Sacramento and Stockton, and trains commenced running over it on the 11th of August.

☞ The engineers of the St. Louis and Southeastern Railroad have made a preliminary survey from Ashley to Shawneetown. They find the distance 82 miles and the route not difficult.

☞ The first train of cars passed over the newly completed section of the Kent and Queen Anne's railroad to Millington on the 4th inst. The road is operated by the Delaware railroad company.

Journal of Railroad Law.

CONTRIBUTORY NEGLIGENCE. A PERSON CROSSING A TRACK MUST USE HIS ORDINARY FACULTIES, AND KNOWING THAT A TRAIN IS DUE, MUST LOOK IN THE DIRECTION FROM WHICH IT SHOULD COME.

The fact of the recent case of Conzales *vs.* The New York and Harlem Railroad Company (38 N. Y. 440), are fully and clearly stated in the following opinion by

DWIGHT, J. The rules of law, applicable to this case, must be considered as settled viz.: First, that the parties seeking to recover for injuries occasioned by the negligence of another, must be shown to be free from negligence contributing in any degree to occasion the injury complained of.

Second, that a person attempting to cross the track of a railroad must make use of his ordinary faculties to ascertain if there is danger in the attempt, or he will be held guilty of negligence. Ernst *vs.* The Hudson R. R. R. Co., 36 How. 84.

Third, that the question of negligence, the facts being uncontroverted, is a question of law for the Court.

Applying these principles to the uncontroverted facts of this case, and I am constrained to conclude, that the judgment cannot be sustained. The deceased was attempting to cross the west track of the defendant's road at the moment when an express train passed over that track. He had been frequently a passenger by the train from which he alighted at the same moment and lived in sight of the crossing. He must have known that the express train was due at that point within one minute of the time, and, allowing for every slight delay on the part of the accommodation train, that the express train was liable to pass at that very moment. With this knowledge, it was especially his duty to look out for the train before going upon its track. He either did look out for it or he did not. If he did not, he was guilty of negligence in the omission; if he did, he must have seen the approaching train within a few feet of him, and his attempt to cross in front of it was recklessness. In Ernst *vs.* The Hudson River Railroad Company (*supra*), WOODRUFF, J., says "A traveller approaching a railroad track is bound to use his eyes and his ears, so far as there is opportunity, and where, by such use of his senses, he might avoid danger, notwithstanding the neglect to give signals or warning, his omission is concurring negligence, and should be so peremptorily declared by the Court; and when proof of this is clear, the plaintiff, thus negligent, should be nonsuited." It was undisputed, in this case, that the track was straight and the view unobstructed, for from five hundred to six hundred feet north from the point at which the deceased stepped from the cars, and the conclusion is inevitable, either, that the deceased omitted to look up the track, or that he saw the approaching train. It cannot be said that he was required to alight at that point where he did, and between the two tracks; so far from this, it seems to me proof of additional negligence on his part that he did so. It is very doubtful whether the train by which he was a passenger had stopped at all when he got off, and if it had it is certain that its stop was only momentary, and not for the purpose of discharging its passengers. It had not reached its stopping place, and when the deceased fell it was moving on toward the platform where it usually discharges its passengers. It is true, that the station-house was on the west side of the track, but there was a platform for the up trains on the east side, and the deceased was not going to the station house, but to his own house, by a shorter route. It seems to me very clear how this casualty occurred: The car in which the deceased was riding had reached the crossing of the street upon which he lived; to get off there saved him a few steps of distance and a few moments of time, and forgetful of the danger from the express train, of which a moment's reflection would have reminded him, he stepped from the car at the street crossing and on the side nearest his home, without so much as looking up the track to see if the express train was coming. That train passed at the moment of his coming to the ground; he started back to avoid it and slipped or stumbled under the wheels of the train in motion behind him. Had he kept his seat until the train in which he was seated had stopped to discharge its passengers, or, in default of that, had he looked up the track before stepping down from the platform of the car, either precaution would have saved his life. He omitted both and was guilty of negligence, which gave occasion for the injury complained of. In my opinion, the motion for a non suit should have been granted; but if not, it is very clear, under the decisions of this Court, above cited, that the defendant was entitled to the instruction to the jury asked for, viz., that it was the duty of the deceased to look in the direction from which the express train was due before attempting to cross the track, and that if he omitted to do so he was guilty of negligence which precluded a recovery, and that the court erred in refusing so to charge.

Upon both of these grounds, I think the judgment should be reversed and a new trial granted.

Judgment reversed.

The Indus Valley Railway.

Mr. W. P. Andrew, Chairman of the Scinde, Punjaub, and Delhi Railway Companies, has just published a Letter,* addressed to the Duke of Argyll, the Secretary of State for India in Council, in which he most clearly and exhaustively discusses the whole question of the Indus Valley Railways, both present and prospective, strongly urging the immediate, or at any rate proximate, construction of at least four new lines, to effectually complete and supplement the existing railway system.

At present the Scinde, the Punjaub, and the Delhi railways, together with the Indus Steam Flotilla, serve to connect the important and rapidly growing sea-port and harbor of Kurrachee, on the Arabian sea, via the Indus Valley and the towns of Kotree and Hyderabad, Mooltan, Lahore, and Umritsur, with the city of Delhi, in the following manner—the Scinde Railway, 109 miles in length, starting from Kurrachee, passes along the right bank of the Indus to Kotree, opposite Hyderabad. From Kotree to Mooltan, a distance of about 600 miles by the river, the traffic is carried on by the Indus Steam Flotilla. At Mooltan, on the Chenaub, is the lower terminus of the Punjaub Railway, 246 miles long, which proceeds thence between the Chenaub and Ravee, and the Sutlej, via Lahore, to its further terminus at Umritsur, where the Delhi Railway, which will, when finished, be 314 miles long, in its turn commences, and after crossing the rivers Beas, Sutlej, and Jumna, terminates within the walls of Delhi, after previously affecting a junction at Ghazeeabad with the East Indian Railway. The Delhi Railway will probably be fully opened for traffic in 1870. These are the only railways now existing in the upper parts of Scinde and the Punjaub.

In this long line of communicating of 1,270 miles, there is one very serious break, viz.: the portion between Kotree and Mooltan, now served by the Indus Steam Flotilla. The navigation of the Indus is at the best of times exceedingly difficult and very uncertain. Shallows, shifting sands, floods, and droughts, sunken obstacles, and strong currents, combine to render the river journey extremely variable. The down journey usually occupies 9½ days, while the up passage fluctuates between 20 and 35 days. The postal service between the two points is therefore necessarily still performed by dak; and an enormous amount of traffic is diverted from its legitimate channel, it being now quite impossible to accommodate it.

The first new lines advocated by Mr. Andrew is the one needed to supply this "missing link," viz., the Indus Valley line proper, about 500 miles long, from Kotree to Mooltan. An enormous amount of testimony in its favor is adduced in the work before us, emanating from such competent authorities as Lord Lawrence, the late Viceroy; the Hon. H. S. Maine, of the Governor-General's Council; Sir Bartle Frere: Sir Charles E. Trevelyan; Major General Sir Henry Durand, R. E.; &c. The second extension of the railway system of the N. W. frontier proposed is about 290 miles of lines from Lahore to Peshawur and the Khyber Pass, very important from a military point of view, and affording access to an immense extent of new country.

The third line suggested would run from Sukker on the Indus, situate half way between Kotree and Mooltan, via Shikarpore and Jacobabad, to Dadur, at the southern entrance to the equally important Bolan Pass.

The last line advocated is one that has been strongly recommended by the local authorities in India, in completion of the N. W. frontier railway system, viz.: A railway from Hyderabad, via Oomercote, to Deesa, effecting a junction with the Bombay, Baroda, and Central India railway and thus affording to Scinde, the Punjaub, and North Western India the advantage of access to an additional port on the Western Coast.—*Herapath.*

* "On the Completion of the Railway System of the Valley of the Indus." By W. P. Andrew, Esq., London, 1869.

Fort Scott, Sprinfield and Memphis Railroad.

With much pleasure we call attention to this new and grand enterprise, the exact counterpart and complement of the Selma and Memphis Railroad. To appreciate the importance of this road, its influence on Memphis and this entire region, the reader must have recourse to the map. Fort Scott is about as far north-west as Selma is north-east of us; so that a road from Selma to Memphis, continued in the same north-westerly course a further distance of 350 miles, passes by Jacksonport, Ark., along the rich valley of White river, and through a rich and beautiful part of south-west Missouri (in which Sprinfield is situated,) to Fort Scott in eastern Kansas, from which place a railroad is already running to Kansas City, tapping the great Pacific road, recently completed. The entire route from Memphis to Fort Scott, is through a rich agricultural region, much of which is already and all of which will soon be thickly settled. The products of this region—cotton, tobacco, wheat, live stock, etc.—will find their best and nearest market at Memphis; and here its people will buy and sell. The carrying business and the local travel furnished by these sources, independent of the immense tide of through travel would support the road.

The enterprise was begun only a few months ago, at Sprinfield, and a sufficient amount has been subscribed in Missouri to secure a charter in that state, under which a board of directors has been elected, who are actively pressing the work in Kansas and Arkansas—their surveyors and engineers being now en route to Memphis. We learn by a letter from Maj. Eldridge, recently of this city, that a number of gentlemen connect-

ed with this work will reach Memphis soon, to present this matter to our people.--*Memphis Appeal.*

Movements of Produce.

Receipts of certain articles of domestic produce at the port of New York during the first seven months of the year:

	1868.	1869.
Ashes, bbls.	3,616	5,912
Breadstuffs—

☞ Five miles of section six of the Intercononial Railway has been completed.

Baltimore and Ohio Railroad.

THE COAL TRADE AND TARIFF RATES.

At the regular monthly meeting of the directors of the Baltimore and Ohio Railroad Company, in Baltimore, on the 11th inst., President Garrett made the following statement in reference to the coal trade of the road:

The demand for the semi-bituminous and gas coals from West Virginia, George's creek and the Cumberland regions have largely increased, the Baltimore and Ohio Company, in addition to the great facilities furnished by the completion of its double track to Piedmont, has added largely to its equipment of locomotives and coal cars. The aggregate of coal transported eastward for ten months from the 30th September, 1867, to the 31st July, 1868, was 658 676 tons. For the same time, ended 31st July, 1869, 1,088,304 tons have been transported, showing an increase for that period of 429,628 tons, being upwards of 65 per cent. 243,423 tons of this coal have been carried three hundred miles upon our railway for the supply of the gas companies of Baltimore, New York and other cities. Coal carrying interests in Pennsylvania have urgently pressed this Company to advance materially its tariff rates. It has been urged that an advance of one dollar per ton which would now make a difference in the net receipts of the Company of $150,000 per month, the great demand for coal would still cause the full capacity of the Company to be used. The Company, however, looking comprehensively at all the great interests involved, has continued the very low rate which was established in the spring of 1868, viz: $2 30 per ton of 2,000 lbs. from Cumberland to Locust Point shipping wharves, and proportionate rates from other points. Whilst this rate is but little over one and a quarter cents per ton per mile--a rate deemed by railway companies generally to be unremunerative--yet it is believed that it will be the policy of the Company to continue it during the present and the approaching season. This policy is directly the reverse of that pursued by the coal-carrying interests of the anthracite regions. The Reading Road, for ninety miles has advanced its rate to $2 50 per ton, thus doubling the rate per ton per mile charged by the Baltimore and Ohio Railroad Company. Notwithstanding the greatly shorter distances of the anthracite regions from Baltimore, as compared with the bituminous coal regions, yet the rates of the Northern Central Railroad and other companies have been such as to cause, in combination with the cost of that coal, the price charged to consumers in Baltimore to be from $9 to $9 50 per ton.

The vast advantages to the manufacturing and commercial interests of Baltimore which are secured by the low tariffs on coal maintained by the Baltimore and Ohio Company, can be appreciated by contrasting the market rates for Cumberland coal, viz: $4 50 to $5 per ton of 2,240 lbs., delivered at manufactories accessible by water in the harbor, for steamship purposes, etc. The enormous difference (upwards of $4 per ton) betwixt the price at which coal transported by the Baltimore and Ohio Railroad Company is furnished, as compared with anthracite coals, is causing many consumers to substitute the former for the latter.

It will be noted that while the tariff on foreign coals protects measurably the interests of the mineral regions of West Virginia and of Maryland, the consumer in New York and New England of the coals of these States has not been required to pay any advance thereon in consequence of the maintenance of its low rates of transportation by the Baltimore and Ohio Company.

The traffic in coal on the road in June and July, including 27,752 tons for the use of the company, was 315,597 tons, and, large as the demand is, the company is promptly meeting all the present requirements, both for local purposes and for shipment. The deliveries in Baltimore frequently exceed 5,600 tons per day. Statements have recently been published which estimate the combined capacity of the Northern Central Railroad Company and the Tidewater Canal Company as but 1,400 tons of coal per day, and this limited delivery is given as one of the leading causes for the large charge for anthracite to the consumer in Baltimore.

It will be noted that the capacity of the Baltimore and Ohio Company for coal transportation at present, is *four times* as great as the combined water and rail capacity from the anthracite regions to Baltimore, as thus represented. The large deliveries by the Baltimore and Ohio Company are being made, too, from much greater distances, namely: from 178 to 300 miles. It is trusted that the policy which the Baltimore and Ohio Company has so steadily pursued, and which it has determined to maintain through the fall, and even during the expensive period of the winter, of charging only its low rate for transportation, will continue, as heretofore, not only to benefit directly the interests of our community, but that it will also thus aid in reducing the high prices charged for other descriptions of coal.

☞ The St. Louis and Iron Mountain railroad has been completed, and regular trains have commenced running, between St. Louis and Belmont, opposite Columbus, Ky., a distance of 195 miles. A connection is made with the Mobile and Ohio railroad at Columbus, by transfer boat, which will transport all trains across the Mississippi river from Belmont to Columbus.

☞ Ground was broken on the 4th inst., on the Monadnock railroad, at Winchendon, Mass. The work will be pushed rapidly forward and the road will be finished from Winchendon to Peterboro', N. H., by August 1, 1870. Messrs. Phelps & Co., are the contractors.

☞ The earnings of the Union Pacific railroad from May 10, 1869, the date of its completion to June 1, were $442,475 67; during the month of June, $676,949 11; and during July, $653,729 19 —total, $1,773,153 97.

Notice to Railroad Companies.

OWING TO A CHANGE IN OPERATING, THE Second Avenue Railroad Company offer for sale, at their depot, corner of Sixty-third street and Second avenue, in the City of New York, the following described Cars:

Two attached 16-horse power Dummy Engines, built by Grice & Long.

Seven 20-horse power double end Dummies, with Grice & Long Engines and Whittaker Boilers.

Also seven 50 Passenger Cars, all in good running order, and will be sold cheap.

Communications addressed as above will meet with prompt attention.

MONTGOMERY QUEEN,
Vice President
4t34 **Second Avenue Railroad Co.**

RAILROAD TIES.

4,000 CEDAR AND HACKMETACK ON hand, and for sale in lots to suit, by

CHAS. D. DEFORD. GEO. C. LEE.

TO RAILROAD CONTRACTORS.

Memphis, El Paso and Pacific RAILROAD COMPANY.

Office of the Chief Engineer,
Memphis, El Paso and Pacific Railroad Company,
90 Broadway, New York.

SEALED PROPOSALS will be received at the above Office, until **October 1st, 1869,** when Contracts will be awarded, for the GRUBBING and CLEARING, GRADING, MASONRY, BRIDGING, BALLASTING, CROSS TIES and TRACKLAYING of the following portions of said Railroad:

FIRST—The last Fifteen miles on the First Division of One Hundred and Fifty Miles, between Jefferson and Paris, Texas, commencing Eight miles east and extending Seven miles west of the town of Clarksville, in Red River County.

SECOND—One Hundred and Fifty miles, embracing the Second Division, commencing at Paris and extending westward, to Palo Pinto County.

Specifications, Profiles, Maps and Plans can be examined at the ENGINEER'S OFFICE, in NEW YORK or JEFFERSON.

Proposals must conform to the specification which will be furnished upon application at either of the above places.

Evidence of ability to complete contracts will be required and a percentage retained of estimates until each section of five miles is finished.

Work upon the First Division must be completed by March 1st, 1870.

The Second Division must be finished by October 1st, 1870.

Every facility will be furnished those wishing to inspect the ground on the line of the road, by application in person at the Engineer's Office in Jefferson.

J. M. DANIEL, Engineer in Chief,
Memphis, El Paso and Pacific R. R. Comp'y.

PROPOSALS FOR $300,000

CITY LUNATIC ASYLUM STOCK.

SEALED PROPOSALS will be received at the Comptroller's Office until TUESDAY, Aug. 31, 1869, at 2 o'clock, P. M., when the same will be publicly opened, for the whole or any part of the sum of three hundred thousand dollars of "City Lunatic Asylum Stock," authorized by chapter 56, Laws of 1869, and by an ordinance of the Common Council, approved by the Mayor, July 29, 1869. Said stock is to be issued for the purpose of providing additional buildings for lunatics in the City of New York, and will bear interest at the rate of seven per cent. per annum, payable half yearly, to wit: On the first day of May and November in each year, and the principal will be redeemed on the first day of August, 1889. The proposals will state the amount of stock desired and the price per one hundred dollars thereof, and the persons whose proposals are accepted will thereupon be required to deposit with the Chamberlain the sums awarded to them respectively, together with any premiums thereon. On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive certificates for equal amounts of the par value of the sums awarded to them, bearing interest from the dates of payment. Each proposal should be sealed and indorsed "Proposals for City Lunatic Asylum Stock," and inclosed in a second envelope, addressed to the Comptroller. The right is reserved on the part of the Comptroller to reject any or all of the bids, if in his judgment the interests of the Corporation require it.

RICHARD B. CONNOLLY,
Comptroller.

BURLEIGH'S PATENT
Pneumatic Rock Drill

Is now in successful working operation in New York, Chicago, Jersey City; also at the Hoosac Tunnel (Mass.,) Lake Superior, Colorado and Nova Scotia Mines, Union Pacific and Boston and Hartford Railroads; also in deepening the beds of the Illinois and Michigan Canals, and Des Moines Rapids, and numerous other localities.

The Burleigh Drill is adapted to all kinds of rock cutting in open cut Mining, Tunnels, Sewers, Quarries, &c., drilling holes from 1¼ to 5½ inches in diameter. The Drills are worked either by steam or compressed air. For all kinds of work under ground compressed air is used, serving as a perfect ventilator, as it is exhausted from the Drill. At the Hoosac Tunnel the compressed air is carried upwards of a mile and a quarter, and at that distance works eight Drills at the same time. Information in regard to the ownership of the different State rights. Prices of Drills, Air Compressors, &c., can be obtained at the office of

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Tebo and Neosho Railroad.

The annual report of the Tebo and Neosho Railroad Company, for the year ending May 31st 1869, has just been received, and the statement therein contained of the financial operations and condition of the company up to that date is highly encouraging to the friends of the enterprise. Under the able management of the officers and directors of the company, the road has already assumed an importance second to no uncompleted line in the State of Missouri. The people interested in its construction seem to have fully appreciated its advantages, and $1,424,700 has already been subscribed to the capital stock, of which amount $1,262,166 10 is available for the construction of the road. Thirty eight miles of the line are now under contract, and will be ready for the iron as soon as it can be procured. Up to June 7th the amount expended on account of construction, engineering and contingent expenses, was $165,428 19, and these expenses have nearly all been paid off, leaving the company unembarrassed and free from debt. The favorable nature of this exhibit is certainly a cause for congratulation to all who are directly or indirectly interested in the success of the enterprise.

The Tebo and Neosho Railroad Company was organized in 1860, and received from the State of Missouri a charter investing it with the most liberal corporate powers and privileges. Under its provisions the stockholders are exempt from individual liability, except as to the amount of stock by them subscribed. Counties, incorporated cities and towns may subscribe to the capital stock of the company, without the expense and delay of incidental elections. In view of this provision, County Courts have recently made liberal subscriptions to the capital stock, upon petitions signed by the citizens, without any reference to the qualifications of the petitioners as voters. The charter also provides that the company may build branch roads into and through any counties the Directors may deem advisable, and may bridge any of the navigable streams of the State which may be crossed by the main line and branches. The future control over the charges of the company, for the transportation of freight or passengers, cannot be interfered with by the Legislature without the consent of the company, and the State reserves no right to alter, suspend or repeal the charter.

The surveyed line of the Tebo and Neosho road lies through the most fertile counties of Southern Missouri, and will open to the trade and enterprise of the North and East the richest agricultural country West of the Mississippi River, constituting an important through line for the commerce and trade of Southwest Missouri, Southeast Kansas; Northwestern Arkansas, and the rich section of country known as the Indian Territory. An important connection with the Northern Missouri road will be made at Moberly, by which the centers of Iowa and Minnesota may be reached, and another connection with the Missouri, Fort Scott and Galveston road at Fort Scott, through which channel communication with Texas will be opened. Two very important branches will also be built—one departing from the main line at a designated point in Henry County and running West to the State line, whence it will be extended, by a connecting road organized in the State of Kansas, to Burlington or Ottawa on the Neosho river; and the other, from a point near the Eastern boundaries of Henry County to Springfield, one of the most important cities in that section of the State. These branches are projected on practicable routes, and when completed will materially aid in developing the resources of Central and Western Missouri.

The section of country traversed by this road and its branches is characterized by the elements of great wealth. The soil for most of the distance rests upon limestone formation, and in Cooper and Howard counties the marly bluff formations and rich alluvial bottoms are crossed. Within a few miles Southwest of Boonville, the carboniferous limestone formation is reached, extending for nearly fifty miles to Henry County, where the bituminous coal measures begin that extend to the Western limit of the State. The coal beds are continuous, and some of the veins now worked show a thickness of from five to six feet. Through these valuable coal fields the road will run for a distance of about one hundred and thirty miles. South and West of the point to which the Southern line of the road has already been surveyed, both in Missouri and Arkansas, are vast deposits of lead, some of which are now being worked with large profit to the operators, notwithstanding the slow and costly modes of transportation to which the product of these mines is subjected. The day is not far distant when this will prove one of the richest mineral regions of the West; and, with adequate facilities for transportation, the development will be rapid. Attracted by such extraordinary natural advantages, an enterprising and thrifty population will soon gather in this fertile and healthy district, and it is not extravagant to predict that, in proportion to its length and the cost of construction, the local traffic alone will soon make the Tebo and Neosho road one of the best paying lines in the United States. The office of the company is at Sedalia, Mo. The officers are: A. C. Marvin, President; Harvey Bunce, Vice President; Cyrus Newkirk, Treasurer; R. H. Melton, Secretary; E. A. Smith, Chief Engineer.

☞ All the bids for grading the first 16 miles of the Portland and Ogdensburg Railroad, *via* Sebago Pond, were rejected, being considered too high. The Boston *Bulletin* says "the work will be leased by the directors by private contract."

Railroad Switches.

LETTER FROM E. S. PHILBRICK.

SIR:—About twelve years ago I happened to be employed as assistant superintendent of one of the important lines of railway leading from Boston and being responsible for the safety of the track, my mind was naturally exercised to no small degree on the subject of "open switches," and the whole history of railroad switches became a matter of study. It became more and more evident to me that it was culpable negligence on my part if I depended on the fallible Hibernian, the more reliable but slower-witted German, or even on the ever-ready Yankee, whose sole business it might be to see that certain switches were always left latched on the main track. Human memory is not and never will be infallible, and any mechanical contrivance, simple and effieient, which can relieve the traveling public from the necessity of depending for their safety on the memory of any mortal, would be hailed as a relief not only by the railroad superintendents and the public, but by the switch tenders themselves, who would thenceforth be needed, just as much as before, to move the switches, but who would be relieved of the fearful responsibility and fearful consequences of leaving them open.

Now, among such contrivances the one most in use, used in fact all over Europe ten years ago, and probably still used there, is the "point" or "tongue" switch, which has had its day in America, having been used very extensively in Ohio and other States, but gradually being condemned of late. It seems to be less reliable here than in Europe, chiefly, I think, because the American rail is in nine cases out of ten only three and a half to four inches high, giving the "point" or "tongue" too little vertical stiffness to be always safe, and rendering its rapid wear and frequent renewal a source of risk, from the necessity of the case. The rails used almost universally in Europe are five inches high and upwards, enabling the "tongue" to be of sufficient stiffness to wear longer and be more efficient and reliable than here. A similar reason has made the use of "fish plates" and bolts at the rail joints a measure of undoubted utility in Europe, but of very doubtful utility here, except as an expensive substitute for the cure of bad drainage and bad ballasting, the bane of American railroads. This tongue switch appearing to be ill adapted to our wants, my attention was drawn to a device called the "Tyler switch," originating in this State, but not then used to any extent. There had been a patent on it, but the patentee had failed to make the device sufficiently practical in its details, and the patent grant had expired before it had attracted much notice.

Satisfied that there was merit in the device, I set myself to develop it in a more practical form and get rid of its objectionable features. In a few months I had made a set of patterns; had the castings made for a dozen sets, and put them in use on the main track of the Boston and Worcester line. I experimented with them first at low speed and then at high speed, till, satisfied of their entire safety, they were applied to all the main track switches from Boston to Worcester as fast as they could be made, at a cost of about $20,000. Whether or no this was a good investment may be judged from the fact that I have known several express passenger trains to pass over them when left "open" or set to the side track, at a speed of thirty miles an hour, without any one on the train becoming aware of it, and without the slightest damage to the switch itself or any part of the train. Moreover, my patterns were borrowed and copied freely by the superintendents of other roads, and this safety switch has now come into general use on many of the lines leading from Boston, while the line where I first introduced it have never taken one up since it was laid except for repairs or change of turnouts. The first cost of this switch is considerable, but the cost of its repairs is no greater than that of ordinary switches, for its peculiar features, as now used, are permanent and not subject to wear. The rail is taken out when worn, and replaced, just as in the case of a common switch.

In fact, after ten or twelve years of constant use of several hundreds of these switches under a traffic of thirty or forty trains per day at high rates of speed, I can see no good reason why they should not be introduced everywhere, at least on all lines of passenger travel, and where the American low pattern of rail is used. The reason why this has not been done already is chiefly from want of information on the part of railroad superintendents and on the part of the public, for public opinion will force the adoption of any such improvement as soon as its merits are established by the test of experience, and as soon as the public know about it. Now that such a thing exists and has been in successful use so long, it seems as if those companies who do not adopt it should be held liable by the Courts for neglect of duty, in continuing to trust to the fallibility of human memory, in a matter which may jeopardize the life of every passenger who passes over their lines. There is no patentee to deal with, nor any living man or ring, to my knowledge, whose private interests would be served by the adoption of this device. The above statements can be verified by applying to A. Firth, Esq., Assistant Superintendent Boston and Albany Railroad, Boston.

EDW. S. PHILBRICK.

Boston, August 5, 1869.

Shore Line Railroad.

The annual meeting of the stockholders of this company was held in New Haven on the 16th inst., S. H. Scranton, President, in the chair, and Wm. T. Bartlett, Secretary. After a recapitulation of the work of the Company during the past year, and an allusion to the prospects for the coming year by Vice President S. B. Chittenden, and the reading of the Treasurer's report, an election for Directors for the ensuing year was held with the following result: S. B. Chittenden, Charles C. Landon, New York; C. S. Bushnell, Edward Ingraham, New Haven; James M. Townsend, East Haven; S. H. Scranton, Madison; A. N. Ramsdell, New London. At a subsequent meeting of the Directors, S. H. Scranton was elected President and Superintendent; S. B. Chittenden, Vice President; Wm. T. Bartlett, Secretary and Treasurer.

From June 1, 1868, to May 31, 1869, the receipts of the company have been: Passengers, $221,931 88; freight, $55,880 61; mails, $10,067 04; express, $9,993 36; rents and interests, $4,259 46; sale of steamer *Union*, $8,000; total receipts, $610,181 85.

The expenditures for the same period have been: For operating the road, including labor, materials, &c., $197 664 64; renewals, damages, &c., $65,093 01; total, $262,858 65. Deducting this sum from the receipts, shows the net earnings to have been $47,424 20; from which subtract the amount paid to the stockholders in dividends, $38,471, and there is a surplus of $7,953, to be carried over to the account of the current year.

In the account of expenditures for renewals, damages, &c., there is included $11,013 for one new locomotive; $5,000 for land adjoining the depot ground at New London; $17,784 48 for expenses incurred on account of the bridge across the Connecticut River, in all $33,788 48.

The condition of the road exhibits a most gratifying improvement during the year just past. The rolling stock is in excellent condition, four new passenger cars have been added, the track has been materially improved, and the most thorough scrutiny is observed in all the departments. The bridge across the Connecticut is rapidly pushed forward, and it is thought will be ready for travel by January, when the through travel by this route will necessarily be increased. Under the efficient officers just elected, the Company will, without doubt, show a gratifying progress a year hence.

Ogdensburg and Lake Champlain Railroad.

The earnings of this road for the years ending March 31, 1868 and 1869, were as follows:

	1868.	1869.
From freight	$701,462 28	$849,474 60
" passengers	173,227 99	171,883 99
" mail	10,710 00	10,710 00
" express	4,999 91	5,000 00
" rents	7,995 52	8,153 11
" use of engines	585 00	
	$898,980 70	$1,045,221 70
Expenses, viz:		
Repairs of road bed	$98,689 40	$102,047 02
Renewal of iron rails	71,864 23	116,135 86
Repairs of buildings, bridges, docks and fences	32,956 21	22,267 50
Taxes, including internal revenue	37,152 33	37,637 04
Insurance	6,420 92	12,312 79
Repairs of engines, cars and machinery	83,642 12	100,931 21
Agents and clerks	39,854 12	42,962 41
Handling freight, porters, watchmen, switchmen, and wood and water attendance	53,237 21	50,489 50
Conductors, baggagemen and brakemen	37,201 79	88,211 71
Enginemen & firemen	28 877 55	30,184 60
Fuel	52,061 37	61,596 65
Oil and waste	8,114 27	9,877 24
Contingencies	13,822 71	13,894 56
Elevating		10 707 89
Loss and damage	2,037 46	4,490 20
Salaries, office rent, etc.	32,805 45	33,636 28
	$597,238 18	$688,382 46
Net earnings	$301,742 52	$356,839 24
Net earnings on hand April 1, 1868		130,891 31
Premium on preferred stock sold		28,134 22
Total		$515,864 77
From which has been paid—		
One dividend of three per cent. on the common stock	$92,310 00	
Two dividends, four per cent. each, on the preferred stock	95,104 00	
One year's interest on First Mortgage bonds	65,491 54	
One year's interest on Equipment bonds	24,000 00	
Revenue tax on dividends and coupons	10,570 70	
Bridge timber on hand	7,433 59	
New locomotive	12,032 39	
		306,942 22
Net earnings April 1, 1869		$208 922 55

Compared with the previous year, the gross earnings show an increase of $146,241; with an increase in expenses of $91,144 28—making the increase in net earnings, $55,096 72. The report says:

The large expenditure upon the road bed and track, which it was deemed judicious to make, has added about fifty thousand dollars to the expenses; a similar expenditure will be necessary the ensuing year, after which, the track will probably require only the ordinary renewals.

No depreciation has been permitted in the value of the rolling stock: one locomotive, used for switching purposes, has been rebuilt entire, and two others partly rebuilt.

For the first time since the road was opened, its business has been seriously interrupted by snow. In the months of February and March, a heavy expense was incurred in keeping the track clear and repairing the damage caused by breakage of machinery. The same cause interfered with the passage of freight trains, thereby adding to our expenses and diminishing our earnings.

The business of the road is, and must be for many years to come, mainly confined to the transportation of freight; its passenger business is comparatively small.

The quantity of freight carried the past year was equivalent to hauling 31,199,413 tons one mile, or 263,724 tons the entire length of the road; while, for the year previous, the quantity hauled was 26,654,154 tons and 225,882 tons, the same distances, showing an excess of 37,842 tons hauled over the entire length of the road.

Through rates have ruled low, and they never can be high so long as there are six lines competing for the business.

It is the favorite theory of many people, to ascribe the high price of food, and of almost everything else that is consumed, to the high cost of transportation. No greater fallacy can possibly be stated: there is no business so poorly compensated as the transportation of freight between the great distributing points at the West and tide water. It is safe to say, that for two years past, the through business between Chicago and the East, in both directions, has not averaged more than one cent. per ton per mile; it will be difficult for any person, however astute he may be, to discover a large margin for profit in a business like that; it costs the farmer, in many localities, as much to get his crops the *short distance* to market, paying the local rates, as it costs the purchaser to transport it the *long distance* to tide water.

The progress of railway improvements, both east and west of us, will in the future largely increase our business.

The Portland and Ogdensburg and Plattsburg and Whitehall roads, to which allusion was made in our last report, are being pushed forward by the people along the lines of country through which they run. The former has been organized, and their Board of Directors, comprising some of the most substantial and enterprising gentlemen in Maine, assure us that the road will be put under contract without delay.

The latter has already been opened a distance of twenty miles, and we are now receiving from it a considerable amount of iron and other freight.

In the West, more remote and yet almost as directly connected with us in point of fact, is the Lake Superior and Mississippi River Railroad. This road is 150 miles long, running from St. Paul in Minnesota to Du Luth on Lake Superior: it will be completed in the course of the year, and will open one of the richest grain growing, as well as lumber and mineral regions, on the continent, a country, the products of which, now find a market by rail, a distance of 500 miles to Chicago, but with the completion of this road will reach Du Luth, a point as near Ogdensburg as is Chicago, and quite as favorable for navigation, and save 350 miles of railway transportation. The Northern Transportation Company propose to run their boats to Du Luth as soon as the road is completed.

The $300,000 of equipment bonds issued a year ago have been invested in rolling stock, by the building and purchase of 327 freight cars, 3 passenger cars, and 4 locomotives.

From our earnings, we have built one locomotive, rebuilt another, and partly rebuilt two. Our equipment at the present time consists of 817 freight, 16 passenger, and 8 baggage cars, and 31 locomotives, and one locomotive building in the shops.

The requirements of the road are such that the Board have decided to make a still further issue of bonds to the amount of $200,000, to procure additional rolling stock, for all of which we shall have ample use; and with this addition we shall have one of the most completely equipped roads in the country.

The wisdom of the expenditures already made, in building the elevator and furnishing rolling stock, is clearly demonstrated.

Since we took possession of the road in August, 1865, we have paid to the stockholders—

Nine per cent. dividend and tax	$288,000 00
Dividends on preferred stock and tax	157,000 00
Interest on 1st mortgage bonds and tax	295,000 00
Interest on equipment bonds and tax.	25,000 00
Paid for new bridges	50,000 00
Paid on account of the elevator	55,000 00
Paid for new iron and ties	400,000 00
Surplus of profits on hand	208,922 55
	$1,478,922 55

This amount has actually been paid out of the earnings.

Previous to August, 1865, the parties who then had possession of the road had been able to earn sufficient to pay the interest on the first mortgage bonds (keeping six months in arrears) and expend not more than $50,000 annually for iron—in all say $150,000 per annum, or about $600,000 in the same space of time that we have realized and expended $1,478,922 55.

Whatever gain has been achieved, by economy and prudent administration, has been more than offset by low rates of freight, and it is clear that but for our elevator, which enables us to receive and store a large amount of grain, and our new equipment, enabling us to move it, we should have earned less money than was earned previous to 1865, and to-day we should have had a worn out track, a feeble equipment, and a bankrupt treasury, while, with the issue of preferred stock and bonds, we have their full value in cars, engines and real property, and a good track, besides having paid to our stockholders nine per cent. in dividends (the first they have received since 1854,) with a handsome surplus left.

To demonstrate this more clearly, we compare the tonnage and prices of 1865 with those of 1868: In 1865 we hauled what was equivalent to 159,614 tons the entire length of the road. In 1868 we hauled the same distance 263,724 tons. Our equipment in 1865 was about 400 cars; in 1868 it was 817; through rates in 1865 were 50 per cent. higher than in 1868. As our equipment was taxed to its utmost extent to carry the freight in 1865, it therefore follows, as the connecting roads have hardly added to their equipment more than their own local traffic requires, that with the same number of cars we should have hauled no more freight in 1868 than in 1865, and at a great reduction in rates.

As has been before stated, the earnings prior to 1865 were not adequate to put a large amount of iron in the track, or even to make the renewals that were absolutely necessary; consequently we found it in poor condition and requiring heavy expenditures. We have made very great improvements, having in three years and eight months laid down sixty miles of new iron, fifty miles of repaired iron, and 200,000 ties. The past year we have put in twenty miles of new iron, twenty-one of repaired iron, and 60,000 ties. With the renewals that we propose to make the ensuing year we shall have a first class track.

The bridges have been kept in proper condition for the safety of trains: none have been rebuilt, but several have required a considerable outlay for repairs.

The bridge at Rouse's Point will, the ensuing year, require an expenditure of about fifteen thousand dollars. Most of the timber required for it is on hand and charged off, so that the cost of the repairs will be reduced to that extent in the next year's expenses.

The roofs of the stone buildings at Malone are covered with shingles, greatly jeopardizing their safety from passing trains. During the past year it has been necessary to slate the blacksmith's shop, and the freight house and repair shops will require it this year.

The wooden building at Ogdensburg, used for the storage of freight received from and delivered to the Northern Transportation Company, the Board have determined to rebuild of brick, making it as nearly fire proof as practicable. The large amount of property in store from time to time in this building, with the outside exposure from steamboats and locomotives, render it indispensable that this improvement should be made. The cost of this building will not exceed twenty-five thousand dollars.

There remains outstanding of first mortgage bonds $605,700; they mature in July next, and the money is in the Treasury to pay them.

$3,040,900 second mortgage bonds have been converted into stock, leaving outstanding, $36,100.

$1,994,000 preferred stock has been issued to provide for the payment of the first mortgage bonds and equipment purposes, and the account is closed; as will be seen from the financial statement, $28,134 22 has been received for premiums on the same.

Appended to this report will be found a statement and decision of the Supreme Court at General Term held in January last, as delivered by Judge Bockes, having reference to the suit of persons interested in the stock of the old corporation. The statement is clear, and the decision unqualified and conclusive.

The equipment of the road consists of 31 locomotives, 16 passenger, 8 baggage and 817 freight cars. Miles run by passenger trains, 145,076; by freight trains, 387,044. Total length of road 118 miles. Per centage of expenses to gross earnings, 66. Earnings per ton per mile of freight, including elevating and car service, 2.7 cents. Total income per mile run, $1 96.4; expense do., $1 29.3. Cost of road repairs per mile run, including new iron, 41.2.

TRIAL BALANCE, March 31, 1869.

Cost of road	$5,071,900 00
Equipm't purchased by loan of 1868	300,000 00
Bills receivable	15,210 22
Northern Transportation Co. stock	30,000 00
Material on hand	73,568 89
Fuel	72,234 68
Real estate, wood lots, &c.	45,357 15
Sundry accounts	47,538 03
Cash and due from other roads	618,400 57
	$6,274,209 54
Capital stock	$3,040,900 00
Preferred stock	1,994,900 00
First mortgage bonds	605,700 00
Second mortgage bonds	36,100 00
Bills payable	60,000 00
Coupons due	4,111 25
Unpaid dividends	4,598 00
Equipment bonds of January, 1868.	300,000 00
Sundry accounts	18,977 74
Net earnings	208,922 55
	$6,274,209 54

President.—JOHN C. PRATT.

Directors.—John C. Pratt, Jacob W. Pierce, John S. Farlow, George M. Barnard, Hollis Hunnewell, Thomas Upham, Samuel M. Felton, E. T. Farrington, William C. Brown, I. D. Farnsworth, Arthur Williams, Calvin T. Hulburd, Albert Andrus.

Treasurer.—HENRY A. CHURCH.

Gen'l Superintendent.—DEWITT C. BROWN.

☞ The July products of some of the Lake Superior copper mines were as follows: Pewabic, 50 tons, 131 pounds; Franklin, 75 tons, 535 pounds; Quincy (June) 150 tons, 1,550 pounds; Knowlton, 9 tons; 1,488 pounds; Evergreen Bluff, 16 tons, 594 pounds; Ridge, 18 tons, 904 pounds.

Commerce of China.

From our correspondent at Foochow, China, under date of May 22, we have received the following interesting trade statistics:

The revenue due the Chinese Government on imports and exports on foreign vessels is collected by foreigners. The Chief of this Revenue Bureau is Mr. Robert Hart, who resides at Pekin. He employs principally Englishmen and Americans to assist him, though there are a few persons of other nationalities. The pay of these in the higher ranks of the service is ample and generous. In this way he secures men of business talents of a high order to carry out his plans.

The number of these Custom Houses in China is fourteen, viz: At Shanghae, Canton, Swatow, Amoy, Foochow, Takao, Tamsui, Ningpo, Hankow, Kin Kiang, Chin Kiang, Cheloo, Tien-tsin and Newchwang. Of these, Takao and Tamsui are on the Island of Formosa, and Hankow, Kin Kiang and Chin Kiang are on the River Yangtse Kiang. The rest are on or near the seacoast.

The following table will show either that the trade to and from China is increasing, or that the Custom House officials are becoming more efficient or more honest:

Annual values of Imports and Exports from 1864 *to* 1868.

	Imports. Taels.	Exports. Taels.	Total. Taels.
1864 ..	51,293,578	54,006,509	105,300,087
1865 ..	61,844,158	60,054,634	121,898,792
1866 ..	74,563,674	56,161,807	130,725,481
1867 ..	69,329,741	57,895,713	127,225,454
1868 ..	71,121,213	69,114,733	140,235,946

It will be observed that the value is given in taels, a tael being an ounce of silver, and worth from $1 38 to $1 40.

The amount of revenue collected in 1864, was 7,845,365 taels; in 1865, 8,296,275 taels; in 1866, 8,685,630 taels; in 1867, 8,785,336 taels; in 1868, 9,425,656 taels.

To show the comparative annual value of the trade between China and foreign countries, exports and imports, the following table is given. The sum represents the total value:

	1867. Taels.	1868. Taels.
Great Britain	52,197,794	66,519 679
Hong Kong	22,296,337	24,642,974
India	32.282,412	26,362 615
United States of America	8.196,001	7,416,069
Japan	3,395,191	3,551,489
Australia	3,123,474	3,584,354
Singapore and Straits	1,238,630	1,087,571
Continent of Europe	2,409,770	4,911,856
Siam	965,401	768,924
Phillipine Islands	747,036	498,862
Java	501,270	492,915
Cochin China	627,973	429,984
British Channel	182,221	634,080
Amoor Provinces	121,930	101,747
South America	122,996	299,948
Canada	.....	237,039
New Zealand	118,781	102,899
Siberia, Russia *via* Kiachta	970,019	796,240
Cape of Good Hope	35 667	44 122
Total taels	129,582,903	142,433,367
Less re-exports to foreign countries	2,307,449	2,197,421
Net total, taels	127,225,454	140,235,946

It will be seen at a glance the great disparity between the trade of Great Britain and the United States of America with China, that of Great Britain exceeding the United States of America nine fold in 1868. The trade with France is so insignificant as not to demand a separate account but is probably included under the specification of "Continent of Europe." Great Britain supplies the Continent of Europe with teas, silk and other productions of China to a very great extent, and this is the reason of the vast disparity between those two items, the former being over 66,000,000 taels, and the latter only a little less than 5,000,000 taels. The reason why the trade between Hong Kong and China is so great is that the former is a general rendezvous of ships trading with China, and large quantities of Chinese goods are taken there for exportation to Western countries, and large quantities of Western goods are landed there previous to shipping for Chinese ports.

The following table will exhibit the kinds and quantities of cotton goods imported into China during the last two years:

	1867.	1868.
Shirtings, plain gray, pieces	2,398 410	4,920,831
Shirtings, plain white, pieces	358,316	575,357
Shirtings, plain dyed, pieces	50,297	34,217
T-cloths, pieces	730,604	2,058,021
Shirtings, Spots & Brocades, white, pieces	77,409	82,449
Shirtings, Spots & Brocades, dyed, pieces	128,958	112,265
Drills, gray, pieces	228,427	87,475
Drills, Dutch, pieces		72,701
Drills, American, pieces		190,935
Sheetings, pieces	3,979	47,834
Jeans, pieces	22,776	40,514
Chintzes and furnitures, pcs.	222,541	248,601
Chintzes Japan, pieces	2,058	40
Turkey Red Cloth, or cambrics, pieces	99,802	82,404
Damasks, dyed, pieces	31,772	33 799
Velvets, pieces	33,650	48,333
Velveteens, pieces	15,631	22,871
Fustians, pieces	1,850	
Cambrics, pieces	31,320	54,678
Lawns, pieces		
Muslins, pieces		
Dimities, pieces	6,744	34,400
Domestics, grays, pieces	2,298	2,817
Twills, pieces	432	11,766
Taffachelas, pieces	3,502	8,394
Ginghams, pieces	.....	2,834
Cottonades, unclassed, pcs	15,360	22,814
Handkerchiefs, dozen	151,530	196,437
Cotton Yarn, piculs	33,274	.....
Cotton Thread, piculs	233	55,998

I now subjoin a table showing for two years the flag and tonnage of the shipping which is employed in the China trade:

Flag.	Vessels entered and cleared in 1867.	Tons.	Vessels entered and cleared in 1868.	Tons.
American	2,926	1,673.754	3,623	2,237,327
Austrian	8	2,920	....	.....
Belgian	2	1,600	2	1,206
British	7,964	3,711,080	7,163	3,332 092
Chinese	561	34 600	571	32,732
Danish	139	25,870	135	23,737
Dutch	253	82 628	124	35,105
French	217	112,587	249	139,165
Hawaiian	8	1,200	12	1,920
Italian	13	11,595	4	1,642
Japanese	1	809	12	4,168
N. German	2,232	611,841	1,772	467,087
Norway and Sweden	82	22,171	106	26,163
Portuguese	6	400	....	.....
Russian	54	8,987	32	12,099
Siamese	166	71,924	222	91,312
Spanish	71	21,863	44	11,147
San Salvador	2	986	2	1,600
Total	14,704	6,396,815	14,075	6,418,503

Vessels bearing the American flag are the second most numerous class, North German the third, but those vessels are of a small and inferior description, used principally for trading along the coast and going from port to port. The vessels called in the above table Chinese are not common junks, but vessels owned by Chinese, built in foreign style, and conforming to the regulations which relate to foreign vessels. There are quite a number of steamers of this class. The Chinese Government have two navy yards, where the manufacture of vessels after foreign models is going on, and probably from year to year the number of such vessels will become greater and greater. The Chinese of late years patronize much more largely than formerly vessels rigged in foreign style for the transporta ion of Chinese produce, timber, &c., from port to port.

The statistics found in these letters relating to trade, revenue, &c., have principally been derived from documents published by the Custom House officers.—*N. Y. Times.*

Russian Railways.

The development of Russian railways is one of the most remarkable industrial phenomena of the present century, and well merits a brief review. The subject is especially rich in instruction for the Turkish Government, and as such we recommend it to the attention of the Minister of Public Works.

The first railway in Russia—an attempt made on a small scale—dates from 1837. Its main object was to give the inhabitants of St. Petersburg facilities for pleasure excursions to the fine imperial castles and grounds of Tsarskoe-Selo and Pavlovsk, at about 25 and 30 kilometres distance from the capital. This line was constructed by a Company, consisting of persons of mark in the political and financial worlds, and although it promised a good pecuniary return, the result fell short of the expectations of its promoters. The little railway served no commercial end. The good folks of St. Petersburg used it only during the few fine days which the abominable summer of that capital affords, to run into the country for a breath of fresh air. In autumn and winter the Zarskoe railway did not run, but, like the bears of the country, hibernated in deep slumber.

The consequences of this state of things were soon made manifest. The shares of the Company, partaking of the inactivity of the line, fell in the market, and they are even at the present day quoted below par. The signal, however, had been given, and the Emperor Nicholas, conscious of the importance of railways to a country of such vast extent as Russia, firmly made up his mind that his empire should become possessed of a network of iron lines. He began by promulgating a decree for the construction of a railway between St. Petersburgh and Moscow, uniting in this way both capitals of the empire, of which Moscow is the pivot of the trade of the interior, and the centre of Russian industry, and St. Petersburg is the principal seaport. The distance from city to city is 700 kilometres, through a country consisting of stony soil, sand, and marshes, the latter predominating. The Czar sketched the line of route with his own pencil, and it was found that upon the ground over which he had laid it there were marshes extending in all upwards of 400 kilometres in length, and of an average depth of 50 feet. Engineering works on a gigantic scale were found necessary to make the line through deep marshes, upon a saturated soil with the water pouring in on all sides. Various stages of massive piles had first to be laid to give a solid foundation, and the permanent way was then completed, with good firm earth carefully banked up. These extensive works were executed by Russian engineers, under the orders of Generals Mesnikoff and Kerbes. The rigors of a northern climate prevented the work being carried on for more than five months of the year, the months of May, June, July, August, and September, and less rapid progress was made than the Emperor wished. Nevertheless, 100 days sufficed to construct the line and throw it open to the public. The first sod was turned in May, 1844; in 1848 there was a year's interruption of the works on account of the cholera, which raged throughout the whole of these damp and unhealthy districts with unusual severity; but in October, 1851, the public were conveyed over the line. It is difficult to say exactly how much the construction of this railway cost, for the State, which constructed it, and has worked it until recently as its own property, has never thought fit to publish any account of its expenses; but it is calculated that they amounted to 500,000 francs per kilometre; nor can this outlay be considered exorbitant, bearing in mind the period at which the line was made, and the difficulties of the ground over which it passed.

The two capitals being thus linked together, the Emperor Nicholas next turned his thoughts to the extension of railways east and south of the empire, in order to join the Black Sea and the Caspian Sea with the Baltic, but the events of 1853 and the Crimean war prevented his carrying out his projects. The impulse, however, as has been already said has been given, and the experience of the war having made it plain to the Russian Government that it is impossible to transport armies with the requisite stores and munitions effectually without railways, the scheme of railway extension was resumed with fresh energy. Capitalists and contractors were sought for at home and abroad, and, after many offers, the Russian Government eventually closed with the proposals of Messrs. Pereire & Co., of Paris. After some preliminary skirmishing, the contract was signed, by which the Messrs. Pereire & Co. bound themselves in 1857 to lay down 4,000 versts (4,500 kilometres) of rail. They would seem, from the result, to have entered into this engagement without having sufficiently made themselves acquainted beforehand with the climate and other circumstances of the country, the damages accruing from the overflow of Russian rivers in the spring, and the multitude of local difficulties which must inevitably hamper the progress of the works; for at length, having constructed 1,750 versts (2,000 kilometres), they threw up their contract, and considered themselves very fortunate in withdrawing from the enterprise with an indemnity from the Russian Government of 70,000,000 of francs.

While the Pereires were commencing the lines which were to connect St. Petersburg with Warsaw and Prussia, as also Moscow with Nijni-Novgorod, other Companies, Russian and foreign, were undertaking similar work in other directions. One company has contracted for the Moscow-Riazan line, another for that from Moscow to Jaroslaw, a third for the line of the Volgo Don, and a fourth had undertaken a railway from Riga to Dunaburg. As all felt that in railway-making loss of time is loss of money, every effort was made to push on these works. Gangs of "navvies" were to be met with in all parts of Russia on their way to the lines they were to be employed upon; and the different custom-houses were choked up with railway material coming in in vast quantities from abroad. To the previously completed railways from St. Petersburg to Moscow (700 kils), and from Warsaw to Cracow (400 kils), Russia was able to add the following lines in four years: St. Petersburg to Warsaw, with a branch to Eldkuhnew (1,500 kils.); Moscow to Nijni-Novgorod (500 kils,); Moscow to Kolomna (120 kils.); Moscow to Troytza (80 kils.); and Riga to Dunaburg (260 kils.)—a total of 2,460 kilometres of additional lines of rail.

In 1863 Russia was possessed of 8,560 kilometres of railway. Since then the work of further construction has not slackened, and the following table will show the number of lines open to the public in 1868:

STATE LINES.

	Kilometres.
Petersburg-Moscow	700
Moscow-Koursk	600
Odessa-Elizabethgrad	400

COMPANY LINES.

Moscow-Riazan	200
Peters-Zarsk	30
Riazan-Kzolow	400
Moscow-Nijni	500
M. Jaroslaw	70
Warsaw-Antriche	300
Petersburg-Peterhoff	30
Petersburg-Warsaw and Eydkuln	1,400
Riga-Vitebsk	550
Volga-Don	100
Warsaw Piusse	300
Kozlow-Morschausk	200
Kozlow-Voroneje	300
Gronechevka Rostow	300
Total kilometres	6,480

In the course of the current year, 1869, the network of Russian railways will be further extended as follows:

	Kilometres.
Koursk Kiew-Balta	1,000
Balta-Kremenschong	300
Balta-Volotchisko	800
Vitebsk-Orel by Smolensk	600
Total kilometres	2,200

Adding this figure to 6,480, Russia will thus possess in 1869 8,680 kilometres of railway. The works are carried on with sustained activity, and while the lines above mentioned are being completed the Poliakoff Company have entered upon other engagements. Its principal work in hand at present is the completion of the railway from Koursk to Taganrog, passing by way to Charkoff.

This line will be 1,000 kilometres in length, and will be ready for public use in 1870. The eagerness of these different companies to carry out their work arises from a natural desire to get as speedy a return as possible for their capital without suffering it to become frittered away through long stoppages, as happens in the case of those unprofitable lines which are begun one fine day and never finished.

Russian railways afford a good investment, and as capital comes in freely from all directions, the works are not delayed by want of means, but pushed on uninterruptedly. The average of the total gross receipts for the year 1868—amounting to 41,000 francs per kilometre—is a tangible proof of the good returns they yield. The Russian lines may be, therefore, well described as in a satisfactory position, more especially when the short time since they have been working is considered, and when their returns are contrasted with the French returns—the highest in repute of those of the long standing lines of Western nations—and which yield an average of not above 46,000 francs per kilometre. At their commencement in 1842, the French lines yielded only a gross average of 25,000, but soon afterwards their receipts augmented to 43,000 francs per kilometre, and they have since risen to the present high figure.

In 1865 the whole of the Russian railways brought in an average of barely 20,000 francs per kilometre. They have in three years more than doubled that amount, and there is every prospect of the returns continuing to augment from year to year. The present returns of some of the lines much exceed that average. The St. Petersburg and Moscow railway brings in 100,000 francs per kilometre. The Moscow and Riazan line returns 80,000 francs, and the Riazan and Koslow and Moscow and Nijini line 60,000 francs the kilometre. The most marked increase has been upon the railway which unites the two capitals. In 1863 the St. Petersburg and Moscow line returned scarcely 23,000 francs per kilometre; but since the construction of the intermediate lines connecting the interior of the empire with Moscow the gross receipts have risen as high as 100,000 francs per kilometre. The revenue of the Moscow and Rizan line has tripled within three years. The returns of the Riga and Dunaburg railway have increased from 15,000 to 24,000 francs per kilometre. The receipts of the line from St. Petersburg to Warsaw—which has to encounter the competition of Baltic navigation during six months of the year, and runs only in winter—have augmented from 19,000 to 27,000 francs in the space of two years. The traffic on the Russian railways is principally a commercial traffic, and consists mainly of the transport of merchandise. The accumulation of goods for carriage is so great as to crowd the stations in all directions, and call for continual additions to the rolling-stock. The Moscow Kozlow and Woroneje line figures conspicuously for the quantity of goods forwarded along its rails, and is likely to prove a very prosperous undertaking, as the lines from Moscow to Saratoff, and from Borigsaglebsk to Tzaritzen will always have Moscow and Riazan for outlets. The more intermediate stations are erected on the Russian lines, the more goods pour in in larger quantities.

Efforts have been made to intimidate the Russian Government, by representing the possible embarrassment to which it has exposed the State revenues by the facility with which it has given guarantees to the lines of rail constructed by these various companies. But the Government was right in not heeding these alarmist views. The receipts are nearly everywhere sufficient to cover the working expenses and to pay interest on the shares. Even the St. Petersburg and Warsaw line, which is the least remunerative of all, earns sufficient to meet the interest on the capital of 440,000,000 francs which it cost in construction. So, also, with the other Rassian lines; and although the Russian Government has assumed the responsibility of paying an annual guarantee of 73,000,000 francs, if need arise, it was only called upon in 1868 for payment of 16,000,000 francs upon this engagement. The State itself, and the commerce of the country, are prosperous; and the receipts realised by the railways, in consequence, from the busy traffic which passes over them, place them in a position not only to defray their working expenses, but to meet the interest accruing upon the capital provided for the construction of the lines.—*Levant Herald*, July 14.

Detroit, Howell and Lansing Railroad.

The engineer of this road has, with the concurrence of the President, made the following statement of its condition: Total length, 84 miles, viz: Detroit to Plymouth, 22.40 miles; Plymouth to Howell, 29 miles; Howell to Lansing, 32.60 miles. Of the 51.40 miles to Howell, 36 miles right of way has been donated, together with station lots, &c., amounting in value to $46,400. The remainder of the right of way and station grounds at Detroit and vicinity will cost $75,877, out of which has been paid $29,752, and $25,000 more is payable in instalments covering ten years, leaving a balance to be provided of $21,125, with addition of $4,500, making $25,625 unpaid. The amount of earthwork completed is 499,969 cubic yards, and all the bridges, culverts and cattle guards on forty miles of road, 26,818 ties have been delivered, about 10,000 fence posts delivered, and nearly six miles of fence built. The total expenditure up to date amounts to $199,471.

Great Indian Peninsular Railway.

The progress that is being made in the construction of the final link that is to unite by rail Bombay with Calcutta, is a subject which command the interest, not only of the commercial and traveling public, but of all India. We may reasonably suppose that the results flowing from complete communication from Western India with Bengal and the Upper Provinces will be as fruitful of political advantages as they must be of material results. Until lately it was thought impossible that the north-eastern line of this railway would be finished so as to admit of any traffic until the close of 1870. Judging, however, from the work that has been done during the past season, and estimating what remains to be accomplished, we can assure the public with tolerable certainty that the first through train will be run in May next.—*Times of India, June* 29.

☞ Interest on the bonds of the Western Maryland Railroad, endorsed by Washington County, due July 1, is now being paid at Hagerstown, Md. The interest on the bonds guaranteed by the City of Baltimore is being paid at the Farmers and Mechanics bank in that city.

☞ Work on the Illinois Southeastern Railroad is progressing satisfactorily. About eight miles are graded, and a force of one hundred men are fast grading the rest of the route between Fairfield and Flora.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, August 28, 1869.

Stock Exchange and Money Market.

Notwithstanding the further general reduction in the city bank resources, amounting to a loss of nearly seven millions of deposits, over 2½ millions of specie, and 1⅝ millions of legal tender notes, in addition to a decrease of nearly 2¾ millions in the cash balances of the U. S. Sub Treasury at this port, as the result of the past week's movements in coin and currency, the Money Market has been very comfortably supplied all through the week, especially in a temporary form, on the basis of 5@7, generally 6@7 per cent. on call, at which the speculative demand, though fairly active, has not been notably urgent. In the discount line, there has been only a moderate business transacted in strictly prime to good grades of mercantile paper at rates ranging from 7@10 per cent. per annum. The crop movements in the interior are now calling for a marked increase of monetary facilities at the more active forwarding points, which demand is operating very distinctly on the reserves of legal tender, and national bank notes at this centre. The country bank balances are being generally reduced here, in many instances wholly withdrawn, to be immediately employed in the marketing of the very gratifying products of this season's harvest. From the South and Southwest too, there comes a growing inquiry for means to aid in the forwarding of the new cotton and rice crops to the distributing ports, which drain it is believed will soon assume important proportions. From the San Francisco market, likewise, there has been an urgent call for aid, to relieve the unusual pressure for financial accommodation in that city, where, according to the latest mail advices, Coin was scarce and hard to be obtained, even on good security. A San Francisco circular of Aug. 13, says: "Immense supplies of grain are coming from farming districts, and accumulating at the various depots inland; but the means for marketing are not here. The stimulus of increased prices in England, while there is little advance upon freight charges, has had slight effect on rates in California, simply because we are without the funds requisite to take advantage of the opportunity. Large amounts of coin have been locked up in real estate, in quartz mills, in new mines, in loans on mortgages, in constructing railroads, and in a variety of other ways. Foreign capital, which was here in large supply, some time since, finding itself underbid, quietly returned whence it came, and the domestic supply is insufficient for our requirements. In addition, the following drains occurred during July: Absorbed in duties, $952,000; personal tax, $250 000; coin shipped, $330,000; interior absorption, $750 000; total, $2,282,000. The Branch Mint gave us $1.500,000, leaving a deficit of $782,000 for the month." Considerable transfers of private deposits of coin have been made from New York through the agency of the Sub-Treasury, under the instructions of General Spinner, the U. S. Treasurer, to San Francisco, which it is assumed, will be of much benefit to that market.

The specie reserve of the city banks according to the latest return is $21,594,510, against $19,768,681 same time last year. The city bank deposits are now $192,024,546, against $216,435,405 week ending Aug. 22, 1868. The legal tender reserve amounts to $53,070,831, against $69,757,645 same time last year. The circulation now stands at $34,028,104, against $24,187,627 same time last year. The loans are now $262,741,133, against $275,245 781 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $104 000,000 a day, against a daily average of $97,136,934 the preceding week, and $102,479,239 the week ending with Aug. 7, 1869. The current week's exchanges average about $110,165,000 a day. The city banks, last week, reported a further loss of $2,559,989 of specie, $6,928,165 of deposits, and of $1,659,258 of legal tender notes. They reduced their loans, $3,764,232; and increased their circulation, $35,847.

The city bank exchanges on Wednesday were $92,383,876, and the resulting balances, $2,771,158.

National Bank notes to the amount of $130,600 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $317,269,166, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $17,548,786, leaving, with the

existing 1,620 banks, (having an aggregate capital of $422,659,260,) an actual circulation at this date, of $299,720,380. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,916,650; and for the public deposits, $20,014 500—making a total of $362,931,150. The Treasury Department last week redeemed and destroyed $227,400 of worn and mutilated fractional currency, and issued $370,682 of new. The outstanding amount of fractional currency on the 1st of Aug., was $31,030,300, against $32,062,528 on the 1st of July.

The U. S. Sub-Treasury receipts, week ending with Aug. 21, were $6,333,643 in coin, including $3,165,394 from customs duties, and $3,555,505 in currency; payments, $6 870,987 in coin, including $315,179 of coin interest, and $4,420,179 in currency; balance at the close of the week, $91,592,863, including $78 647,870 of coin, and $10,334,725 of currency, against $94,312,140 at the close of the preceding week, showing a decrease of $2,719,277. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $775,186, of coin including $481,359 from customs, and $371,827 of currency and payments, $66,467, in coin including $42,118 of coin interest and $449,804 in currency. On Tuesday, receipts, $506,328, in coin including $464,000 from customs, and $249,524 in currency; and payments $44,099, in coin including $27,514 of coin interest and $368,151 in currency. The balance at the close of business on Tuesday stood at $90,058,239, (including $10,138,621 of currency, and $79,818,843 of coin,) against $92,111,546 a week previous; and $93,775,622 on Aug. 7, 1869. The aggregate receipts of the office in July were $88,513,855, including $10,502,046 from customs; aggregate payments, $76,502,624, including $17,384,486 of coin interest.

The outstanding amount of coin certificates on the 1st of Aug. was $36,725,840 against $30,489,640 on the 1st of July. The Sub-Treasurer at this port, last week, retired $3,039,394 of coin certificates through the receipts for customs.

Government revenues have been up to a full average, since our last. The customs have been yielding quite liberally. The excises, last week, yielded about three millions; customs at the port of New York, $3,165,394, and at the outports about $1,030,000 (in coin) more, making the grand total income for the week equal to about $8,506,500 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 83½ millions.

The coin balances of the Government at this port on Wednesday morning, was about a little less than eighty millions. On Thursday morning, it stood at 81⅜ millions.

Gold has been quite active, since our last, with more variableness in the premium. The extremes of the week have been 131¼@133¾; and the closing quotation on Wednesday was 133⅜. The speculative business has been largely influenced by various unconfirmed reports from Washington, relative to the purchase of Cuba, and the probability of an early completion of negotiations, with that purpose in view. The customs demand has been up to nearly half a million a day. The export inquiry has been on a restricted scale. Last week, the shipments of specie from this port were under half a million. On Tuesday of the current week, only $5,000 were exported, and on Wednesday $50,000. The *Arizona* from Aspinwall has delivered here $59,095 of California gold since our last.

The customs of the port on Wednesday yielded $845,000. The U. S. Sub-Treasury disbursed $143,368 of coin interest, on that day.

The customs demand for Gold last week, averaged $527,566 a day; thus far, this week, it has averaged $472 679 a day, or equal to a weekly aggregate of $2,836,074. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $9,151, and since Jan. 1, $9,824,531, against $4,806,859 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $85,567,957, again $74,862,966 same time in 1868. At San Francisco, from Jan. 1, to Aug. 1st, 1869, $4,716,000, against $4,810,000 same time last year.

The exports of specie, from this port, last week, were $492,981, against $648 923 same week last year; total, since Jan. 1,1869, $24,713,945, against $63,887,110 same time last year. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $315,179, and since Jan. 1, 1869 $64,437,314, against $59,965,581 same time in 1868. The specie exports from San Francisco, from Jan. 1, to Aug. 13, 1869, were $25,119,261, against $24 839,174 same time in 1868.

The U. S. Treasury receipts from customs at all ports from July 1, to Aug. 21, were about 30 millions.

Foreign exchange has been less sought after and quoted weaker in price, but closes with more steadiness. Bankers' prime sixty day bills on London closed heavily on Wednesday at 109⅛@109¾, and on Paris to 5.18¾@5.15; sight bills on London to 110@110⅜, and on Paris to 5.13¾c. @5.11⅞. The offering of produce bills has been unusually extensive this week. The week's exports of domestic produce have been to the currency value of $5,581,238, making the total since Jan. 1, 1869, $122,767,777, against $108,630,209 same time last year.

There has been a less active movement in the Public Funds, since our last, and some depression of values has been noted, chiefly caused by the decline in gold early in the week. The offerings of bonds have been comparatively light, as holders have not been eager to sell at the ruling figures. On Wednesday, the U. S. Sub-Treasurer at this port bought in two millions of Five twenty bonds, at from 119.20@119.68 net, out of an aggregate offering of over three millions. Subsequently, the market rallied a fraction, on a more general inquiry from local buyers.

U. S. sixes of 1881 closed here on Wednesday at 123@123¼; U. S. Five-twenties of 1862, ex-coupon, 122⅞@123; U. S. Five twenties of 1864 at 121⅞@122; U. S. Five-twenties of 1865 at 121¾@122; U. S. Five-twenties of 1865, consolidated, 120⅝@120¾; U. S. Five-twenties of 1867, 120⅞@121; U. S. Five-twenties of 1868, 120½@120¾; U. S. Ten-forties at 114⅞@115; U. S. Six per cent. currency bonds, 110@110⅛.

The latest quotations at the London Stock Exchange compare as follows with former returns;

	Aug. 11.	Aug. 18.	Aug. 25.
Consols	93	92⅞	93½
U. S. 5-20's of 1862	83⅜	83¼	84
Erie	19½	18½	....
Ill. Central	94½	94¾	....

" 1867	....	....	82⅞
" 10 40s	....	....	76

Railway and miscellaneous share dealings have been on a less extensive scale, and prices have been quoted weaker, as a whole. On Tuesday, the speculation ran generally against ruling values. On Wednesday, the market showed more buoyancy, on an improved demand.

Domestic produce has shown less activity, since our last. Cotton opened briskly, but closed dull. Breadstuffs and Provisions have been offered more freely at easier prices. Petroleum improved a little in value, toward the close, on a rather better export inquiry. Middling upland cotton closed tamely on Wednesday at 34¾@35 cts. per lb. The stock of cotton now here is estimated at about 7,500 bales. The receipts at the port this week, have averaged about 800 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 2,308,500 bales, against 2,347,000 bales same time in 1867–'8; exports, same time 1,445,000 bales, against 1,661,000 bales same time in 1867–'8; stock on hand at latest dates, 16,500 bales, against 47,600 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 15.810 pkgs., against 14,404 pkgs., same time last year. From Boston, 6,025 pkgs., against 6,391 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been in rather more demand, at from 10@16c., per lb.; week's receipts, 5,565. Milch cows, neglected, at from $40@$110 each, receipts, 65. Veal calves in fair request at from 4@11c per lb.; receipts, 3,163. Sheep and lambs moderately active at from 4@7c., and 5½@8½c. per lb.,; receipts, 33 950. Swine in light request at from 10@10⅜c. per lb.; receipts, 21,862.

Foreign goods have been less freely dealt in and less buoyant in values. The week's dry goods imports were valued at $2,411,544, and of general merchandise, $3,392,604.

Freights, have been quiet but quoted stronger and buoyant on a very meagre supply of room. For Liverpool we quote flour at 2s.@2s. 3d. by sail, and 2s. 6d.@2s. 9d. by steamer, per bbl.; grain at 8¼d. by sail, and 10d. by steamer, per bushel; cotton at $\frac{3}{16}$d. by sail, and ¼d. by steamer, per lb.; and heavy goods 20s.@35s. by sail, and 30s.@45s. by steamer, per ton. Total number of vessels in port on Wednesday, 469.

The New York exports, exclusive of specie, for the week ending Aug. 24, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$3,568,654	$5,581,238
Prev. reported	105,061,555	117,186,539
Since January 1	$108,630,209	$122,767,777

The imports for the week ending August 21, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$2,897,131	$2,411,544
Gen. merchandise	3,747,159	3,392,604
Total for the week	$6,644,290	$5,804,148
Previously reported	155,532,525	194,406,006
Since January 1	$162,176,815	$200,210,154

The balance in the Sub-Treasury on Wednesday was $91,426,742.

☞ PACIFIC RAILWAY GOLD LOAN, $6,500,000. A seven per cent. land grant, railroad, first mortgage bonds having thirty years to run. Interest and principal payable in gold. Coupons payable semi-annually in London, Frankfort and New York. Circulars, maps and pamphlets sent on application. The bonds for the present are sold in currency at 95, with accrued interest. DABNEY, MORGAN & CO., 53 Exchange Place. M. K. JESUP & COMP'Y, 12 Pine street.

Newburgh and New York Railroad.

The opening of the Newburgh and New York Railroad was celebrated at Newburgh on the 24th inst. The road is 12.6 miles in length, commencing at Vail's Gate on the Newburgh Branch of the Erie Railway, a station just this side of Newburgh, and extending to a point on the Erie Railway, about one mile south of Turner's, or 47 miles from New York. The distance from Newburgh to New York by this route is 62½ miles—a saving of about 11½ miles in distance over the old route *via* Greycourt. The road is of the same gauge as the Erie, has been about one year in building, and cost about $500,000. It is laid with T rail weighing 56 lbs. to the yard, and fish-jointed.

☞ The opening of the Windsor and Annapolis (Nova Scotia) Railway took place on the 15th inst.

Lake Shore and Michigan Southern R. R.

The lines owned and operated by the consolidated Lake Shore and Michigan Southern Railroad Company consist of the following, viz: Chicago to Buffalo, *via* Air Line, 529 miles; Toledo to Elkhart, *via* Adrian and White Pigeon, 142 miles; Jackson Branch, 41½ miles; Adrian to Monroe, 33½ miles; Toledo to Detroit 59 miles; White Pigeon to Constantine, (leased), 4 miles; Branch to Graytown, from Junction, 8 miles east of Toledo, 9 miles; Elyria to Sandusky, 35 miles—total, 856 miles.

It is now proposed to consolidate this road with the Toledo, Wabash and Western Railway, and an agreement to that effect has been entered into between the representatives of the respective companies, subject to the approval of the stockholders. The stock of the Lake Shore and Michigan Southern is to be put in at 120 and that of the Toledo, Wabash and Western at par. Before this is done there is to be a dividend of four per cent. cash on the stock of the Lake Shore and Michigan Southern. The stock and bonded debt of the consolidated company will then stand as follows:

Present stock of L. S. & M. So.	$35 000,000
Twenty per cent. to be added	7 000 000
Toledo, Wabash and Western stock	8,000,000
Bonded debt of L. S. & M. So.	20,000,000
Bonded debt of Toledo, Wabash and Western	15,000,000
Total:	$85 000,000

The length of road operated by the Toledo, Wabash and Western Railway Company is as follows: in Ohio, 75.5 miles; in Indiana, 166.9 miles; Main road in Illinois, 212.4 miles; Keokuk branch, 41.2 miles; Naples branch, 4 miles; Camp Point to Quincy, (leased) 22 miles—total, 522 miles.

Pittsburg, Ft. Wayne & Chicago Railway.

The books of this company have been closed for the purpose of calling in the old stock of the company, amounting to $11,500 000, and issuing therefor new certificates to the extent of $19 714,285 to be guaranteed by the Pennsylvania Railroad Company. By the terms of the lease of this road to the Pennsylvania Railroad Company, the latter company agree to pay an annual rental, for the term of 999 years, of $1,380,000, in quarter-yearly instalments of $345,000 each, viz: on the 1st days of April, July, October and January; this amount to be paid to the stockholders of the Pittsburg, Ft. Wayne and Chicago Railway Company, free of Government or State taxes, or any other liability or incumbrance. The rental capitalized equals the sum for which the new certificates are to be issued; and upon these certificates regular quarterly dividends of 1¾ per cent., free of Government tax, are to paid.

☞ The Iowa Central and Iowa River Railroad Companies have been consolidated—the name of the latter road being retained. This road is already built from Ackley, on the Dubuque and Sioux City Railroad, to Eldora; a large share of the grading is done between Marshalltown and the latter place, and the cars expected to run that far by the last of September.

☞ The Western Pacific Railroad Company expect to complete their road from Sacramento to Oakland, opposite San Francisco, by the 6th of September.

Commerce of the United States.

From the Report of the Bureau of Statistics, now going through the press, it appears that the gold value of imports into the United States during the year ending June 30, 1869, were $437,026,541; the exports (mixed values, chiefly currency) $413,869,182; and the re exports (gold values) $25,130,167. The proportions of the foregoing carried in American and foreign vessels, respectively, were as follows:

Vessels.	Imports.	Exports.	Re-exports.
American.	$136,465,257	$136,893,580	$15,299,631
Foreign...	300,561,284	276,975,602	9,830,536
Total.....	$437,026,541	$413,869,182	$25,130,167

From this it appears that about 69 per cent. of our imports, 67 per cent. of our exports, and 89 per cent. of our re exports, or 67 per cent. of the aggregate, was transported by foreign vessels. The entrances and clearances in the foreign trade during the year ending June 30, 1869, were as follows:

Vessels.	Entered.		Cleared.	
American..	9 974	3,402,689	9,707	3,384,745
Foreign ...	18,875	5,388,243	18,824	5,425,425

The principle articles of export, during the year were as follows:

Agricultural implements	$1,042,426
Live animals	871,492
Indian corn (against $13,068,736 in 1868)	6,820,664
Indian meal	1,656,270
Wheat (against $30,341,600 in 1868)	24,349,638
Wheat flour	18 841,445
Coal	1,553,115
Copper	231,187
Sea Island cotton	2,374,892
Upland cotton	160,258,160
Manufactures of cotton	5,865,388
Furs and furskins	2,024,076
Gold bullion (against $23,984,021 in 1868)	13,584,407
Silver bullion	13,573,427
Gold coin (against $44,353,637 in '68)	14,853,369
Hops	1,627,244
Hardware	2,039,008
Muskets, Pistols, Rifles, and Sporting Guns	1,983,886
Machinery, other than Sew'g Machines	2,948,165
Boots and shoes	475,053
Rosin	1,989,019
Spirits turpentine	1,261,222
Oil cake	4,493,196
Crude petroleum	2,808,202
Refined petroleum	27,289,835
Spermaceti oil	1,361,388
Whale and fish oil	81,860
Beef	2,429,977
Cheese	6,487,866
Hams and bacon	7,481,813
Lard	7 443,948
Pork	3,407 813
Tallow	2,362,630
Quicksilver	869 803
Sewing machines	2,051,681
Distilled spirits from grain	86,686
Distilled spirits from molasses	638,495
Distilled spirits from other materials	70,917
Leaf tobacco	20,550,489
Cigars	15,519
Snuff	20,252
Other manufactures of tobacco	2,758,698
Boards, Clapboards, Deals, Planks, Joists and Scantling	2,788,057
Box shooks	558,508
Other shooks, staves and headings	5,781,289
Timber (sawed and hewn)	875,394
Household furniture	1,203,541

From the beginning of the present fiscal year a more extended classification of articles of export will be adopted, the schedule embracing 220 specifications, as against 120 in the schedule heretofore in use. The following are the principal artices imported during the fiscal year:

FREE OF DUTY.

Dyewood in sticks	$1,092,508
Gold bullion	890,930
Gold coin	13,841,638
Silver coin	5,852,066
Horse hair	1,052,441
Indigo	1,640,950
Madder	3,553,258
Rags	2,700,619
Raw silk	3,312,738

DUTIABLE.

Animals	$3,563,605
Barley	5,616,194
Rice	1,326,113
Wheat	1,719,382
Books, &c	1,606,913
Buttons	1,649,750
Coal	1,213,056
Coffee	24,686,818
Cotton, bleached and unbleached	3,533,083
Printed, &c	2,960,636
Other manufactures of cotton	13.986,976
Chemicals, &c., not specified	7,239,079
Earthen, stone and chinaware	4,372,954
Fancy goods	3,038,107
Fish	1,972,690
Flax, raw	669,411
Manufactures of flax	16,552,876
Fruits	7,955,658
Furs	3,045,144
Glass and glassware	4,194,881
Gums	1 240,195
Raw hemp	2 813,496
Hides and skins	12,467,600
Raw India rubber	2,505,646
Manufacturers of India rubber	964,639
Pig iron	2 171,369
Bar iron	3,675,397
Railroad iron	8.281,005
Old and scrap iron	2,531,832
Steel ingots, &c	3,196,466
Cutlery	1,595,908
Other manufactures of iron and steel	8,992,000
Raw jute	1,108,524
Manufactures of jute	641,876
Lead, in pigs and bars	3,503,798
Leather	4,792,884
Gloves, of kid and leather	2,515,467
Opium	1,086,572
Precious stones	2 041,933
Provisions, &c	2,002,225
Salt	1,265,054
Dress and piece goods of silk	10,916,915
Other manufactures	11,417,789
Caustic soda	2,562,145
Other soda	1,661,236
Spices	1,553,766
Sugar	60,809,612
Molasses	11,990,765
Tea	13,690,326
Tin, in bars, &c	1,589,741
Tin, in plates	8,730,832
Leaf tobacco	1,973,515
Cigars	1,330,047
Watches, and parts of watches	2 449,059
Spirits and cordials	1,507,771
Wines	2,758,555
Wood and manufactures of wood	8,252,304
Wool	5,597 641
Woolen goods, Cloths and Cassimeres	7,003 669
Shawls	1,816 239
Carpets	4,136,999
Dress goods	16,051,263
Other manufactures of dress goods	5,612,743
Zinc and manufactures of zinc	1,206,572

The principle articles, free of duty re-exported during the year were:

Gold coin	$7,541,576
Silver coin	6,428,518
Dutiable—	
Coffee	$1,015,261
Breadstuffs	1 123,480
Cotton and manufactures of cotton	595,339

Of the total amount of import entries during the year, there was:

Dutiable	$395,847,369
Free of duty	41,179,172
Entered for consuption	252,101,392
Entered warehouse	184,925,149

Reducing the domestic exports to specie values, $318,103,765, it will be seen that our imports exceed them by $118,922,776, and are in excess of exports and re exports combined by $93,792,609.

Journal of Railroad Law.

RAILROAD COMPANIES—CONTRIBUTORY NEGLIGENCE—IMPUTING TO INFANT—NEGLIGENCE OF PARENT.

The facts of the late case of Margam *vs.* The Brooklyn Railroad Company (38 N. Y., 455,) are fully and clearly stated in the following opinion by

GROVER, J.—The non suit granted at the Circuit can only be sustained upon the ground, that the evidence failed to show that the injury received by the plaintiff resulted from the negligence of the driver of the car, or that it showed the negligence of the plaintiff, or that of those having the care of him, and whose negligence was imputable to him, contributed to the injury received.

Upon the first ground, no question is made by the counsel of the appellant. The negligence of the driver was clearly proved. It was his duty, while driving in the streets of Brooklyn, to keep entire control of his team as far as practicable; to be in a position to speedily apply the brake, and to be vigilant in observing the track, so as to enable him as far as practicable, to avoid inflicting injury upon others. All of this was omitted by the driver, upon the occasion in question. Upon the latter ground there is more doubt. In Hartfield *vs.* Roper (21 Wend., 615,) it was held, that when a child of such tender years as to be incapable of avoiding danger, who is permitted by the parents or guardians to be in the public streets, and there receive an injury by being run over by a traveler, who failed to discover him while standing or sitting in the traveled track, they could not recover unless the traveler was guilty of gross negligence, or inflicted the injury voluntarily. The principle of this case has been since its determination often applied by the Courts of this State to analogous cases, and must now be regarded as the settled law, notwithstanding a somewhat different rule prevails in some of the other States. See Darley *vs.* Norwich Railroad Co., (26 Connecticut, 591,) and cases cited. This brings us to an inquiry as to the degree of care required from parents and guardians in keeping such a child from the street. The counsel for the defendant insists that it must be such care as effectually to accomplish the object, and that anything short of this is negligence. While, on the other hand, it is claimed by the plaintiff, that to constitute negligence in the parent or guardians there must be an omission of such care as persons of ordinary prudence exercise, and deem adequate for that purpose. The latter appears to be the conclusion required by the analogies of the law. Legal negligence is the omission of such care as persons of ordinary prudence exercise and deem adequate to the circumstances of the case. This definition, applied to the point in consideration, will exonerate the parents from the charge of negligence, if they used that degree of

care. This conclusion is also supported by the reasoning in Hartfield *vs.* Roper (*supra.*) It is there said, that the law has placed infants in the hands of vigilant and generally affectionate keepers, their own parents, and if there be any legal responsibility for damages, it lies on them. Surely an infant could not recover against his parent or guardian, for negligenae in permitting him to escape into the street, unless he could show some omission of ordinary care to prevent it. The inquiry upon this point, then, is whether the parents of the plaintiff were guilty of negligence, in permitting him to get into the street; for, if not, the non-suit cannot be sustained upon that ground. The evidence shows, that he was not permitted to go, unattended, in the street, that he was lost sight of by his sister for only about twenty minutes; that his only means of access to the street was by climbing out of an open window, which only came within four feet of the floor. There was no evidence, that he had ever before got out of this window, or attempted to. I do not think that failing to guard this aperture, will warrant the conclusion, as matter of law, that the parent was guilty of negligence. At most, it should only have been submitted to the jury as a question of fact. The only remaining question is, whether the plaintiff himself was guilty of negligence contributing to the injury. This leads to an inquiry as to what degree of care is required of an infant four years old. In Daly *vs.* Norwich R. R. Co., (*supra,*) it was held, that negligence could not be imputed to a child of such tender years as to be wholly incapable of the exercise of care. In Robinson *vs.* Cone (22 Vermont,) it was held, that all that could be required of such a child, was the exercise of such care as it was capable of. In Lynch *vs.* Murdin (41 Eng. Com. Law, 422,) it was held, where the defendant's cartman had left his horse and cart standing unattended in the street for half an hour, and children gathered around it for play, and the plaintiff got into the cart, and, while getting out, another lad started the horse, thereby causing the plaintiff to fall, and the cart to run over him, breaking his leg, that the plaintiff could recover. It will be observed, that, in this case, the plaintiff (seven years old) had done a positive act (getting into the cart,) in itself wrongful, and which had directly contributed to the injury, and which would most clearly have barred an action by an adult for a similar injury, yet the Court held he had acted from childish instinct, and that this was not an impediment in the way of a recovery. These cases show, that a somewhat different rule, in determining the care to be exercised, is to be applied to infants, that is applicable to adults, when the inquiry is whether their negligence has contributed to an injury received; that if there is no negligence in the parents or guardians in permitting the child to be in the street, and he has then received an injury from the negligence of another, he can maintain an action, unless he has omitted such care as might reasonably be expected from one of his capacity. Applying this rule to the conduct of the plaintiff, the evidence shows, that he was not guilty of the omission of any care that might have been expected from one of his years. After getting into the street, he ran along Tenth until he came to First, and then ran across the track ahead of the team, getting out of their way, but not out of the way of the dash-board of the car. He was too young to possess discretion to guard against that danger, and his not doing so is not, under the circumstances, to be regarded as negligence in him.

The order appealed from must be affirmed, and judgment final, upon the stipulation, be given to the plaintiff.

Bachman's Valley Railroad.

Mr. Joseph S. Gitt, engineer, with a corps of assistants, last week, surveyed a new route for the proposed Bachman's Valley Railroad, starting at Leib's Bridge, on the Hanover Branch Railroad, and from thence running southeast through Heidleberg and Manheim townships, York County, *via* Klinefelterville, and entering Maryland near Wentz's Church, in Carroll County, intersecting the line run last fall by engineer Ames, between Kroh's and Tracy's Mills, on the head of the Gunpowder Falls, and ending at the extensive Ore Banks in Bachman's Valley. This route is the most favorable and practical one that has been surveyed, passing through a fine rich country, with light grades. There are extensive deposits of iron ore, of excellent quality, throughout the whole country through which the road is to pass, the transportation of which alone will more than pay the cost of construction. It appears to be generally understood that this road will be built at an early day.—*Hanover Spectator.*

☞ The contract for the extension of the Cumberland Valley Railroad from Hagerstown to the Potomac River, near Williamsport, a distance of eight miles, has been awarded to Mr. James Marsh. It is understood that a commencement will be made immediately and no efforts spared to finish the road in the shortest possible time.

☞ The firm of Otis & Co., proprietors of the "Lake Erie Iron Works," Cleveland, Ohio, was dissolved on the 2d inst. The business heretofore conducted by the above firm will be continued by the Otis Iron Co. The officers are: C. A. Otis, President; E. Lewis, Sup't; E. B. Thomas, Secretary and Treasurer. The office of the company is at 48 and 50 River st., Cleveland, Ohio.

☞ The final commission on the part of the U. S. Government were to have met at Omaha on the 23d inst., and proceed thence to Sacramento, examining the works in all its parts. The Commission consists of Gen. Hiram Walbridge, S. M. Felton, President of the Philadelphia, Wilmington and Baltimore Railroad, Gen. Boyd, of Kentucky, Gen. Winslow, of Iowa, and Gen. Comstock, late of Gen. Grant's Staff.

☞ The Louisville *Courier-Journal* says that the counties in Illinois through which the Danville, Olney and Ohio River Railroad is to pass are voting the subscriptions by large majorities. The directors have agreed upon terms with a company of capitalists who undertake the completion of the entire road from Danville to the Ohio river, and next Thursday is the day fixed for closing the contract at Chicago.

☞ The Cleveland *Herald* says the Directors of the Western Pennsylvania Railroad Company are determined to push the Butler Branch to completion by the middle of May or first of June, 1870. We presume work will be commenced at once. A number of contractors from the East were along the line last week making examinations preparatory to work.

Ten-Twenty Bonds

$300,000

IN

BONDS OF

Buchanan County,

STATE OF MISSOURI,

Issued by a Special Vote of the People, at an Election held for this purpose.

TWENTY YEARS TO RUN,

With the option of paying them after ten years,

Bearing TEN PER CENT. (10 per Cent.) Interest, payable Semi-Annually, on 1st of July and Jan., at the

Bank of America, New York,

FREE OF GOVERNMENT TAX,

Principal Payable in New York.

Taxable Wealth of Co., $13,000,000
Debt, including these Bonds, only - - $500,000

PRICE 95 UNTIL SEPT. 1, NEXT.

FOR SALE BY

TANNER & CO.,

BANKERS,

No. 49 Wall-Street, New-York.

We take pleasure in recommending these Bonds as a perfectly safe and reliable investment, and will furnish information relating thereto.

TANNER & CO.

Aug. 19, 1869.

OFFICE OF THE

RICHMOND IRON MINING COMPANY,

No. 165 BROADWAY, Room No. 17, }
New York, Aug. 20th, 1869. }

THIS COMPANY HAS ON HAND AND FOR sale at their Mine on Staten Island 15 000 tons of Granulated Hematite Iron Ore, which assays as follows:

Sesqui oxide of iron	72.57
Sand, etc., (insoluable)	15.67
Moisture and other constitutes	11.76
	100.00
Yielding metallic iron	50.80

Or proposals will be received for the reduction of the same to iron.

CHAS. HOWDON SMITH,
Secretary.

$18 IMPROVED WALTHAM WATCHES.

GET THE BEST, AND BUY WHERE YOU CAN BUY THE CHEAPEST.

Engineers, Railroad Men, Master Mechanics and Machinists, if you wish to obtain a genuine Waltham Watch, with all the late improvements, and run no risk whatever of not obtaining a reliable timekeeper, send for Descriptive **PRICE LIST**, giving full particulars of Watches, style and quality of cases, or call and examine. In Coin Silver Cases, **$18.** In 18k Gold Cases, **$80.** Ladies' Size, **$70.** Every Watch thoroughly examined and regulated, and if any one should prove imperfect, return it at once and we will correct or exchange it for one that is perfect, FREE OF CHARGE. H. O. FORD & CO.

Eight years with American Watch Company, 84 Tremont street, opposite Tremont House.

Watches sent to any address, and by selecting from Price List you can get as good a Watch as if selecting in person.

PASSENGER CARS.

60 AND 64 SEAT NEW FIRST CLASS PASSENger Cars. Immediate delivery. For sale by

WM. H. PETIT,
72 Wall St.

4t35

DESIGNS AND WORKING DRAWINGS OF Railroad and other Machinery, Iron Bridges, Roofs, Cranes, &c., promptly made by M. N. FORNEY, Mechanical Engineer, 64 Broadway, (Room 48,) New York. 4t35

Notice to Railroad Companies.

OWING TO A CHANGE IN OPERATING, THE Second Avenue Railroad Company offer for sale, at their depot, corner of Sixty-third street and Second avenue, in the City of New York, the following described Cars:

Two attached 16-horse power Dummy Engines, built by Grice & Long.

Seven 20-horse power double end Dummies, with Grice & Long Engines and Whittaker Boilers.

Also seven 50 Passenger Cars, all in good running order, and will be sold cheap.

Communications addressed as above will meet with prompt attention.

Intercolonial Railway.

THE Commissioners appointed to construct the Intercolonial Railway give PUBLIC NOTICE that they are now prepared to receive Tenders for five further Sections of the line.

CONTRACT No. 8 will be in the Province of Quebec, and extend from the Easterly end of Contract No. 5, at Rimouski, to a point near the Metis River, about 20½ miles in length.

CONTRACT No. 9 will be in the Province of New Brunswick, and extend from the Easterly end of Contract No. 6, towards the Town of Bathurst, about 20½ miles in length.

CONTRACT No. 10 will be in the Province of New Brunswick, and extend from the centre of the Chaplin Island road, near the Court House, at New Castle, towards Bathurst, about 20 miles in length.

CONTRACT No. 11 will be in the Province of Nova Scotia, and will extend from the Easterly end of the Eastern Extension Railway to the Westerly end of Section No. 4, (including the bridge across the Missiquash River, except the western abutment) about 3½ miles in length.

CONTRACT No. 12 will be in the Province of Nova Scotia and extend from the easterly end of Contract No. 7, at Folly Lake, to a junction with the existing railway at Truro, about 24½ miles in length.

Contracts Nos. 8, 9 and 10 to be completely finished before the first day of July, 1871. Contract No. 11 to be completely finished by 1st July, 1870.

That portion of contract No. 12 east of Folly River to Truro to be finished and ready for laying the track by the 1st day of October, 1870, from Folly River to a point opposite the Londonderry Iron Works by the 1st January, 1871, and the remaining portion of said contract by the 1st day of July, 1871.

Plans and profiles, with specifications and terms of contract, will be exhibited at the offices of the Commissioners in Ottawa, Rimouski, Dalhousie, St. John, Halifax, Toronto and Quebec, on and after the 13th September next, and sealed Tenders addressed to the Commissioners of the Intercolonial Railway, will be received at their office in Ottawa up to 7 o'clock, p. m., on the 18th October, 1869.

Sureties for the completion of the contract will be required to sign the Tender.

Commissioners' Office.
Ottawa, 3d August, 1869.

STEAM COAL,

From the Clover Hill Virginia Coal Mines,
A SUPERIOR ARTICLE FOR STATIONARY ENGINES.
FOR SALE LOW BY THE CARGO. Apply to
JAMES B. CUNNINGHAM & CO.,
3m33. *AGENTS, 130 PEARL-ST.*

TO RAILROAD CONTRACTORS.

Memphis, El Paso and Pacific RAILROAD COMPANY.

Office of the Chief Engineer,
Memphis, El Paso and Pacific Railroad Company,
90 Broadway, New York.

SEALED PROPOSALS will be received at the above Office, until **October 1st, 1869,** when Contracts will be awarded, for the GRUBBING and CLEARING, GRADING, MASONRY, BRIDGING, BALLASTING, CROSS TIES and TRACKLAYING of the following portions of said Railroad:

FIRST—The last Fifteen miles on the First Division of One Hundred and Fifty Miles, between Jefferson and Paris, Texas, commencing Eight miles east and extending Seven miles west of the town of Clarksville, in Red River County.

SECOND—One Hundred and Fifty miles, embracing the Second Division, commencing at Paris and extending westward, to Palo Pinto County.

Specifications, Profiles, Maps and Plans can be examined at the ENGINEER'S OFFICE, in NEW YORK or JEFFERSON.

Proposals must conform to the specification which will be furnished upon application at either of the above places.

Evidence of ability to complete contracts will be required and a percentage retained of estimates until each section of five miles is finished.

Work upon the First Division must be completed by March 1st, 1870.

The Second Division must be finished by October 1st, 1870.

Every facility will be furnished those wishing to inspect the ground on the line of the road, by application in person at the Engineer's Office in Jefferson.

J. M. DANIEL, Engineer in Chief,
Memphis, El Paso and Pacific R. R. Comp'y.

PROPOSALS FOR $300,000

CITY LUNATIC ASYLUM STOCK.

SEALED PROPOSALS will be received at the Comptroller's Office until TUESDAY, Aug. 31, 1869, at 2 o'clock, P. M., when the same will be publicly opened, for the whole or any part of the sum of three hundred thousand dollars of "City Lunatic Asylum Stock," authorized by chapter 56, Laws of 1869, and by an ordinance of the Common Council, approved by the Mayor, July 29, 1869. Said stock is to be issued for the purpose of providing additional buildings for lunatics in the City of New York, and will bear interest at the rate of seven per cent. per annum, payable half yearly, to wit: On the first day of May and November in each year, and the principal will be redeemed on the first day of August, 1889. The proposals will state the amount of stock desired and the price per one hundred dollars thereof, and the persons whose proposals are accepted will thereupon be required to deposit with the Chamberlain the sums awarded to them respectively, together with any premiums thereon. On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive certificates for equal amounts of the par value of the sums awarded to them, bearing interest from the dates of payment. Each proposal should be sealed and indorsed "Proposals for City Lunatic Asylum Stock," and inclosed in a second envelope, addressed to the Comptroller. The right is reserved on the part of the Comptroller to reject any or all of the bids, if in his judgment the interests of the Corporation require it.

RICHARD B. CONNOLLY,
Comptroller.

CITY OF NEW YORK DEPARTMENT OF FINANCE,
4t33 COMPTROLLER'S OFFICE, Aug. 9, 1869.

BURLEIGH'S PATENT

Pneumatic Rock Drill

Is now in successful working operation in New York, Chicago, Jersey City: also at the Hoosac Tunnel (Mass.,) Lake Superior, Colorado and, Nova Scotia Mines, Union Pacific and Boston and Hartford Railroads; also in deepening the beds of the Illinois and Michigan Canals, and Des Moines Rapids, and numerous other localities.

The Burleigh Drill is adapted to all kinds of rock cutting in open cut Mining, Tunnels, Sewers, Quarries, &c., drilling holes from 1½ to 5½ inches in diameter. The Drills are worked either by steam or compressed air. For all kinds of work under ground compressed air is used, serving as a perfect ventilator, as it is exhausted from the Drill. At the Hoosac Tunnel the compressed air is carried upwards of a mile and a quarter, and at that distance works eight Drills at the same time. Information in regard to the ownership of the different State rights. Prices of Drills, Air Compressors, &c., can be obtained at the office of

J. T. & W. H. DALY,

PRATT'S.
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Homogeneous Boiler Plates.

These plates, manufactured by Messrs. HUSSEY, WELLS & Co., of Pittsburgh, Pa., have been widely adopted for locomotive boilers and fire-boxes, instead of iron, and with the best results. For some time past, this firm has not been able to supply the demand for these plates, but they have now erected a new mill especially for their manufacture, and are now prepared to answer orders promptly to any amount. Recent improvements in manufacture, enable them to give these plates just the right ductility, so that they can be bent and worked at any angle without the least danger of breaking or straining of the fibre, while very hard tests show great increased resistance to bursting pressure over common iron boiler plate. *Engineering*, in referring to American locomotive boilers, very properly comments upon the frequent explosions, and if American locomotive engineers wish to retain the advantage of thin plates, they must see to it that they secure plates of the requisite strength and this they can do by using the homogeneous metal referred to. We copy the comments referred to:

It is impossible for an English engineer to read the records of American boiler explosions without being struck by the very large number of failures of locomotive boilers which occur annually on the other side of the Atlantic. In this respect the American records form a strong contrast to those of explosions in this country. Here the number of locomotive boiler explosions seldom exceeds three or four per annum, and considering the large number of locomotives now at work in the United Kingdom, locomotive boilers may be said to possess a greater immunity from explosion than almost any other class. To a great extent this is, no doubt, due to the fact that locomotive boilers are, almost always, worked under skilled superintendence, and subject to frequent inspection; but it is also due to their being, with but few exceptions, well constructed, in the first instance, and properly proportioned for the work they have to perform. In America locomotive boilers, although under quite as skilled superintendence as our own are yet more liable to explosion from the fact of their having generally less superfluous strength when new than would be considered necessary by our railway engineers. American locomotive superintendents use 5-16 in. and ⅜ in. plates, where we should use 7-16 in. or ½ in.; and notwithstanding the high pressures used, double rivetting is still the exception rather than the rule. The consequence of all this is that in a list, now before us, of 94 boiler explosions which occurred in the United States during 1868, no less than twenty-three explosions of locomotive boilers are recorded, these explosions thus amounting to over 25 per cent. of the whole; while from another record of the explosions which took place in the month of May last we find that during that month four locomotives exploded on different American lines. These are facts which demand the serious consideration of American locomotive engineers, and we trust that in the records of future years we may find evidence that the lessons which they teach have not been disregarded.

New Process for the Manufacture of Steel.

An experiment, says the Paris *Presse*, of a most interesting character, and having the highest interest for the iron industry, has taken place at the Marquise Steck Works, in presence of two eminent persons of the Ecole Centrale. The object of this experiment was to make steel by one operation, a problem which has engaged all metallurgists, and which, if solved, would cause an industrial revolution. M. Aristide Berard, an engineer whose name is familiar to all who have occupied themselves with this question, proposed to change second class metal in course of refining into steel of at least ordinary quality, by means of a process alternately oxidizing and reductive. His efforts have been crowned with success. The product obtained by his process, in presence of two competent judges, proved to be steel of good quality suitable for all purposes, and made with the facility necessary to its application to practical industry. The operation was effected in a reverbatory furnace, lasted about an hour and a half, and was accomplished with as much facility as puddling. In this process, instead of acting on 480 pounds of metal to obtain iron of number one quality, from 6,600 to 11,000 pounds of metal is made by only one operation into steel ingots ready for the workshop, and with an unexpected economy. We will be much deceived if this invention has not in it the germ of a complete revolution in metallurgy.

Iron Manufacture.

FURTHER IMPROVEMENTS BY BESSEMER.

The London *Globe* says that Mr. Bessemer, whose name is so intimately associated with progress in the manufacture of steel, has lately patented another invention which is likely to have an important influence on the manufacture of iron. This metal is improved, up to a certain point at all events, by successive remeltings, and thus old iron has considerable value. The value, however, is considerably diminished by the difficulty experienced in fusing such materials as old rails and scrap iron. But by Mr. Bessemer's last invention these refractory materials are run down like wax, and a charge is melted in a few minutes which would require many hours and a large expenditure of fuel to effect the fusion on the common system. The secret lies in the employment of atmospheric pressure. The inventor converts a cupola furnace into an air-tight vessel, capable of withstanding a pressure of an atmosphere and a half or two atmospheres, and the concentration of heat in this compressed air is sufficient to produce the striking effects we have mentioned. In practice, it is not found necessary to increase the pressure beyond the amount we have stated, and we may safely assume the fact that Mr. Bessemer finds no difficulty in constructing furnaces to withstand the pressure without extravagant wear and tear. This is a point on which we have as yet no information, nor have we any statement of the relative consumption of fuel on the old and new system. An idea of the construction of the furnace may be given in a very few words. It is a cupola furnace, with a very (comparatively) narrow outlet closed by a loaded valve to regulate the pressure, while a blast of heated air is driven in by a powerful engine. A very ingenious mechanical contrivance allows of additions being made to the charge during temporary interruptions of the blast until the furnace is worked up to its full capacity.

Chicago and Northwestern Railway.

The earnings of this road for the years ending May 31, 1868 and 1869, were as follows:

	1867–'68.	1868–'69.
From passengers	$3,573,031 47	$3,990,998 13

Rent of Cedar Rapids and Mo. River R.R.	475,300 00	
	2,450,753 11	
Leaving surplus of net earnings	$3,566,070 26	
Add surplus May 31, 1868	20,476 97	
Total	$3,586,547 23	
Less for cash dividend of 5 per cent., including tax, on common and preferred stocks, payable December 26, 1868	1,671,891 73	
Leaving balance to credit of Income Account May 31, 1869	$1,914,655 50	

After deducting for cash dividend of 5 per cent., payable June 30, 1869, amounting to $1,632,885, there will remain to credit of income account the sum of $281,770 50.

This exhibit of the year's business is no less gratifying as a review of the past, than encouraging as a ground of expectation for the future, and furnishes the best evidence of the success and continued prosperity which have attended the efforts of the management in their control of the operations of the company.

The gross earnings, which were never so large, increased from $12,614,846 46, in the preceding year, to $13,941,343 19, during the past year, showing a gain of $1,326,496 73, or 10.52 per cent.

On the other hand, the proportion of expenses to earnings has considerably diminished, and a saving of 5.58 per cent. in the relative cost of operating effected.

The total amount of charges applicable to the year's business for operating expenses, interest on bonds, sinking funds, taxes, rent of leased roads, etc., for the year ending May 31st, 1868, was $10,252,483 95, and the amount for the same purposes, for the year ending May 31st, 1869, was $10,375,272 93, showing the important and interesting fact, that it has been found practicable to so reduce the expenses that only $122,788 98 were necessary to be added to the annual charges of last year to defray the entire cost of the year's business, which yielded an increase of $1,326,496 73, in gross earnings, as before explained.

The result of the economy of operations will more fully appear by a comparison of the gross and net earnings for the last two years:

	Gross Earnings.	Net Earnings.
For the year ending May 31, '68.	$12,614.846 46	$2,362,862 51
For the year ending May 31, '69.	13,941,343 19	3,566.070 26
Amount of increase	$1,326,496 73	$1,203,707 75
Per centage of inc.	10.52	50.9

Liberal outlays have been made for such permanent improvements as were important and necessary to secure the safe and efficient working of the line, and to promote the best economy in the present and future operations of the road; and the beneficial results of such policy are in a measure already seen in the steady decrease of the per centage of current expenses to earnings.

New locomotives and cars have been purchased and built, and added to the value of the equipment, within the year, to the amount of $262,501 22; and the further sum of $829,658 20 has been expended for permanent works, construction improvements, depot grounds, right of way, new and important depot buildings, new station facilities, new and extended side tracks, steel rails, new telegraph lines, etc., etc.

Since the beginning of the last fiscal year, on the 1st of June, 1868, the funded debt has been decreased to the extent of $783,000, and this amount, added to the amount of $275,000 of 10 per cent. equipment bonds, paid off on the 1st of May, 1868, as stated in the last annual report, shows a total decrease of the funded debt, in the last two years, of $1,058,000. Of this amount there has been paid off in cash—

10 per cent. equipment bonds	$825,000
1st mortgage, and Beloit and Madison 7 per cent. bonds	10,000
	$835,000
Amount retired by the conversion of consolidated sinking fund, and Peninsula bonds, and by exchange of 7 per cent.	223,000
Total	$1,058,000

The share capital of the company has been increased during the year $337,296, of which $34,486 has been an increase of common stock, and $302,810 an increase of preferred stock; all which has been issued for conversion of bonds, and in exchange for Beloit and Madison, and Chicago and Milwaukee Railway stocks.

The condition of the company on the 31st of May, 1869, in respect to its stock and bonds, is as follows:

Common stock	$14,590,161 61
Preferred stock	16,659,097 42
Bonds as per schedule appended to this report	17,290,400 00
Total of stock and bonds	$48,539,659 03

Three payments of the 10 per cent. equipment bonds, issued September 1st, 1866, have already been made as they matured, in the respective amounts of $275,000 every six months; and two more of such payments, amounting together to $550,000, will accrue and be paid in November and May of the current fiscal year, ending with the 31st of May next.

No new issues of bonds have been made to replace the amount of these maturing bonds, nor for any other purpose; but in view of these payments, which will materially decrease the funded debt, and of the large expenditures during the year for additional equipment and permanent improvements before referred to, the Board of Directors authorized, on the 26th of May last, the issue and sale of fifteen thousand shares of the preferred stock of the company—as an increase of its capital—to be consummated by the delivery of the stock on the 1st of July, 1869.

This stock was all disposed of, as of that date, at its par value, and its issue, which was subsequent to the close of the last fiscal year, will appear in the next annual report.

At the date of the last report there was outstanding of Chicago and Milwaukee Railway stock $153,400, and of Beloit and Madison Railroad stock $10,200, not owned by this company. These amounts have, during the year, been reduced to $41,090, and to $8,214 respectively, by exchanges for the preferred and common stocks of this company; the balance still outstanding of $49,304, is mostly in small amounts, and may be exchanged on presentation, at the option of the company, at any time.

During the year the directors have declared two dividends of *Five per cent.* each, free of tax, on both classes of stock, one on the 19th of November, payable on the 26th of December, 1868, and the other on the 26th of May, payable on the 30th June, 1869. The aggregate of these dividends, together with the taxes that have been paid on dividend account during the year, amounted to $3,304,776 73, which amount, deducted from the net income of $3,586,547 23, leaves a surplus, at the close of the year, of $281,770 50, against $20,476 97 at the close of the previous year.

The company retains its interests in the Winona and St. Peter and the La Crosse, Trempeleau and Prescott Railroads; the latter is still incomplete and not in operation, and the business of the former, which is increasing and encouraging, is conducted under a separate organization, and is not included in this report.

In addition to the outlays made for increase of equipment and permanent improvements, already mentioned, there has also been expended a considerable amount during the year for a class of renewals and improvements which are of a durable character, and have for their object the advancement of the company's interests through many years. These items have been charged to the cost of operating, and are included in the ordinary expenses of the year.

The Direction regard it as a self-evident and conclusive proposition, that the preservation and maintenance of this great property are essential to its influence, prosperity and success in the future; and they believe it to be alike the dictate

of sound policy, prudent management and self-protection, to keep active step with the progress of events in the affairs of the company, and to provide such adequate and proper facilities as shall not only meet present requirements, but also reasonably anticipate those wants which are steadily and inevitably growing upon us.

Nearly six thousand tons of rails have been ordered, and are being laid down in place of the lighter iron of the Iowa Division, and further renewals will be made on this and other portions of the road from time to time, to maintain the efficiency of the property in all its departments.

The Rolling Stock and entire property are in better condition, generally, than at any former period, and the effective capacity of the road has steadily enlarged with the growth of business upon it.

Situated as one of the earliest, most direct and favorable connections of the Pacific Railways, and enjoying amicable relations for the interchange of business, we may confidently rely upon receiving a due share of the through traffic passing over those lines; and we shall hereafter participate in the benefits of this new business in direct proportion to the success of those great national routes in influencing the course of business across the continent.

But encouraging as is the prospect of through business to be realized from our connections with these and other important lines, whose extensions west and northwest are stretching out railway communication to hitherto new and remote regions, abounding in natural elements of wealth and prosperity, we have, in the local business already developed, and in course of development, a still greater source of encouragement in the future.

The country traversed by our Milwaukee Division, which, by its healthful and commanding situation on the Lake shore, offers great inducements for suburban residences and country homes, has steadily increased in population and importance. Many indications of prosperity are constantly appearing, in the new and attractive improvements which are to be seen with the progress of each year, and the large passenger traffic now enjoyed, will continue to increase with the growth of the important cities of Milwaukee and Chicago. The traffic of the Peninsula Division, in the transportation of the rich and inexhaustible iron ore of the Lake Superior regions, for which there is an increased demand each year, is rapidly augmenting; the construction of new railways in Minnesota and Wisconsin, with the varied industries and resources abounding in those States, must contribute to the business of our Wisconsin lines; while the millions of acres of cheap and fertile lands adjacent to our road in the State of Iowa require but quick and easy tillage at the hands of the husbandman to convert the broad prairies into fruitful fields and productive farms, capable of sustaining a large population, and yielding a surplus for abundant transportation.

A portion of this business, and a large quantity of coal from the valuable coal beds of the regions contiguous to this line, will seek an outlet upon the Pacific roads, and along the valley of the Missouri River for many miles, while thousands of tons of this cheap fuel will be distributed at various points, east and west, throughout the line, to meet the demands for local consumption.

But the bulk of the surplus products of these prairies must seek an eastern market, by way of our Fulton line, to Chicago, and the earnings of the Galena Division, as well as those of the Iowa line, will continue to increase with the development of the State of Iowa from year to year.

The thrift that every where abounds, with the increase of manufactures, trade and agriculture, the upbuilding and growth of new villages, towns and cities, and the improvement of material interests in the older communities along our various lines, evince the profitable industries and advancing wealth of the country, and afford the surest guarantees of our continued prosperity.

The earnings and expenses of the road for the past year were distributed among the respective divisions as follows:

	Earnings.	Expenses.
Wisconsin Division.	$3,143,969 41	$1,876,094 48
Galena "	4,622,395 78	3,353,006 90
Iowa "	4,290,894 54	2,678,526 40
Madison "	227,883 41	140,666 16
Peninsula "	534,085 66	317,785 10
Milwaukee "	1,122,114 39	558,440 78
	$13,941,348 19	$7,924,519 82

There has been expended during the year for permanent improvements, and charged to construction account, the sum of $829,658 20; and for additional rolling stock, $262,501 22.

The additianal equipment consists of: 5 locomotives purchased, and 2 built at the company's shops; 7 first-class and 9 second-class passenger, 1 mail, 1 baggage, 12 way and caboose, 91 box-freight, 4 stock, 3 flat and 14 iron ore cars—all built at the company's shops.

The company now have 255 locomotives, 155 passenger, 149 caboose and way, 109 baggage, mhil and express, 4 boarding, 3,654 box, 904 platform, 311 cattle, 53 coal, and 536 iron ore cars.

The number of passengers carried during the year was 2,231,941, carried an average distance of 49.6 miles, equal to 110,804,266 passengers carried one mile. Tons of freight carried, 2,211,826. Increase in passengers, 171,529; and in the mileage of do., 21,996,764. Increase in tonnage, 229,397.

The operating expenses of the road for the year, including taxes, were 56.84 per cent. of the gross earnings; in 1867-'68 they were 62.42. The earnings per mile of road operated were $12,059 99—an increase over the preceding year of $1,122 89.

GENERAL BALANCE SHEET, May 31, 1869.

Old Construction:		
Cost of road and property in accordance with terms of consolidation to May 31, 1868		$39,811,242 62
Add for amounts charged since for purchase of stock of the Chicago and Milwaukee and Beloit and Madison Co's		114,296 00
		$39,925,538 62
New Construction:		
Balance to debit of this account May 31, 1868	$2,777,203 97	
Add amount charged during the year for right of way and depot grounds	96,204 19	
Additional side tracks	128,864 53	
Extension of track on Peninsula Div	37,761 34	
Construct'n of buildings	328,922 29	
New iron and steel rails	191,161 29	
Telegraph	14,989 36	
Coon River Bridge	9,064 74	
Fences, gates, etc.	22,690 46	
		3,606,862 17
New Equipment:		
Balance to debit of this account May 31, 1868	$4,958,899 50	
Add for new locomotives and cars purchased and built during the year	262,501 22	
		5,221,400 72
Securities on hand		848,000 24
Materials on hand		1,169,578 11
		$50,771,379 86

Common stock:		
Amount issued to May, 1868		$14,555,675 61
Issued since for stock of Beloit and Madison R. R. Co		1,986 00
Issued since for bonds of Peninsula R. R. Co. of Michigan		32,500 00
		$14,590,161 61
Preferred stock:		
Amount issued to May 31, 1868	$16,356,287 42	
Issued since for st'k of Chicago and Mil. R. W. Co	112,310 00	
Issued since for Consol. S. F. bonds	126,000 00	
Issued since for 7 per cent. equipment bonds	32,000 00	
Issued since for b'ds of Peninsula R.R. Co. of Michigan	32,500 00	
		16,659,097 42
Funded debt:

European Mining and Mineral Statistics.

The following is a tabular review of the mining and mineral statistics of the German Zollverein (1867,) of Italy (1865,) and of the mining of Great Britain (1867,) prepared from official documents recently published by the respective Governments:

German Zollverein.

MINES.

	No. of Mines.	Production. Tons.	Value of products (gold.)
Bituminous coal	647	23,788,276	$32,812,525
Brown coal	865	6,994,818	4,812,250
Iron	1,859	3,264,464	4,409,647
Silver and gold.	188	81,953	1,045,066
Quicksilver	5	36	644
Lead	188	95,594	3,726,722
Copper	74	178,850	949,335
Zinc	64	368,928	1,930,250
Tin	33	261	51,906
Cobalt	5	650	77,065
Arsenic	4	1,845	10,050
Antimony	4	45	1,061
Manganese	242	60,342	478,958
Vitriol	30	79,612	319,527
Graphite	27	564	7,626
Schwerspath	7	6,445	12,508
Alum	3	17,160	8,590
Total	4,215	34,789,843	$50,653,730

METALLURGIC ESTABLISHMENTS.

	Nature of product.	General productions. Tons.	Value of annual productions. (Gold.)
188	Pig iron	960,806	$15,595,291
12	Raw steel	71,357	1,471,366
54	Castings from ore	126,444	2,959,951
381	Castings of pig iron	189,000	9,472,351
347	Iron in bars and stretched	540,380	24,702,423

Zinc	13,000	205,000
Iron pyrites	117,000	315,000
Miscell'neous minerals	....	10,865,000
Total value		$170,825,000

The following is a comparative statement of the mineral productions of some other countries (coal excluded) in 1865:

MINERAL MINES.

	Production. Tons.	Value of products (gold.)
Great Britain	10,350,800	$39,107,295
France	4,182,500	4,188,269
Belgium	1,071,900	3,176,405
Spain	972,180	7,720,576
Italy	195,281	1,398,064
German Zollverein ('67)	4,006,749	13,028,955

METALLURGIC ESTABLISHMENTS.

	Production. Tons.	Value of products (gold.)
Great Britain	4,912,400	$78,866,435
France	2,567,480	118,761,392
Belgium	921,420	29,682,110
Spain	147,220	15,656,265
Italy	64,705	6,732,014
German Zollverein ('67)	2,267,675	95,372,581

Messrs. Sanderson Brothers & Co.

One of the oldest and most eminent houses in the steel trade of England and the United States is the firm of Sanderson Brothers & Co., (Limited) of Sheffield, England. More than forty years they have been manufacturers and importers of steel, and have built up a reputation surpassed by none of their contemporaries in the trade. One peculiarly of this house is the constant and uniform excellence of its products; the Sanderson steel of to-day is just as good as the Sanderson steel of thirty years ago when it had no competitors; and this fact has secured for it a world-wide fame. Another important advantage possessed by this house is in the monopoly which they enjoy of that famous brand of Danamora iron, the G. L. hoop—the entire annual make of which they have secured. This is esteemed the best melting iron in the world, and in its manufacture Sanderson Brothers & Co. employ the most skillful workmen known. In May last the house underwent a change in its *personnel*, which is likely to result in an increased degree of prosperity. One or two new members have been admitted to the firm—men of large means and first rate business capacity, and this infusion of new blood has already had its legitimate effect in stimulating the energies of the concern to enter upon a wider field of operations. The new firm have decided to erect, immediately, new works on an extensive scale, which will be supplied with new rollers and new machinery throughout, all of the most improved patterns.

Tennessee State Bonds.

Office of Secretary of State, Nashville, Aug. 20, 1869.

W. and T. Harris, Dandridge, Tenn:

Gentlemen: In reply to your note of the 15th, I will venture the opinion that no serious effort will be made by the next Legislature to repudiate any portion of the debt of this State.

It is true that some two or three members elect have expressed such a purpose, but they have evidently done so without deliberate investigation. The very nature of their proposition shows an absence of a knowledge of the facts in the case. They propose to repudiate all bonds issued since the war by what they are pleased to term an irresponsible State Government. This will include all our bonds that are termed new bonds by the stock boards and in the quotations.

The new issue amounts to $19,535,000, and is made up of the following items:

1. Bonds issued for the interest and debt matured during the late war.	$4,912,000
2. Bonds issued in funding old debt matured since the war	1,000,000
3. Bonds issued in exchange for registered and defaced bonds	378,000
4. Bonds issued since the war to paying railroad companies, who do not ask to be relieved of the debt.	4,470,000
5. Bonds issued to non-paying railr'ds	8,795,000
Total	$19,535,000

Of the three first items, amounting to $6,270,000, it may be said, too, that they stand in law, equity and honor on precisely the same footing as the old debt, the old debt to that amount having been retired, and the overdue bonds and coupons canceled and filed in the office of the Comptroller. There is just as little ground for objection to the fourth item of $4,470,000, being bonds issued in aid of solvent and responsible railroad companies who pay their interest without difficulty.

The remaining $8,795,000 was issued to railroad companies who fail to pay interest, and most of them are now in the hands of receivers. The State has its lien on these roads, and some of them are worth more than they owe the State; others are worth the greater portion of their indebtedness and some will fall far short if forced to sale in in their unfinished condition. It is difficult to see how the State can ultimately lose on these non-paying roads more than three millions, provided reasonable diligence is used by the Legislature and its agents. The State of Tennessee cannot afford to repudiate three millions of dollars.

It may have been, and no doubt was, extravagant or improvident legislation to issue these bonds for sale when they were worth but from sixty to seventy cents on the dollar. But this was not the fault of the bondholder or buyer. By the issuance of our bonds we stimulated our corporations to embark in these railroad enterprises. This may have been folly, but if we refuse to pay the citizen or stranger who furnished the means it will be criminal.

Much has been said about the sale of our bonds at low figures. We chose to issue six per cent. bonds when the Federal Government was issuing five-twenties bearing an interest equal to about eight and a half per cent. But this does not involve the question of repudiation. The bondholder is blameless. He had a perfect right to buy our bonds on the market at whatever he could get them.

It has also been said that the law required our bonds to be sold at par, and made it a felony to sell them at less. This is a mistake. No such provision appears in any of the appropriation bills passed since the war.

Nor can we point to history and claim a release from our debt on the ground that it is a war debt. Our new bonds were not issued to raise funds

either to overthrow or to sustain any Government. They were issued in aid of peace and commerce, and to build up and enrich our State.

Indeed, there is not a single reason why these new bonds are not as just and valid, both in law and equity, as our old bonds, or as any other bonds of any other State; and it is painful to have to come to the conclusion that this movement (if such it can be called) is but the out-cropping of that seditious sentiment which looks upon the present State Government as a void and illegal affair, foisted upon the people by that very wicked concern at Washington called the Federal Government. But that is no open question. The Federal power set up this State Government and will maintain it. Besides, it is the very same State Government which issued the bonds it is proposed to repudiate. A change in the politics of the officers does not make a new Government. The members and officers are elected under the same Constitution and laws, and hold their offices under the same State Government which issued the bonds it is proposed to dishonor, and are all estopped from denying its validity. The State officer who denies the validity of this State Government denies his own right to the office he fills.

I may add that it is the opinion of our best lawyers that our bonds cannot be repudiated, because they are collectable by law in the Federal Courts, either by direct suit against the State, or by bill in equity to enforce the State's lien against the railroad for the benefit of the bondholder.

So, my dear Sirs, I take the responsibility of advising you to hold on to your new bonds. Repudiation is impossible for many reasons. First, and above all, because the people of Tennessee are too proud and too honest; because there is not the shadow of justification for it, and because our bonds are collectable in the Courts. It is impossible in the face of the condemnation of the world. No Legislature can or dare adopt a measure which would brand every Tennesseean with disgrace wherever he may go on the face of the earth, and which would make our children's children blush to own their nativity.

Most respectfully, A. J. FLETCHER.

A New Railroad Project.

Mr. Wingate, specially authorized by the City Council of Baltimore to examine the route of a proposed railroad from Swann Point, in Kent county, to Salisbury, in Wicomico county, and ascertain its practicability, passed through this place on Saturday week, on his way to Baltimore, from the execution of his commission. In conversation with some our citizens, he said that the route was not only practicable, but feasible, and that the road, if built, would be self-sustaining. The route of this road as at present laid down, passes through or near this town. We feel glad to know that Baltimore city is at last waking up to the importance of a short and direct communication with the Eastern Shore by means of a railroad. It is a subject which has been agitated time and again, but has failed to enlist the interest or attention of its citizens. And it is only now, through the lack of trade with Baltimore, that this much interest has been enlisted. Gradually decreasing year by year since the establishment of the Delaware road, the opening of so many lateral branches has almost turned the entire trade of the central peninsula, and a great portion of the western section, also to Philadelphia and New York, and it is this detraction from Baltimore of the commerce naturally hers which has awakened her to a realizing sense of the injury wrought her. We trust that the city council will be so influenced by the report of Mr. Wingate that it will at once initiate measures looking to the construction of the road, and that it will not relax its efforts until the last rail is laid and the iron horse goes leaping back and forth through the peninsula, rendering unto Baltimore the things which be Baltimore's.—*Denton (Md.) Union.*

Denver and Cheyenne Railroad.

We learn that the Denver and Cheyenne railroad, already partly built, has just been practically consolidated with the Kansas Pacific, now running to Sheridan, and soon to be completed from this city to Denver. The Kansas Pacific takes the road bed, now ready for the iron, and about eight hundred thousand acres of land belonging to the Denver road, and agrees to iron and stock the road, and put it into running order as quickly as possible, and to *pro rata* with the Denver and Cheyenne Company on their route and on an equal distance, one hundred and six miles, from Denver east. The road from Cheyenne will under this arrangement be very quickly put in running order, as the Kansas Pacific bonds are now being very promptly and satisfactorily sold, so that the company is fully assured of the means to iron that road as well as to complete from Sheridan to Denver. This latter portion is now vigorously pushed, and, as soon as practicable, work will be pressed from Denver eastward also. It is expected that by June next the entire route from this city to Cheyenne will be in running order, and it will then constitute practically one road, under the direction of the Kansas Pacific managers. We need not say that the arrangement is a very important one to the railroad interests of St. Louis, for it will secure to this city a direct route to Cheyenne, and to connection with the Union Pacific there.—*St. Louis Democrat.*

The Peninsular Railroads.

The railroads now finished and under way and connecting with the Delaware railroad on the Eastern Shore of Maryland are as follows: The Delaware branch, starting from Townsend Station, and completed to Massey's Cross Roads, in Kent county, Md. From this point two branch roads are being built—one along the north side of Chester river to Deep Landing, about twelve miles below Chestertown; the other on the south side of the river to Centreville, and terminating on the river a few miles below that town. The Maryland and Delaware railroad is now completed from Clayton Station to Easton, Md., and the work of grading to Oxford, twelve miles below, commenced. At this point the road will connect with the steamers from Baltimore. The Junction and Breakwater railroad starts from the Delaware road at Harrington. It is completed to Georgetown, to which point cars run, and graded to Lewes, Delaware, and the iron is now being laid. The Dorchester and Delaware road is now completed within three miles of Cambridge, Md. This road commences at Seaford, Delaware. The Pocomoke and Berlin road is in running order from Salisbury to Berlin, a distance of twenty-four miles. The Delaware road, which connects with the Philadelphia road at Wilmington, is the main trunk.—*Balt. Sun.*

Alexandria, Loudoun and Hampshire R. R.

The engineers of this company have recently made an examination of the country from Middletown, in Frederick county, Md, to the Ohio river, with a view to extending the road to that river. They were at Point Pleasant, Mason Co., West Virginia on the 21st ult. They represent the route as entirely practicable, and that they would be able to pass the Alleghanies with lower grades than the Baltimore and Ohio road. They represent that it is purposed by the company to come as near an air-line from Washington or Alexandria to Cincinnati and occupy as near a central position between the Baltimore and Ohio and the Chesapeake and Ohio roads as possible, which would make this proposed road pass directly through Mason county.

Railroad Switches.

To the Editor of the Railroad Journal:

SIR:—My attention has been called to a communication in your last JOURNAL on the subject of Railroad Switches. I would esteem it a favor if you will allow me space for some remarks on that portion of your correspondent's letter having reference to the "Tongue Switch" so extensively used on the other side the Atlantic.

The use of the "tongue switch" is almost universal in Europe, and the reason suggested for its non adoption in this country—namely, that it is rendered less reliable, because the rail generally in use in America being lighter than the European rail, does not allow the tongue to be made of sufficient stiffness to successfully resist the wear at that point—appears to me to be hardly correct.

The section of the rail used has little or nothing to do with the rigidity or strength of the Switch, and if it be properly constructed an equal stiffness can be given to the tongue, whether the rail be 4 or 5 in. high. The tongue and the rail of the Switch are generally made of steel with the points securely housed under the main track rail; the use of iron instead of steel may possibly have been one cause for the rapid wear alluded to by your correspondent, but where the latter metal is employed and the Switch properly constructed, I venture to think there is no Switch made that is more reliable, simple or economical.

It is with every respect for the opinion of your correspondent that I say this, and I would not be thought as placing myself in opposition to any arrangement which has his approval, but simply as defending a plan I think to be safe and good. It is difficult to explain without the aid of diagrams, and I may not have made myself intelligible, but to Mr. Philbrick or any one interested on the subject it will be my pleasure to give further information.

The firm I represent in this country, have, during a long period, manufactured this tongue Switch for all sections of Rail and with uniform success. I have found it very favorably received in this country and I doubt not that ultimately it will be very largely adopted.

I am sir,

Yours respectfully,

W. CHURCHILL OASTLER.

Agent J. Armstrong & Co., Rotherham, Eng., and 43 Exchange Place, N. Y.

Pittsburg and Connellsville Railroad.

Over two thousand men are at work on the heaviest portions of the road at present, and we can, with some confidence, state that by next New Year's day the line will be finished to Indian Creek, ten miles above Connellsville, next Spring the falls of the Youghiogheny will be reached, and probably about October of next year, or at furthest in January, 1871, the proud consummation of the iron road between the head waters of the Ohio and Chesapeake Bay will be reached, and this result, it is very well known in our community, is due very largely to the liberal and far-sighted action of the Eastern friends of the enterprise. The City of Baltimore, releasing their first mortgage of $1,000,000, and taking for it, together with the accrued interest, a second mortgage on the line, enabled the company to issue new first mortgage bonds, of which $1,000,000 were taken by the Baltimore and Ohio Railroad Company, $800,000 by citizens of Baltimore, and some three or four hundred thousand by our citizens here.—*Pittsburg Chronicle.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in *"Italics."* State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, September 4, 1869.

Stock Exchange and Money Market.

There has been a less urgent inquiry for Money through the week, under review. The local call has been mainly from speculative borrowers, whose wants have been generally provided for with promptness on the basis of 6@7 per cent. in a temporary form. The mercantile demand has been moderate for the season, and rates on prime to good business paper have been quoted at from 7@10 per cent. per annum. The country drain of currency has been less extensive, and the city banks have been less freely drawn on for legal tender notes, of which they have reported a further loss of only $277,997. In their deposit line, there has been a reduction of about 3¼ millions; and in the specie item, of about 2⅛ millions. Comptroller Hulburd, of the National Currency Bureau, has made a requisition on the national banks of this city for a statement, on September 8, of the amounts of the several items they have been accustomed to include in their specie assets, embracing gold coin, gold certificates, gold checks, gold bars, silver coin, silver bars, uncollected coupons, and whatever else they may have been accustomed to count as specie. The loan and discount averages of the city banks, last week, were cut down about 1¾ millions. The cash balances in the U. S. Sub-Treasury at this port were reduced about 5¾ millions, leaving the general balance at the close of business on Saturday, about 85⅞ millions. At the close of August, the aggregate balance of the office was $83,063,638 against $96,621,590 at the end of July. The office now holds $78,289,861 of coin, and $4,666,406 of currency. On Thursday of last week, the U. S. Treasurer bought in a million of U. S. 5 20 bonds at from 119.28@119.74, nett, out of an aggregate offering of $2,885,000. It has been formally announced that Government will buy in twelve millions of U. S. 5-20 bonds during the current month of September, viz: On the 1st $2,000,000; 8th, $2,000,000; 9th, $1,000,000; 15th, $2,000,000; 22d, $2,000,000; 23d, $1,000,000; and 29th, $2,000,000. And will dispose of three millions of gold, as follows; Sept. 2, $1,000,000; 16th, $1,000,000; 30th, $1,000,000. The two millions of 5-20 bonds were bought on the 1st inst., at 120.03@120.10 nett, out of an aggregate offering of $6,731,759.

The specie reserve of the city banks according to the latest return is $19,469,102, against $16,949,108 same time last year. The city bank deposits are now $188,754,539, against $210,334,646 week ending Aug. 29, 1868. The legal tender reserve amounts to $52,792,834, against $67,757,376 same time last year. The circulation now stands at $33,999,742, against $24,112,139 same time last year. The loans are now $261,012,109, against $271,780 726 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $100,633,390 a day, against a daily average of $104,000,000 the preceding week, and $97,136,934 the week ending with Aug. 14, 1869. The current week's exchanges average about $84,939,300 a day. The city banks, last week, reported a further loss of $2,125,408 of specie, $3,270,007 of deposits, and of $277,997 of legal tender notes. They reduced their loans, $1,729,024; and their circulation, $28,362.

The city bank exchanges on Wednesday were $73,731,622, and the resulting balances, $2,860,158.

National Bank notes to the amount of $154,040 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $317,423,206, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $17,628,866, leaving, with the existing 1 620 banks, (having an aggregate capital of $422,659,260,) an actual circulation at this date, of $299,794,340. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,905,500; and for the public deposits, $20,714 500—making a total of $363,620,000. The Treasury Department last week redeemed and destroyed $89,600 of worn and mutilated fractional currency, and issued $175,000 of new. The outstanding amount of fractional currency on the 1st of Sept., was $30,711,799 87 against $31,030,300, on the 1st of Aug.

The U. S. Sub-Treasury receipts, week ending with Aug. 28, were $4,715,910 in coin, including $3,341,838 from customs duties, and $1,361,399 in

currency; payments, $6,546,378 in coin, including $186,704 of coin interest, and $6,322,260 in currency; balance at the close of the week, $85,883,817, including $76 817,428 of coin, and $5,373,864 of currency, against $91,592,863 at the close of the preceding week, showing a decrease of $5,709,046. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $442,085 of coin, including $370,924 from customs, and $433,663 of currency; and payments, $84,998 in coin, including $16,667 of coin interest and $797,223 in currency. On Tuesday, receipts. $1,161,438, in coin including $601,711 from customs, and $240,400 in currency; and payments $46,092, in coin including $27,000 of coin interest and $584,300 in currency. The balance at the close of business on Tuesday stood at $83,063,638, (including $4,666,406 of currency, and $78,289,861 of coin,) against $90,053,239 a week previous; and $92,111,546 on Aug. 14, 1869. The aggregate receipts of the office in Aug. were $42,041,140, including $14,319,915 from customs; aggregate payments, $54,599,091, including $18,867,484 of coin interest.

The outstanding amount of coin certificates on the 1st of Sept. was $23,647,580, against $36,729,840 on the 1st of Aug. The Sub-Treasurer at this port, last week, retired $3,094,068 of coin certificates through the receipts for customs.

The revenues of the Government have been on a liberal scale in the form of customs, during the week, the aggregate yield having been nearly 4½ millions in coin. The receipts from internal revenue, on excises, have been moderate. The excises, last week, yielded about $3,600,000; customs at the port of New York, $3,341,838, and at the out ports about $1,100,000 (in coin) more, making the grand total income for the week equal to about $9,596,480 in currency. The receipts from excises, thus far in the current fiscal year,commencing with July 1, 1869, have been about 36 millions.

Gold has been active and variable, through the week, under the conflicting reports from Paris, relative to the health of the Emperor Napoleon, and the excited state of affairs at the Bourse. The extremes in the local market have been from 132⅜ to 134⅝; and the closing quotation on Wednesday was 133¼. The customs demand has been extensive; while the export drain has been light. Government marketed a million of Gold on Thursday, and will dispose of a million on the 16th and another on the 30th of the current month of September. The coin reserve of the Sub-Treasury on the 1st., inst was $78,289,861. The city banks now report their specie reserve at 19½ millions, as against a little over 31 millions on the 17th of July. The customs at this port yielded $14,319,915 in August, against $12,263,884 same month last year. The U. S. Sub-Treasurer here, it is stated has, consented to renew the issue of Gold Notes of the denomination of $10,000 with a view to the accommodation of bankers and brokers, who dealt largely in Gold. These notes will be made payable to the order of W. G. White, Cashier of the New York Treasury Office, and will be paid out and indorsed over to parties applying for them in preference to the smaller denominations usually employed in the Gold Department of the Office. There were gold notes to the amount of $6,200,000 cancelled at the Sub-Treasury, and forwarded to Washington, last week.

The coin balances of the Government at this port on Wednesday morning, was about a little over 78¼ millions.

The customs of the port on Wednesday yielded $845,000. The U. S. Sub-Treasury disbursed $143,368 of coin interest, on that day.

The customs demand for Gold last week, averaged $556,973 a day; thus far, this week, it has averaged $505,000 a day, or equal to a weekly aggregate of $3,030,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $11,325, and since Jan. 1, $9,835,856, against $4,850,183 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $88,911,713, against $77,971,966 same time in 1868. At San Francisco, from Jan. 1, to Aug. 20th, 1869, $5,016,000, against $5,104,000 same time last year.

The exports of specie, from this port, last week, were $168,500, against $492,034 same week last year; total, since Jan. 1,1869, $24,893,234, against $64,409,113 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $186,704, and since Jan. 1, 1869, $64,624,015, against $60,130,581 same time in 1868. The specie exports from San Francisco, from Jan. 1, to Aug. 20, 1869, were $25,419,552, against $25,202,835 same time in 1868.

The U. S. Treasury receipts from customs at all ports from July 1, to Aug. 28, were about 4¼ millions.

The following is a statement of the business of the New York Gold Exchange Bank for the week ending Saturday August 28th, 1869:

Average am't of loans and discounts	$1,422,643 66
Average amount of specie	683,820 30
Average amount of deposits	1,433,228 42

Foreign exchange has been in more liberal supply, and quoted cheaper, on a restricted business. Bankers' prime sixty day bills on London closed heavily on Wednesday at 109⅛@109⅜, and on Paris to 5.20@5.15¾; sight bills on London to 109½@109⅞, and on Paris to 5.15c. @5.15¾. The offering of produce bills has been less extensive this week. The week's exports of domestic produce have been to the currency value of $3,835,119, making the total since Jan. 1, 1869, $126,602,796, against $111,458,100 same time last year.

Government securities have been, on the whole, much stronger in price, on a reduced offering in the open market, and a more active inquiry, chiefly from local purchasers, and to some extent on speculative account. The announcement that the Secretary of the Treasury had ordered the purchase of an aggregate of twelve millions of U. S. Five-Twenties, in September, has had the effect of strenthening confidence in the bouyancy of the public fund values, in the immediate future. All issues have been in light supply at this point, while the inquiry has been rather on the increase, especially from investment buyers, who give a preference to the later Five-Twenties, to the Ten-Forties and the currency six per cents, which latter have been put forth in aid of the several Pacific R. R. enterprises. Washington advices give promise of a further liquidation of some five millions of the public indebtedness, as the result of the receipts and disbursements of public money in August. The warrants paid by the Treasury Department during August, to meet the expenditures of the government, were $20,788,652 as follows:

Civil, miscellaneous and foreign intercourse, $3,850,421 43; war, $3,534,567 09; navy, $1,929,445 65; Indians and pensions, $11,474,217 97.

The above does not include payment on account of the public debt.

U. S. sixes of 1881 closed here on Wednesday at 123⅛@123⅛; U. S. Five-twenties of 1862, ex-coupon, 123⅛@123¼; U.S. Five twenties of 1864 at 122⅝@122¾; U. S. Five-twenties of 1865 at 122⅝@122¾; U. S. Five-twenties of 1865, consolidated, 121¼@121⅜; U. S. Five-twenties of 1867, 121⅜@121½; U. S. Five-twenties of 1868, 121¼@121½; U. S. Ten-forties at 112⅛@112⅜, ex-interest; U. S. Six per cent. currency bonds, 111¼@111⅜.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 18.	Aug. 25.	Sept. 1.

" 10-40s	....	76	76½
Erie	18½	20	24
Ill. Central	94¾	94¾	94¾

Railway and miscellaneous share property has been without much animation, since our last. Prices have varied considerably. On Tuesday, the dealings were strengthened by the increased call for the Vanderbilt stocks, which rallied sharply, helping the whole market. On Wednesday, the dealings were rather more extensive and the market was buoyant.

There has been a fairly active trade in Breadstuffs, Petroleum, and Tobacco, since our last, but at variable prices. Cotton operations have been checked by the scanty supply available here. Middling upland cotton closed tamely on Wednesday at 35 cts. per lb. The stock of cotton now here is given at about 7,100 bales. The receipts at the port this week, have averaged about 200 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 2,308,500 bales, against 2,347,000 bales same time in 1867–'8; exports, same time 1,445,000 bales, against 1,649,000 bales same time in 1867–'8; stock on hand at latest dates, 11,500 bales, against 37,500 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 16,276 pkgs., against 14,689 pkgs., same time last year. From Boston, 6,034 pkgs., against 6,755 pkgs. same time in 1868.

At the auction sale of Scranton Coal on Wednesday 80,000 tons were disposed of at from 6.15 @7.75 per ton of 2250 lbs., delivered at Elizabethport, N. J.

At the Live Stock markets, this week, Beeves have been in fair demand, at from 10@16c., per lb.; week's receipts, 6,296. Milch cows, dull and heavy, at from $40@$110 each, receipts, 89. Veal calves in moderate request at from 6@11c. per lb.; receipts, 3,348. Sheep and lambs more active at from 4@6½c., and 6½@8½c. per lb.,; receipts, 33,950. Swine in less request at from 9⅝@10c. per lb.; receipts, 21,836.

Foreign goods have been moderately sought after and generally quoted steady. The week's dry goods imports were valued at $3,571,877, and of general merchandise, $3,504,941.

Freights, have been less active and rates have been rather less buoyant. For Liverpool we quote flour at 2s.@2s. 3d. by sail, and 2s. 6d.@2s. 9d. by steamer, per bbl.; grain at 8¾d.@9d. by sail, and 10d. by steamer, per bushel; cotton at 3/16d. by sail, and ¼d. by steamer, per lb.; and heavy goods 20s.@35s. by sail, and 30s.@45s. by steamer, per ton. Total number of vessels in port on Wednesday, 435.

The New York exports, exclusive of specie, for the week ending Aug. 21, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week.....	$2,827,891	$3,835,019
Prev. reported.....	108,630,209	122,767,777
Since January 1.....	$111,458,100	$126,602,796

The imports for the week ending August 28, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$3,126,200	$3,571,887
Gen. merchandise.....	3,072,307	3,504,941
Total for the week.....	$6,198,507	$7,076,828
Previously reported....	162,176,815	200,210,154
Since January 1.....	$168,375,322	$207,286,982

The balance in the Sub-Treasury on Wednesday was $86,468,743 52.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ At a meeting of the stockholders of the Kalamazoo and Schoolcraft, Schoolcraft and Three Rivers, and Three Rivers and White Pigeon Railroads, at Kalamazoo, Mich., on the 20th ult., it was resolved to consolidate the three roads under the name of the Kalamazoo and White Pigeon Railroad.

Chenango Canal.

The Albany *Argus* says that the work on the Chenango Canal extension is being pushed forward with energy, and will soon be completed to the Pennsylvania line, providing the Legislature furnishes the requisite means. Last week a reconnoissance of the whole line between Oswego and the State line was made by a party consisting of the State Engineer, division and resident engineers, State Treasurer, Canal Commissioner, and others, particular reference being had to the dam across the Susquehanna, and a connection with the North Branch Canal of Pennsylvania. A large amount of work is being done between Oswego and Binghamton.

Kansas Pacific Railway.

A telegram received in St. Louis, from Topeka, Kansas, announces the sale of thirty-two thousand acres of land for the Kansas Pacific Railway Company, to the representatives of an English colony, comprising twelve hundred families. The average price per acre was about $3 75. Eighteen members of the colony have already arrived and commenced making improvements on the land. Most of the others are expected to arrive during the coming Fall and Spring. They are a superior class of English emigrants, and are said to possess sufficient means to improve their property at once.

☞ The Commissioner of Internal Revenue has decided that the practice of railroad companies, canal companies, banks, insurance companies, and other corporations which are required by law to withhold and to pay over to the United States a tax of five per cent. on all dividends, interest, coupons representing interest, surplus and contingent fund, &c., of treating said amounts as expense of business, and deducting them in all returns where expenses are deductable, is wrong, and cannot be allowed; that the amounts thus paid are not an expense of business, and no such return should be accepted until the Assessor is convinced no deduction of the kind has been made.

☞ PACIFIC RAILWAY GOLD LOAN, $6,500,000. A seven per cent. land grant, railroad, first mortgage bonds, having thirty years to run. Interest and principal payable in gold. Coupons payable semi-annually in London, Frankfort and New York. Circulars, maps and pamphlets sent on application. The bonds for the present are sold in currency at 95, with accrued interest. DABNEY, MORGAN & CO., 53 Exchange Place. M. K. JESUP & COMP'Y, 12 Pine street.

☞ The right of way for the new railroad from Medford to Camden has been secured, except in one or two instances, which will probably be secured in a short time, and the work of building it will be commenced. It is the intention of the Directors to finish this road at an early day.

☞ Five miles of track have been laid on the Southern Minnesota Railroad from Austin Junction westerly.

☞ The proposed railroad route from Newport, Vt., to North Troy, by way of South Troy, is being surveyed.

Commerce of New York.

The foreign imports at New York for the month of July, 1868 and 1869, are officially stated as follows:

	1868.	1869.
Entered for consumpt'n.	$12,193,589	$12,560,232
Do. for warehousing....	10,573,083	10,705,702
Free goods.....	1,094,543	1,214,472
Specie and bullion.....	126,442	202,487
Total entered at port...	$23,987,657	$24,682,893
Withdrawn fr. wareh'use	6,829,796	8,151,534

The foreign imports at New York for the seven months from January 1, were:

	1868.	1869.
Entered for consumpt'n.	$71,118,420	$93,215,706
Do. for warehousing....	70,296,156	83,816,016
Free goods.....	6,048,592	9,086,943
Specie and bullion.....	4,165,342	10,213,747
Total entered at port..	$151,628,520	$196,332,412
Withdrawn fr. wareh'se	58,752,011	61,138,759

The revenue from customs at New York:

	1868.	1869.
In July.....	$9,237,920 50	$10,045,078 14
Prev. 6 months...	55,450,748 65	63,467,409 94
Total since Jan. 1.	$64,688,669 15	$73,512,488 08

The exports from New York to foreign ports in the month of July, were:

	1868.	1869.
Domestic produce.....	$10,538,848	$18,450,323
Foreign free goods.....	37,975	27,020
Do. dutiable.....	444,735	604,923
Specie and bullion.....	10,584,558	6,474,624
Total exports	$21,606,116	$25,556,890
Do. exclusive of specie.	11,021,558	19,082 266

The exports from New York to foreign ports for seven months from January 1, were:

	1868.	1869.
Domestic produce.....	$89,640,160	$100,242,492
Foreign free goods....	412,224	183,890
Do. dutiable	4,354,208	3,928,017
Specie and bullion.....	59,688,158	21,926,517
Total exports	$154,124,750	$126,280,916
Do. exclusive of specie	94,436,592	104,351,399

Journal of Railroad Law.

RAILROADS—LIABILITY FOR STOCK INJURED—NEGLIGENCE OF LESSEE—LIABILITY OF INDIVIDUAL OPERATORS.

The facts of the late case of Liddle *vs.* Keokuk, Mt. Pleasant and M. R. R. Co. *et al.* (23 Iowa 378) are, that plaintiff's cow, of the value of fifty dollars, was killed, May 31st, 1866, by the engine running on the track of the railway company. The other defendant Kilbourne, was at the time "individually the lessee, and in the possession of and running said road." The road was not fenced. Due notice was given as required by the statute, of the killing, on the company and lessee. No proof of carelessness, nor was the cow killed by any willful act of plaintiff or his agent. Judgment against the company for $100, and the cause dismissed as to Kilbourne. From this latter order plaintiff appeals.

The following is the opinion by

WRIGHT, J.—This case involves a construction of section 6, chapter 169, Laws of 1862, (197). And though this section has frequently received a construction at our hands, the point here made is new. The statute is, that any railroad company hereafter running or operating its road in this State, and failing to fence etc., shall be absolutely liable to the owner of any live stock injured, etc. In case the company thus liable shall neglect or refuse to pay the value after thirty days' notice, etc., it shall be held for double the value, etc. Was the lessee "in possession of and running said road," under the agreed facts, liable equally with the company?

Our opinion is that the statute will not warrant this construction. The language is clear, plain and fairly susceptible of but one meaning. The law does not require a lessee to fence the road, nor make him liable for injuries to property if he does not. Giving it the most liberal construction, keeping in view the object and spirit of the entire chapter, we still think it would require at our hands the clearest judicial legislation, to extend it so as to cover plaintiff's claim.

It is the company that has the power and right to fence—the company organized under the general incorporation act—and it is this voluntary association, possessing the power to protect itself, which is made liable for a failure to comply with the implied, not express, requirements of the statute. A lessee's term may continue for one day, one month or one year.

In case of negligence of his employees, or of his own in the particular case, he might be liable. The liability of the company is absolute, not depending upon the question of negligence, provided the loss occurred by reason of the want of such fence. It was competent for the legislature to make any one liable criminally for running a train on a road not fenced, or to make lessees and employees responsible for stock killed or injured thereon, but for reasons doubtless satisfactory and reasonable, the language of the act limits the liability to the company,

And there would be as good ground for extending it to employees, the engineer and conductor, as to a lessee. We do not say that the law making power might not more consistently include the lessee than the employee, nor that this might not be done with much consistency, but what is meant is, that as the law now stands there is no more warrant for including the one than the other. If the killing was the result of the willful act of the appellee, a different question would arise, and the case of Russell *vs.* Harby (20 Iowa, 20 Iowa, 219), cited by appellant, would be applicable. Nothing of this kind appears.

We have said that it is the company—a company organized, etc., which is made liable. If a case should occur where one or more individuals, without a corporate existence, should build a road, or should run and operate it as their own, having right to fence, and under the like liability, we should not hesitate to hold that they would be within the spirit, if not the very language, of the act. But a lessee comes within neither the letter nor spirit.

Judgment affirmed.

Exports of Railway Iron.

The total quantity of railway iron exported from the United Kingdom in June was 95,039 tons, as compared with 62,778 tons in June, 1868, and 52,640 tons in June, 1867. The exports of railway iron to the United States showed some little decline in June, but there was a great expansion in the shipments to Russia; there was also some increase in the Canadian and Australian demand. The aggregate exports of railway iron from the United Kingdom for the six months ending June 30 this year were 415,784 tons, as compared with 296,542 tons in the corresponding period of 1868, and 251,927 tons in the corresponding period of 1867. The great customers for our railway iron are Russia, the United States, and India. Russia took 86,786 tons to June 30, this year, against 20,214 tons in the corresponding period of 1868; the United States 168,348 tons, against 148,544 tons; and India 37,199 tons, against 49,494 tons. The value of the railway iron exported from the United Kingdom in June was £790,729 against £505,232 in June, 1868, and £469,466 in June, 1867; and in the six months ending June 30 this year £3,271,323, against £2,314,262 in the corresponding period of 1868, and £2,096,281 in the corresponding period of 1867.

† May and June.

Monongahela Valley Railroad.

The location of the line of the Monongahela Valley Railroad has just been completed by the Chief Engineer, Mr. Loew. The results of the final surveys are even more favorable than at first anticipated, and it behooves the vast coal and manufacturing interests of the Valley and Pittsburg to take hold of the matter with energy and push it through with dispatch. The subscriptions still needed, ought to be raised without much difficulty, in view of the assured large business the road will do, as soon as opened, and the trifling cost of construction.

As we said, the surveys are the most favorable imaginable. Look at the grades, for instance: There is a perfect dead level from the Panhandle bridge twenty nine miles to Monongahela City, from thence to Brownsville, twenty-three miles, a rise of only ten feet. From that point to the State line, a distance of thirty-five miles, there is an up grade of only forty-four feet, making a total rise of fifty-four feet in one hundred and seventeen miles! Nor are there any tunnels or heavy, costly cuts in the whole length mentioned; no bridges of more than thirty feet water way. The road, simply considered as a local railroad, will do a large business as soon as built. There are over fifty coal works alone between McKeesport and the State line. But an easy and very favorable connection can be made with the Baltimore and Ohio Railroad at Fairmont, twenty miles beyond the State line. The next, and prospectively the most important connection would be with the Virginia and Tennessee Railroad, near the head waters of the Big Kanawha, which would give the shortest, easiest and best line of route between the East and Chattanooga. With this connection, the Monongahela would also be the best route for all the trade and travel between Savannah and Charleston and the Lakes. The Board has thus far paid special attention to the line through East Birmingham, but their negotiations have not reached any very satisfactory results, we believe. At all events, Mr. Loew is instructed to make surveys for a bridge near Brownstown, to connect with the Connellsville

road. It has also been proposed to lay a line of rail over Dam No. 2 at Port Perry, and connect this with the Connellsville, which would possibly be the cheapest and most expeditious mode of opening rail communication with the upper valley. The Monongahela Valley Railroad Company has evidently a splendid franchise, and we hope to see them successful in their negotiations for funds to immediately finish the road as far as the State line.—*Pittsburg Chronicle.*

New York and Oswego Midland Railroad.

The Chenango *Union* says the connection of the Sherburne extension with the Midland Railroad was made at Sherburne Four Corners on Saturday last, and the new engine "Madison" placed upon the Midland track and run south as far as Plasterville. The work of ballasting the road will now be pushed forward, and as soon as that is completed (and it ought not to take more than two weeks' time) passenger trains will make regular trips between Norwich and Utica. The track is laid to near Wood's Corners, and it is confidently expected that it would all be laid to Norwich the present week.

A continuous line is now laid from Munnsville, ten miles south of Oneida, to Central Square, Oswego County, a distance of forty miles. The distance from Oswego to Central Square is twenty-six miles. It is expected that the track will be laid from the latter place to Fulton, which is not far from Oswego, by the 5th of September. The grading is already done. The work on the Auburn Branch at Norwich has been commenced.

Blue Ridge Railroad.

The *Altoona (Pa.) Tribune* states that Col. J. J. Patterson, Col. J. V. Cresswell, and Hon. James M. Sellers have made a contract with South Carolina for the construction of a road from Anderson, S. C., to Knoxville, Tenn., 198 miles. Thirty-seven miles from Anderson to Marysville are in running order. A distance of 148 miles to be completed is covered by this contract. It is very heavy work, as the road crosses the Blue Ridge. There are ten tunnels—one over 5,800 feet long. The contract includes grading, masonry, bridging, ties, iron, and it is to be completed in two years. The cost will exceed $9,000,000. Twenty months are needed to do the tunneling and grading, and four months for the superstructure. The builders are to advance $1,000,000 before the road advances a dollar, and of this million $300,000 are to be deposited with the road within thirty days after the 1st of August, on forfeit of $50,000.

Cape Fear River Bridges.

WILMINGTON, N. C., August 28.—The iron bridges, built by W. Bollman, over the northwest and northeast branches of Cape Fear River, for the purpose of connecting all the railroad lines centreing here, have been completed, and the first train, with a large party of excursionists, passed over to-day. The completion of this great work greatly facilitates railroad travel, enabling passengers and freight to go through without delay. The entire connection is now complete, except a mile and a half of a branch track on the Wilmington and Manchester Railroad, which will be finished in about ten days. It makes the Wilmington and Weldon, the Wilmington and Manchester, and the Wilmington, Charlotte and Rutherford Railroads almost one road, and marks a new era in the history of this city.

These bridges were built by Mr. Wendell Bollman in Baltimore, and shipped to North Carolina in sections.

Debt of North Carolina.

The Governor of North Carolina being inquired of as to the financial condition of the State; the relative position, as charges on the public revenue of the various kinds of securities issued or authorized to be issued, and the effect of the late decision of the Supreme Court of the State on such securities, replied as follows:

The Supreme Court has decided that the debt of the State contracted before the rebellion is good. This amounts to about $18,100,000. It has also decided that the debt for unfinished works is equally good, and that there is no limit to taxation for these debts. The latter is about $16,240,000. The amount of appropriations that fell under the decision of the Court is $5,100,000—that is, this debt is invalid and falls. The special tax bonds are at present better than the old, for the reason that a special tax is levied and and is being collected, and must be applied to meet the interest on the new bonds, whereas the State will be obliged again to fund the interest on another half year of the bonds. I feel sure that ultimately the State will be able to pay every dollar she owes.

Cumberland and Pennsylvania Railroad.

The immense traffic on the line of the Cumberland and Pennsylvania Railroad compels the company to increase its facilities by the construction of additional tracks, and we noticed last week that a large force was engaged in building additions to the piers of the iron bridge over Will's Creek, above the Narrows, preparatory to widening it for another track. The grading for the additional track as far as Kreigbaum's is mostly done, at which point the Pittsburg and Connellsville Railroad will join them. Mr. Slack, the Superintendent of the road, is bending every energy to make it equal to the demands of the immense trade now passing over it, and constantly increasing. Within another year most of the line of the road will be laid with a double track, and gradually steel rails will supersede the old iron. There will then be scarcely a limit to the capacity of the road, and we may confidently expect the annual transportation over it of more than two millions tons of coal.—*Cumberland Civilian.*

Elizabethtown and Paducah Railroad.

We are gratified to learn of the rapid progress of the work on this road. The bridges over all the rivers are now under contract, and on some of them the work is already under way, and two-thirds of the whole road is now under contract, and a portion of the first letting, extending from Elizabethtown to the line of Ohio County, (a distance of fifty miles) nearly completed. The iron sufficient for track laying to Litchfield in Grayson County is provided, and by October 1st this work will begin. Thus far the active energies of President Thomas and his Board of Directors give promise of the early completion of this valuable enterprise, and the well-known reputation of their Chief Engineer, Mr. MacLeod, insures the work to be well done.—*Louisville Courier-Journal.*

Muscatine, Kewanee and Eastern Railroad.

At a meeting of the corporators of this company at Kewanee, Wis., on the 25th ult., the following gentlemen were elected directors for the ensuing year: Simon G. Stein, of Muscatine, Morrison Travis, of Andover, Ethel V. Bronson and Milo Doty, of Kewanee, Isaac Spencer, of Osceola, Jesse L. Jones and Fred. S. Potter, of Henry, John O. Dent, of Wenona, and A. E. Harding, of Pontiac. At a subsequent meeting of the directors the following officers were chosen: President, E. V. Bronson; Vice President, John O. Dent; Secretary, Milo Doty.

Chicago and Northwestern Railway.

The lines of road owned and leased by this company are as follows: Chicago to Clinton, Iowa 138.1 miles; Clinton to Missouri River, opposite Omaha (perpetually leased), 352.9 miles—total, 491 miles. Junction to Freeport, 91 miles; Elgin to Richmond, 38 miles; Belvidere to Madison, 67.6 miles; Kenosha to Rockford, 72 4 miles; Chicago to Milwaukee, 85 miles; Chicago to Fort Howard, 242.2 miles; Escanaba to Lake Angeline Mine, 67.9 miles; Branches and extensions to mines, 5.9 miles—total length of main lines, 1,156 miles. Total length of lines owned by the company, 803.1 miles. The length of the different Divisions is as follows: Wisconsin Division, 314.6 miles; Galena Division, 261 miles; Iowa Division 354 miles; Madison Division, 67.6 miles; Peninsula Division, 73.8 miles; Milwaukee Division, 85 miles—total, as above, 1,156 miles. Length of double track (Chicago to Junction) 30 miles. Length of side tracks, 181.7 miles. Total miles of iron, 1,367.7.

Maryland Central Railroad.

The survey for the Maryland Central Railroad, which was commenced on the 16th of August by Gen. I. R. Trimble, of Baltimore, and W. S. Shoemaker & Son, has been completed. The starting point is near Towsontown, running in nearly a northeasterly direction, and terminating at the Little Falls of Gunpowder. The distance is about 11½ miles. The line crosses the Great Falls of Gunpowder, near Raven Rock, at an elevation of about 120 feet. The profile shows this to be the most practicable route for a railroad that has yet been examined in that section of country. The most elevated points on the line are at Towsontown, 407 feet, the ridge dividing the Dulaney and Long Green Valleys, 427 feet, and the ridge at Baldwin's, 427 feet above tide water.

Columbia and Port Deposit Railroad.

It is very probable, if not entirely certain, that the Columbia and Port Deposit (Md.) Railroad will now be speedily built. A corps of engineers have again surveyed the route, accompanied by hands, who cleared it of underbrush. R. Crane, Esq., agent for the company, has also been along settling with the owners of property across which the road is to pass. This certainly looks as if the company intended going to work. Mr. Crane assured us a few days ago that it is certain, beyond a doubt, that the road will now be built. He says it is the intention of the company to put that part of the road between Columbia and Safe Harbor under contract in September.—*Lancaster Intelligencer.*

☞ The earnings of the Great Western Railway of Canada for June, 1869, were $300,600 94; and the expenses, $173,403 24—making the net earnings, $127,197 70. In June, 1868, the earnings were $263,170 07; the expenses, $148,052 59; and the net earnings, $115,117 48—showing an increase in earnings of $37,480 89, in expenses, $25,350 65, and in net earnings, $12,080 24. After deducting loss by exchange, proportion of interest charges, &c., the net profit for the five months to 30th June, is $158,923, compared with $120,133 in the corresponding period last year.

☞ Ground has been broken near Hagerstown, Md., for the extension of the Franklin (Cumberland Valley) Railroad from Hagerstown to Williamsport. The distance is seven miles Major Watts is Chief Engineer.

☞ The Frederick (Md.) *Examiner* says that the work on the Frederick and Pennsylvania Line Railroad is progressing finely. The contractors are hard at work grading in the direction of Frederick City. The work of grading is also going on beyond Woodsboro, in direction of Carroll County. The friends of the enterprise entertain the confident hope that the road will be completed at the time specified.

☞ The contract for building the Mississippi River Railroad from Memphis to Covington, a distance of 36½ miles, has been let to Saulpan & Co., for $369,000. This includes clearing, grubbing, grading, trestling, bridging and cross ties; in fact the entire preparation of the road bed for the iron rails. The work is to begin early in September, and is to be completed in eighteen months.

☞ Two parties of surveyors are now at work on the construction survey of the Lamoille Valley Railroad (the Vt. section of the Portland and Ogdensburg R. R.,) and the directors expect to have the road ready for contract this Fall. Five per cent. of the capital stock is now being collected.

☞ The Little Rock *Gazette* says arrangements have been perfected by which the first eighty miles of the Little Rock and Fort Smith Railroad willl be completed, and a bridge built at this place during the next year, and the balance of the road in two years.

☞ Mr. Albion N. Towne has been appointed General Superintendent of the Central Pacific Railroad.

☞ Messrs. Goss, Warner & Co., of Kalamazoo, have taken the contract of building the Allegan and Holland Railroad, 22 miles long.

☞ The new railroad from Easton, Pa., to Waverly, N. Y., has been completed and opened for traffic.

Intercolonial Railway.

THE Commissioners appointed to construct the Intercolonial Railway give PUBLIC NOTICE that they are now prepared to receive Tenders for five further Sections of the line.

CONTRACT No. 8 will be in the Province of Quebec, and extend from the Easterly end of Contract No. 5, at Rimouski, to a point near the Metis River, about 20½ miles in length.

CONTRACT No. 9 will be in the Province of New Brunswick, and extend from the Easterly end of Contract No. 6, towards the Town of Bathurst, about 20½ miles in length.

CONTRACT No. 10 will be in the Province of New Brunswick, and extend from the centre of the Chaplin Island road, near the Court House, at New Castle, towards Bathurst, about 20 miles in length.

CONTRACT No. 11 will be in the Province of Nova Scotia, and will extend from the Easterly end of the Eastern Extension Railway to the Westerly end of Section No. 4, (including the bridge across the Missiquash River, except the western abutment) about 3½ miles in length.

CONTRACT No. 12 will be in the Province of Nova Scotia and extend from the easterly end of Contract No. 7, at Folly Lake, to a junction with the existing railway at Truro, about 24½ miles in length.

Contracts Nos. 8, 9 and 10 to be completely finished before the first day of July, 1871. Contract No. 11 to be completely finished by 1st July, 1870.

That portion of contract No. 12 east of Folly River to Truro to be finished and ready for laying the track by the 1st day of October, 1870, from Folly River to a point opposite the Londonderry Iron Works by the 1st January, 1871, and the remaining portion of said contract by the 1st day of July, 1871.

Plans and profiles, with specifications and terms of contract, will be exhibited at the offices of the Commissioners in Ottawa, Rimouski, Dalhousie, St. John, Halifax, Toronto and Quebec, on and after the 13th September next, and sealed Tenders addressed to the Commissioners of the Intercolonial Railway, will be received at their office in Ottawa up to 7 o'clock, p. m., on the 18th October, 1869.

Sureties for the completion of the contract will be required to sign the Tender.

Commissioners' Office.

TO RAILROAD CONTRACTORS.

Memphis, El Paso and Pacific RAILROAD COMPANY.

Office of the Chief Engineer,
Memphis, El Paso and Pacific Railroad Company,
90 Broadway, New York.

SEALED PROPOSALS will be received at the above Office, until **October 1st, 1869,** when Contracts will be awarded, for the GRUBBING and CLEARING, GRADING, MASONRY, BRIDGING, BALLASTING, CROSS TIES and TRACKLAYING of the following portions of said Railroad:

FIRST—The last Fifteen miles on the First Division of One Hundred and Fifty Miles, between Jefferson and Paris, Texas, commencing Eight miles east and extending Seven miles west of the town of Clarksville, in Red River County.

SECOND—One Hundred and Fifty miles, embracing the Second Division, commencing at Paris and extending westward, to Palo Pinto County.

Specifications, Profiles, Maps and Plans can be examined at the ENGINEER'S OFFICE, in NEW YORK or JEFFERSON.

Proposals must conform to the specification which will be furnished upon application at either of the above places.

Evidence of ability to complete contracts will be required and a percentage retained of estimates until each section of five miles is finished.

Work upon the First Division must be completed by March 1st, 1870.

The Second Division must be finished by October 1st, 1870.

Every facility will be furnished those wishing to inspect the ground on the line of the road, by application in person at the Engineer's Office in Jefferson.

J. M. DANIEL, Engineer in Chief,
Memphis, El Paso and Pacific R. R. Comp'y.

Notice to Railroad Companies.

OWING TO A CHANGE IN OPERATING, THE Second Avenue Railroad Company offer for sale, at their depot, corner of Sixty-third street and Second avenue, in the City of New York, the following described Cars:

Two attached 16-horse power Dummy Engines, built by Grice & Long.

Seven 20-horse power double end Dummies, with Grice & Long Engines and Whittaker Boilers.

Also seven 50 Passenger Cars, all in good running order, and will be sold cheap.

Communications addressed as above will meet with prompt attention.

MONTGOMERY QUEEN,
Vice President

BURLEIGH'S PATENT

Pneumatic Rock Drill

Is now in successful working operation in New York, Chicago, Jersey City; also at the Hoosac Tunnel (Mass.,) Lake Superior, Colorado and Nova Scotia Mines, Union Pacific and Boston and Hartford Railroads; also in deepening the beds of the Illinois and Michigan Canals, and Des Moines Rapids, and numerous other localities.

The Burleigh Drill is adapted to all kinds of rock cutting in open cut Mining, Tunnels, Sewers, Quarries, &c., drilling holes from 1¼ to 5½ inches in diameter. The Drills are worked either by steam or compressed air. For all kinds of work under ground compressed air is used, serving as a perfect ventilator, as it is exhausted from the Drill. At the Hoosac Tunnel the compressed air is carried upwards of a mile and a quarter, and at that distance works eight Drills at the same time. Information in regard to the ownership of the different State rights. Prices of Drills, Air Compressors, &c., can be obtained at the office of

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Changeable Gauge Freight Cars.

The "National Despatch" have a line of Adjustable Gauge Freight Cars running between Boston, Chicago and St. Louis. The changing of the gauge of these cars takes place at Montreal and Sarnia, on the line of the Grand Trunk Railway—the Northern lines of railway between Boston and Montreal, and the roads west of Sarnia, having the narrow 4 ft. 8½ in., while the Grand Trunk has the broad, 5 ft. 6 in. gauge. A shed built over the track protects the workmen who do the shifting from rain and snow. A pit about 4 ft. deep has been excavated between the rails, in which the workman takes his position. It occupies about five minutes to make the change of each car. The device for changing the gauge of the car is by shifting the wheels on both sides of the car upon the axle. The wheels are cast with a sleeve about 10 inches in length which envelopes the axle. This sleeve has two sockets cut in it, corresponding to a like socket cut in the axle; and the change from the broad to the narrow gauge is effected by sliding the wheels just the distance that the sockets in the sleeve are from each other. The axle where the sleeve works is made an inch larger than it is in the centre, and the socket or groove in the axle is cut about ½ an inch in depth. The socket in the sleeve is brought over that in the axle, and a steel key accurately fitted is dropped into the openings—thus holding the wheels securely in place. A double steel pin with curved ends is passed lengthwise through the sleeve and steel key, expanding at the inner end in an enlarged opening, and a tightly fitting gutta percha band is placed over the opening in the sleeve and top of the steel key which serves to snap the key into the groove in the axle when changing the gauge, and as an additional security in keeping the key in position, after the change is effected. This holds the whole securely. A change of gauge is effected by merely taking out the key and passing the car over a converging and diverging track with a guard rail, which contract or spread the wheels as the case may call for. In these cars these axles are fitted for passing over 5 ft. 6 in. and 4 ft. 8½ in. gauges, but the same plan can be used to accommodate other gauges, the openings in the sleeve regulating that matter. These cars are owned by a private company, and are leased to the several railway companies over whose lines of road they run, at a certain rate per mile. They have several hundred on the line, and are building more to meet the increasing through traffic.

Grand Rapids and Indiana Railroad.

The annual report of the Directors of the Grand Rapids and Indiana Railroad, for the year ending July 1st 1869, shows that the company are urging their work to a successful completion, in spite of the many obstacles placed in its way by the representatives of rival interests. The record of the past year is not in all respects satisfactory, but for this the directors properly disclaim all responsibility; and certain it is that, considering the difficulties overcome, the results accomplished in the past twelve months have been highly creditable to those entrusted with the management of the company's affairs. At the date of the last report but twenty miles of the road had been completed, from Grand Rapids to Cedar Springs. Forty five miles are now actually constructed, on forty miles of which daily passenger trains are running. A large amount of work has also been done on 140 miles more of the road which is now under contract, and the directors are confident that, before the date of their next report, 200 miles of the road will be fully equipped and ready for use.

Owing to the unwise and disastrous policy formerly adopted in the management of the financial affairs of the company, even those most deeply interested had, at one time, but little hope of the final success of the enterprise. During the past year, however, the prospects of the company have brightened considerably. On the 1st of May last a contract was made with the Continental Improvement Company, a Pennsylvania corporation, for the construction and equipment of the section of road from Fort Wayne to Little Traverse Bay. The Continental Improvement Company is fully empowered by its charter to carry out the work it has undertaken, and is organized with a capital of $2,000,000, one half of which is already paid in by the subscribers and applied to the construction of the road and the payment of the company's debts. The contracting company is controlled by representatives of the Pennsylvania, and Pittsburgh, Fort Wayne and Chicago Railroads, and the effect of the contract will be to ally the Grand Rapids and Indiana permanently to the line of railway now extending under one management from Philadelphia to Chicago. The power and influence of this alliance will be beneficially felt in the construction and management of the Grand Rapids and Indiana road, and in all the business interests of Western Michigan.

The substance of the contract is that the contracting parties, in consideration of furnishing the right of way, depot grounds and materials, and the construction and equipment of the road according to the standard prescribed in its charter, from Fort Wayne to Little Traverse Bay, a distance of 320 miles, within the time required by law; and the payment, upon an assignment to the contracting company of such debts as by the terms of the contract it is required to pay, shall receive the company's assets applicable to construction, the lands covered by the grants, $8,000,000 of first mortgage bonds, and the amount yet unissued o the $2,800,000 of capital stock, and shall be entitled to operate the road during construction and to receive its revenues; the contracting company assuming the payment of interest on the $8,000,-

000 of bonds, the expenses of operating and maintaining the road, and the expenses attending the organization and management of the railroad company; and, on the final completion of the contract, surrendering the road to the company in good condition, free from any indebtedness incurred since the date of the contract, except the mortgage bonds issued to the contracting company. The effect of this contract, if performed in good faith, will be ultimately to make the contracting company virtually the controlling owners of the road; not, however, to the exclusion of the original stockholders. This contract was not the best that could have been made under other and more favorable circumstances, but considering the extremity to which the company was reduced through its financial discredit, it is probably the most advantageous adjustment of the complication of difficulties at the time practicable.

In view of the arrangement of which we have spoken, the Directors are confident that the work on the line between Fort Wayne and Grand Rapids will now progress so rapidly as to secure the operation of the road between these points before the close of the present year. According to an estimate made last January, there remained to be done to make the road ready for the rails between Fort Wayne and Grand Rapids about 484,000 yards of grading, and about 170 acres of grubbing and clearing and the necessary bridging and ties. The ties required will not exceed 220,000. The heavy bridging is mostly done, including that at Rome City, Pigeon river, the Kalamazoo and Grand Rivers. The statement may, therefore, safely be made, that there is nothing in the state of the work between Grand Rapids and Fort Wayne, (140 miles) to prevent, if the labor and means are promptly and properly applied, that division of the road being put in operation within six months. The facilities for hurrying the work are great, and with the same energy which has been applied under far greater difficulties, on the twenty mile section just completed, the work between Fort Wayne and Grand Rapids can certainly be done in the time named.

The surveys and location of the third section of the twenty miles North of Grand Rapids are already completed. The average earth work will be about 15,000 yards per mile. The crossing of the Muskegon river will be attended with some difficulty, but as far as is known, the section offers no insurmountable obstacle in the way of its completion before the first of January. To secure the completion to Big Rapids by that date, aid to the amount of $30,000 has been voted by the city of Big Rapids, under the enabling act of March last.

The financial condition of the company is better now than it has been for several years past. There has been no material change in the capital stock during the past twelve months, except an increase of $23,000 by payment in full on state subscriptions. No additional stock has been issued, and the total liability for full paid stock on July 1st 1868, is stated by the Secretary at $778,977 49, exclusive of any liability in stock under the Talcott contract, or to the Continental Improvement Company under their contract, or to municipalities or individuals for subscriptions not yet fully paid to the company. Of the account of stock issued, $103,250 is for interest, and $173,000 for "Mackinaw" stock, representing no value paid in to the company, or not exceeding ten per cent. on the "Mackinaw" stock. The late Board of Directors certainly deserve great credit for their management of the affairs of the company; and, if existing contracts are faithfully carried out, the Grand Rapids and Indiana Road will soon be opened to business along its entire line.

Boston and Maine Railroad.

The earnings of this road for the years ending May 31, 1868 and 1869, were as follows:

	1868.	1869.
From passengers....	$907,133 23	$997,397 09

Reserved for the purchase of rails, and unadjusted liabilities, etc.....		60,000 00
Leaving.....		$472,183 76
From which two dividends of five per cent. each have been paid.....		455,000 00
Balance.....		$17,183 76
Add balance from previous year.....		976,017 10
Total, as in General Balance Sheet...		$993,200 86

The above balance of $993,200 86, is invested as follows: in Newburyport railroad bonds, $300,000; in Danvers railroad bonds (guaranteed by this corporation) $73,000; in the Danvers railroad contract and stock, $27,430; in the Dover and Winnipiseogee railroad stock, $258,464 14—and the remainder in expenditures on the road, rolling stock, etc., in addition to the capital received from the sale of stock. It is therefore only an element indicating, in some measure, the value of the stock above par; but it is not available for the payment of debts or dividends. The report says:

By a comparison of the receipts and expenditures for the past two years, it will appear that the gross receipts from passengers and freight for the past year exceed those for the previous year, by $176,822 09, and that all the expenses of every kind, including National, State and Municipal taxes, were $77,840 80 more than in the former year, in addition to the sum of $25,193 14 expended for rails, &c., which was charged to the reserved fund of $60,000.

It is now more than a year since work was commenced upon the extension of the passenger depot in Boston. The foundations have been laid upon piles cut so low as to be continually saturated with water, and will therefore prove durable. This portion of the depot is finished, and the rooms have been occupied for several months.

Upon examination of the old, main building, it was found to be necessary, in the opinion of the architect, to strengthen the walls. Consequently about thirty piers or pilasters have been built, resting on piles, inside and incorporated with the old walls. This should have been done when the building was erected.

The piles, also, upon which the foundations of this building rested, were found to be in a decaying state, and already there were indications that the walls were settling. To preserve the building, a slow and expensive work has been accomplished. All the piles, under the old structure, have been cut off two and a half feet lower, where they are perfectly sound, and a new foundation built thereupon, underneath the former foundation, and made perfectly firm and solid by driving iron wedges between the upper and lower foundations. This difficult undertaking was placed in charge of an experienced and faithful builder, and it has been executed, it is believed, in such a manner as to render the present foundation permanently secure. A new roof is now in the process of replacing the old roof. The whole of the inside is to be removed and a new set of rooms, for the various offices, are to be finished in the front end of the old building. When completed it will furnish all the accommodations required for many years to come, notwithstanding the continually increasing business of the road.

The apartments, intended more especially for the accommodation of the public travel, already finished, give great satisfaction. The dining hall is large, and well furnished. Connected therewith, in the attic over the baggage room, is a capacious, light and well ventilated kitchen, completely furnished with all cooking and other apparatus necessary for such an establishment. The communication between them is by means of dumb waiters.

These apartments, together with the privilege of selling periodicals, &c., are leased at a rent which will pay the interest on a considerable portion of the expense of the enlargement.

A new passenger depot has been erected at South New Market. It was much needed. A suitable building for freight purposes is also required at this station, which is increasing yearly in importance. A large addition has also been made to the car shops at Lawrence.

An iron bridge of the Mosely pattern is contracted for to be placed over the river in Exeter. The same kind of bridge has been in use upon other railroads, where they have proved acceptable.

The road is considered to be in good order and condition. The cost for new rails, beyond the value of the old iron for the last year, was $114,365 95.

During the same period some 65,000 cedar ties have been laid, costing about $32,500.

We have, in our main line, branches and sidings, what is equivalent to 200 miles of single track to maintain; in which are laid about 20,000 tons of rails and 450,000 ties to support them.

It is hoped that it will not be necessary to put in place, annually, so much iron and so many ties in the future.

As business increases, it will probably be considered true economy to put down steel in preference to iron rails, where the service is severe.

During the past year we made a purchase of land in Lawrence to the amount of $40,000. Also land in Somerville and Charlestown, adjoining our location on either side, partly marsh land and partly flats, amounting to about twenty-five acres, for $20,000. All of the above land is so situated that it can easily be made available for railroad

purposes, and will, ere long, in all probability, be needed for actual use.

During the last two years extensive repairs have been made on Charles River Bridge. At least $10,000 worth of Southern hard pine timber has been used for that purpose.

One mile of a second track, between Atkinson and Plaistow brick yard, laid with new iron, has also been constructed.

The usual repairs on the station buildings and other property owned by the corporation have been made. Some new depots, wood sheds, &c., are needed on the line of the road, which will be attended to in due season.

The legal controversy between the Portland, Saco and Portsmouth Railroad Company and this corporation, referred to in our last report, has been decided in our favor. The claim made by said Portland, Saco and Portsmouth Railroad upon the Eastern Railroad Company and this company, for the semi-annual payments in coin, under the 7th Article of the Contract of April 1, 1847, has been compromised and settled to the general satisfaction of all parties. By this arrangement the Eastern and Boston and Maine Railroad have agreed to pay, in currency, the sum of $90,000 each, in full of all claims under said 7th Section, and, in addition thereto, the present and future semi-annual payments, as they become due, in coin.

We do not know of any reason, now that this great question is harmoniously arranged, why the contract of 1847 may not be carried out in good faith, and be beneficial in its operations to the three corporations concerned, for a long time to come.

On the first day of November, 1868, the Dover and Winnipiseogee Railroad came into our possession by contract. Since then there has been no addition to our road, except in side tracks. Our Annual Report, in 1865, contains the first full year of our operations after the contract. The gross receipts from passengers and freight for the whole road and branches, are therein stated to have been $1,218,739 50; in 1866, they were $1,462,228 00; in 1867, $1,558,680 25; in 1868, $1,510,488 85; in 1869, $1,687,310 94—increase in four years, $468,571 44.

The falling off in the passenger receipts in 1868, amounting to $69,550 74, is accounted for by the reduction of the tariff in the spring of 1867. With this explanation, the above indicates a healthy and steady growth in the business and receipts of the road. The gross receipts for the last year were at the rate of fifteen hundred dollars daily more they were four years previous thereto. In consequence thereof we have been compelled to increase our transportation facilities, in every department, in order to meet the reasonable demands of the public for accommodation. We have now, in efficient condition, 45 locomotive engines, 74 passenger cars, and more than 1000 freight cars. In addition we have a full complement of baggage, gravel and other cars. They are fully employed, and frequently forced to their utmost capacity.

Allusion has been heretofore made to the great outlay for rails and ties during the past year. This has become a serious matter. It was stated, in our last Annual Report, that the outlay on account of rails for the previous year was $87,400, which was $35,000 more than for any preceding year. The expenditure for the past year was about $27,000 more than that, or about $79,000 more than the average for the previous ten years. We have, as an experiment, put down steel rails and steel headed rails. They have seen two years service or more. Each kind indicates great endurance and long life.

About the time of closing our accounts we received 500 tons of rails from Wales. They are called the "Aberdare steely head rail." They will be embraced in the next year's account. Their cost was about $84 per ton, and we have strong hope that they will prove as good as they were recommended to be.

In times past we have expressed to you our confidence in the value of your property in this road. Every year increases, and confirms us in that confidence.

The Pennsylvania Tonnage Tax.

The act of the Legislature of Pennsylvania, of August 25th, 1864, imposing a tax on every ton of two thousand pounds weight carried over the railroads and by the steamboat, canal, slack water navigation and transportation companies of this Commonwealth, has recently been declared by the Supreme Court to be constitutional. The objection alleged to the validity of this tonnage tax was that the law created a regulation of commerce, and was an impost act beyond the power of an individual State. The opinion of the Court was delivered by Judge Agnew, who, in noticing the relations between the Federal and State Governments, said: "Upon the Declaration of Independence, in 1776, the Colonies became separate and sovereign States, and in entering into the Federal Union they parted only with some of their sovereign powers, all the undelegated and unprohibited powers being reserved to the States or to the people thereof?" "These reserved powers," Judge Agnew, following the decision of Chief Justice Marshall, says "include the right to pass laws regulating the internal commerce of the State, and those with respect to turnpike roads, ferries, &c. The States have built up railroads and canals under their unquestioned power to improve their own resources and to regulate their internal affairs, and have a right to compensation for the expenditure. As the roads in Pennsylvania were built by herself, or under franchises granted by her the right to exact tolls, charges and fares for their use, is a necessary consequence of her power to construct them. If the railroads were in the hands of the State, as some of them once were, the Federal Constitution could not forbid the State to increase her revenue by an increase of the charges of transportation, nor could it forbid a tax on the franchise when in the hands of a company." In reference to the interference with inter-state traffic Judge Agnew says "it is carriage, not destination, which gives the right of toll, tax or charge which is levied, not because the products of mining, manufacture, and agriculture go out or come in, but because they have the privilege and benefit of transportation." The charge, it is asserted, is clearly nothing but a tax on the business of the roads, measured by the number of tons carried over them. The Pennsylvania ton of 2000 pounds, it is contended, is a convenient and equitable means of measuring the subject of the tax, and in ordinary language the charge is called a tonnage tax, but is not on that account to be confounded with the tonnage of capacity forbidden by the Federal Constitution to be levied by a State.

From these and other considerations, the Court held that the law in question is in no sense a regulation of commerce or an attempt to tax interstate commerce, and is a lawful exercise of State power over creations and uses brought into existence by her own authority.—*Phila. Ledger.*

Boston, Hartford and Erie Railroad.

The operations of this road are pushed with energy, about four thousand men being employed on the two unfinished sections. The nearest of these is from Putnam, Conn., to Willimantic, in the same State (23 miles), is under the charge of Mr. Munson, who has about 1,500 men at work and about $200,000 worth of machinery. Upwards of seven miles of the road have been completed, commencing at the Williamantic end of the section and coming this way, and the grading has been continued a few miles farther.

There are two points—one a very high rise, and the other situated near Pomfret (a ledge), where large numbers of workmen are engaged, and which will, without doubt, be finished this fall, although these portions will probably be the last finished. A large bridge has been constructed over the Naugatuck river, with abutments fifty feet high, built up in solid, first-class masonry. The span of this structure is one hundred and fifty feet, and a double track has been laid across the whole of this section, having also a double track.

A similar bridge, nearly completed, is also in process of construction over the Quinnebang river and upon which the tracks will be laid in a few days. When this section of the road is finished connection will be established at Williamantic with a branch of the road now running from Providence to Waterbury, thus opening railroad communication from this city to the latter place.

From Waterbury to Fishkill (a distance of about sixty miles) where the road will connect with the New York and Erie line, the operations are under the charge of Mr. Dillon, contractor. About 2,500 men are employed here, being distributed along at different points.

About fifteen miles of track have already been laid from Fishkill, and the contractor says it will be all graded by the first of April, and the tracks will be laid very soon after. The work on this road is being accomplished in the most thorough manner, some of it rivalling any before done in this country.—*Boston Tranecript.*

☞ The Muskegon and Grand Haven Railroad Company have completed negotiations with the Detroit and Milwaukee Railroad Company by which the latter endorse the bonds of the former, securing the completion of the road from Grand Haven to Muskegon, by about Nov. 1, 1869.

Grain Trade of Buffalo.

The movement of Flour and Grain from the West through Buffalo, from Jan. 1 to Sept. 1, this year, including Flour estimated as Wheat, is 1,793,272 bushels more than for the corresponding period in 1868. The receipts of Grain show an increase of 90,782 bushels over the receipts of last year; and the receipts of Flour are 200,498 barrels more than were received in 1868 to Sept. 1. There has been a great increase in the movement of Wheat from the Western ports to Kingston and Montreal for export from the latter port by the line of steamers plying between there and Liverpool, which has told heavily on the trade of Buffalo.

The following will show the imports of flour and grain into Buffalo from the West by lake and Grand Trunk Railway for the month of August, and from Jan. 1 to Sept. 1, 1869, as compared with previous years:

FOR THE MONTH OF AUGUST.

	Flour, bbls.	Grain, bush.	Grain, including Flour, bu.
1869	170,119	4,740,887	5,591,482
1868	161,001	5,785,533	6,590,538
1867	161,938	5,010,088	5,819,779
1866	102,588	6,163,776	6,678,727
1865	132,656	5,110,797	5,774,077
1864	174,383	5,442,528	6,314,413
1863	143,594	3,386,584	4,104,554
1862	243,675	9,018,581	10,286,956
1861	215,195	6,397,461	7,473,436
1860	147,227	4,669,462	5,405,597
1859	127,609	1,349,324	1,987,369

FROM JAN. 1 TO SEPT. 1.

	Flour bbls.	Grain, bush.	Grain, including Flour, bu.
1869	783,051	20,986,071	24,801,326
1868	582,553	20,095,289	23,008,054
1867	419,146	16,044,357	18,140,087
1866	575,655	30,558,669	33,436,944
1865	946,328	20,906,038	25,637,678
1864	1,228,774	24,238,199	30,382,099
1863	1,398,673	29,450,686	36,444,051
1862	1,556,486	32,305,327	40,087,757
1861	1,009,803	23,693,445	28,472,460
1860	535,230	14,365,055	17,041,205
1859	645,535	4,722,696	7,950,371

The following will show the canal exports of flour and grain from Buffalo from the opening of canal navigation on May 6, 1867, May 4, 1868, and May 10, 1869:

	1867.	1868.	1869.

1865	3,680		

From the Dubuque Times.

Improvement of our Western Rivers.

In order that an intelligent conception may be formed of the nature, extent, and probable cost of improvements of immediate necessity required on Western Rivers, the following statements and extracts have been compiled from the official reports of eminent engineer officers of the United States in charge of the several works. The information is all embodied in the report of the Secretary of War, submitted to the second session of the Fortieth Congress, and is printed with the President's message and accompanying documents of 1867–'68.

From these reports it appears that the improvement of the falls of the Ohio, at Louisville, and of the rapids of the Mississippi, at Keokuk and Rock Island, the deepening of the channels at the mouths of the river, the removal of snags and sunken wrecks, and the employment of dredge boats in improving the water on sand bars are regarded as works of a national character, demanding the immediate attention of Congress. These opinions are expressed by gentlemen of the highest character as engineers, whose chief motive is the general development of the country and the promotion of the public service.

FALLS OF THE OHIO.

Estimates by Maj. Gen. Godfrey Weitzel:

For Louisville and Portland Canal extension	$933,500
For new canal on Indiana side	3,470,000
For two dams	225,000
Total	$4,628,500

The extension and improvement of the old canal, as recommended, will make its length about two miles; give a depth of six feet at the lowest stage of water; width of canal, 100 feet; two lift locks of 13 feet, each 350 feet long, and 80 feet wide.

The new canal on the Indiana side is estimated at 2¾ miles long, 120 feet wide; locks, 400 feet long, 100 feet wide, 24 feet lift; descent of bottom of canal, 8 feet, with six feet of water over the mitre sills at the lowest stages; so constructed as not perceptibly to disturb the natural order of things, and to allow the use of the natural channels by boats, in high stages of water.

In his report accompanying these estimates, Gen. Weitzel remarks, "No one can deny that the Ohio River is a national highway, and that the falls at Louisville are an insurmountable obstruction in this highway, on an average of three hundred days in the year. It is clearly the duty of the Government to remove this obstruction as it did and does, almost everywhere on the Atlantic coast, and Northern lakes.

"It will be safe to say that the commercial interests of this country have been damaged to the amount of at least fifteen million dollars by the failure of the Government to construct a suitable canal at this place.

"With an improved Ohio River more freight will be carried at a cheaper rate between Pittsburg and Cairo than by half a dozen railroads connecting these points."

OHIO RIVER ABOVE AND BELOW THE FALLS.

Estimates by W. Milnor Roberts, Superintending Engineer, recommended in reports of War Department:

For improvement of river between Pittsburg and Louisville, 615 miles	$473,000
Between Louisville and Cairo, 400 miles	363,000
Total	$836,000

DES MOINES RAPIDS, MISSISSIPPI RIVER.

Maj. Gen. J. H. Wilson reports, September 10th, 1867, "that the permanent completion of the work of improvement at the Des Moines Rapids, according to the plan which has been approved and adopted by the Government, will require an expenditure of $1,479,647."

Gen. Wilson states in his report that "the losses by detention and accidents on the Des Moines Rapids alone are estimated at $500,000 yearly, and to cover extra hazard by these obstructions, an additional insurance of thirty to fifty per cent. of the usual rate is asked."

"Besides all this there is 400,000,000 feet of lumber annually which finds its way to market on the Mississippi. Not less than two per cent. is added to the price of lumber on account of the dangers and delays in passing the obstructions at the rapids." (If Gen. Wilson had put this estimate at five per cent. he would have been nearer the fact.)

The Des Moines Rapids are eleven miles in length, with a fall of twenty-two feet. The mode of improvement adopted is a lateral navigation canal, extending along the Iowa shore from Keokuk to the village of Nashville, a distance of seven and six-tenths miles; thence to Montrose, making a through cut of two hundred feet wide and five or six feet deep along the natural channel of the upper chain of these rapids. This plan, says Gen. Wilson in his report, "I am convinced would give the best, cheapest and simplest improvement, all things being considered, that could be devised, and could be more readily carried into effect than any other.

DIMENSIONS OF CANAL.

Length 7.6 miles; width on the water surface three hundred feet, and depth at the lowest stage five feet. Two lift locks and one guard lock. The size of the lock chambers 350 feet between the quoins, and 80 feet wide at the top—and to lift respectively, eight and ten and one-third feet. By this mode of improvement the natural channel will be left free for use in high water.

ROCK ISLAND RAPIDS.

The Rock Island or upper rapids extend from Le Claire to Davenport, a distance of 14.26 miles, measured on the Iowa shore; with a total fall of 21.46 feet. The mean width of the Mississippi in this distance is about 2,500 feet. The greatest velocity is on the Moline chain 5½ miles per hour at low water. In the length of these rapids there is eleven miles of good navigation, and only about three miles that are dangerous or difficult to pass at low stages of water. The plan of excavating the rock has been adopted as the most feasible mode of improvement. According to the estimate of Gen. Wilson this plan involves the removal of about 57,500 cubic yards, at a total cost of $813,601 03, of which $300,000 has already been appropriated. This will give a channel two hundred feet wide and four feet deep in low water.

MOUTH OF THE MISSISSIPPI RIVER.

The *debouch* of the Mississippi river into the sea, by several outlets, is called "the passes." Bars exist at the mouths of all the passes, so that it is difficult for large vessels to enter the river. The two principal outlets from the river to the sea used for purposes of commerce are the Southwest Pass and Pass a'Loutre. Gen. McAlister, in charge of the work of improvement at the mouth of the Mississippi river, thus reports to Gen. A. A. Humphrey, Chief of Engineers, under date of September 12th, 1867:

"As a result of the survey, Pass a'Loutre was selected for improvement under the appropriation for the current fiscal year and the unexpended balance of the one for last year, amounting together to about $273,000. The plan adopted is that of excavating and stirring, or harrowing up the minute alluvial material, forming mainly the bars by deposit from the heavily-laden waters of the river, by means of double-ender dredge boats, fitted with an excavating screw, fourteen feet in diameter, of four blades at one end (similar and similarly mounted to the ordinary screw propeller) turning by means of a double engine, at the rate of sixty revolutions per minute, and reaching two feet below the under side of the keel; and an auxiliary scraper or harrow at either end. The light, and in many cases almost semi-fluid material thus again brought into a disseminated and floating condition will be gradually carried off to deep soundings by the current of the river and tide of the Gulf.

"Owing to the character and condition under

which the bars are formed and maintained, this work is not susceptible of certain and permanent completion. The water of the river is constantly laden with sediment, and with an increasing tendency to rapid deposit on the bars the instant the channel depths are increased. After the completion of the two dredge boats required for the work, an annual expenditure of $100,000 will be required for the constant maintenence of a twenty-foot channel, of which $75,000 is estimated for removing and working expenses, and $25,000 for repairs, buoys, etc.

"During the next fiscal year $375,000 can be profitably expended upon the work, and is absolutely essential to its success, of which amount $100,000 is estimated for running and working expenses, repairs, &c., and $275,000 for construction and delivering of the second of the two required dredge boats. At least two dredge boats are required for constant maintenence of a channel, since a machine of their character is liable at any time to become disabled to the extent of requiring a cessation of work for repairs, and must be docked at least once a year for general repairs and overhauling."

UPPER MISSISSIPPI RIVER.

Estimates of Gen. G. K. Warren of cost of work that will secure at all times four feet of water from head of Rock Island rapids to the mouth of the St. Croix river, and three feet thence to the Falls of St. Anthony:

Experimental dam at Prescott	$5,000
Experimental dam and dredging at Wau-coutachute	3,000
Experimental beacons at two places	800
Two snag and scraper boats	60,000
Expenses annually for service of boats	36,000
For lock and dam at Meeker's Island	230,665
Total	$334,465

"It is desirable that the whole amount should be appropriated at once."

"The total amount for subsequent years, $40,000."

"The above plan is recommended in preference to an extended system of wing dams which would cost to construct $2,000,000, and at least an annual outlay for repairs of $60,000."

LOWER MISSISSIPPI.

Col. J. N. Macomb, of the engineer branch of the U. S. Army, made an examination of the Mississippi river, below St. Louis, in the summer of 1867, in relation to the dangers of navigation, and he reports that "between St. Louis and Cairo navigation is obstructed by two hundred snags and sunken logs strewn along the channel of the river, and twenty-five wrecks of boats, the accumulation of years.

There is no data by which to determine the frequency of such impediments in other parts of the lower river, and upon the Missouri, but it is notorious that the navigable channel of the river is everywhere beset with danger from this source, imperiling life and property to an incalculable degree.

The best engineers of the country are agreed as to the comparative ease with which obstructions of this kind can be removed.

In the absence of specific estimates, an appropriation of $1,000,000 is suggested as a reasonable provision for the removal of snags and wrecks, and the repair of levees at threatened points on the Lower Mississippi.

RECAPITULATION.

To complete improvement of Des Moines rapids of Mississippi river	$1,479,647
For Rock Island rapids	813,601
For Upper Mississippi	334,465
Mouth of the Mississippi	375,000
Falls of the Ohio river	4,628,500
Ohio, above the falls	473,000
Ohio, below the falls	373,000
Removal of snags and wrecks, and repair of levee	1,000,000
Total	$9,467,213

Less than ten millions of dollars required to clear the main obstructions from a river that floats an annual commerce of $2,000,000,000. A half per cent. of the value of this commerce, only, required to render the navigation of the river comparatively safe and easy, and save at the lowest possible estimate, two hundred million dollars annually to the people. The government has given its lands and to the extent of hundreds of million of dollars to aid in the construction of railroads, and enrich corporations, shall it not, now, do something to unfetter the commerce of the great river, which is our only truly national highway, and relieve the products of the West from the usurious rates of transportation that the cupidity and avarice of artificial lines are heaping upon us?

DUBUQUE, August 25. V.

Grain Trade of the West.

The following will show the comparative receipts of Flour and Grain at the ports of Chicago, Milwaukee, Toledo, Detroit and Cleveland, from January 1 to August 28, in the years indicated:

	1869.	1868.	1867.
Flour, bbls.	3,112,853	2,074,869	1,740,823
Wheat, bu.	23,304,827	12,491,378	9,208,062
Corn, bu.	21,111,099	24,275,552	21,719,371
Oats, bu.	7,311,260	8,993,890	6,215,703
Barley, bu.	494,951	594,933	695,420
Rye, bu.	643,154	619,880	818,021
Total, bu.	52,935,291	46,975,133	38,656,577

The following shows the aggregate shipments of Flour and each variety of Grain from the ports of Chicago, Milwaukee and Toledo, including those by lake and rail—excepting the rail shipments from Chicago—from the opening of navigation to August 28, 1869, and for the corresponding period in the other years indicated, viz:

	1869.	1868.	1867.
Flour, bbls.	1,173,625	914,616	539,204
Wheat, bu.	16,301,951	7,476,977	3,947,483
Corn, bu.	11,995,317	19,482,580	14,139,339
Oats, bu.	3,539,868	6,066,271	3,338,356
Barley, bu.	31,611	12,037	92,866
Rye, bu.	94,720	265,647	302,548
Total grain, bu.	31,963,467	33,303,512	22,820,592

Pittsburg and Connellsville Railroad.

The operations for the past year on the sixty-one miles of the Pittsburg and Connellsville Railroad, eastwardly from Pittsburg, over which trains are now running, have been exceedingly gratifying. The exhibit made at a late meeting of the Board of Directors shows an increase of thirty per cent. of tonnage as compared with the preceding year. Some idea of the business the road is already doing may be had from the fact that the amount of coal and coke hauled over it was not less than three hundred thousand tons, and the total amount of raw material for manufacturing purposes, excluding coke, taken to Pittsburg was not less than five hundred thousand tons. What the road is destined to do when the rich mineral and agricultural regions through which it will pass are opened up and developed can scarcely be estimated. The ninety miles yet to be completed to connect it with Cumberland are all under contract.

☞ The contract for building the levees in Boliver, Washington and Issaquena counties, Miss., has been awarded to Capt. W. M. Williams and Martin Keary, of Vicksburg. The work comprises 1,500,000 cubic yards of earth, and the capital required for the undertaking will approximate $1,000,000.

A New Patent Car-Starter and Brake.

Captain J. W. Wilson, of the United States revenue service, has patented a brake and car-starter which is calculated to afford great relief to horses on horse railroads. The chief object is to relieve the horses from the strain of starting a car, when it has been stopped to take on passengers. Experience shows that the greatest wear on street-car horses in this city is in starting the cars, which stop at almost every corner. The strength required to draw a car when in motion is slight in comparison with that required to move a car loaded with passengers, when it is once stopped. Captain Wilson has contrived an ingenious and simple arrangement of friction wheels, by which he throws a spring into gear; and when the brake is taken off the spring starts the car ahead, without any effort on the part of the horses. The brake may be used at any time without the spring, at the discretion of the driver, as, for instance, when going down a grade. The spring may be used with less labor than the driver has to use in controlling ordinary brakes. It can be placed upon any car now in use, without any change in the running gear, except the addition of the patent brake, which is itself very simple. Such a contrivance is needed to save the straining of horses attached to heavy cars; and it should commend itself to the managers of our street railroads.

Nashua and Rochester Railroad.

At a meeting of the stockholders of this company at Derry, N. H., on the 1st inst., the following board of directors was chosen: Gen. Alfred Hoyt of Durham, Hon. N. N. Whitehouse of Rochester, Hon. J. D. Otterson, and Col. Gilman Scripture of Nashua, Col. Charles D. Waters of Groton, Mass., H. R. Underhill of Derry, T. J. Melvin of Chester, Col. George Marston of Sandown and Dr. Josiah C. Eastman of Hampstead. At the meeting all the towns on the line of the proposed road were fully represented, and a determined spirit was manifested to adopt the most vigorous measures for the immediate prosecution of the enterprise. The directors were instructed to secure the balance of the subscriptions to the stock within thirty days. Gen. Hoyt, one of the new directors, subscribed ten thousand dollars, and several of the towns reported large subscriptions—among them Chester, $40,000, and Sandown, one of the smallest towns on the line, $25,000. The prospects of the enterprise were never better, and it is confidently expected that the new board of directors, who are men of wealth, energy and large business experience, will adopt the most vigorous measures for the early completion of the road.

Western Pacific Railroad.

SAN FRANCISCO, Sept. 6.—By the completion of the Western Pacific Railroad on Monday, the cars now travel continuously from the harbors of New York, Boston, Baltimore and Philadelphia to the harbor of San Francisco. Arrangements have been made for carrying through passengers and mails between Sacramento and San Francisco, without transhipment, inside of four hours.

☞ The Kansas Pacific, Illinois Central, Milwaukee and St. Paul, and some ten or twenty of the largest Western railways, are about testing a new joint on their track, the nuts of which tighten up instead of working loose, which, it is said, will add greatly to the safety of the road, and be a great saving to the rolling stock.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, September 11, 1869.

Stock Exchange and Money Market.

Money has been in more active, speculative and mercantile demand, since our last, and rates have been quoted up to full 6@7, generally 7 per cent. currency and gold on call, and 7½@12 per cent. per annum in the discount form. The most urgent inquiry for aid has been from the Gold and Stock dealers, who have been making more extensive application to lenders, as the result of the increased activity at the Gold and Stock Exchanges. Some effort has been made to render money scarce, but not with very notable success, as the supply available to responsible borrowers has been equal to their wants, at the going rates. The city banks, in their latest return, show an addition of 2⅜ millions to their deposit averages, and over three millions to their legal tender reserve, while reporting a further loss of over two millions of specie. They added 1½ millions to their loan and discount averages; and slightly reduced their circulation. The U. S. Sub Treasury cash balance was augmented about 3¼ millions. The mercantile call from the country is increasing, and will soon be quite active, because of the requirements of the inland trade, in the forwarding of produce to the seaboard. The cotton crop movements promise soon to be on an extensive scale. The dealings in money on Wednesday showed a very close market, many of the stock firms having been compelled to pay the full legal rate in gold for the necessary aid.

The specie reserve of the city banks according to the latest return is $17,461,723, against $16,815,723 same time last year. The city bank deposits are now $191,101,086, against $210,334,646 week ending Sept. 5, 1868. The legal tender reserve amounts to $55,829,782, against $65,983,773 same time last year. The circulation now stands at $33,960,035, against $24,170,419 same time last year. The loans are now $262,549,839, against $271,830,696 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $92,814,879 a day, against a daily average of $100,633,390 the preceding week, and $101,000,000 the week ending with Aug. 21, 1869. The current week's exchanges average about $124,000,000 a day. The city banks, last week, reported a further loss of $2,007,380 of specie, with a gain of $2,346,547 of deposits, and of $3,036,948 of legal tender notes. They increased their loans, $1,587,730; and reduced their circulation, $39,707.

National Bank notes to the amount of $146,770 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $317,569,976, against $282,555,140 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $17,832,876, leaving, with the existing 1,620 banks, (having an aggregate capital of $422,659,260,) an actual circulation at this date, of $299,737,600. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,892,000; and for the public deposits, $20,041,000—making a total of $362,933,000. The Treasury Department last week redeemed and destroyed $249,200 of worn and mutilated fractional currency, and issued $109,000 of new. The outstanding amount of fractional currency on the 1st of Sept., was $30,711,799 87 against $31,030,300, on the 1st of Aug.

The U. S. Sub-Treasury at this port was closed on Thursday in honor of the memory of Secretary Rawlins.

The U. S. Sub-Treasury receipts, week ending with Sept. 4, were $5,602,495 in coin, including $3,173,175 from customs duties, and $11,993,255 in currency; payments, $6,032,222 in coin, including $2,357,387 of coin interest, and $5,001,418 in currency; balance at the close of the week, $89,166,589, including $76,387,702 of coin, and $12,865,701 of currency, against $85,883,817 at the close of the preceding week, showing an increase of $3,282,772. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $458,339 of coin, including $303,894 from customs, and $383,860 of currency; and payments, $144,417 in coin, including $116,702 of coin interest and $445,629 in currency. On Tuesday, receipts, $787,567 in coin, including $412,000 from customs, and $373,264 in currency; and payments $270,505 in coin, including $117,000 of coin interest and $330,021 in currency. The balance at the close of business on Tuesday stood at $87,635,084, (including $12,347,176 of cur-

rency, and $75,218,686 of coin,) against $88,063,-638 a week previous; and $90,053,239 on Aug. 21, 1869. The aggregate receipts of the office in Aug. were $42,041,140, including $14,319,915 from customs; aggregate payments, $54,599,091, including $18,867,484 of coin interest.

The outstanding amount of coin certificates on the 1st of Sept. was $23,647,580, against $36,725,-840 on the 1st of Aug. The Sub-Treasurer at this port, last week, retired $3,050,176 of coin certificates through the receipts for customs.

Government revenues yielded fairly last week. The excises yielded about four millions; customs at the port of New York, $3,173,175, and at the outports about $1,050,000 (in coin) more, making the grand total income for the week equal to about $9,807,000 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 39½ millions.

Gold has been in much more active speculative demand, and has advanced sharply, the range having been from 134¼@137¾, and the closing quotation on Wednesday 135⅛. The market has been characterized by unusual excitement, consequent on the determined struggle between the conflicting bull and bear interests in the Gold Room. The export demand has been insignificant. The customs drain has been less urgent. Government held a coin balance on the 1st inst., of $101,214,987, or some two millions less than on the 1st of August. The Sub-Treasury coin balance, at this port, is now about 75¼ millions; and the city banks now hold a specie reserve of 17½ millions. The U. S. Sub-Treasury at Boston closed the week with a coin balance of $1,806,827.

The coin balances of the Government at this port on Wednesday morning, was about a little over 75¼ millions.

The following is a statement of the business of the New York Gold Exchange Bank for the week ending Saturday September 4th, 1869 :

Average am't of loans and discounts	$1,290,935
Average amount of specie	746,740
Average amount of deposits	1,444,423

The customs of the port on Wednesday yielded $594,000. The U. S. Sub-Treasury disbursed $96,189 of coin interest, on that day.

The customs demand for Gold last week, averaged $528,863 a day; thus far, this week, it has averaged $358,000 a day, or equal to a weekly aggregate of $2,248,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $11,385, and since Jan. 1, $9,847,241, against $5,529,241 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $92,025,901, against $80,950,810 same time in 1868. At San Francisco, from Jan. 1, to Aug. 29th, 1869, $5,477,658, against $5,503,000 same time last year.

The exports of specie, from this port, last week, were $335,183, against $643,387 same week last year; total, since Jan. 1,1869, $25,217,628, against $65,022,531 same time last year. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $2,357,387, and since Jan. 1, 1869, $67,223,255, against $62,348,027 same time in 1868. The specie exports from San Francisco, from Jan. 1, to Aug. 29, 1869, were $25,969,326, against $27,035,746 same time in 1868.

The U. S. Treasury receipts from customs at all ports from July 1, to Sept. 4, were about 86 millions.

Foreign exchange has been seriously depressed, and quoted much lower and irregular, on a very limited inquiry. Bankers' prime sixty day bills on London closed irregularly on Wednesday at 107¾ @108⅛, and on Paris to 5.27½@5.20; sight bills on London to 108¼@108¾, and on Paris to 5.20c. @5.18½. The offering of produce bills has been liberal this week. The week's exports of domestic produce have been to the currency value of $4,393,783, making the total since Jan. 1, 1869, $130,996,579, against $114,532,742 same time last year.

Government securities have been less confidently dealt in, and have been quoted variably from day to day, showing on the whole, a weaker market, though the offerings of bonds have been on a restricted scale. The net reduction of the public indebtedness in August, was fully $5,604,235, according to the official reports, making the aggregate liquidation since March 1, $49,500,759, or equal to about ten millions a month. On Wednesday, Government bought in through the U. S. Sub-Treasury at this port two millions of Five-twenties, all from Messrs. Fisk & Hatch, at 117.80 net, out of an aggregate offering of $8,457,050.

U. S. sixes of 1881 closed here on Wednesday at 120½@121; U. S. Five-twenties of 1862, ex-coupon, 121¼@121½; U.S. Five twenties of 1864 at 120½@120¾; U. S. Five-twenties of 1865 at 120½@120¾; U. S. Five-twenties of 1865, consolidated, 119¼@119½; U. S. Five-twenties of 1867, 119⅜@119½; U. S. Five-twenties of 1868, 119@119½; U. S. Ten-forties at 110½@111, ex-interest; U. S. Six per cent. currency bonds, 109½@110.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 25.	Sept. 1.	Sept. 8.
Consols	93½	93¼	92⅞
U.S. 5-20's of 1862	84	84	82¾
U. S. 5-20s, 1865	83¼	83⅝	82⅝
" 1867	82⅞	83	81¾
" 10-40s	76	76½	75¾
Erie	20	24	23¼
Ill. Central	94¾	94¾	94

Railway and miscellaneous share property has been more active, but unusually variable, under the influences growing out of the Gold and Money dealings of the week. On Wednesday, the movements were on a restricted scale, opening heavily, but closing rather more firmly.

Business in domestic produce has been on a less extensive scale, and the market for the leading articles has shown less firmness. Middling upland cotton closed tamely on Wednesday at 34½ @34¾ cts. per lb. The stock of cotton now here is given at about 3,650 bales. The receipts at the port this week, have averaged about 450 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 2,308,500 bales, against 2,347,000 bales same time in 1867-'8; exports, same time 1,-445,000 bales, against 1,649,000 bales same time in 1867-'8; stock on hand at latest dates, 9,850 bales, against 34,500 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 16,276 pkgs., against 14,680 pkgs., same time last year. From Boston, 6,084 pkgs., against 6,755 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been in more demand, at from 12@16½c., per lb.; week's receipts, 6,169. Milch cows, very dull, at from $40@$110 each, receipts, 105. Veal calves in more request at from 7@11½c. per lb.; receipts, 2,320. Sheep and lambs brisker and firmer at from 5@6¾c., and 6½@9c. per lb.; receipts, 28,735. Swine in moderate request at from 9¼@10c. per lb.; receipts, 22,659.

Foreign goods have been more active; groceries have been quoted stronger in price. The week's dry goods imports were valued at $2,116,-405, and of general merchandise, $3,405,672, making an aggregate for the week of $5,522,077 specie value.

Freights have been less active and variable, closing rather languidly. For Liverpool we quote flour at 2s. 4½d.@2s. 6d. by sail, and 2s. 7½d.@ 2s. 9d. by steamer, per bbl.; grain at 9¼d.@9½d. by sail, and 10¼@10½d. by steamer, per bushel; cotton at $\frac{3}{16}$d. by sail, and ¼d. by steamer, per lb.; and heavy goods 20s.@35s. by sail, and 30s.@ 45s. by steamer, per ton. Total number of vessels in port on Wednesday, 399.

The New York exports, exclusive of specie, for the week ending Sept. 7, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$3,074,462	$4,393,783
Prev. reported	111,458,100	126,602,796
Since January 1	$114,532,742	$130,996,579

The imports for the week ending September 4, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$2,362,700	$2,116,405
Gen. merchandise	2,222,071	3,405,672
Total for the week	$4,584,771	$5,522,077
Previously reported	168,375,322	207,286,982
Since January 1	$172,960,093	$212,809,059

The balance in the Sub-Treasury on Wednesday was $88,234,600 40.

☞ PACIFIC RAILWAY GOLD LOAN, $6,500,000. A seven per cent. land grant, railroad, first mortgage bonds, having thirty years to run. Interest and principal payable in gold. Coupons payable semi-annually in London, Frankfort and New York. Circulars, maps and pamphlets sent on application. The bonds for the present are sold in currency at 95, with accrued interest. DABNEY, MORGAN & CO., 53 Exchange Place. M. K. JESUP & COMP'Y, 12 Pine street.

New York and Utica Railroad.

Travelers and citizens generally will be gratified to know that a company, composed of some of our most prominent capitalists, has been organized under the General Railroad Law of the State for the purpose of completing a railroad from the City of New York, direct to some advantageous point on the line of the New York Central Railroad at Utica or Rome. A road is now being constructed from Paterson in New Jersey to Port Jervis, and from Port Jervis to Monticello in Sullivan County, and upon that portion of the route there are at work nearly one thousand men, with every prospect of a speedy completion of the enterprise. The company now organized will construct the remaining link between Monticello and Utica perfecting a through line from the City of New York to Utica, avoiding for all time the necessity of going to Albany for the purpose of reaching the west by the way of Utica, and lessening the distance to that point at least sixty miles. It has always seemed strange to us that capitalists have not moved in this enterprise long ere now! Why it should be necessary for a traveler from the west to go to Albany at all has always seemed a mystery, and could only be explained by the fact that no railroad communication existed that would cut off the great Albany angle and strike Utica or Rome direct from New York! And strange, too, the people living in those cities and along the line of the proposed route have not moved—have made no effort to take advantage of the shortest route to the great commercial centre of the nation—by constructing a new communication direct with the City of New York! We see it advertised that the New York Central Railroad Company will contract to carry passengers from New York to Chicago in twenty-nine hours time! And yet travel sixty to seventy-five miles out of the direct line in doing it! If passengers could be taken direct to Utica or Rome from New York, a great saving of time, fatigue and expense would be effected, and so also would the traveller from the west experience a like benefit! making it altogether the most agreeable and speedy route now leading from this city to the growing western country. We have not the time or space to devote to further elucidation of the great benefits that must come from the completion of this road. Every county, every town, every village through which this road passes will awake from their long sleep, and start again with renewed vigor on the way to prosperity and wealth.

Port Huron and Lake Michigan Railroad.

The Flint (Michigan) *Globe* says that all the towns between Flint and Port Huron have voted 5 per cent. tax to the Port Huron and Lake Michigan Railroad Company. In Port Huron 5 per cent. additional tax was voted lately by 424 majority. A similar tax was voted by Flint, August 18, the vote standing 440 to 59. Track is laid about 10 miles west of Port Huron and is going down rapidly. It is intended to reach Lapeer by November 1. The grading is nearly completed for nine miles east of Flint, and there is talk of commencing tracklaying there. It is hoped that the road will be completed to Lansing and connect there with the Peninsular Railroad to Chicago by November, 1870.

Toronto, Grey and Bruce Railroad.

The by-laws granting bonuses to the Toronto, Grey and Bruce, and the Toronto and Nipissing Railways, were finally passed by the City Council last evening. The debentures will be issued immediately, and placed in the hands of the Trustees appointed for that purpose. Both companies, we are informed, are now almost fully organized. Engineers are hard at work preparing plans and specifications, and as soon as they are ready, tenders will be advertised for, and the work of construction commenced with the least possible delay. —*Toronto Telegraph.*

Elizabeth and Paducah Railroad.

We are gratified to learn of the rapid progress of the work on the Elizabethtown and Paducah Railroad. The bridges over all the rivers are now under contract, and on some of them the work is already under way, and two-thirds of the whole road is now under contract, and a portion of the first letting, extending from Elizabethtown to the line of Ohio County, (a distance of fifty miles) nearly completed. The iron sufficient for track laying to Litchfield in Grayson County, is provided, and by October 1st this work will begin.—*Louisville Journal.*

Canadian Railway Returns.

☞ The Board of Public Works of Chicago has decided to prepare the way for another tunnel under the lake, to be sixty feet beneath the surface, running under the main and south branches of the river, and under the whole city from the Water Works on the North side to about Twenty-second street on the West side. The work will occupy three years to complete it, and cost about a million of dollars.

☞ The contracts for the construction of the Shelby Railroad have been let. The work will be commenced at once, and completed within twelve months.

Journal of Railroad Law.

RESPONSIBILITY OF RAILROAD COMPANY FOR ACTS OF SERVANTS—LIMITATION OF RULE.

The late case of Callahan *vs.* The Burlington and Missouri River Railroad Company (23 Iowa, p. 562,) was an action to recover damages for setting out fire, and negligently permitting it to escape from the grounds of defendant to those of plaintiff, where it burned timber, wood, &c.

The petition alleges that the defendant is an incorporation organized under the laws of this State for the purpose of constructing and operating a railroad from Burlington to the mouth of Platt River; that the State has granted to said company the right of way through the State; that said road passes through Lucas County; that defendant let the contract of grading its road through Lucas County to J. S. Wolf & Co., and that Wolf & Co., sub-let to John Fitzgerald; that in the contract with said Wolf & Co., defendant expressly reserved the right (to be exercised by its engineers,) of giving, as the work progressed, general and in many cases specific directions, as to how said work should be performed (the petition recites one paragraph of the specifications in said contract, as follows, to wit: First, "the ground occupied by and set apart for the right of way is to be thoroughly cleared of all trees, logs, brush and rubbish, and other perishable materials, and the whole to be removed or burned up as the engineer shall direct, and before the grading is commenced;") that in the month of May, 1867, Henry Gardner, an engineer of defendant, ordered one Pat. McGeary, a boss foreman of said Fitzgerald, to set fire and burn certain brush and rubbish on the tract of said road, at section ——, at station 278, about five miles west of Chariton, in said county; that said Pat. McGeary did cause fire to be set to said brush and rubbish, in obedience to said order, and that he and the hands of Fitzgerald negligently permitted said fire to escape to plaintiff's lands, whereby a large amount of timber and wood was burned; that Gardner, as engineer of defendant, had full authority from defendant to give such order, and gave the same in obedience to directions from defendant, under the specification above quoted from the contract between the defendant and J. S. Wolf & Co.

Beck, J.—Were the persons who committed the wrong as shown in the petition, the servants or agents of defendant in such a sense that it was liable for their acts? Upon the determination of this question the case depends.

The rule *respondeat superior* is limited by this principle. "The responsibility of the master grows out of, is measured by, and begins and ends with his control of the servant." 1 Parsons on Contracts, 88. If the person sought to be charged under the rule as employer, did not contract with the party committing the wrongful act for his labor or services, and is not directly liable to him for compensation for such labor or services, and has no such control over him as will enable the employer to direct the manner of performing the labor or services, he is not liable for the wrongful act of the agent or servant. 1 Parsons on Contract, 90–92 and notes. In order to create the liability it is especially necessary that the control of the employer over the servant should be of such a character as to enable him to direct the manner of performing the services, and to prescribe what particular acts shall be done in order to accomplish the end intended. The principle may be illustrated by the case of a contract for the erection of a house. The proprietor bargains with the contractor that the edifice shall be erected at a particular place, within a prescribed time, of prescribed materials, and in a certain style. The proprietor has no control over the workmen which enables him to direct what means they shall use to accomplish the work, or the way of performing or executing it. The means to be used and the way and manner of performing the work are under the control of the contractor only. Now if such means are used to do the work, or it is done in such a way and manner that another is injured, dangerous machinery being used, or reckless and careless workmen employed, the proprietor cannot be held liable, for the simple reason that the law will not hold one responsible for the acts of others, over whom he has no control. See Kellogg *vs.* Payne, 21 Iowa, 575, and authorities there quoted. The doctrine is learnedly discussed and the authorities extensively referred to by Judge Story, in his work on agency, sections 454–459 and notes. The conflict in the authorities is pointed out or reconciled, and the principles above announced are substantially laid down.

The parties doing the wrongful acts complained of in appellant's petition, were the servants of the sub-contractor, and were not in any way under the control of the defendant, it cannot therefore be liable for such wrongful acts.

It is contended with much ingenuity, by appellant's counsel, that under the stipulation of the contract with Wolf & Co., quoted in the statement of the case, appellee retained the right to direct and control the workmen, and did actually exercise that right through its agent, the engineer. A little thought will give a different view upon this point. The contractors obligated themselves to clear off the ground covered by the right of way, by removing or burning up the trees, logs, etc., as the engineer should direct. The clearing of the ground was the work to be done, the end to be attained, and could be done in one of two modes at the option of the defendant.

In the exercise of that option, burning was chosen as the mode of accomplishing the end. But with the manner of burning, defendant had nothing to do, and over it exercised no control. It could not direct that the combustible materials should be gathered in large or small heaps, or on one side of the roadway or the other, or that the act of burning should be prudently and carefully done, and proper precautions of watchfulness be exercised in order to prevent danger to the property of others, all relating to the manner of doing the work required by the contract to be done. Steel *vs.* The South Eastern Railway Co., 81 Eng. Com. Law, 550. The petition does not allege that the burning of the wood, brush, etc., was in itself an act necessarily dangerous to the property of appellant, but avers that the damage resulted because the act was carelessly and negligently done. The appellant did not sustain the loss on account of the act itself, but on account of the careless and negligent manner in which it was done. Appellee directed that the act should be done, and it was lawful and innocent in itself; the contractors only, had control of those who did the act, and could alone direct the manner of its performance. The loss resulted from the manner of the act done; it is clear that appellee is not liable therefor.

It is contended that section 1327 of the revision, fixes liability upon the appellee. The provisions of the statute referred to in this section, relate to the right of way of railroads and the manner of acquiring it, and contain sundry regulations in regard to the crossing of plank roads, turnpikes, canals and water courses by railroads, and impose certain duties upon the corporations in respect to bridges. The provisions of this section, and the statute therein referred to, do not extend the liability of the corporations to acts of those not their agents and servants.

Judgment affirmed.

Stone Cutting by Machinery.

A large party of engineers and other gentlemen interested in the progress of mechanical appliances assembled on Friday in an enclosure on the Thames Embankment to witness some experiment made with a new stone dressing machine invented by Mr. Joseph E. Holme, an American patentee. The machine consists of a small steam engine connected with that part of the apparatus in which the working of the stone is performed. The principle of the invention is exceedingly simple. The block of stone to be dressed is placed under a series of chisels in the first instance, which are impelled by an arm-shaped lever, which is itself driven by a slightly cranked shaft. On the power being applied, the stone is propelled forward, and as it advances lines of ridges are cut on its surface. On reaching the end of its course the action of the lever is reversed. The driving shaft is connected by a bevilled gear wheel with the shaft by which the motion of the stone is produced. To procure the reversed motion referred to a pin is taken out of the arm-shaped joint. During the first progress about three-fourths of an inch is taken off the surface of the stone, and then the power of the cutting apparatus is modified as occasion may require. To finish the stone completely, a knife is employed instead of the series of chisels alluded to. Amongst the experiments performed on Friday, one of the most interesting consisted of the dressing of a block of freestone six feet long and one foot ten inches wide. This was practically finished in an hour. The dressing of a stone of similar dimensions would occupy a mason for a whole working day. The engine was 8 horses power, but a less powerful motive machine would have sufficed for the operations specified. In addition to the apparatus driven by steam another smaller and less complex machine, constructed to be driven by hand, was also shown in the inclosure. Several stones dressed by this second application of the principle already explained were placed on benches for the inspection of the visitors. Amongst these were large blocks of Garth stone and limestone. The power of the machine, however, was most efficaciously proved by the appearance of the blocks of Guernsey granite and Irish marble, considered the two hardest stones of their respective kind—dressed by the smaller machine to which allusion has been made. It is not in the saving of time only that the value of Mr. Holme's invention consists. The faces of the stone dressed by it in either modification present none of the inequalities which necessarily occur on the surface of stone dressed by hand. The lines on the blocks treated by machine action were as nearly mathematically parallel to each other as could be conceived; whereas those on the blocks finished by hand, with which they were placed in juxtaposition, were palpably crooked.—*Montreal Gazette.*

Movements of Produce.

Receipts of certain articles of domestic produce at the port of New York during the first eight months of the year:

☞ The Pittsburg *Post* says that officers have been elected and about $31,000 of the $35,000 required to construct a railroad from Hollidaysburg to Morrison's Cove, Blair County, have been subscribed, and the Cambria Iron Company, who own considerable ore land along the proposed route, will furnish all the money needed for commencing the work without delay.

Mercantile Law.

The Supreme Court of Pennsylvania has recently made a decision of great importance to merchants and bankers. In what light a person who endorses a promissory note before the payee is to be regarded has long been a vexed question. In some cases he is regarded as a joint and several promissor with the maker, in other cases as a guarantor to the payee or any subsequent lawful holder, in others as a second endorser, the payee having a right to restrict his own prior endorsement by the words "without recourse," in others still as a second endorser, merely under an implied engagement to the payee to assume the position and all the responsibilities of a first endorser. In a large majority of cases, however, he is treated as an original promissor or a guarantor, according as the evidence may show the original contract between the parties to have been.

The law being in this state uncertainty, the Legislature of Pennsylvania, on April 5th, 1855, passed an act going into effect on January 1st, 1856, which, following the English statute of Frauds and Perjuries, provided that no action shall be brought "whereby to charge the defendant upon any special promise to answer for the debt or default of another, unless the agreement upon which such action shall be brought, or some memorandum or note thereof, shall be in writing and be signed by the party to be charged therewith, or some other person by him authorized." In a suit brought after this act went into effect, it was held that a person who endorses a promissory note before the payee is within the provisions of the statute, and that his signature is not the necessary note in writing to charge him with the debt of another, but only imports an endorsement of commercial paper, and makes him liable as endorser only to subsequent and not to prior holders. The principles involved in the above case were recently re-argued before the entire Bench and were unanimously reaffirmed by the Court.—*Pittsburg Chronicle.*

A Double-Bogie Locomotive.

The *Scientific American* describes a new double locomotive, just manufacurted by Wm. Mason & Co., of Taunton, Mass., for the Central Pacific railroad. It looks precisely as if two ordinary locomotives had been backed up to each other and made into one machine. The engineers' house and the fuel bunkers are, of course, stationary, between the two locomotives—or rather, are part and parcel of the machine itself, which, like a double ender steamship can go equally well either way, thus obviating entirely the necessity of turn-tables. The whole machine is carried by six pair of 3 feet 9 inch wheels, in two groups, one at each end; and each group is driven by a pair of 15 inch cylinders, with 24 inch stroke; and the combined power of the machine is equal to a pull of 25,714 pounds. Its weight is 54 tons, or about 4½ tons to thewheel. It has 1,650 feet of tube surface, 125 feet of fire-box surface, and about 25 feet of fire-grate surface. In its wing-tanks it can carry 3,000 gallons of water, and in its bunkers 2½ tons of coal.

☞ By a recent report to the directors by the engineer of the Belfast and Moosehead Lake Railroad, it is shown that of the 565,000 yards of excavation and filling on the whole road, 338,000 yards have been completed, or nineteen miles and seven-tenths brought to an actual sub grade. The whole distance to Burnham is 33 miles.

A New Locomotive Alarm Bell.

A new locomotive alarm bell has just been invented in Detroit. The invention consists of an ordinary bell, weighing about 100 pounds, placed on the platform of the locomotive, immediately over the cow-catcher. A rod attached to the eccentric shaft causes a clapper to strike the bell each turn of the driving wheel. The bell is suspended loosely, and revolves from the force of the stroke it receives, so that all parts of the surface are equally exposed to wear. The advantages of this arrangement are a continuous sound, slow or rapid in proportion to the speed of the engine, each 15 feet producing a stroke of the bell. In case of an accident the railroad company can always prove that their bell was ringing according to law. Owing to the position in which this bell is placed the sound can be distinctly heard about three miles in day time, and by night four miles or more, the ground and the continuous rail, both excellent conductors of sound, assisting in carrying the vibrations. The Detroit and Milwaukee Railroad have 24 of these alarms already in use, and intend to provide all their passenger engines with them. Mr. Ben Briscoe, of Detroit, is the inventor.

Concord and Rochester Railroad.

At a meeting of the directors and stockholders of this road in Concord, N. H., on the 1st inst., it was stated that the locating survey from Concord to Pittsfield was completed, and measures were taken to insure an immediate survey of the remainder of the route. It was voted that none of the building funds of the corporation should be expended until the final survey was completed, and not then unless the amount of subscription should be sufficient to build the whole road. It was considered that the way was clear to increase the present subscriptions to half a million dollars. Much encouragement was received as to the probable success of the undertaking.

Costa Rica Railroad.

The Panama *Star*, of August 23d, says that General Spalding, chief engineer of the Costa Rica Railroad, with four assistants and several laborers, arrived at Aspinwall on the steamer Arizona, from New York on the 9th inst., and took passage for Lamon Bay on the steamer Atrato. The party consisted of twenty-six persons in all, and will go to work at once on arrival in Costa Rica running levels and making other preliminary arrangements for the opening of the road.

☞ The following gentlemen have been elected directors of the Southern Central Railroad Company for the ensuing year: John H. Chedell, D. M. Osborn, H. Woodruff, Wm. C. Barber, Wm. H. Seward, Jr., Nelson Beardsley, C. G. Briggs, Hyland K. Clark, J. W. Dwight, J. C. Platt, J. J. Taylor, C. L. Rich and George J. Post. President, J. H. Chedell; vice president, J. J. Taylor; treasurer and secretary, William H. Seward, Jr. The office of the company is at Auburn, N. Y.

☞ The earnings of the North Carolina Railroad for the months of May and June, 1869, were $78,300 52; and the expenses, $50,729 72—making the net earnings, $27,570 80. In the corresponding months of 1868 the earnings were $69,629 52, the expenses, $57,464 82, and the net earnings, $12,164 70—an increase in gross earnings of $8,671, and in net earnings of $15,406 10.

☞ The Frederick *Union* says that the work all along the line of the Frederick and Pennsylvania Line Railroad is being prosecuted with the utmost vigor, and that the most confident hopes are entertained that it will be entirely completed by the 1st of July, 1870, the time designated.

CHANGEABLE GAUGE
FREIGHT CAR TRUCKS.

A line of upwards of 200 Freight Cars, with ***Changeable Gauge Trucks,*** are in successful operation

BETWEEN BOSTON, CHICAGO AND ST. LOUIS,

Running over Different Gauges of Tracks.

These Trucks are adaptable

To any and all Gauges of Track.

The Proprietors of the Patents are prepared to treat with any Railroad Companies desiring to use them. Address,

Intercolonial Railway

THE Commissioners appointed to construct the Intercolonial Railway give PUBLIC NOTICE that they are now prepared to receive Tenders for five further Sections of the line.

CONTRACT No. 8 will be in the Province of Quebec, and extend from the Easterly end of Contract No. 5, at Rimouski, to a point near the Metis River, about 20½ miles in length.

CONTRACT No. 9 will be in the Province of New Brunswick, and extend from the Easterly end of Contract No. 6, towards the Town of Bathurst, about 20½ miles in length.

CONTRACT No. 10 will be in the Province of New Brunswick, and extend from the centre of the Chaplin Island road, near the Court House, at New Castle, towards Bathurst, about 20 miles in length.

CONTRACT No. 11 will be in the Province of Nova Scotia, and will extend from the Easterly end of the Eastern Extension Railway to the Westerly end of Section No. 4, (including the bridge across the Missiquash River, except the western abutment) about 3½ miles in length.

CONTRACT No. 12 will be in the Province of Nova Scotia and extend from the easterly end of Contract No. 7, at Folly Lake, to a junction with the existing railway at Truro, about 24½ miles in length.

Contracts Nos. 8, 9 and 10 to be completely finished before the first day of July, 1871. Contract No. 11 to be completely finished by 1st July, 1870.

That portion of contract No. 12 east of Folly River to Truro to be finished and ready for laying the track by the 1st day of October, 1870, from Folly River to a point opposite the Londonderry Iron Works by the 1st January, 1871, and the remaining portion of said contract by the 1st day of July, 1871.

Plans and profiles, with specifications and terms of contract, will be exhibited at the offices of the Commissioners in Ottawa, Rimouski, Dalhousie, St. John, Halifax, Toronto and Quebec, on and after the 13th September next, and sealed Tenders addressed to the Commissioners of the Intercolonial Railway, will be received at their office in Ottawa up to 7 o'clock, p. m., on the 18th October, 1869.

Sureties for the completion of the contract will be required to sign the Tender.

Commissioners' Office.

Ottawa, 3d August, 1869.

FOR SALE LOW BY THE CARGO. Apply to

JAMES B. CUNNINGHAM & CO,

3m23. ***AGENTS, 130 PEARL-ST.***

TO RAILROAD CONTRACTORS.

Memphis, El Paso and Pacific RAILROAD COMPANY.

Office of the Chief Engineer,
Memphis, El Paso and Pacific Railroad Company,
90 Broadway, New York.

SEALED PROPOSALS will be received at the above Office, until **October 15th, 1869,** when Contracts will be awarded, for the GRUBBING and CLEARING, GRADING, MASONRY, BRIDGING, BALLASTING, CROSS TIES and TRACKLAYING of the following portions of said Railroad:

One Hundred and Fifty miles, embracing the Second Division, commencing at Paris and extending westward, to Palo Pinto County.

Specifications, Profiles, Maps and Plans can be examined at the ENGINEER'S OFFICE, in NEW YORK or JEFFERSON.

Proposals must conform to the specification which will be furnished upon application at either of the above places.

Evidence of ability to complete contracts will be required and a percentage retained of estimates until each section of five miles is finished.

All the work upon this Division must be finished by October 1, 1870.

Every facility will be furnished those wishing to inspect the ground on the line of the road, by application in person at the Engineer's Office in Jefferson.

J. M. DANIEL, Engineer in Chief,
Memphis, El Paso and Pacific R. R. Comp'y.

TO RAILROAD COMPANIES.—THE ADVERtiser, a thoroughly competent and experienced man, desires a position as superintendent of either a steam or horse railroad. Address "RAILROAD," at this office.

THEO. SHARTS,

RAILWAY SUPPLY AGENT AND CONTRACTOR.

SURVEYS, ESTIMATES, PLANS, MAPS, SPECIfications, and all Information Furnished in relation to the Construction and Equipment of Steam and Horse Railroads.

Office No. 7 Murray St., NEW YORK.

To Bridge Builders.

THE HALLOWELL AND CHELSEA BRIDGE Company solicit proposals for putting a new superstructure upon the piers of their bridge across the Kennebec River at Hallowell, Maine.

The Bridge is 878 feet long with four spans of 150 feet each, one 106 feet, with a draw of 170 feet in length, and is to be substantially built and covered, to be completed within one year.

Builders will specify the kind of material to be used and the style of bridge which they propose to build.

For further particulars apply to CHAS. A. PAGE, Hallowell, Me.

CROSS TIES.

PROPOSALS FOR WHITE OAK AND CHESTNUT RAILROAD TIES, to be 8 feet in length, 6 inches thick, average 8 inches face, none to be less than 6 in face, delivered at Georgetown and Shallcross wharf, on Sassafras River, will be received until the 1st of October, 1869, by

PRESIDENT KENT COUNTY R. R. Co.,
Chestertown, Kent County, Md.

NEW YORK CITY STEEL WORKS,

Manufacture every description of Steel—PERFECTLY UNIFORM IN QUALITY—and of very great tensile and compressible strength.

BURLEIGH'S PATENT Pneumatic Rock Drill

Is now in successful working operation in New York, Chicago, Jersey City; also at the Hoosac Tunnel (Mass.,) Lake Superior, Colorado and Nova Scotia Mines, Union Pacific and Boston and Hartford Railroads; also in deepening the beds of the Illinois and Michigan Canals, and Des Moines Rapids, and numerous other localities.

The Burleigh Drill is adapted to all kinds of rock cutting in open cut Mining, Tunnels, Sewers, Quarries, &c., drilling holes from 1¼ to 5½ inches in diameter. The Drills are worked either by steam or compressed air. For all kinds of work under ground compressed air is used, serving as a perfect ventilator, as it is exhausted from the Drill. At the Hoosac Tunnel the compressed air is carried upwards of a mile and a quarter, and at that distance works eight Drills at the same time. Information in regard to the ownership of the different State rights. Prices of Drills, Air Compressors, &c., can be obtained at the office of

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Boston and Maine Railroad.

The annual meeting of the stockholders of this corporation was held in Lawrence, Mass., on the 8th inst. The annual report—an abstract of which was given in our last issue—was read and unanimously accepted. The following gentlemen were elected directors for the ensuing year: Francis Cogswell, of Andover; Peter T. Homer, of Boston; N. G. White, of Lawrence; E. J. M. Hale, of Haverhill; Geo. C. Lord, of Boston; Amos Paul, of So. Newmarket, N. H.; and John E. Bickford, of Dover, N. H. On motion it was voted "that the directors be authorized to employ a suitable engineer to make a survey and plan of the Boston and Maine Railroad and all the land belonging to the same, designating any now in litigation, and mark the whole by metes and bounds."

The second article in the warrant for the meeting, relating to the issue of new stock by the Portland, Saco and Portsmouth Railroad Company, was next taken up.

President Cogswell, in explanation, was understood to say that by existing contracts the surplus earnings of the Portsmouth, Saco and Portsmouth road belong to the Boston and Maine and the Eastern roads jointly; that in past years about $200,000 had been realized annually by the two roads in this way; but that last year, by mutual agreement, the surplus earnings had been applied to the building of a new machine shop and the purchase of land at Portland, and to the improvement of the rolling stock. The expenditures thus made were a debt due the Boston and Maine and Eastern roads. The Legislature of Maine had granted the Portland, Saco and Portsmouth Corporation an increase of $500,000 capital stock, which they had accepted, conditioned upon the approbation of the Boston and Maine and Eastern Corporations, and with this stock, or so much of it as should be required if issued, it was proposed by the Portland, Saco and Portsmouth Corporation to pay the indebtedness mentioned. The speaker furthermore intimated his approbation of this plan of liquidating the debt.

Without further discussion a vote was passed recapitulating the action of the Portland, Saco and Portsmouth Railroad Company in accepting the increase of capital stock, and authorizing their Directors, with the consent of the Eastern and Boston and Maine Companies, to issue such amount as might be necessary to pay for improvements made or to be made in putting the Portland, Saco and Portsmouth road into the condition of a first class road, and that said shares should have the same rights as those previously issued—therefore, voted, that the Directors of the Boston and Maine Railroad Corporation be authorized, if they so deem it expedient, to give its consent to the issuing of new stock by the Portland, Saco and Portsmouth Railroad Company in the manner provided in the votes above recited, and furthermore that the Directors of this corporation be invested with full power to act in the premises.

The article in the call, "to see what action the stockholders will take in regard to opening communication with deep water," after prolonged discussion, was disposed of by a vote referring the whole subject of deep water communication to the Directors, to investigate and report upon it at a meeting, which the directors were instructed to call at a future day.

At a subsequent meeting of the directors Francis Cogswell, Esq., was re-elected President.

Erie Railway.

It was formally announced to the Stock Exchange on the 14th inst., that the shares of the Erie Railway Company would thereafter be regularly called at the Board, the Company having fully complied with the rules of the Exchange. The following letter from the President of the Company was read at the Board:

OFFICE ERIE RAILWAY COMPANY,
NEW YORK, Sept. 11, 1869.

R. G. Rolston, Esq., President Farmers' Loan and Trust Company:

DEAR SIR: The following is a statement of stock, debt and leasehold estates, in answer to your inquiries of this date. The amount of common stock is $70,000,000, and the amount of common scrip, none. The amount of preferred stock, including scrip $8,536,910. The amount of mortgage debt (7 per cent.) authorized and issued is as follows:

First mortgage, $3,000,000; extended May, 1867, due 1897.

Second mortgage, $4,000,000; date of issue March 1, 1849, due 1879.

Third mortgage, $6,600,000; date of issue March 1, 1853, due 1883.

Fourth mortgage, $4,441,000; date of issue October, 1857, due 1880.

Fifth mortgage, $926,500; date of issue June 1, 1859, due 1888.

Buffalo Branch mortgage, $186,400; date of issue July 1, 1861, due 1891.

The amount of Sterling Bonds £1,000,000 equivalent to $4,844,400; date of issue Sept. 1, 1865, due 1875.

Under a statute of the State, the mortgage debt is convertible into stock only within ten years from date of issue. The ten years have expired on all but the Sterling Loan, and as that is selling at par in London, there is no danger of conversion.

There is no leased road that can be converted into the stock of the Company, except in compliance with the rules of the Stock Exchange by giving thirty days' notice; nor will any increase be made in any form, except in compliance with the aforesaid rules.

JAY GOULD, President.
H. N. OTIS, Secretary.

From this letter it appears that the nominal par value of the outstanding obligations of the Company is as follows:

Mortgage debt	$23,897,300
Preferred stock	8,536,910
Common stock	70,000,000
Grand total	$101,984,210

Massachusetts Central Railroad.

An adjourned meeting of the stockholders of this company was held in Boston on the 9th inst. A vacancy in the Board of Directors, occurring by the declination of Henry F. Hills of Amherst, was filled by the election of C. C. Aldrich of Granby.

At a meeting of the Directors subsequently held, Hon. James M. Stone of Charlestown was elected President, Jas. S. Draper of Wayland, Clerk, and Francis J. Parker of Boston, Treasurer. An immediate thorough re-survey of the entire line with reference to route and method of construction was ordered, and other measures to promote the enterprise were adopted. Both meetings stand adjourned to 30th inst.

Louisville, Cincinnati and Lexington Railroads.

We have been favored with a copy of the Third Annual Report of the "Louisville, Cincinnati and Lexington Railroads"—being the Twenty-first Annual Report of the *Louisville and Frankfort & Lexington and Frankfort* Railroad Companies. These roads have hitherto been operated as one under the control of an executive committee with Hon. W. A. Dudley, President of the Lexington and Frankfort Railroad Company, as Chairman. The receipts from operations of these roads for the years ending June 30, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$277,702 59	$257,553 12
" freight	187,247 74	220,398 93
" express	15,437 14	14,863 58
" mail	9,400 00	9,400 00
" telegraph	1,111 27	1,343 14
" miscellaneous	2,320 19	313 06
	$493,218 93	$503,871 83
Expenses, viz:		
Conducting transp.	$71,610 54	$71,628 62
Motive power	77,641 95	77,708 52
Maintenance of way	139,566 41	136,508 04
" cars	33,977 50	42,228 83
General expenses	13,175 47	13,041 28
	$335,971 87	$341,115 29
Net earnings	$157,247 06	$162,756 54

Compared with the previous year, the gross earnings of 1868-'69, show an increase of $10,652 90; with an increase in expenses of $5,143 42—making the increase in net earnings, $5,509,48.

The receipts and expenses from all sources for the year ending June 30, 1869, were as follows:

Receipts.

Transportation receipts, as above		$503,871 83
Sales of bonds	$512,000	
Less discount	76,800	
		435,200 00

		115,516 82
Total, as above		$599,150 29

We give elsewhere statements showing the financial condition of the respective companies July 1, 1869. Excluding the joint liabilities contracted on account of the Cincinnati Branch, which are borne by the two companies, as between themselves, in the same ratio in which their profits are divided, the general condition of each company is as follows:

	Lou. & Frank.	Lex. & Frank.
Capital stock	$1,109,594 40	$514,716 02
Debt secured by mort.	208,000 00	25,000 00
Debt unsecured	74,519 50	.....
Total liabilities	$1,372,113 90	$539,716 02
Cost of road	1,532,644 99	654,265 37

The aggregate amount of capital stock is $1,623,310 42; debt secured by mortgage, $213,000; unsecured debt, $74,519 50—total liabilities of both roads, $1,911,829 92. The aggregate cost of both roads has been $2,186,910 36. The report says:

The repairs of the road have been kept up to the usual standard, and the track is in very good condition throughout. The completion of the Cincinnati Branch will of course throw out a very much heaver traffic upon the road between Louisville and Lagrange than it has heretofore been subject to. It was therefore desirable to place that portion of the line in the best possible order. As stated in my last report, we had purchased in England seven hundred tons of iron rails beyond what was required for the main track and sidings of the Cincinnati Branch. This surplus has been laid on the old road from Lagrange westward, and the rails which were taken up have been put down again on the sidings of the Branch. In this manner several hundred additional tons of new rails have been relieved, and the process of relaying the old road is being continued. By the end of the summer the track between Lagrange and Hobbs will have been relaid with the new fish-jointed rail, leaving only twelve miles to be relaid hereafter at your convenience. The expenditure in relaying so large a portion of your road was much beyond the ordinary requirements for repairs, and could not justly be charged to the *repairs* of any single year. It might with justice have been charged to *construction*, inasmuch as it was principally intended to meet the exigencies of the new business. But as the entire purchase of new rails had been originally charged to construction account, it was thought, under all the circumstances, to be the most proper course at once to credit to that account, and charge to repairs the value of such portion of the iron used on the old road as would have been sufficient for the ordinary annual repairs, and to continue that course for one or two succeeding years until the whole amount should be exhausted. At the same time construction was charged with the actual value of the old iron used on the sidings of the new road. If there be any injustice in the course which has been adopted, the error has been in charging too large an amount to the repairs of the year—an error on the right side, and which will correct itself in the diminished charges to be made to that account in one or two succeeding years.

Cincinnati Branch.

The end of the fiscal year witnessed the opening of the Cincinnati line for passenger business. It was a month later before the completion of our temporary station buildings at Covington enabled us to advertise our readiness to carry freights. The accompanying report of General St. John, late Chief Engineer, is a history of the progress of the work during the year, and a statement of its condition on the 15th of June, when he resigned his position to take service elsewhere, and turned the work over to other hands. The Auditor's Table No. 9 is a detailed account of the expenditures in construction. The total, exclusive of discounts and interest paid, is $3,827,998 42. The Auditor's general balance sheet indicates the mode by which these means have been provided. The item of *bills payable* in the sheet includes the sum of $60,893 24 for interest yet to accrue on notes given for rails and equipment. The floating debt is provided for by the deposit as collateral security of 372 mortgage bonds and 6,517 shares of preferred stock. The larger portion of the debt for which they are pledged will not mature for nearly two years to come, so that ample time will be afforded to realize the hypothecated securities for its payment.

It is very much to be regretted that we are not yet able to announce to you the settlement of the vexed question of a right of way through the city of Louisville to a connection with the Nashville Railroad. In accordance with the wishes of a majority of the stockholders of the Louisville and Frankfort Railroad Company, as expressed at their last annual meeting, the Executive Committee passed a resolution offering to change the gauge of the road on the terms proposed by the city authorities, if time should be allowed them, until the completion of the bridge at Cincinnati should enable them to make connection on the new gauge with the eastern roads centering at that city. Negotiations to this effect have now been pending for several months, and it seems that the only difficulty remainining in the way arises from the inability of the city councils to agree upon the particular route which should be granted for the connecting line. This difficulty, it may reasonably be hoped, will soon be surmounted.

The Newport and Cincinnati Bridge is in the hands of a strong company, who are abundantly able to complete it with dispatch. Considerable progress has already been made in the erection of the shore piers, and we have the most confident assurances that the bridge will be ready for use in the course of next summer. No considerable expenditure will be required in the extension of your line from South Covington to Newport until that bridge approaches completion. The utmost that can be needed this season would be to put in the foundations for the piers of your own bridge across Licking River, so as to enable us to complete the structure readily during the next spring or early summer. The rest of the work is of so easy a character as to require a very short time for its completion.

In the mean time our business is accommodated at Covington by an arrangement with the Kentucky Central Railroad Company for the use of a mile of their track, and by the erection of temporary station buildings upon grounds leased from that company.

It can not be expected that your road will be able to command its proper share of traffic either in freight or passengers while we are without connections at either end of the line. The long drayage and omnibus ride at each terminus are serious obstacles in our way, and until their removal the superior location and direction of your line will not give us the full advantages which they ought to do in its competition for business. Yet the

brief experience which we have had from the opening of the road to the time of writing this report is very far from discouraging. We have been carrying passengers but six weeks, and the public are just beginning to understand the advantages which we offer them. The passenger receipts for the month of August will very closely approximate, if they do not exceed, those of the old road, which has been in successful operation for nearly twenty years. As it is only a fortnight since we advertised our readiness to carry freight, we can not be said to have had any actual experience of the business; but I may add that it is already evident that the freight traffic from the eastern end of the Lexington line will receive large accessions from the use of the Cincinnati Branch, and that the business between Cincinnati and Louisville is beginning to develop itself very encouragingly. There can be no doubt of a steady increase of both passengers and freight even while matters remain as they are; and if, as there is every reason to hope, we shall be able next year to complete our connections at both Louisville and Cincinnati, the increase can not fail to be immediate and very great.

The intervening country between Lagrange and Covington has heretofore been so secluded and inaccessible from without that time will be required to develop its capabilities and accustom its people to the use of the new facilities now offered them. Its principal production, tobacco, had been already marketed for the present season before the opening of the road. Since that time the farmers have been engaged in harvesting their crops, so that neither in passengers or freight has any fair indication been given of the traffic it will afford us. The value of lands has risen, but is still low compared with that of other lands not more fertile nor so well located with a view to market. When the character of the soil and its proximity to market become understood by the public, population will flow in rapidly and production will be largely increased. Several of the way stations already compare favorably in point of traffic with the stations upon the old line. At many of them villages are springing up, and new life is being infused into the whole of the adjoining country.

Consolidation.

A plan for the consolidation of your two companies will probably be submitted by the Executive Committee at your approaching annual meeting. Its details are not, at the moment of writing this report, definitely arranged, and therefore will not now be commented on. It is sufficient to say that the Committee are deeply impressed with a sense of the advantages which would accrue to the stockholders of both companies from a consolidation upon *some* plan, and that the one to be submitted to you will have received their most careful consideration. Your present organization is cumbrous and unnecessarily expensive, and its working is liable to interruption by the occurrence of any disagreement between you. The affairs of your companies are now so interwoven that a severance of their connection is no longer practicable unless by the extinguishment of one company through the purchase of its property and franchises by the other—a contingency not at all likely to occur. The rate of division of their profits has long been fixed by their operating agreement. The liabilities of each are well known, and the relative value of their stocks is of easy calculation. Thus there remain but a few minor points upon which there can arise any difference of opinion when considering the terms of the arrangement. The advantages of consolidation are so manifest that no small obstacle should be allowed to stand in its way.

The company have 26 locomotives, 22 passenger, 8 baggage and mail, 24 house freight, 130 house stock, 24 open stock, 100 platform, 6 express, and 195 road cars. Miles run by locomotives with passenger trains, 145,079; with freight trains, 85,377; with distributing trains, 18,903; with construction trains, 65,822—total, 315,181. Total cost per mile run, 80.85 cents. Number of passengers carried, 288,815; do., carried one mile, 6,705,055. Av. distance traveled by each passenger, 23.21 miles. Earnings per passenger per mile, 3.84 cents. Earnings per mile run by passenger trains, 202.49 cents. Tons of freight hauled, 83,891; do., hauled one mile, 4,381,111. Av. distance hauled, 53.17 miles. Earnings per ton hauled one mile, 5.03 cents. Earnings per mile run by freight trains, 293.51 cents. Total earnings per train mile, 235.71 cents.

The gross cash receipts of the joint roads for three years ending June 30, 1869, were $1,507,409 78; and the actual cash expenditures, $963,318 74—leaving a balance of $544,091 04; of which there has been paid to the Louisville and Frankfort Railroad Company $295,996 37, and to the Lexington and Frankfort Railroad Company $127,448 32. The balance, amounting to $120,646 35, has been paid into the Cincinnati Branch Fund, from which a dividend amounting to $8,900 09, was paid on the preferred stock in 1868, leaving a balance, as per income account, of $111,746 26.

General Account, June 30, 1869.

Construction Cincinnati Branch	$4,576,985 74
Due from sundry individuals	19,037 93

Palace Cars.—Miller's Patent Couplings.

Within the past few months the Philadelphia, Wilmington and Baltimore Railroad Company has placed upon the through line between Washington and New York four new cars, which, in point of magnificent appearance and the comfort which they insure to passengers traveling in them, are entitled to the designation of "palace" cars. The last of these cars was finished about a week since, and all four are now running regularly upon the night trains from Washington to New York. A description of this car will answer for all. It is fifty-six feet long and nine and a half feet wide, the exterior painted and varnished light yellow, the color agreeably relieved by the bright hues of the lettering. The exterior of the car presents a handsome appearance by the graceful outlines of the mouldings on the sides and at the ovals of the windows. On entering the car at either end the passenger steps into an ante-room or vestibule, separated from the main portion by a dark walnut door, the upper half of which is of ground glass, worked in elegant patterns. Each vestibule contains four roomy arm chairs cushioned with dark velvet, marble washing basins with silver faucets, and the private closets. These apartments are intended for the use of smokers, who will appreciate the provision which enables them to smoke a cigar without being driven into what is usually the most uncomfortable and crowded car on a train. The main apartment of the car contains thirty-seven arm chairs in double rows on either side of the central aisle, and by merely working a wheel and screw, set below the seat of the chair in the framework, the occupant can adjust it at any incline. When the back is adjusted vertically the chair is an ordinary arm-chair, but by turning the wheel back is lowered and from under the chair a rest for the feet is thrown out, it then becoming a cozy and luxurious arrangement for sleeping. The cushions are of crimson velvet, the wood work of dark walnut grained and polished, and the metal work heavily silver plated. The floor of the car is grained and polished in light yellow, the aisle is carpeted with a neat pattern of velvet carpet, and the interior walls are of dark yellow walnut and light yellow satin wood, each polished in a beautiful manner. The ceiling is of a pure white material, worked out with tracery of blue and gold in graceful designs. The patent ventilators above the roof are of ground glass, and all the metallic finishings are plated with silver. The artistic combination and contrast of colors on the interior of the car, the dark walnut, the brilliant satin wood and crimson velvet, the white, blue and gold of the ceiling and the sparkle of the metal, all form a beautiful and attractive spectacle. The car is furnished with "Miller's Patent Couplings," by means of which the connection between two cars is made simply by the movement of a lever on the platform of each, thus obviating the danger and trouble of coupling by hand. This coupling never fails to work satisfactorily, and the company are putting it upon all their new cars. The car was built at the Company's Works, Wilmington, Delaware.

Missisquoi Valley Railroad.

At a meeting of the directors of this road at St. Albans, Vt., on the 10th inst., it was voted to divide the charter on the basis that all that part of the chartered road lying north and east of Richford Village shall be called Missisquoi Valley Railroad, Orleans Division, and all that part lying between Richford Village and the Vermont and Canada Railroad shall be called Missisquoi Valley Railroad, Franklin Division; that there shall be a division of the capital, and that each division of the road is to have a separate board of management and control. This action, it is said, will lead to the speedy construction of the road.

Memphis and Charleston Railroad.

At the recent annual meeting of the stockholders of this company at Huntsville, Ala., the directors were authorized to lease or purchase, as they may deem best, the Decherd, Winchester and Fayetteville Railroad; and in case they succeed in effecting the lease or purchase, then to build a branch road from or near Huntsville, to intersect the same at or near Decherd, in Tennessee, or such other point as the directors may consider for the best interests of the Memphis and Charleston Railroad Company.

☞ The earnings of the Cleveland, Columbus, Cincinnati and Indianapolis Railroad in July and August, 1869, were $590,808; in July and August 1868, they were $489,772—showing an increase of $101,036.

Baltimore and Potomac Railroad.

The annual meeting of the stockholders of this company was held at Upper Marlborough, Md., on the 1st inst. The President (Hon. Oden Bowie) in his annual report says that but five miles of the road had been graded at the date of his last report, and "since then much progress has been made with the work, and many results accomplished which, until they had been secured, necessarily delayed the undertaking. Thus our entrance into the City of Washington depending upon the consent of Congress, and into Baltimore upon that of her City Council, we were delayed in the location of our route in and adjacent to those cities until we could designate one satisfactory to their authorities. In both Congress and the Council of Baltimore we were confronted with a determined and formidable opposition—the same which has heretofore opposed us at every step; and, in addition, in Baltimore we had to overcome the strong and influential antagonism of the property holders along the line, who objected to the road being located near their premises. But the mayor and councilmen, legislating for the general good, and foreseeing the immense advantages to accrue to their great and beautiful city from this road, which would pour into her lap the wealth of southern trade and travel, wisely passed the ordinance authorizing us to tunnel through their streets from our point of entrance into the city to our general depot.

"The idea of this tunnel had not suggested itself at our last annnual meeting, and although its construction will involve an immense outlay of money, yet we doubt not that the interests of the road will be advauced, and the company fully reimbursed for the expenditure by its enabling us to make rapid and close connections by steam, and without change of cars. The popular clamor in Baltimore against the rails already down upon the grade of her streets is such that the councils have required certain of them to be taken up, and will, in time, all others. In anticipation of this, the acute and intelligent managers of the Baltimore and Ohio Railroad are looking to their northern and eastern connections by way of a ferry at Locust Point, instead of by horse, as at present, through Pratt street. It is the only way by which their connections can be made, and although the tunnel will probably be more expensive to us than the ferries and boatage to them, yet the delay and inconvenience to travel by their line will be much greater than by ours, and give us a vast advantage over them in the through travel. The convenience of our local travel has been provided for by locating our main depot upon one of the widest and handsomest streets in Baltimore, at which point the city railway will deliver passengers, and by having several local stations in our passage through and around the city, at each of which our trains will receive and deliver passengers instead of requiring them, as they are now, to go from all parts of the city to but one point, and that not immediately adjacent to the city railways. In Washington, also, our depot will be nearer to the business and resident heart of the city, and other facilities are in contemplation for both local and through travel."

The President congratulates the company upon the appropriation to the road by Charles Co., of the sum of $175,000, to which their county is entitled under the State constitution for the aid of internal improvements within her county limits, after the question had been duly considered, whether it should be appropriated to the proposed Southern Maryland or Baltimore and Potomac road, and then adds:

"The proper papers have been prepared and will be signed by the President of the company and by the commissioners, requiring the money to be expended in the construction of the road from the Charles County line to the Potomac River, and the work will be shortly commenced and rapidly pushed to completion.

"There should be no antagonism between the Baltimore and Potomac and the Southern Maryland, if it should fortunately ever be built. There will be none on the part of the Baltimore and Potomac as long as it is controlled as it is at present, and if after it shall have been in successful operation, as we look to see it in its whole length in the course of one or two years, the Southern Maryland shall be building, and shall stand in need of aid from us, it will be the policy and the duty of this road to aid it at least to the amount of the $175,000 subscribed by Charles County, provided the purposes of the two roads shall be, as they should be, in thorough accord, and each auxiliary to the other for mutual benefit and the benefit of the country through which they run.

"When the capitalists who furnished the largest means to build the road were induced to so invest their capital, they had the assurance, and every reason to believe, that the right of way would be secured at a very moderate cost—that the people who were to be so immensely benefitted by the road would have the liberality to either donate their land for right of way, or dispose of it at its actual value, and the enlightenment not to impair their own interest by impeding the progress of the work. To the credit of the people of Prince George's County especially, it can be said that this has generally been the case. Much of the right of way has been freely donated, and very rarely have any excessive damages been asked. Strange to say, the very cases where legal and other impediments have been interposed have been those where the company had either agreed to pay most liberally the high prices asked, or had accepted the excessive rates awarded by the juries rather than have delay and the annoyance of Court proceedings. Finding that our liberality was thus abused, we have determined no longer to submit to these unjust and excessive demands, and these and similar cases have been, or will be, perforce, submitted to the arbitrament of the Courts."

"These delays above Marlborough have prevented the location of the line below the town, as our engineers, agents and attorneys have had their every moment occupied with them. They being happily disposed of, the progress of the work below will immediately occupy our attention. Here, too, whilst many of the landholders have met us in a liberal, just, and enlightened spirit, others who are most able to aid the building of the road, and most to be benefitted by it, are most extortionate in their demands and most obtuse to their own interests.

"With our experience on the road above, we have found it necessary to secure, in advance of operations below Marlborough, the right of way in all cases. Accordingly, an agent of the company will be sent with agreements to be signed by persons through whose property the road runs, and in such cases where terms mutually satisfac tory cannot be agreed upon, juries of condemna tion will be immediately summoned.

"Other progress than that of the grading has been made. Cross ties sufficient for the work being graded have been secured, and many of them delivered along the line of road.

"The bridging along the road has also been undertaken. Many culverts and smaller bridges have been permanently completed, and the long and expensive bridge over the Patuxent River is well under way. The grading of the long "Y," which connects this road with ours, has been lately completed, and it is in contemplation to lay the track from their road to the Patuxent River immediately, to facilitate the transportation over our own road of the heavy materials for the building of the bridge.

"The General Assembly of the State meeting only biennially, and our charter expiration by limitation before it will again meet, in 1872, it will be necessary to apply to the next Legislature for an extension of charter. With our people united in its favor, and the road being vigorously prosecuted, there can be doubt of the result of our application. Division and dissension, however, among the friends of the road may lead to unity of purpose and concert of action among those who have heretofore opposed us, and may embolden them to other acts of opposition. This makes the efforts of those who have embarrassed us with litigation the more serious and damaging. They are not aware, or have not stopped to reflect, that by the course they are pursuing they may destroy the road entirely.

"It should be constantly borne in mind that this is the only railroad ever attempted to be built in Maryland, and possibly in the United States, without State, county or city aid, either by subscription to the capital stock or endorsement of its bonds. It should also be remembered by those most interested in and most vitally benefitted by its construction, that *they* have not been required either to subscribe to the stock or guarantee the bonds. And that except a very small subscription to the stock *they have done neither.*

"Since the report of Mr. Emack, Chief Engineer, was handed in, three other sections have been completed, and we are informed by him that of the whole forty miles now being graded, all but about five miles will be completed on or before the 1st of November next. These are sections on which we have been enjoined, and those on which the work was so heavy and the hauls so long as to induce the company to supply the contractors with rails to expedite their work.

"The chief engineer asserts in his report that but for the legal delays interposed against its progress, the road would have been completed and running from Baltimore to Washington and Upper Marlborough by March next. It was this assurance given by the President of this company to the Congress of the United States which did so much to defeat the 'air line' project last winter.

"It will be further observed that the engineer declares that the road can and will still be completed during the next summer, if it receives the 'hearty co-operation of all those interested.' Such being the case, we unite with him in the belief that the next annual meeting of the stockholders will witness the completion of this part of the road, and great progress made on that part of it between Upper Marlborough and the Potomac River. This part, except a few miles below Marlborough, can be very rapidly and cheaply constructed, and that from Baltimore to Washington and Marlborough completed, will enable the company to place their bonds so advantageously that all financial difficulties will be removed, and the whole road from Baltimore to the Potomac River speedily completed."

The Chief Engineer, C. S. Emack, in his report says:

"The line in the cities of Baltimore and Washington has been located, and as soon as the 'right of way' has been secured will be ready for letting. Below the town of Upper Marlborough, for about seven miles, we have a very difficult country to pass over; three lines have been run over this section, which meet at a common point a short distance below the Holy R sary Church; from this point to the Potomac River two lines have been run, one reaching the Potomac, opposite Aquia Creek, and the other at the mouth of Pope's Creek. I have at present a corps of engineers making an examination of the country in King George's and Caroline Counties, Virginia, to enable me to form a better idea of the proper terminus of the road. A more thorough examination of the whole route, and careful estimates of the cost, have shown that your road will cost nearly sixty per cent. more than at first estimated, requiring a much larger expenditure of money than was at first expected."

☞ The corporation of Marieville, Canada, has adopted a By-Law authorizing the Mayor to take stock to the amount of $3,000 in the Shefford,

Stanstead and Rouville railway. The parish of St. Marie has subscribed for $12,000 of the same stock.

Louisville and Frankfort and Lexington and Frankfort Railroads.

We give elsewhere a statement in detail of the joint operations of these roads for the fiscal years ending June 30, 1868 and 1869. During the three years that these roads have been operated as one the earnings, expenses, etc., have been as follows:

	1867.	1868.	1869.
Earnings	$510,319 02	$498,218 93	$503,871 83
Expenses	357,101 90	335,971 87	341,115 29
Net	$153,217 12	$157,247 06	$162,756 54

The aggregate earnings and cash receipts for the three years under review have been $1,507,409 78; and the operating expenses, consisting of cash and materials used bought in former years, $1,034,189 06—leaving as the aggregate net earnings of both roads for the years named $473,220 72. Deducting from the expenses the sum of $70,870 32 (being decrease in amount of material used from the stock of supplies on hand July 1, 1866,) will leave the actual cash expenditures, $963,318 74, and the actual net cash receipts, $544,091 04. These have been disposed of as follows:

Paid Louisville & Frankfort R.R. Co.	$295,996 37
Paid Lexington & Frankfort R.R. Co.	127,448 32
Paid into Cincinnati Branch Fund	120,646 35
Total, as above	$544,091 04

The receipts of the Louisville and Frankfort R. R. Co. from all sources for the year ending June 30, 1869, were as follows:

Received from the L., C. and L. R. R., in part net earnings	$74,078 80
Bills receivable—amount received on account	875 00
Cash in New York July 1, 1868	2,699 50
Cash on hand July 1, 1868	2,819 78
	$80,473 08

Expenditures, viz:

Preferred joint stock dividend No. 4	$33,205 70
Interest on bonds, etc	16,572 22
General expense	1,923 45
Taxes—Municipal, State and National.	4,767 24
Redemption of bonds	20,000 00
Cash in New York to pay interest	2,892 00
Cash dividends paid	971 75
Cash on hand June 30, 1869	140 72
	$80,473 08

The financial condition of the company June 30, 1869, was as follows:

Capital stock	$1,109,594 40
Railroads bonds, due 1870–'78	88,000 00
City of Louisville bonds, due 1881	100,000 00
State of Kentucky, for right of way on perpetual credit at 6 per cent.	74,519 50
Cash dividends unclaimed	3,566 46
Preferred joint stock dividends, unclaimed	5,209 50
Profit and loss	241,255 40
	$1,622,145 26
Construction	$1,532,644 99
Real estate	33,235 10
Bills receivable	1,057 33
Louisville, Cincinnati and Lexington Railroad	38,465 62
Stock of other companies	8,500 00
Cash in New York to pay interest	2,892 00
Preferred joint stock	5,209 50
Balance cash on hand	140 72
	$1,622,145 26

The receipts of the Lexington and Frankfort R. R. Co. from all sources for the year ending June 30, 1869, were:

Received from L., C. and L. R. R. in part net earning	$28,439 38
Sale of four bonds L. and F. R. R. Co.	4,000 00
Profit and loss	439 84
Sale of fractional stock	59 99
Rent of house	270 00
Cash on hand July 1, 1868	9,140 28
	$42,349 49

Expenditures, viz:

Joint stock dividend 26	$15,439 38
Railroad due bonds July 1, 1869, redeemed	19,000 00
Taxes and insurance	2,376 53
Interest	1,941 96
Expenses	236 50
Contractor's bond 1850 and interest	53 00
Cash dividends	86 84
Bills receivable, charged off	439 84
Lexington City tax scrip	69 60
Cash on hand	2,705 84
	$42,349 49

The financial condition of the company June 30, 1869, was as follows:

Capital stock	$514,716 02
Bonds due in 1874	25,000 00
Renewal and contingent fund	35,296 72
Stock profits	66,173 34
Sinking fund	10,000 00
Cash dividends unpaid	1,390 88
Preferred joint stock dividends unpaid	734 70
Profit and loss	29,006 58
	$682,317 74
Construction	$654,265 37
Bills receivable	726 60
L. and J. Co. stock Ass	1,500 00
Treasurer	612 49
Preferred joint stock	734 70
L., C. and L. R. R. Co	21,772 74
Cash on hand June 30, 1869	2,705 84
	$682,317 74

Raritan and Delaware Bay Railroad.

The sale of this road took place on the 13th inst., at the depot of the company, Manchester, N. J. The sale was under a writ of *fieri facias*, issued to Robert S. Green, a Master in Chancery of New Jersey, by the bondholders of the line, for non-payment of a mortgage on the line and stock of $1,000,000 and accumulated interest to the amount of $1,700,000.

The property was sold in two lots, the first comprising the railroad and its corporate franchises and rights. The second consisted of the entire rolling stock of the company, the locomotives, cars, and the steamboat Jessie Hoyt. Both lots were knocked down to the bondholders of the company after a very feeble competition, the first for $50,000 and the second for $74,000. These prices were only nominal, it being understood that the bondholders were determined to buy in the line, and no opposition was offered.

The new proprietors will have a fresh board of directors, of which Charles Gould, of New York, is proposed as president, and intend issuing $3,500,000 worth of new stock and raising $2,000,000 on fresh mortgage bonds, the majority of which is to be expended in putting the road into better working order and improving the stock.

☞ The New Bedford Glass Works have been purchased by Messrs. Libby & Co., of the Mount Washington Glass Works, South Boston, Mass.

Illinois Central Railroad.

The statement of this Company for the month ending August 31, 1869, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	4,571.91 for	$40,336 55
Acres Int. Fund Lands sold	40.00 for	501 60
Acres Free Lands sold	845.40 for	12,674 94
Total sales during month of August, 1869	5,457.31 for	$53,513 09
To which add Town Lot Sales		
Total of all	5,457.31 for	$53,513 09
Cash collected in August		$213,620 00

TRAFFIC DEPARTMENT.

Receipts from	Freight	$472,472 00
do.	Passengers	136,641 77
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	60,000 00
Total Receipts in August, 1869		$679,472 10
Total Receipts in August, 1868		$675,637 10

Estimated earnings in the month of August, on the D. & S. C. R. R., not included above	$110,856 25
Corresponding month of 1868	$88,142 23

National Junction Railroad.

An engineer corps have commenced the survey of the route of the National Junction Railway, as incorporated by a late act of Congress, at the south bank of the Potomac, above Georgetown, opposite the island known as the "Three Sisters," and to run thence through Georgetown and Washington. The object in commencing the survey at the point mentioned is to ascertain the practicability of a railroad crossing in conjunction with a free bridge there. If this road is pushed forward earnestly and completed, the needed link to connect the Northern and Southern Railroads through Washington will be supplied, for it is stated that the directors of the Washington and Alexandria Canal, Aqueduct, Bridge and Railroad Company at a meeting recently held in Washington, passed an order for the immediate construction of a railroad to connect Georgetown with the Alexandria, Loudoun and Hampshire Railroad, commencing at the Virginia terminus of the aqueduct, and running thence along the berm bank of the canal and connecting with the Loudoun and Hampshire Railroad near the Four-Mile Run. The depot will be established at Rosslyn, on the south side of the aqueduct bridge, to the north end of which it is believed the Washington and Georgetown street Railway will be extended, and this with the completion of the National Junction road will form a direct connection.

☞ The McGregor and Sioux City Railroad is now under contract to be finished to Clear Lake, Cerro Gordo county—forty miles from Algona—by the middle of next October. It is expected that the road will be completed to Algona by the first of December, 1870, which is three years sooner than it has been contemplated.

☞ The Fort Wayne, Muncie and Cincinnati Railroad south has been completed to a connection with the Bellefontaine Railroad at Muncie. The direct line from Muncie to Cincinnati is now completed. Work upon the new road north Muncie is being pushed rapidly.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, September 18, 1869.

Stock Exchange and Money Market.

There has been a variable market for Money, through the week. The speculative demand has been generally active, and has enabled lenders to place their available means in a temporary form at the full legal rate of seven per cent., as the governing price of accommodation. The Stock and Gold operators have been the most urgent borrowers, and on one or two days, they experienced no little difficulty in adjusting their accounts at the close of bank hours. The mercantile calls for aid have been increasing with the increasing activity of the fall trade, and discounts have been reported more active within a range of from 7@10 per cent. par annum. There has been a further outflow of currency to the West and South, which had its due effect on the bank reserves. The city banks, in their last weekly return, showed a loss of nearly 4⅜ millions of the legal tender notes, over 2½ millions of specie, and over 2¼ millions of deposits. Their loans were increased nearly 6⅜ millions; and a slight addition was made to their circulation. They now hold 51½ millions of legal tender notes, against about 56⅛ millions six weeks since. Their specie reserve is now less than 15 millions, against over 81 millions on the 17th of July. Their deposits are now 188⅞ millions against 200¼ millions five weeks ago Their loans are now up to 268⅞ millions, against 261 millions a fortnight back. The U.S. Sub-Treasury at this port reduced its cash balances slightly, during the week. Its coin and currency reserve on Tuesday was about 86¼ millions against 87⅝ millions the preceding Tuesday evening.

The specie reserve of the city banks according to the latest return is $14,942,066, against $16,-150,942 same time last year. The city bank deposits are now $188,823,324, against $205,-489,070 week ending Sept. 12. 1868. The legal tender reserve amounts to $51,487,867. against $63,429,337 same time last year. The circulation now stands at $33,964,196, against $24,139,926 same time last year. The loans are now $268,-864,533, against $272,055 690 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $131,959,-000 a day, against a daily average of $92.814,879 the preceding week, and $100.633,390 the week ending with Aug. 28, 1869. The current week's exchanges average about $103,000,000 a day. The city banks, last, week, reported a further loss of $2,519,656 of specie, $2,277,762 of deposits, and of $4,341,915 of legal tender notes. They increased their loans, $6,314,694; and their circulation, $4,161.

The city bank exchanges on Wednesday were $95,122,199.

National Bank notes to the amount of $77,170 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $317,647,146, against $282,-555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $17,904,916, leaving, with the existing 1,620 banks, (having an aggregate capital of $422,659,260,) an actual circulation at this date, of $299,742.230. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $347 893,-000; and for the public deposits, $19,881 000—making a total of $367,774,000. The Treasury Department last week redeemed and destroyed $249,200 of worn and mutilated fractional currency, and issued $396,406 of new. The outstanding amount of fractional currency on the 1st of Sept., was $30,711,799 87 against $31,030,300, on the 1st of Aug.

The U. S. Sub-Treasury receipts, week ending with Sept. 11, were $4,118,579 in coin, including $2,696,000 from customs duties, and $2,683,572 in currency; payments, $2,736,106 in coin, including $658,922 of coin interest, and $5,494,064 in currency; balance at the close of the week, $88,951,-334, including $75 770,175 of coin, and $9,455,-210 of currency, against $89,166,589 at the close of the preceding week, showing a decrease of $215,255. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $711,456 of coin, including $523,662 from customs, and $439,149 of currency; and payments, $133,500 in coin, including $91,000 of coin interest and $1,112 640 in currency. On Tuesday, receipts, $1,111,799 in coin, including $461,000 from customs, and $281,971 in currency; and payments $213,946 in coin, including $116,837 of coin interest and $163,736 in currency. The

balance at the close of business on Tuesday stood at $86,287,697, (including $8,894,954 of currency, and $77,245,985 of coin,) against $87,635,084 a week previous; and $83,063,633 on Aug. 28, 1869. The aggregate receipts of the office in Aug. were $42,041,140, including $14,319,915 from customs; aggregate payments, $54,599,091, including $18,867,484 of coin interest.

The outstanding amount of coin certificates on the 1st of Sept. was $23,647,580, against $36,725,840 on the 1st of Aug. The Sub-Treasurer at this port, last week, retired $2,574,648 of coin certificates through the receipts for customs.

Government revenues have been yielding quite satisfactorily for the season. The excises yielded about 4¼ millions; customs at the port of New York, $2,696,000, and at the outports about $850,000 (in coin) more, making the grand total income for the week equal to about $9,037,100 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 43 millions.

Gold has been less confidently dealt in by speculative operators, and has shown less firmness. The range has been from 134¾ to 136⅝; and the closing quotation on Wendesday was 136⅛. The customs demand has been less extensive, and the export drain has been very light. The Gold Exchange Bank clearances which were as high as 190¼ millions on Monday of last week were down to 85½ millions on last Saturday; and on Tuesday of the current week were only 53⅛ millions. The receipts of California gold, by the last Aspinwall steamer, were only $1,925. The exports of specie from this port last week, were only $56,439.

The coin balances of the Government at this port on Wednesday morning, was about 77¼ millions.

The following is a statement of the business of the New York Gold Exchange Bank for the week ending Saturday September 11th, 1869:

Average am't of loans and discounts	$1,182,095
Average amount of specie	743,196
Average amount of deposits	1,236,413

The U. S. Sub-Treasury coin balance on Thursday morning was $77,869,331.

The customs of the port on Wednesday yielded $510,504. The U. S. Sub-Treasury disbursed $93,975 of coin interest, on that day.

The customs demand for Gold last week, averaged $449,333 a day; thus far, this week, it has averaged $492,500 a day, or equal to a weekly aggregate of $2,955,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $11,385, and since Jan. 1, $9,847,241, against $5,529,241 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $94,715,901, against $62,843,345 same time in 1868. At San Francisco, from Jan. 1, to Sept. 1, 1869, $5,433,154, against $5,715,132 same time last year.

The exports of specie, from this port, last week, were $56,439, against $329,525 same week last year; total, since Jan. 1, 1869, $25,274,067, against $65,352,056 same time last year. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $658,922, and since Jan. 1, 1869, $67,882,177, against $62,843,345 same time in 1868. The specie exports from San Francisco, from Jan. 1, to Sep. 8, 1869, were $26,555,822, against $28,341,440 same time in 1868.

The U. S. Treasury receipts from customs at all ports from July 1, to Sept. 4, were about 40 millions.

Foreign exchange has been in light demand and generally weak in price. Bankers' prime sixty day bills on London closed irregularly on Wednesday at 108@108¼, and on Paris to 5.27½@5.20; sight bills on London to 108⅜@108¾, and on Paris to 5.20c.@5.17½. The offering of produce bills has been less extensive this week. The week's exports of domestic produce have been to the currency value of $3,124,362, making the total since Jan. 1, 1869, $134,120,941, against $117,695,766 same time last year.

Government securities have been in much less request, and with rather freer offerings of the various issues of bonds, prices have been depressed. Government bought in on Friday of last week $675,500 of Five-Twenties at from 117.42@118.99; and on Saturday, $324,500 do. at from 118.25@118.90 nett. The street business has been mainly confined to the local dealers. There has been very little of an investment inquiry. Some purchases have been made on Cuban account; but apart from this, there has been no foreign demand of moment. On Tuesday, a somewhat steadier movement was noted. On Wednesday, Government bought in two millions of U. S. 5 20s at 118.20@118.75, out of an aggregate offering of $5,474,000.

U. S. sixes of 1881 closed here on Wednesday at 121½@121¾; U. S. Five-twenties of 1862, ex-coupon, 122@122¼; U. S. Five twenties of 1864 at 121⅛@121⅜; U. S. Five-twenties of 1865 at 121¼@121½; U. S. Five-twenties of 1865, consolidated, 119⅞@120; U. S. Five-twenties of 1867, 120⅛@120¼; U. S. Five-twenties of 1868, 119⅞@120⅛; U. S. Ten-forties at 110⅛@110¼, ex-interest; U. S. Six per cent. currency bonds, 109¼@109⅜.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 1.	Sept. 8.	Sept. 15.
Consols	93¼	92⅞	93
U. S. 5-20's of 1862	84	82¾	83⅛
U. S. 5-20s, 1865	83⅝	82⅝	82⅞
" 1867	83	81¾	82
" 10-40s	76½	75¾	75½
Erie	24	23¼	28½
Ill. Central	94¾	94	94½

Railway and miscellaneous stocks have shown more activity; and notwithstanding the augmented call for Money, prices have been on the whole, quite buoyant. The shares of the Erie company were formally restored to their place on the regular list, on Tuesday last, at Stock Exchange. On Wednesday, the general market closed weak and irregular.

The President of the Erie Road sent in to the Committee of the Stock Exchange a statement of their funded debt, of which only $4,887,000 is convertible into Common Stock, and also a pledge that none of their numerous leases will be capitalized without thirty days' notice to the Stock Exchange, under the rule adopted last Winter. Notice has also been given by the Farmers' Trust, that the the certificates of stock in the names in which they now stand will be duly countersigned and registered, without waiting for the reopening of the transfer books on the 13th October after the annual election.

Business in domestic produce has been on a very moderate scale in all other articles than Breadstuffs, in which the dealings have been extensive, prices have favored buyers. Cotton has been depressed and lower. Middling upland cotton closed tamely on Wednesday at 32@32¼ cts. per lb. The stock of cotton now here is given at about 4,500 bales. The receipts at the port this week, have averaged about 1,500 bales a day. The receipts at all the ports, year ending Sept. 1, 1869, were 2,260,657 bales, against 2,430,893 bales in 1867-'8; exports, same time 1,447,643 bales, against 1,655,816 bales same time in 1867-'8; stock on hand at latest dates, 15,500 bales, against 39,000 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 16,695 pkgs., against 15,106 pkgs., same time last year. From Boston, 6,189 pkgs., against 6,871 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been in fair demand, at from 11@16½c., per lb.; receipts, 7,095. Milch cows dull, at $40 @$110 each, receipts, 115. Veal calves in good request at from 7@11½c. per lb.; receipts, 2,463. Sheep and lambs fairly active at from 4½@7c., and 6½@9c. respectively per lb.; receipts, 41,398. Swine more sought after at from 9⅜@10½c. per lb.; receipts, 16,856.

Foreign goods have been in fair demand, and generally held with firmness. The week's dry goods imports were valued at $3,105,307, and of general merchandise, $3,839,566, making an aggregate for the week of $6,997,873 specie value.

Freights have been less active, especially in the breadstuff line at firmer rates. For Liverpool we flour at 2s. 6d. by sail, and 2s. 6d.@2s. 9d. by steamer, per bbl.; grain at 9½d.@9¾d. by sail, and 10d.@10½d. by steamer, per bushel; cotton at $\frac{3}{16}$d. by sail, and ¼d. by steamer, per lb.; and heavy goods 20s.@35s. by sail, and 30s.@45s. by steamer, per ton. Total number of vessels in port on Wednesday, 413.

The New York exports, exclusive of specie, for the week ending Sept. 14, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$3,163,024	$3,124,362
Prev. reported	114,532,742	130,996,579
Since January 1	$117,695,766	$134,120,941

The imports for the week ending September 11, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$1,857,313	$3,105,307
Gen. merchandise	2,364,942	3,892,566
Total for the week	$4,222,255	$6,997,873
Previously reported	172,960,093	212,809,059
Since January 1	$177,182,348	$219,806,932

The balance in the Sub-Treasury on Wednesday was $86,955,695 36.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Chesapeake and Ohio Railroad.

The anticipated completion of the Chesapeake and Ohio Railroad, now running to White Sulphur Springs, in West Virginia, and to be extended to the Ohio within the next two years, will open another and most important avenue to trade between the Great West and the Atlantic cities.

From Richmond to the White Sulphur Springs, a distance of 225 miles, the road is completed and in good running order. From White Sulphur Springs to the Ohio River, a distance of 200 miles, the road is yet to be constructed.

The Messrs. Huntington & Co., of the Central Pacific Railroad and other influential parties of New York City have, during the past six months, examined thoroughly the present condition and future prospects of the Chesapeake and Ohio Railroad, and have recently concluded to undertake the completion of this important road to the Ohio River.

By the terms of the agreement with the Chesapeake and Ohio Railroad Company, Mr. Huntington and his associates (ten in all) will have the control of this road from Richmond to the Ohio River, a distance of 425 miles; *and thus New York will control the most important railroad in Virginia*—a road calculated to accomplish more good for Virginia than all their other internal improvements combined, and destined to make Norfolk a great commercial city.

The advantages of this road to New York, Virginia, and the great West are apparent.

1. Cincinnati and the great central West will be 120 miles nearer to the Atlantic seaboard by this road than by any other railroad now in operation.

2. In grade the Chesapeake and Ohio has decided advantages over the Baltimore and Ohio, over the Pennsylvania Central, and over the New York and Erie. The maximum grade of the C. and O. R. R., in ascending the chief Alleghany range of mountains from west to east being only 29½ feet to the mile; that of Pennsylvania Central, 53 feet to the mile; that of New York and Erie, 60 feet to the mile; that of Baltimore and Ohio, 116 to the mile.

3. In climate this Central Virginia route has advantages over the other three routes. The Winters being much milder, therefore this route will have less obstruction from ice and snow than the more northern routes.

Thus, in *distance, grade,* and *climate* this route through Central Virginia will have decided advantages over any other road now in operation between the great West and the Atlantic seaboard, and when completed to the Ohio River it will constitute the best outlet for the trade of St. Louis, Louisville, and Cincinnati seeking the New York market. It will develop the vast cannel splint, and bituminous coal deposits situated in the great Kanawha region, and also the iron deposits of Central Virginia and Central and West Virginia, and will make Norfolk an important commercial city. And, as "all roads lead to Rome," we do not fear that New York will reap less than her fair share of the advantages resulting from the construction of so great a work.—*N. Y. Tribune.*

Debt of Michigan.

The debt of Michigan has been reduced $852,342 since January 1, 1867, and the whole amount paid and ordered to be paid this year, is $1,151,500. In three years, from a fraction less than $4,000,000, the State debt will thus be reduced to less than $2,500,000. The diminution of the State tax has been $415,474 in two years, and the cash balance in the treasury next January, it is expected, will exceed $250,000, of which sum $80,000 or $100,000 will be by law applicable to the purchase of State bonds.

☞ PACIFIC RAILWAY GOLD LOAN, $6,500,000. A seven per cent. land grant, railroad, first mortgage bonds, having thirty years to run. Interest and principal payable in gold. Coupons payable semi-annually in London, Frankfort and New York. Circulars, maps and pamphlets sent on application. The bonds for the present are sold in currency at 95, with accrued interest. DABNEY, MORGAN & CO., 53 Exchange Place. M. K. JESUP & COMP'Y, 12 Pine street.

☞ The Louisville and Frankfort and Lexington and Frankfort Railroad Companies have been consolidated, under the name of the "Louisville, Cincinnati and Lexington Railroad Company." The former road is 65 miles in length, and the latter, 29—total, 94 miles. To which add length of Cincinnati Branch, 81 miles—making a total of 175 miles of road now in successful operation.

☞ The stockholders of the Richmond and York River Railroad Company have resolved to extend the road twenty-one miles to the Chesapeake Bay, thus shortening by eleven hours the time between Richmond, Baltimore and Philadelphia.

☞ Messrs. Corning, Griswold & Co., Troy, N. Y., will commence upon the manufacture of street rails at their new rolling mill, next week.

Journal of Railroad Law.

RAILROAD COMPANIES—DIFFERENCE BETWEEN CONSOLIDATION AND AMALGAMATION—DISSOLUTION—ITS EFFECTS.

The facts of the late case of Powell *vs.* North Missouri Railroad Company (42 Missouri Reports page 63) are fully and clearly stated in the following opinion by

HOLMES, J.—The petition is in the nature of a bill in equity, for an account of the assets of the Chariton and Randolph Railroad Company, in the hands of the defendant. It is alleged that this company, by an agreement with the defendant, and by virtue of the act of the General Assembly, approved February 10, 1864, for the consideration of one dollar and of the covenants contained in the instruments of transfer, surrendered and transferred to the defendent their franchises and property of the value of $200,000, and that it was agreed that, upon the acceptance of such transfer, the other corporation should cease to exist. There was no allegation of fraud, nor that the transfer was not made for a valuable consideration, nor that the defendant was not a *bona fide* purchaser, nor that there was any trust for the benefit of creditors.

A demurrer to the petition was overruled.

An answer was then filed denying the averments of the petition as therein stated, and alleging that the defendant, under the act aforesaid, did, on the 14th day of May, 1864, purchase, for a valuable consideration and in good faith, from the said Charitan and Randolph Railroad Company, all their rights, privileges, franchises, and property, but assumed no liability to pay the debts of the company; and it denied the right of the plaintiff to maintain this action.

There was some evidence tending to show that the value of the property sold and conveyed was between fifty and a hundred thousand dollars. The deed of sale and transfer was expressed to be "in consideration of the premises and the agreements herein contained, and of the sum of one dollar." Among the covenants there was one for the payment of $25,000, for the liquidation of the debts of the company to that amount, and no more, and it was proved that this sum had been paid. Another covenant was to the effect that the defendant would issue certificates of stock in the "West Branch of the North Missouri Railroad Company," to the stockholders in the other corporation, to the amount of the actually paid up stock held by each one, upon a surrender of the old certificates for cancellation. It was further covenanted that the defendant would accept the transfer in pursuance of the act, and agree to undertake the construction of the West Branch Railroad, and proceed at once to the construction and completion thereof, as rapidly as the moneys to be raised by means of the bonds authorized, or from other sources, would enable them to do.

The Court gave an instruction, which we may take as indicating the principles upon which the decision was grounded, to the effect that the act of the Legislature did not authorize a sale of the effects of the Chariton and Randolph Railroad Company, but merely an amalgamation and consolidation of the two roads, and that therefore the assets were subject, in the hands of the defendant, to the plaintiff's claim; and judgment was given for the plaintiff for the sum of $37.35, for which execution was awarded against the property, real and mixed, of the Chariton and Randolph Railroad Company, found in the hands of the defendant.

This corporation was authorized by the act to transfer and assign, by a vote of a majority in interest of the stockholders, all their effects and assets rights and privileges, and all the work done in the construction of their road, to the North Missouri Railroad Company; and upon such transfer and acceptance the company was "to cease to have a corporate existence" and the road was thenceforth to be styled the "West Branch of the North Missouri Railroad;" their "franchises" were to become "completely vested in the North Missouri Railroad Company" but "the accounts and business of the West Branch" road were to be kept separate and distinct from those of the main line, so that one road should not become or be held liable for the debts of the other.

The deed certainly transferred and conveyed everything that could be transferred or assigned under this act. This was not a mere amalgamation or consolidation of the two corporations into one. By the very terms of the statute and the deed, the first corporation was extinguished—the second only continued to exist. Where several railroad companies were, by virtue of the act of union "merged in and constituted one body corporate," under the name of one of them, and all were continued in existence, it was treated as a consolidation. (Phila., Wil. and Balt. R. R. Co. *vs.* Howard, 13 How. 333.) An amalgamation implies such a consolidation as to reduce the companies to a common interest. (2 Redf. Rail. 659.) Such was not the case here. One was absolutely extinguished, as was held in a similar case in Eaton and Hamilton R. R. Co. *vs.* Hunt, 20 Ind. 463.

As to what the effect was upon the corporate franchises, we need not inquire very minutely. It may safely be said that such of them as were personal in their nature, and incapable of being transferred to another, were revoked or surrendered, and were extinguished. There is no question here of the power of the Legislature to pass this act, nor of the power of this corporation to do this thing with the consent of all the stockholders, and, for all the purposes of this case, such consent may be presumed. As to the other corporation, whether any franchises were transferred or not, the act conferred upon that company all the additional franchises and powers that were necessary to enable them to accept this transfer and build the West Branch of the North Missouri Railroad. The provision in relation to the keeping of the accounts and business of the branch and the main line separate and distinct, appears to refer to the future operations of the North Missouri Railroad Company, and to the rights and interests of the stockholders therein. This corporation is to be considered as having power to construct a main line and a branch, with two classes of stockholders, in respect to their interest in the corporation. The act of February 16, 1865, to provide for the completion of the North Missouri Railroad, and its West Branch, proceeds upon this idea in reference to the application of the funds to be raised by the first mortgage bonds, and may be taken in some measure as a legislative construction of the nature and constitution of this corporation. Whatever it may be, we need go no further now than to say that there is no consolidation of these two corporations into one under the name of the other.

The Chariton and Randolph Railroad Company was not compelled to make this transfer. It was a matter of contract, and it is clear that the conveyance was made upon a valuable consideration, and to a *bona fide* purchaser. It was authorized by law, and it was effectual to convey the property.) Bruffet *vs.* Great West. Railw. Co. 25 Ills. 356). By the old common law, it seems, a dissolution of the corporation extinguished the debts; but courts of equity in such case will consider the property and effects as a trust fund for the payment of creditors and for the shareholders, into whosesoever hands they may come, subject to such a trust. A corporation cannot give away the effects belonging to it, to the prejudice of the creditors. (2 Redf. Rail. 624). A court of equity will follow the trust fund into the hands of others than *bona fide* creditors and purchasers. Bacon *vs.* Robertson (18 How. 480.) There was no averment and no proof that this defendant held this property otherwise than as a *bona fide* purchaser for a valuable consideration. The judgment of the court below did not proceed upon any equity of this nature upon the theory that the debtor corporation still existed under the corporate name of the defendant, and that the property which had belonged to it was subject to this demand in this suit. According to the view we have taken of the case, this proceeding was entirely erroneous.

Judgment reversed and the petition dismissed. The other judges concur.

Baltimore and Ohio Railroad.

At the regular monthly meeting of the directors of this company held in Baltimore on the 8th inst., President Garrett made the following statement in reference to the business of the road:

Within a brief period the relations of the Baltimore and Ohio Company have so materially changed, and openings for a great increase of the business of Baltimore with extensive and important regions have been so effectually secured by new connections, combinations and contracts formed in the West, that a statement in reference to the agreements and their effects will doubtless prove interesting. The board will remember that on the 1st of July the contract with the Sandusky, Mansfield and Newark Railroad Company went into operation. That line is 116 miles in length, extending from Newark, on the Central Ohio Division, to the city of Sandusky, on Lake Erie. Passing under the charge of this company permanently, it is now known as the Lake Erie Division of the Baltimore and Ohio Railroad. This road extends through five of the richest and most important counties of the State of Ohio, namely: Licking, Knox, Richland, Huron and Erie. It passes also through a number of important places. It commences at the city of Newark, at the junction with the Central Ohio Division. This city, with a population of 9,000, has extensive manufactures and a large and increasing business. The road passes through the prosperous and enterprising city of Mount Vernon, which contains a population of 7,000. Within five miles of Mount Vernon is situated Gambier, the seat of the successful and distinguished institution, Kenyon College, the students of which and the adjacent population use this road as their chief avenue of communication. Mansfield, also upon the line, is a town of 10,000 inhabitants, with large establishments for various manufactures, and an active and large commerce. Besides these principal places, important towns are located at a number of points on the line—each of which has a fertile

back country for its support. The city of Sandusky is a port of entry and possesses one of the best harbors upon the Lakes. Its present population is fifteen thousand, which is rapidly increasing. Its traffic is large in lumber, wool, flour, grain, fish, grapes, wines, etc. Its manufacturing interests are varied and extensive. Heretofore Sandusky has been without direct relation with any eastern seaport. Its trade has not, it is believed, for this reason, been developed to the extent to which it is legitimately entitled. With the improved and direct relation now established with the city of Baltimore, the entire line of Railway (595 miles) being under one management, the cars transported through without break of bulk, combined with the conveniences and economy of shipment from this point by the regular lines of steamers to Europe to the Atlantic, and especially to Southern ports, it is anticipated that the business of Sandusky will rapidly enlarge and improve. Such an additional direct outlet for the commerce of the great Lakes to the city of Baltimore with advantage to many great interests, will doubtless attract a large increase to the commerce of the port of Sandusky.

The relations of the Baltimore and Ohio Railroad, through the Marietta and Cincinnati Road, under the contract which has been recently made with the Cincinnati, Indianapolis and Lafayette Railroad Company, are also proving of a highly interesting character. That road and its branches pass through Hamilton county, Ohio, Ripley, Decatur, Shelby, Dearborn, Johnson, Marion, Boone, Clinton, Tippecanoe, Franklin, Wayne and Henry counties in Indiana, all of which are populous and fertile and afford a heavy and growing traffic.

It is strange that the chief difficulty which is alleged in transferring to Baltimore a large portion of the immense business of these counties, and also from the region of the Lake Erie division —counties which embrace a population of 600,000 —arises from a want of knowledge of and relations with Baltimore merchants, on the part of the business men of these sections. So little direct intercourse has heretofore existed with Baltimore that the Baltimore and Ohio Railroad Company in securing these lines of communication, with preparations for the most economical transportation of an enormous business, will enable the merchants of Baltimore who will appreciate the advantages which they can thus control to transfer a most valuable traffic to this city which has heretofore passed to New York.

A number of our merchants have recently been induced to visit these important sections of Ohio and Indiana, and already business has commenced to flow to Baltimore in a much enlarged volume. With proper energy and enterprise, which will beyond doubt be exerted as soon as the subject is generally understood, a rich harvest of increased business for this community can beyond question be commanded.

These roads are equally important in their chains of connections. The main line of the Indianapolis, Cincinnati and Lafayette Road is 179 miles in length. It operates leased roads from Fairland (95 miles northwest from Cincinnati) to Martinsville, 53 miles; and from Valley Junction (18 miles west of Cincinnati) to Hagerstown, 70 miles; and from Cincinnati to Lawrenceburg, 25 miles—making an aggregate of 301 miles.

That company has also important and favorable contracts for through business with the St. Louis, Alton and Terre Haute Road, and will, under existing contracts, have similar arrangements with the new road between Terre Haute and Indianapolis and the Vincennes lines when completed.

In addition to these connections from Cincinnati, the Baltimore and Ohio Company has the most friendly relations with the Ohio and Mississippi Road, with which it is transacting a large reciprocal business between Cincinnati and St. Louis.

Amidst the tremendous efforts and conflicts of the past few months of the great trunk lines, in connection with Western business, the power and capacity of the Baltimore and Ohio Road to maintain satisfactory results under its enlarged arrangements have been exhibited.

It is interesting to note that the revenues of the Main Stem and branches, which in the corresponding month in 1868 were in the aggregate $790,059 99, in the past month of August, notwithstanding the unprecedented difficulties in rates, amounted to $1,036,244 29, exhiting an increase of $246,184 30. Of this amount, however, $40,889 21 were derived from the Lake Erie Division. Deducting this sum, an increase of $205,295 09 is shown in the general business of the company.

The company has made special efforts within the past year to afford increased facilities and advantages for the passenger business. Arrangements are in progress for further improvements. The extensive building being erected at Mount Clare for the construction and quick repair of passenger cars is rapidly approaching completion. and large as they have been heretofore, the facilities for this work will be materially increased upon the completion of that structure. In May last, availing at the earliest practicable period of the completion of the arching of the tunnels on the Parkersburg branch, and of the improved condition of the Marietta and Cincinnati Road, this company organized a fast line, running betwixt Baltimore and Cincinnati in twenty three hours and thirty minutes, a time unprecedented in the history of travel between these cities. That line has been run with marked success. It made the time with great uniformity and safety in two hours and fifty minutes less than the shortest time made by the Pennsylvania Road. In the recent schedule adopted by the Pennsylvania Road, our line still reaches Cincinnati two hours and twenty minutes in advance of their quickest line. The Baltimore and Ohio Company also furnishes to travelers from Washington to Cincinnati an advantage of three hours and ten minutes in advance of the quickest time by the Pennsylvania Road. The result has been that the road, with its increased advantages, its comfortable cars, its line improved with superior iron and a large quantity of steel rails, its bridges and structures in the most perfect condition, and the singular safety and immunity from accidents, has not only increased its ordinary business, but has attracted a very large from the city of New York and the New England States.

The facilities and economies which Baltimore now possesses in connection with its European steamship arrangements, and its lines of steamers to every important Southern port, continue to attract great attention in the West, as well as abroad. The company has been informed that a number of extensive houses, which have heretofore had their relations almost exclusively with New York, are about organizing houses and branches in the city of Baltimore, in order to avail of the economies and advantages of this port. To add to and complete the advantages of this city, another enterprise has been urged. Gradually the system of shipping the cereal products of the West unground is taking the place of shipments of flour. In order to handle grain in the most economical manner it is being shipped to a large extent in cars *in bulk*. This company has prepared a large number of cars which pass through from distant points in the West without change to this city.

It is justly stated that the absence of a facility offered elsewhere—of an extensive grain elevator —is a disadvantage to this market. Whilst it would seem that the enterprise of others should have, as we had hoped, supplied this requirement, yet as an injurious delay is occurring, the President is prepared to recommend to the Board that this company, in addition to its various and extensive works in progress, shall undertake to build a first-class elevator, and thus furnish an essential facility for this important trade.

The value of the roads in alliance with this company, important as it is in their immediate and direct relations, extends much further. In the case of the Lake Erie Division, it is proper to state that the officers of this company have had the most full and satisfactory interviews with the authorities in the Lake Shore Lines, and they assure us in regard to the business of Philadelphia, Baltimore and Washington, that they are anxious to have the most friendly co-operations with this road. We therefore have close and satisfactory relations with the Cleveland and Toledo and the Michigan Southern and their connections, as also with the Toledo, Wabash and Western and its connections.

It is hoped that the extensive connections and arrangements perfected by the Baltimore and Ohio Company, with the advantages of economy and in net results to shippers, will lead to movements on the part of the mercantile interests East and West that will cause the business of Baltimore, largely as it has increased, to spring forward with a rapidity and in a volume not heretofore anticipated.

The company has continued not only to enlarge its equipment for coal tonnage, but has built largely of cars with compromise wheels to meet the requirements upon Western Roads of a different gauge. Our arrangements to increase our equipment continue to be of a magnitude commensurate with the prospects of a constantly enlarging business.

Subsequent to the remarks of Mr. Garrett, upon motion of Mr. H. M. Warfield, the Board unanimously adopted a resolution approving the suggestion of the President, and authorizing the construction of a first class elevator upon the company's property at Locust Point.

Baltimore and Swann Lake Railroad.

At a recent meeting of the corporators of this road recently held in Baltimore, a report from the engineer was submitted, in which were embraced the entire practicability and economy of using steam as a propelling power on this road. It was stated that guaranties from reliable parties in Ohio were ready for furnishing the company with light engines to run over the greatest grades of this road and carry from sixty to eighty tons burden. A calculation of the comparative cost of using steam power or horse power resulted in the conclusion that the use of the steam engine would cost only about one-half the amount per day as that required in the use of horse cars. A committee was appointed to wait upon the property holders along the line of the contemplated road to ascertain what amount of stock can be obtained. It is thought by some of the parties interested that within the next ten days an amount of stock will be subscribed sufficient to justify the immediate commencement of work on the road, beginning at both ends, and pushing it to completion by the opening of next summer. It is also in contemplation when this road shall be completed to Towsontown to extend it into Dulaney's valley, where there is a large quantity of iron ore, and perhaps the finest marble quarries in the State.

☞ The Leavenworth and Topeka Railroad Company have determined to make a preliminary survey of the route, and to this end a corps of surveyors will be immediately employed and set to work. The officers are: President, Len. T. Smith, of Leavenworth; Vice-President, S. S. Cooper, of Oskaloosa; Secretary, James Safford, of Topeka; Treasurer, Lucien Scott, of Leavenworth.

☞ The Elkhart and Lake Michigan Railroad Company has been organized by the election of a Board of Directors with Hon. Franklin Muzzy as President. Resolutions were adopted to the effect that work should be commenced on the road at once. The office of the company is at Berrian Springs, Michigan.

☞ The Memphis and Little Rock Railroad will be in running order to L'Anguille, some ten miles west of Madison, in a few days.

☞ The track is now laid and construction trains are running on 25 miles of the Iowa Falls and Sioux City Railroad east from Sioux City. It is the intention of the company to have the road opened to Storm Lake, 60 miles from Sioux City, by the 1st of November, at which point a junction will be formed with the eastern end of the line running from Iowa Falls.

☞ The Belleville and Eldorado Railroad Company was organized at Raleigh, Ills., on the 27th ult., by the election of a board of directors with Andrew D. Duff as President, Joseph J. Castles, Vice-President and Secretary, and John W. Cox, Treasurer.

☞ The work of grading the first fifteen miles of the northern extension of the Jackson, Lansing and Saginaw Railroad from Wenona, will commence the latter part of September. The iron will be laid as far as Kawkawlin the coming fall, if not further.

☞ The contract to widen the Louisville and Portland Canal according to the plans of Gen. Weitzel, has been let. It will be enlarged from 48 feet 8 inches to 80 feet.

☞ The Quincy, Alton and St. Louis Railroad Company has been organized at Quincy, Illinois, with Gen. J. W. Singleton as President, and Thomas T. Woodruff, Secretary and Treasurer.

Intercolonial Railway.

THE Commissioners appointed to construct the Intercolonial Railway give PUBLIC NOTICE that they are now prepared to receive Tenders for five further Sections of the line.

CONTRACT No. 8 will be in the Province of Quebec, and extend from the Easterly end of Contract No. 5, at Rimouski, to a point near the Metis River, about 20½ miles in length.

CONTRACT No. 9 will be in the Province of New Brunswick, and extend from the Easterly end of Contract No. 6, towards the Town of Bathurst, about 20½ miles in length.

CONTRACT No. 10 will be in the Province of New Brunswick, and extend from the centre of the Chaplin Island road, near the Court House, at New Castle, towards Bathurst, about 20 miles in length.

CONTRACT No. 11 will be in the Province of Nova Scotia, and will extend from the Easterly end of the Eastern Extension Railway to the Westerly end of Section No. 4, (including the bridge across the Missiquash River, except the western abutment) about 3½ miles in length.

CONTRACT No. 12 will be in the Province of Nova Scotia and extend from the easterly end of Contract No. 7, at Folly Lake, to a junction with the existing railway at Truro, about 24½ miles in length.

Contracts Nos. 8, 9 and 10 to be completely finished before the first day of July, 1871. Contract No. 11 to be completely finished by 1st July, 1870.

That portion of contract No. 12 east of Folly River to Truro to be finished and ready for laying the track by the 1st day of October, 1870, from Folly River to a point opposite the Londonderry Iron Works by the 1st January, 1871, and the remaining portion of said contract by the 1st day of July, 1871.

Plans and profiles, with specifications and terms of contract, will be exhibited at the offices of the Commissioners in Ottawa, Rimouski, Dalhousie, St. John, Halifax, Toronto and Quebec, on and after the 13th September next, and sealed Tenders addressed to the Commissioners of the Intercolonial Railway, will be received at their office in Ottawa up to 7 o'clock, p. m., on the 18th October, 1869.

Sureties for the completion of the contract will be required to sign the Tender.

TO RAILROAD CONTRACTORS.

Memphis, El Paso and Pacific RAILROAD COMPANY.

Office of the Chief Engineer,
Memphis, El Paso and Pacific Railroad Company,
90 Broadway, New York.

SEALED PROPOSALS will be received at the above Office, until **October 15th, 1869,** when Contracts will be awarded, for the GRUBBING and CLEARING, GRADING, MASONRY, BRIDGING, BALLASTING, CROSS TIES and TRACKLAYING of the following portions of said Railroad:

One Hundred and Fifty miles, embracing the Second Division, commencing at Paris and extending westward, to Palo Pinto County.

Specifications, Profiles, Maps and Plans can be examined at the ENGINEER'S OFFICE, in NEW YORK or JEFFERSON.

Proposals must conform to the specification which will be furnished upon application at either of the above places

Evidence of ability to complete contracts will be required and a percentage retained of estimates until each section of five miles is finished.

All the work upon this Division must be finished by October 1, 1870.

Every facility will be furnished those wishing to inspect the ground on the line of the road, by application in person at the Engineer's Office in Jefferson.

J. M. DANIEL, Engineer in Chief,
Memphis, El Paso and Pacific R. R. Comp'y.

Notice to Contractors.

SEALED PROPOSALS addressed to either of the undersigned, will be received until Thursday, September 23, 1869, for the graduation, masonry and bridging of that part of the Connecticut Western Railroad extending from a point on the State line of New York, in the town of Salisbury, to a point in the town of Canton, near the village of Collinsville, a distance of 45 miles, or for any portion thereof.

Profiles and specifications can be seen at the Engineer's Office, Clark House, Winsted, Conn., on and after September 1.

The company reserves the right to reject all proposals not deemed for their interest to accept.

WILLIAM H. BARNUM, President.
Lime Rock, Conn.

OR WILLIAM G. COE, Secretary.
Winsted, Conn.

To Bridge Builders.

THE HALLOWELL AND CHELSEA BRIDGE Company solicit proposals for putting a new superstructure upon the piers of their bridge across the Kennebec River at Hallowell, Maine.

The Bridge is 878 feet long with four spans of 150 feet each, one 106 feet, with a draw of 170 feet in length, and is to be substantially built and covered, to be completed within one year.

Builders will specify the kind of material to be used and the style of bridge which they propose to build.

For further particulars apply to CHAS. A. PAGE, Hallowell, Me.

CROSS TIES.

PROPOSALS FOR WHITE OAK AND CHESTNUT RAILROAD TIES, to be 8 feet in length, 6 inches thick, average 8 inches face, none to be less than 6 in face, delivered at Georgetown and Shallcross wharf, on Sassafras River, will be received until the 1st of October, 1869, by

PRESIDENT KENT COUNTY R. R. Co.,
Chestertown, Kent County, Md.

NEW YORK CITY STEEL WORKS,

Manufacture every description of Steel—PERFECTLY UNIFORM IN QUALITY—and of very great tensile and compressible strength.

BROOKS'

Patent Paraffine Insulator Works,

REAR OF 2123 CHESTNUT STREET, PHILADELPHIA.

The guarantees of this insulator are:

1st.—A current resistance in rain or fog, or in rain and fog combined of 100,000,000,000 Ohmads.

2d.—To insulate a conducting wire of any length in rain or fog, or rain and fog combined, to its full working capacity, or the capacity of a similar wire or conductor placed upon any other insulators under the most favorable circumstances of weather.

3d.—Strength, not to break or part by any strain by, or that a No 8 wire will bear.

It is not injured by missiles in the general acceptance of the term.

It does not depreciate from exposure to smoke, soot and the gases from combustion to one hundredth part of the extent of ordinary insulators.

It is not injured by atmospheric discharges, and is a protection to the poles from the same effects.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

For freight or passage tickets and all further information apply at the Company's ticket office on the wharf, foot of Canal street. F. R. BABY, Agent.

BURLEIGH'S PATENT
Pneumatic Rock Drill

Is now in successful working operation in New York, Chicago, Jersey City; also at the Hoosac Tunnel (Mass.) Lake Superior, Colorado and Nova Scotia Mines, Union Pacific and Boston and Hartford Railroads; also in deepening the beds of the Illinois and Michigan Canals, and Des Moines Rapids, and numerous other localities.

The Burleigh Drill is adapted to all kinds of rock cutting in open cut Mining, Tunnels, Sewers, Quarries, &c., drilling holes from 1½ to 5½ inches in diameter. The Drills are worked either by steam or compressed air. For all kinds of work under ground compressed air is used, serving as a perfect ventilator, as it is exhausted from the Drill. At the Hoosac Tunnel the compressed air is carried upwards of a mile and a quarter, and at that distance works eight Drills at the same time. Information in regard to the ownership of the different State rights. Prices of Drills, Air Compressors, &c., can be obtained at the office of

Intercolonial Railway.

Although to a majority of the people of the United States, the rapid progress made in the construction of the Intercolonial Railway is a matter of but little present interest, this important work nevertheless claims a prominent position among the great material enterprises of the present time, and on its successful completion depends the development of a vast area of valuable territory now practically excluded from the busy circle of the world's activities. The Intercolonial Railway, projected when the Act of Confederation was passed by the British Parliament, was designed to be as "oil on the troubled waters" of Provincial discontent and dissatisfaction; but if it has failed to accomplish the object intended by the British Ministry, it has already shown itself to be a commercial as well as a political necessity. If the idea, now so prominent, of interoceanic railway communication through British territory is to be realized, the Intercolonial road is also a physical necessity. The successful completion of the Pacific Railroad has given the United States control of the commerce between two great continents. It is scarcely probable that Great Britain, with her vast colonial possessions on this side of the Atlantic, will consent to be deprived of the advantages to be gained by handling a portion, at least, of the trade referred to; and as a link in the new chain of railway communication between the two oceans, the Intercolonial road is an indispensable necessity. To the people of the dominion, the local benefits to be derived from its completion are matters of greater moment than the importance of the road in its character as a material scheme of internal improvement and development. But, however considered, it is fully appreciated by them, and, in awaking a new spirit of energy and enterprise among all classes of the people, has already accomplished much that will exert a powerful influence in determining the future of the British North American Provinces.

During the past year the progress of the work on the several sections of the Intercolonial Railway, has been rapid and satisfactory. A short time ago the Intercolonial Railway commissioners, appointed by the Government to supervise the construction of this great national work, made a tour of inspection along the line of the road, to examine and report on the progress of the work. From the letters of a correspondent of the Toronto *Telegraph*, who accompanied the commissioners, we learn many interesting facts concerning the present condition of the road and the prospects of its rapid completion, of which we furnish our readers a brief summary. The Intercolonial Railway starts directly from the station of the Grand Trunk road, and in a very short distance crosses the Riviere du Loup by a bridge some three hundred feet in length, immediately above the falls at that place so well known for their picturesque beauty. After crossing the river, the line makes a sharp curve through a heavy rock hill side cutting, after which it descends to a level terrace and runs through a well settled French country. This section, or "contract," is twenty miles in length, and a large force of workmen and laborers are employed on it—the number being never less than five hundred at any time. Several culverts and arches are already completed, and others are in progress. Much heavy grading remains to be done, but the work on this contrat is in a forward state. The bridge at Isle Vert, is the structure next in importance to that at Riviere du Loup, which will be ready by the time the grading is finished.

On contract No. 2, the work is also progressing rapidly, and with the exception of two or three heavy planes will be finished this fall. Upwards of five hundred men are engaged on this section, and the Messrs. Worthington, who are the contractors for Nos. 1 and 2, in all about forty miles, are pushing forward the work with great energy. The country abounds in stone suitable for use in culverts, bridges and other structure where masonry is needed, and all the stone work is said to be done in the most satisfactory manner. A large 15 foot arch culvert, about two miles east of Trois Pistoles, has one of its walls already completed up to the course from which the arch will spring, and is as fine a piece of solid, well executed work as is to be found in Canada. The length of this culvert is about 75 feet. Competent inspectors are appointed to overlook the masonry, and from the character of the work executed so far, they appear to be thoroughly doing their duty.

The heaviest work on contracts 1 and 2 is at the crossing of the Trois Pistoles River, about a mile and a half west of the village of that name. The valley of the river, at the point where the road crosses it, is about 1,100 feet wide, and the road will be elevated nearly 75 feet above the bed of the river. This crossing is the heaviest work between Riviere du Loup and Metis, a distance of about 90 miles. On the west side of the river the line is carried for nearly two miles across a number of gorges necessitating several culverts and side hill embankments. The bridge, which will be 500 feet long, will start from the west bank and be carried nearly half-way across the flats, thus placing the bridge across the main channel and allowing no check to the flow of the river. The bridge is approached on the west side by a heavy embankment about 40 feet deep, made from a cutting of the stiffest kind of blue clay. This bank will be about 800 feet long and is being actively constructed. The material on both sides of the river is the same, and is very difficult to work, coming out in large blocks of blue clay. On the east side of the river the embankment will be about 1,400 feet long and about 65 high at the deepest point. Large gangs of men and horses

are at work on both sides of the river, and the contractors are preparing to put in tramways and tip wagons as soon as the haul gets long enough to use them with advantage. An excellent stone quarry for the piers of this bridge has been opened on the St. Lawrence, about nine miles from Trois Pistoles, to which point the stone is now floated at comparatively small cost in scows and flat boats.

On contract No. 5, awarded to Mr. Haycock, of Ottawa, whose headquarters are situated at the village of Bic, work is progressing favorably. Mr. Haycock took the contract in April, and already employes a force of 350 men in grading the line, There is but little bridging or culvert work on this part of the road, but most of the grading is through solid rock and is difficult and expensive. Contract No. 6 begins at Rimouski Bay, where a large and flourishing village has grown up within the past few years. Work is progressing on both sides of the Rimouski River, which will be spanned by a bridge 300 feet in length. The country from Riviere du Loup to Rimouski is like a continuous village, very similar in its general characteristics to that between Chaudiere and Riviere du Loup. The scenery in many places is exceedingly fine, and for tourists seeking a healthful relief from city life no more delightful trip could be made than from Quebec down the river and gulf of the St. Lawrence. From Rimouski the line will run through a very level country for about 22 miles to the Metis crossing, the Metapedia road. The course of the line from the Metis to the mouth of the Metapedia has been a source of considerable labor to the engineers, who, after careful examination of the country, have found a moderately easy line, with favorable gradients throughout. The railway will cross the Metis about four miles from its mouth and ascend by easy grades the high land between the St. Lawrence and the Restigouche. It then descends to the level of Lake Metapedia, then runs along the banks of the Metapedia River, which it crosses once instead of 14 times, as proposed originally by Major Robinson.

East of the town of Dalhousie, situated at the mouth of the Restigouche River and possessing a very fine harbor, a section of fifty miles is now under contract; Mr. Jobin of Quebec, having undertaken the work. Mr. Jobin is hurrying the work of grading throughout the whole length of his contract, and has already completed a very considerable amount of it. He has succeeded in finding very good quarries, where the stone for the masonry is now being got out. Some will be delivered on the ground within two or three weeks, when the work of making the culverts will at once be proceeded with. Labor is said to be abundant, and some three hundred men are now engaged on this section. West of Dalhousie is a similar section, the contract for which has been awarded to Messrs. Elliot, Grant and Whitehead, an Ontario firm. Their work is also progressing in a satisfactory manner, the entire line being cleared and a large amount of grading already done. They have about 300 men at work. There is a good deal of rock excavation on this contract. Elliott and Grant have taken up their residence at Campbelltown, and are personally superintending their work. There has been some difficulty in finding suitable stone quarries in the vicinity of the work; but they have now been obtained and the contractors expect to have all the stone for the culverts and bridges on the ground before the winter sets in. The line from the Metapedia, about three miles from which Elliott's contract begins, runs on the south side of the Restigouche River, in sight of it nearly the whole way. The work is principally side-hill cutting, a good deal of it through rock, but no heavy structures. The view from the trains for about 30 miles will be magnificent.

There are but few engineering difficulties in the way of completing the work at an early day. There are only in the whole line of nearly 500 miles three new bridges—one at Trois Pistoles, about 500 feet long; one at Restigouche, about 750 feet long; and the other at Miramichi, where two bridges will be required, the total length of which will not exceed 1,800 feet may be made 200 feet less. Both at the Miramichi and the Restigouche, the rivers are crossed at a low level, in neither case exceeding 20 feet, it may be possible to make it even less. The quantity of masonry will therefore not be large. From the Miramichi to the European and North American Railway the location has not been yet decided upon. A line direct to Monckton was surveyed in the spring, and is understood to be a very favorable line as regards grades, curvature, and economy of construction. It runs along the ridge which is the dividing line for two separate sets of watercourses. It has, therefore, no large streams to cross, as it meets them all at their heads. It is claimed for it that it will save 13 miles of railway to construct, and without increasing the distance to Halifax will shorten that to St. John by nearly 14 miles. The people of the county of Kent, which lies between Miramichi and Shediac, live mainly on the gulf shore, and are said to number about twenty-two thousand. They sent deputations to see the commissioners to urge that the line should follow the course of the post road, and bring it down to the mouths of the rivers. This would involve very heavy work, as the rivers widen out near their mouths into large valleys, which it would be very expensive to cross. The local interests of the population along the gulf shore are great, and there does not seem much doubt as to the line that should be selected. Even if the short and cheap line is adopted, the people of Kent will not be badly served by railway. They already have ample excellent water communication. The short line will probably cost at least $500,000 less than the line crossing near the mouths of the rivers.

Owing to the want of adequate facilities of communication with the centers of wealth and population, the agricultural resources of the country through which this road will run have never been properly understood or appreciated. There is a vast section of heavily timbered and richly productive country that, when the completion of the Intercolonial Railway shall have opened communication with the markets of the more populous sections, will be brought prominently into notice; and there can be no doubt that the local business thus created will justify the construction of the road. The traffic in fish and produce will, of course, be great. On many parts of the line the business of transporting lumber will be considerable, and the passenger travel and the amount of merchandise to be carried will increase every year. Whether the road is immediately profitable or not, there is an important section of country to be developed, and, in doing this, it will have accomplished much, if not all, that was originally expected of it.

Portland and Kennebec Railroad.

The receipts from operations of this road for the years ending December 31, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$246,476 68	$248,637 20
" freight	296,691 89	315,461 72

Total, as above		$112,204 31

The road is 63 miles in length, extending from Portland to Augusta, Me.; Branch line, Brunswick to Bath, 9 miles; Somerset and Kennebec Railroad (Leased) 37 miles—total length of road operated, 109 miles.

The company have 17 locomotives, 20 passenger, 12 baggage and mail, and 220 freight cars.

The trains have run 373,501 miles during the year, divided as follows: passenger, 131,896; freight, 143,697; wood and construction, 48,408;

at a cost of $1.19 per mile. Number of passengers carried, 300,683; do., carried one mile, 7,127,219. Tons of freight moved, 149,419. The report says:

A new spirit of enterprise has recently been awakened in our State in the construction of railroads. In all sections of the State our people seem to be alive to the importance of introducing these new methods of travel and transportation. From Portland, our commercial metropolis, three lines of road are projected (one of which is partly constructed,) all designed to penetrate the great West, and bring within our borders the treasure of that most inviting and prolific region. Each and all of these roads, when completed, will not only add immeasurably to the business and wealth of Portland and of the State, but will tend directly and rapidly to increase the business of our road. The value of these projected lines of communication to and through the mighty empire of the West, to Maine cannot be over estimated. The product of that now undeveloped territory, within our national borders, which will find its most direct transit to market over these projected lines of road, and through the harbor of Portland can hardly be conceived by the most vivid imagination. And when we add to this the business from beyond the great western ocean which, if we are true to ourselves, will find its pathway to the markets of the world over these same lines of road and through the gates of the same city, the amount of business, thus brought into prospect may truly be said to be illimitable.

From Bath a new line of road extending east has been put under contract to Rockland, and is now being rapidly prepared for the iron. This line which will at an early day be extended through the flourishing commercial cities and towns along our coast to Bangor, will constitute a great thoroughfare through our State, bringing into close proximity the great timber and lumber producing region of the east, through Bangor, and the principal ship building and lumber consuming territory of our State. At Belfast this *shore line* will intersect the Belfast and Moosehead Lake Railroad, which is destined, when thus connected, to bring from the interior large quantities of freight, and much travel which now finds its outlet east and west over the Maine Central road, and which will make Belfast with its land and water communication thus completed, one of the great business centres of the State. In the construction of this line of road, we are also much interested, as while it will add largely to business facilities of the central and eastern portion of the State, it will also contribute much to the business of our road.

At the north the people are making a strong movement for the extension of the Somerset and Kennebec road, to Carritunk Falls, in Solon, which is the present limit of its charter. This charter now follows the line of the river through Norridgewock and Anson villages. A route shorter by several miles, and which will substantially accommodate all the business of the river, has been surveyed, and found of easy construction, from Skowhegan through Madison, and by way of Patterson's bridge to Solon. Permission to conform to this new location has been asked of the present Legislature, and will, we doubt not, be granted, and the road extended to Carritunk Falls during the coming season, and ultimately as population and business shall demand, to Moosehead Lake. When these several roads shall have been constructed, the connection of your road with the whole outlying systems of railroads will be completed, and the wisdom of its original projectors in placing it upon its central location be fully vindicated, as the business of all these connecting roads will gravitate to it as naturally and inevitably as the waters of streams and rivulets gravitate to the great rivers.

In the fall of 1870 our city and town loan will mature. At that time our sinking fund will have absorbed one-half of the debt, or about $400,000. To meet the balance the company have special authority of the Legislature to issue bonds payable in 30 years from 1865, secured by a mortgage on its whole property, sufficient in amount to redeem the balance of the city and town loan and all its other outstanding indebtedness. Thus concentrated in these consolidated bonds the whole indebtedness of the company will be less than $2,000,000.

The security for these bonds will be most ample, and they will constitute one of the most desirable securities for investment to be found in the country.

The prospects for an increasing business upon your road were never more flattering than at present, for in addition to the connections of other roads now building or in contemplation, already referred to, the permanent business immediately upon our line is constantly increasing. This is true not only of the general business of our people but especially of that dependent upon the unlimited and accessible water power on the line of the road. Extensive milling establishments are being projected and erected on the water powers at Brunswick, Augusta, Waterville and Skowhegan. These and others of like character will give much new and permanent business to the road. While we may not promise ourselves that rapid increase of business that distinguishes some roads in the rapidly growing west, we may confidently anticipate a steady and permanent increase to the business and value of your property.

STATEMENT OF LIABILITIES.

Oil and waste	9,241 23	9,254 26
Freight expenses	101,230 19	105,447 42
Passenger expenses	63,219 89	57,264 45
Switchmen, etc	17,556 34	19,457 83
Removing ice & snow	7,120 30	4,166 30
Taxes and insurance	76,263 87	72,520 25
Gratuities & damages	7,193 31	6,636 70
Salaries & office exp.	13,513 53	21,910 02
	$746,699 53	$810,958 70
Net earnings	$354,744 30	$344,300 62

Compared with the previous year the gross earnings of 1868, show an increase of $53,815 14, with an increase in expenses of $64,259 17—making the decrease in net earnings, $10,443 68.

The following statement will show the number of passengers carried, tons transported and miles run in 1868 as compared with the year 1867:

	1867.	1868.
Number of passengers carried in the cars	1,535,097	1,622,156
Do. carried one mile	19,820,919	20,619,491
Number of tons of merchandize carried	511,488	559,368
Do. carried one mile	14,268,518	15,659,871
Number of miles run	505,332	556,594

The increase in number of passengers carried is 87,059; in passengers carried one mile, 798,572; and in receipt from passengers, $6,876 73. The increase in tons carried is 47,880; in tons carried one mile, 1,391,353; and in receipts from freight, $39,549 21. Increase in miles run, 51,262.

The company have 31 locomotives, 37 passenger cars, 10 baggage cars, 358 eight-wheel and 298 four-wheel freight cars, and 36 gravel cars.

The assets of the corporation on the 30th of November last, were as follows:

Notes receivable		$313,168 20
Cash and cash funds		159,205 59
Freight uncollected		26,925 46
United States for mail service		1,666 67
		$500,966 01

And the liabilities were:

Renewal fund	$17,730 95	
Balances due connecting railroads	1,777 87	
Unclaimed dividends, etc.	4,106 21	
		23,615 03
Excess of assets Nov. 30, 1868		$477,350 98

From this sum a dividend of four per cent., and U. S. tax, was paid in January, 1869, amounting to $149,052 65, leaving thereafter $328,298 33 in cash or funds equivalent thereto. In addition to this the company owns real estate valued at $10,344, also fuel and materials worth $109,016 62. This property, amounting to $119,360 62, has all been paid for, but is not included in the assets enumerated above. It may also be stated that the corporation has no debt.

TRIAL BALANCE, NOV. 30, 1868.

Construction		$3,540,000 00
Cash and cash funds		159,205 58

☞ About 800 hands are now at work on that portion of the Macon and Augusta Railroad, between Macon and Milledgeville, which remains to be graded. The expectation is to put the whole of the line in operation about next mid-summer.

Commerce of New York.

The foreign imports at New York for the month of August, 1868 and 1869, are officially stated as follows:

	1868.	1869.
Entered for consumpt'n.	$14,005,112	$15,895,735
Do. for warehousing	8,280,600	10,008,548
Free goods	828,188	1,322,924
Specie and bullion	846,821	159,927
Total entered at port	$23,960,721	$27,387,134
Withdrawn fr. wareh'use	9,676,657	11,706,290

The foreign imports at New York for the eight months from January 1, were:

	1868.	1869.
Entered for consumpt'n.	$85,123,542	$109,111,441
Do. for warehousing	78,576,756	93,824,564
Free goods	6,876,780	10,409,867
Specie and bullion	5,012,162	10,373,674
Total entered at port	$175,589,241	$223,719,546
Withdrawn fr. wareh'se	68,428,668	72,845,055

The revenue from customs at New York:

	1868.	1869.
6 months	$55,450,748 65	$63,467,409 94
In July	9,237,920 50	10,045,078 14
In August	11,995,596 18	13,845,030 69
Total since Jan. 1	$76,684,265 33	$87,357,518 77

The exports from New York to foreign ports in the month of August, were:

	1868.	1869.
Domestic produce	$12,750,918	$17,975,524
Foreign free goods	18,192	54,356
Do. dutiable	558,078	594,339
Specie and bullion	4,690,989	3,027,940
Total exports	$18,018,177	$21,652,159
Do. exclusive of specie	13,327,188	18,624,219

The exports from New York to foreign ports for eight months from January 1, were:

	1868.	1869.
Domestic produce	$102,391,078	$118,218,016
Foreign free goods	460,416	238,246
Do. dutiable	4,912,286	4,522,356
Specie and bullion	64,379,147	24,954,457
Total exports	$172,142,927	$147,933,075
Do. exclusive of specie	107,763,780	122,978,618

Railroads in California.

Now that the Western Pacific is finished, there are signs of activity on other railroad routes, more or less controlled by the same corporation. Laborers are arriving at Marysville to commence grading the California and Oregon Railroad. The Chinese employed on the Western Pacific are being transferred thither, and one thousand or more will be at work by the end of the month. We have previously stated that the iron and ties for one hundred miles of the Oregon road have been accumulated on the road connecting Marysville with the Central Pacific. Whether the Oroville Railroad will be bought for the first section of the Oregon line is not yet known.

The Stocktonians are agitating for the construction of a railroad from their town to Visalia, or to a point of connection with the Southern Pacific line northeast of Tulare Lake. At the late election they voted to loan the credit of the city for $300,000 to the Stockton and Tulare Railroad Company, and the officers of this company inform the local press that they have now in San Francisco, or will have in a few days, iron sufficient to lay the track from the water front of Stockton, a distance of twenty-five miles, into the valley, or five miles beyond the boundary line of San Joaquin and Stanislaus Counties. This iron the company will land in Stockton immediately, providing the council will guaranty to issue the bonds asked for, in the event the Legislature grants the privilege, and the company are willing to "take the chances" on the Legislature. The company will bind itself to have the road in running order as early as next August at farthest, or in season to bring the new grain crop to the Stockton wharfs. The bonds, if issued, are asked for only as the road is built, in sections of five and ten miles. It is understood that the Central Pacific folks want to build this road, and will compete for the Stockton bonds.

The latest project is for a railroad from Suisun, on the bay of that name, in Solano County, to Clear Lake.—*San Francisco Bulletin.*

Little Miami and Columbus & Xenia Railroads.

The earnings of the Little Miami, Columbus and Xenia, and Dayton and Xenia Railroads for the fiscal year ending November 30, 1868, were:

From passengers		$708,923 33
" freight		812,054 69
" express and mail		120,193 06
" rents of depots		3,304 50
" mileage of cars and rent of engines		23,723 99
" gross earnings of D. & W. R.R.		94,593 56
		$1,762,793 13
Expenses, viz:		
Repairs of road	$242,467 25	
" bridges	22,427 55	
" depots, etc	23,558 00	
" locomotives	95,068 91	
" cars	120,677 42	
Passenger expenses	173,232 95	
Freight expenses	187,767 25	
Rents	12,926 44	
Fuel	126,880 90	
Oil, waste and tallow	30,855 75	
General expenses	63,655 38	
Loss and damage	24,647 96	
		1,124,165 76
Earnings less working expenses		$638,627 37
Interest	$115,479 96	
Taxes	87,736 30	
Working expenses Dayton and Western road.	86,123 38	
Rent and taxes of do	54,416 42	
		343,756 06
Net earnings		$294,871 31
Received from C., C. & I. C. Co. on division of earnings	$27,500 00	
Paid and due from C., C., C. & I. Co. on division of earnings, in part estimated	12,204 32	
		15,295 68
Add four years interest on Steubenville and Indiana bonds paid		56,000 00
Dividends on other investments, etc.		3,057 83
Total		$369,224 82
Transferred to L. M. and C. & X. Companies for construction		$11,895 84
Expenses of new bridge at Dayton for D. & W. R. R		35,954 85
Little Miami dividend Nov. 1868		112,812 63
Columbus and Xenia do		39,461 05
Balance		169,100 45
Total, as above		$369,224 82

There has also been expended during the year for approaches and depot grounds to Newport bridge, $44,166 67; to account of wharf boats, $246 92; for increasing rolling stock and shop machinery, $48,917 12; to account of bills payable made in 1867, $70,033 33; construction account of Little Miami, in addition to amount transferred to that company from joint surplus $27,000 27—total, $190,364 31.

Of the joint assets, as reported by the Auditor, the following were available as financial means, November 30, 1868:

Cash on hand	$118,280 09
Bills receivable	26,979 00
Agents	64,795 87
Transportation companies	29,619 49
U. S. military transportation	1,484 07
U. S. mail	9,690 61
City of Cincinnati	27,428 00
Insurance companies	25,730 77
Sundry individual accounts	24,776 48
Supplies on hand	178,112 54
Little Miami bonds to pay dividend	28,000 00
P. C. & St. L. bonds	200,000 00
Street connection bonds	30,000 00
	$759,796 92
Deduct L. M. bonds (to be returned to L. M.) being excess over amount required for bond dividend $9,000 00	
Deduct doubtful acc'ts, etc. 30,670 75	
	39,670 75
	$720,126 17
Deduct current liabilities	417,347 86
	$302,778 31

In further explanation of the Auditor's Report, it should be stated that most of the expenditures for real estate and improvements at Cincinnati, are properly chargeable to the individual account of the Little Miami Company by order of the Joint Committee of the companies whose action is required for that purpose.

The opening of a railroad from Louisville to Cincinnati, making the line of railroad between the two cities one hundred and five miles, and the erection of the Newport bridge over the Ohio river, promise increased traffic to the Little Miami line, and increased business to Cincinnati. Southern trade will naturally tend to Cincinnati, as the best and cheapest point for transit and supplies.

The street connection track between the Little Miami depot and the railroads in the western part of the city, is now used, and will increase in value and importance to the company.

The great Eastern lines, by obtaining the control of some of the Ohio lines of railroad, will no doubt change the relations and affect the through business of the other lines. So far as these new arrangements have been perfected, the business of the Little Miami line has not, probably, on the whole, been injuriously affected; but it will require no small degree of prudence and watchfulness, and, perhaps, new arrangements and outlays, to protect its position and traffic.

The joint assets and liabilities of the Little Miami and Columbus and Xenia Railroad Companies, on the 30th of November, 1868, were as follows:

ASSETS.

Rolling stock and shop machinery	$1,061,481 67
Bills receivable	26,979 00
Due from agents, etc	105,490 04
L. M. individual account for construction, etc	61,244 05
Street connection and Storrs T. R.R.	228,991 34
Grain Elevator, cost	65,416 87

C. Fay treasurer	18,627 09
Total	$2,206,598 69

Liabilities.	
Capital stock	$1,786,200 00
Mortgage bonds	248,000 00
Unclaimed dividends	606 97
Individual accounts	53 00
L. M. R. R. Co. bond account	63,000 00
Surplus account	89,811 61
L. M. and C. & X. R. R. Co	18,627 09
Total, as above	$2,206,598 67
Cost of road and equipment to November 30, 1867	$1,482,840 46
Increase in construction account	3,965 28
	$1,486,805 74
C. & X. proportion of joint rolling stock	353,827 22
Total	$1,840,632 96

The account with the stockholders is as follows:

Surplus November 30, 1868	$85,846 33
Am't drawn on surplus joint account	3,965 28
	$89,811 61

The companies have 47 locomotives, 35 first-class and 3 second-class passenger cars, 20 baggage, mail and express cars, 434 box, 139 stock, 35 rack, 20 coal, 65 flat, 3 lime and 14 caboose cars.

The mileage of locomotives has been: on passenger trains, 448,282; on freight trains, 443,783; on wood and construction trains, 49,652—total 941,717. Cost per mile run 9.72 cents. Mileage of passenger and baggage cars, 2,426,401. Cost per mile run, 14½ mills. Mileage of freight cars, 6,315,844. Cost per mile run, 13½ mills. The cost of fuel per mile run by locomotives has been 13.49 cents.

The total number of passengers transported on the road during the year, exclusive of commuters, was 472,082, of whom 134,073 were through, and 338,009 were local. Number of passengers carried one mile, 22,730,535.

The tonnage of the year, exclusive of express matter and mails, amounted to 369,843 tons, of which 341,124 tons were through freight, and 128,719 local.

Canadian Pacific Railway.

LETTER FROM THOMAS C. KEEFER.

SIR.—The Portland papers announce the commencement of the Portland and Ogdensburg Railway. Can this be the same Portland which, over twenty years ago, made a Railway alliance, offensive and defensive, with Montreal, adopting an exceptional gauge (which has since been fastened upon the whole Dominion) as a particular groove in which Western traffic, like water in a gutter, would follow down *through* Montreal, to Portland. If Portland is really heading for Ogdensburg it indicates, not only a change of base, but of gauge. The next change will be to veer round more to the westward, and make for Albany, Chicago, Cincinnati, St. Louis and San Francisco, through the Hoosac Tunnel. In a little more than a year there will be continuous Railway communication from San Francisco to Halifax through Portland, and when the Hoosac Tunnel is completed there will be a route to Halifax from Chicago and Detroit and all points north and west, over the Great Western and New York Central, with which the Grand Trunk cannot compete. I draw attention to this because, on completion of the railway to Halifax, whether by Canadian or American capitalists, there is almost a certainty that fast passenger and mail steamers will start from that point, almost daily, making the voyage across the Atlantic regularly within the week.

It is supposed by some that Montreal will be a point on this new thoroughfare between Halifax and the West, whether Halifax is to be reached by Portland or by the Intercolonial road. But I do not believe that either the Grand Trunk or the Intercolonial will keep this traffic, and I think the Grank Trunk managers are doubtful of it. I believe the Grand Trunk is most anxious to change the gauge of the Buffalo and Lake Huron for the purpose of securing some of that traffic which has followed the change of gauge on the Great Western. The only part of the Grand Trunk system which can control any portion of Western traffic is not upon the main line at all, and can only do so by a change of gauge.

If this be true Montreal and Toronto must look for better lines of communication with the West, that is that "new West," which cannot be drawn off by Buffalo, Niagara, New York, Boston and Portland; and this can only be done by throwing the line north of Lake Huron instead of south of it. By this means not only is the absolutely shortest line secured with which no future rival can compete for through traffic, but it is protected by Lake Huron from any diversion of its traffic at points west of Toronto. The shortest possible railway line from Montreal to San Francisco will pass through Sault Ste. Marie and St. Paul. Geographically St. Paul is "in the same boat" with Montreal; and it is a plan of such position and prospects that it is difficult to say whether in time it will not become more important than Chicago or St. Louis. Now, St. Paul, with its surroundings and backers, is quite competent to bring itself into line between San Francisco and Sault Ste. Marie; and there is not the slightest reason to doubt that if Montreal were to take up her line of railway march for the outlet of Lake Superior St. Paul would meet her there, and it could not be many years before St. Paul would have a western connection through Dakotah, Nebraska and Wyoming with the Union Pacific, which would afford the shortest route between San Francisco and Halifax.

The charter of the Canada Central Railway runs out in September, 1870. Scarcely a year is left for action. With it expires the most valuable land grant open to any Canadian railway, and if Montreal desires to have a railway through the Ottawa valley to Lake Superior to open to her Red River trade, the St. Paul travel and the great emigrant highway into the fertile belt, besides the local trade of the Ottawa valley—the best and most important back country she can ever have—it is difficult to see how a commencement in the future can be made under such favorable auspices as at the present time. If in the future there may be more money in the country, there will certainly be less land to aid a railway.

THOS. C. KEEFER.

Railroads in Illinois.

There are seven new railroads now under construction in Illinois. One extends from St. Louis to Rock Island; a second from St. Louis to Paducah; a third from St. Louis, by Vandalia to Terre Haute, Indiana, to be worked by the Pennsylvania Railroad Company; a fourth, the Duquesne Road, is extending to Cairo, and also from Duquesne to Paducah. The officers of the Duquesne Road are stimulated by the desire to connect with new roads in progress in the Southern States. Congress has authorized a bridge over the Ohio river at Paducah, so that this new road will by this connection bring St. Louis within 702 miles by railroad of New Orleans, and within 638 of Mobile. These roads are all advancing rapidly, and will be completed at an early day.

Western Union Telegraph.

The Western Union Telegraph Company have purchased the lines of the Atlantic and Pacific States Telegraph Company for about 60 per cent., of their actual cost of construction. By this arrangement the old company is enabled to increase its facilities for doing business at once, instead of waiting for the construction of new lines over the same territory, which they had in contemplation. The purchased property was all new within the year, and is in excellent condition. The Western Union will announce a material reduction in rates to all points on the 1st of October prox.

☞ The Washington (Pa.) *Examiner* says that work is being pushed forward with great vigor on those sections of the Chartiers Valley Railroad lying between Mansfield and Canonsburg, a very large number of laborers being actively employed. So far no operations have been commenced on that portion lying between Cannonsburg and Washington.
